

Inputs from the TFD for consideration by the ExCom for inclusion in its recommendations to Parties

16 September 2021. Unedited

- Inputs from the TFD are in text boxes. Inputs are based on the implementation of the PoA of the TFD.
- The green text serves as sign-posting and will be deleted once the TFD inputs are incorporated into the [Elements paper](#) during ExCom 14 Part 2.
- Yellow highlights indicate TFD's proposals for addition to the existing recommendations in the [Elements paper](#).

1 Acknowledges the inputs and contributions from member organizations and participants in the work of the TFD

Integrate acknowledgement of the inputs and contributions from member organizations in the TFD's work in (d) of the Elements paper.

Proposed (d) with TFD input:

To all organizations and experts that contributed to the success of the work undertaken and to the constituted bodies that collaborated with the ExCom **and its expert groups, including the task force on displacement;**

2 Recall the 2018 Executive Committee Recommendations

"Encourages further engagement and support of Parties for the plan of action of the TFD and work on human mobility under strategic workstream (d) of the five-year rolling workplan of the ExCom, recalling the relevance and importance of the 2018 recommendations on integrated approaches to a.m.a. displacement related to the adverse impacts of climate change from the ExCom (Decision 10/CP.24, annex)."

3 Emphasize the need to base action and support on the best available science in combination with local knowledge and perspectives, including risk assessments

Integrate the following aspects in (h) of the Elements paper:

- *in combination with indigenous or local knowledge,*
- *to enable planning and action to a.m.a. displacement related to the adverse effects of climate change; and*
- *use best available science to support further development of technical guides*

Proposed (h) with TFD input:

"ExCom and expert groups to continue to use best available science **in combination with indigenous or local knowledge to inform their work, including to enable planning and action to a.m.a. displacement related to the adverse effects of climate change, and to support further development of technical guides.**"

4 Scale-up action and support, including finance

“Invites Parties to recognize the urgent need to scale up action and support and mobilize resources to implement integrated, effective, risk-informed approaches to a.m.a. displacement related to the adverse effects of climate change for developing country Parties, including the facilitation of safe, orderly and regular migration and, where necessary, planning for relocation, noting the importance of developing guidance and providing capacity-building support to enable access to sustainable and predictable climate financing for adaptation action and approaches to a.m.a. loss and damage.”

5 Ensure integrated approaches and policy coherence within and outside the UNFCCC

“Continues to encourage relevant constituted bodies under the Convention and the Paris Agreement, together with relevant organizations and other stakeholders, to strengthen coordination, coherence, collaboration and joint programming across policy and action areas, both under and outside the Convention and the Paris Agreement:

- To enhance understanding of human mobility (internal and cross-border) in the context of climate change; and
- To support developing country Parties in systematically preparing for and addressing displacement related to the adverse effects of climate change, including through the application of international policy instruments and normative frameworks and taking into account Parties’ respective obligations on human rights.”

6 The Santiago Network

“Encourages organizations, bodies, networks and experts working on human mobility to join the Santiago network.”

7 Engagement and Outreach

“Encourages bodies, programmes and platforms under and outside of the Convention and the Paris Agreement, to work with the ExCom to raise awareness of the challenges and opportunities related to human mobility in the context of climate change in fora of, *inter alia*:

- The Sendai Framework for Disaster Risk Reduction 2015-2030 and its associated Global and Regional Platforms;
- The Global Compact for Safe, Orderly and Regular Migration and its associated International Migration Review Forum,
- The Global Compact on Refugees; and
- The 2030 Agenda for Sustainable Development.”
