

Session SB65 (2026)

Session starts: 09-08-2026

Facilitative, Multilateral Consideration of Progress

A compilation of questions to – and answers by – **Tunisia**
Exported on 1-10-2026 by the UNFCCC secretariat

Title: Inventory improvement

Question From Party: European Union

Question raised on: 09.09.2026 CEST

Question Category: National inventory report

Question: The European Union notes that one of the improvement items identified in Chapter 7 of Tunisia's BTR is the implementation of decomposition methods for Industrial Processes and Product Use (IPPU), Waste, Agriculture, and Land Use, Land-Use Change, and Forestry (LULUCF) sectors, to better track progress against Tunisia's NDC. The report states that Tunisia plans to improve an existing tool for decomposing emissions to allow the identification of the factors (for example, population, GDP growth) that explain the gap between the NDC projection and observed GHG emissions for the same year. Could Tunisia elaborate on the progress made with improving the tool and how it will support Tunisia assessment of progress towards its NDC?

Answer:

Title: Institutional arrangements for tracking progress against Tunisia's NDC

Question From Party: European Union

Question raised on: 09.09.2026 CEST

Question Category: Progress towards/achievement of the NDC

Question: The European Union notes that Section 2.1.6 of Tunisia's BTR identifies the Comité Technique Consultatif Atténuation (CTCA), established within the climate change management unit, as the body overseeing the monitoring and evaluation of mitigation measures drawn up for Tunisia's NDC. The BTR indicates that the CTCA will rely on a national technical coordinator and four technical groups representing the institutions responsible for policies in the energy and industrial processes, agriculture, forestry and land-use, solid waste, and sanitation sectors. Could Tunisia provide an update on the implementation of the CTCA and elaborate on its role and how it currently ensures Tunisia is tracking progress towards its NDC?

Answer:

Title: Landfill gas

Question From Party: Australia

Question raised on: 09.09.2026 CEST

Question Category: Mitigation actions, policies and measures supporting NDC implementation

Question: Tunisia has been reducing emissions in the waste sector for a considerable period through landfill gas capture and flaring. Could more information be provided on Tunisia's plans to recover landfill gas for energy while expanding the use of degassing systems for other controlled landfills. La Tunisie réduit les émissions du secteur des déchets depuis un certain temps déjà grâce au captage et au torchage du méthane. Pourrait-on obtenir davantage d'informations sur les projets de la Tunisie visant à valoriser énergétiquement le méthane, tout en étendant l'utilisation de systèmes de dégazage à d'autres décharges contrôlées ?

Answer:
