

SUBMISSION FROM INDONESIA

Dear Secretariat RM,

We notice that there are economic and social impact - domestic and cross border - for developing countries.

Hence,

1. We need for greater capacity building for developing countries, including in the ASEAN region, for assessing impacts of response measures and developing tools to assess the impacts, and eventually for dealing with those impacts. We see that this can be achieved through regional workshop for different region for most of the activities, in particular activity 3. Therefore, to enhance effectiveness of the workplan and the functions of the forum, the forum has to be open to add for more or change modalities for the workplan activities.
2. The forum's recommendations to the COP, CMP and CMA should include requests to operating entities of financial mechanism under the UNFCCC to provide support related to assessment of impacts and capacity building for assessment of impacts. We consider this is within the functions of the forum and the authority of the COP, CMP and CMA to request that support related to assessment is also provided under the financial mechanism.

Many thanks

Kus Prisetiahari
