

May 09, 2022

14:00 – 16:00 hrs Hanoi time

## Training by the UNFCCC

### Which data are necessary for baseline development?

UNFCCC RCC Bangkok

#### Objective

- To introduce the information requirements for the Biennial Transparency Report (BTR)
- To gain knowledge on baseline methodologies, data requirements and methodologies
- To apply the knowledge in exercises, guided by UNFCCC experts

#### Description

Solid methodologies for developing an emission mitigation scenario in the transport sector becomes more and more important – especially as the new reporting format to the climate secretariat (UNFCCC) introduce common formats by 2024. What are these formats, which information and data are required and how to build a standardised baseline are crucial questions for countries. The training will provide an introduction to the topics of Biennial Transparency reports, baselines, methodologies and opportunities to apply these within the session with guidance by UNFCCC experts.
