

Sixth Technical Expert Dialogue under the Ad Hoc Work Programme on the New Collective Quantified Goal on Climate Finance

Information about the resource persons

Cecilia Tam
Senior Investment Analyst
International Energy Agency

Cecilia is a Senior Investment Analyst at the International Energy Agency. She has held a number of leadership positions at the IEA including Head of the Energy Demand Unit and Special Advisor to the Executive Director since first joining the agency in 2006. Cecilia was also responsible for the development of the IEA Energy Technology Roadmaps Programme and is an expert in clean energy finance, energy efficiency, energy technology deployment and innovation.

Cecilia recently returned from the OECD Environment Directorate where she led the development and implementation of the Clean Energy Finance and Investment Mobilisation Programme between 2019 and March 2023. From 2015 to 2017, Cecilia was Special Advisor at the Asia Pacific Energy Research Centre (APERC) in Tokyo where she was responsible for managing APERC's research programme.

Cecilia began her career as a Financial Analyst in Chile before moving to Dresdner Kleinwort Benson. In her role as a Senior Equity Research Analyst covering Latin American utilities, she has worked on numerous privatisations and equity offerings.
