# UNEP's NDC related area of works

## 1 in reporting and transparency

UNEP implements (USD 140 mi)  
 - CBIT projects in 36 countries  
 - NC/BUR/BTR projects in 89 countries  
 UNEP (UNEP CCC) hosts the Climate Transparency Platform

## 2 in sectoral country engagement

Transport, Energy efficiency (U4E), Buildings (Global ABC), Methane (CCAC and IMEO), cooling (Cool Coalition), cities (Urbanshift), food waste, AFOLU, climate finance

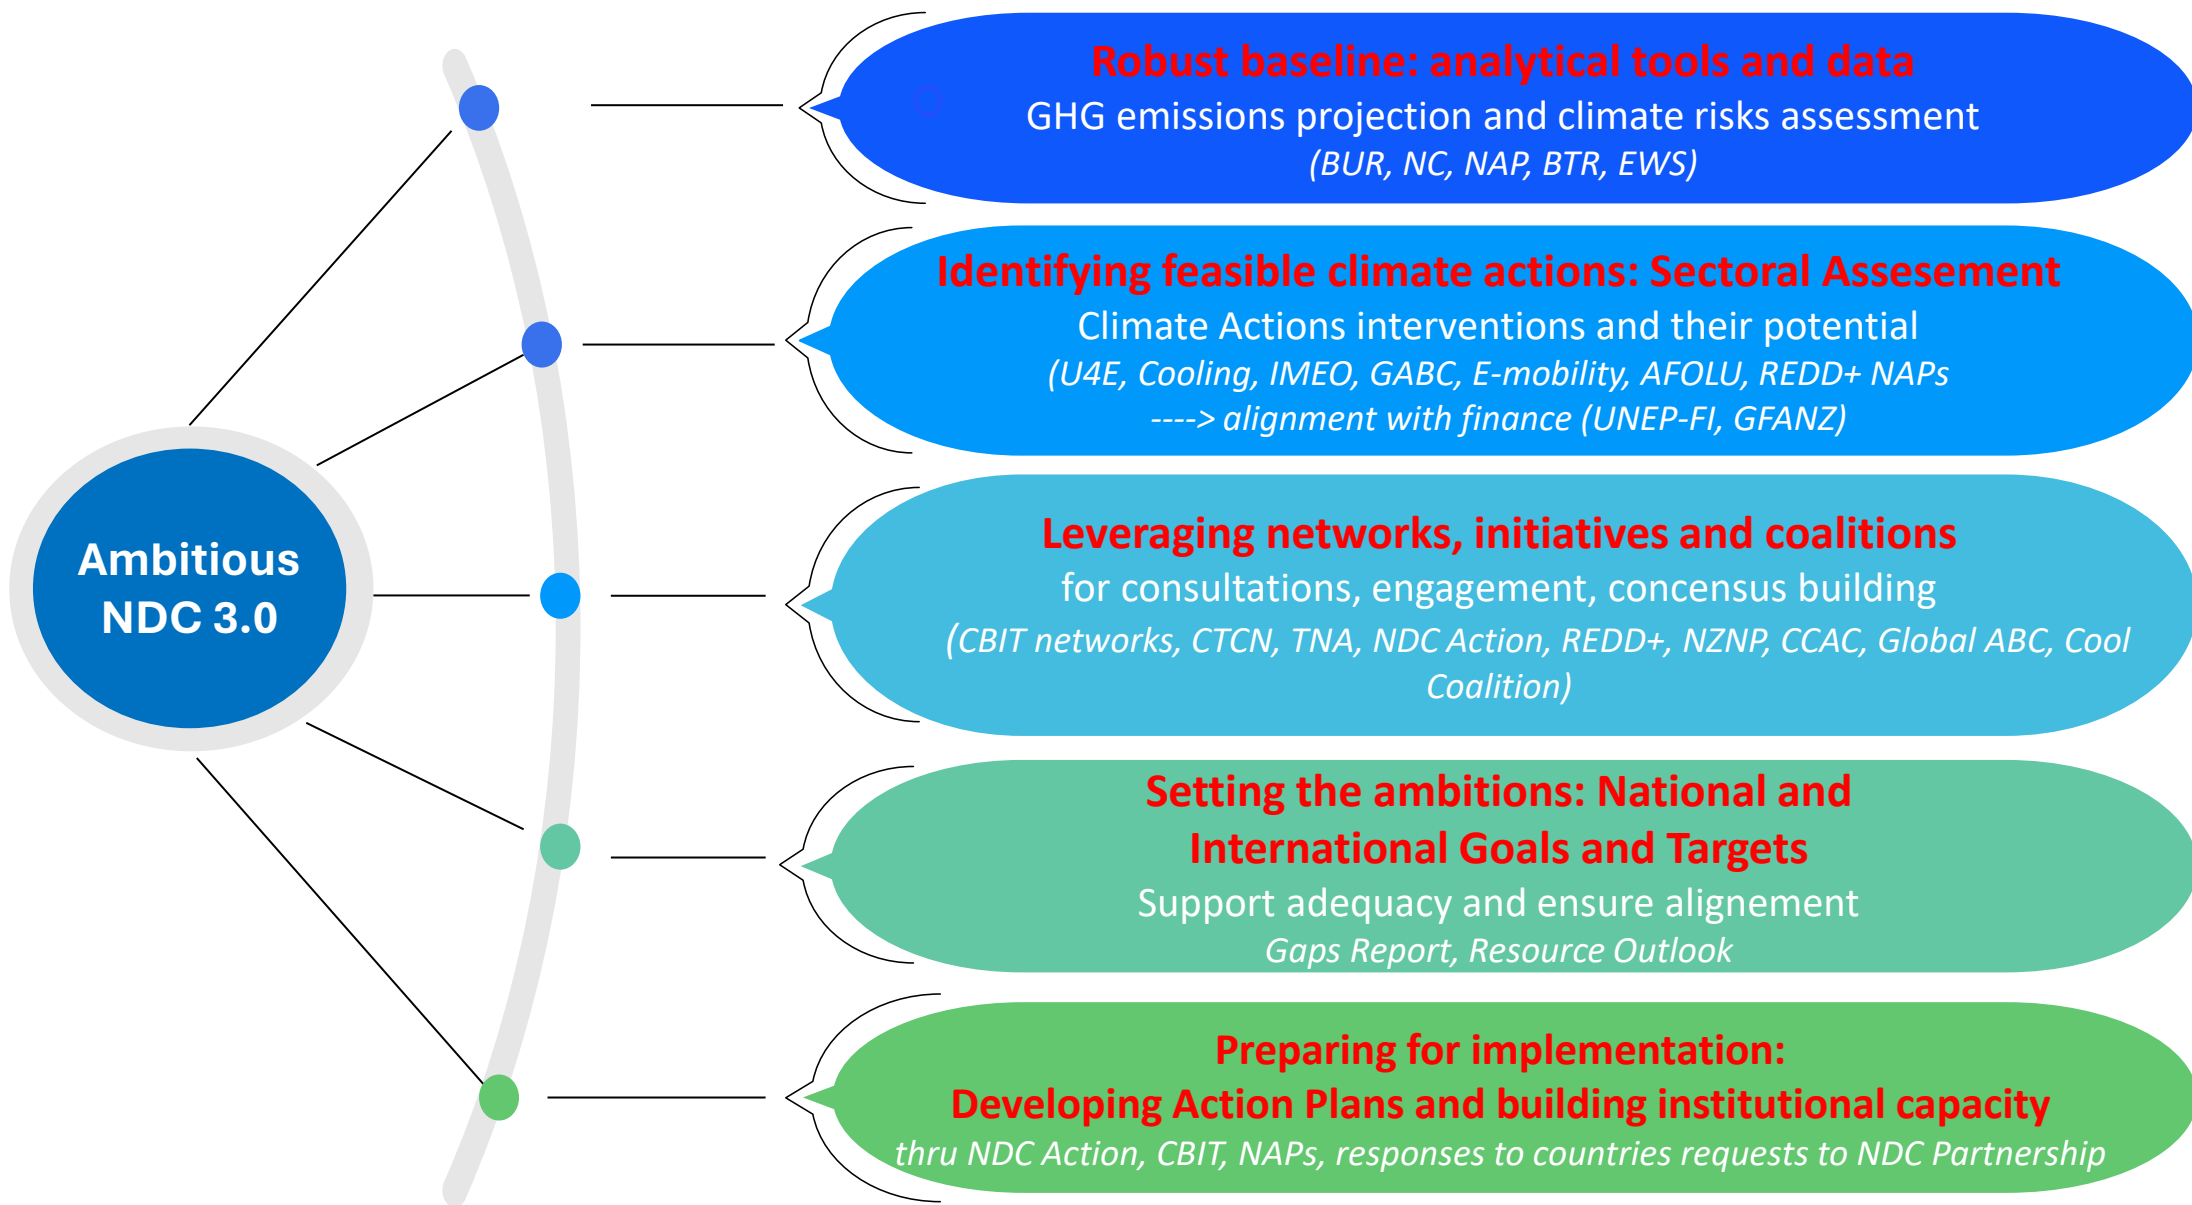

## 3 in NDC support, TNA and NAPs

## 4 in scientific and policy research

# UNEP's areas of potential contribution

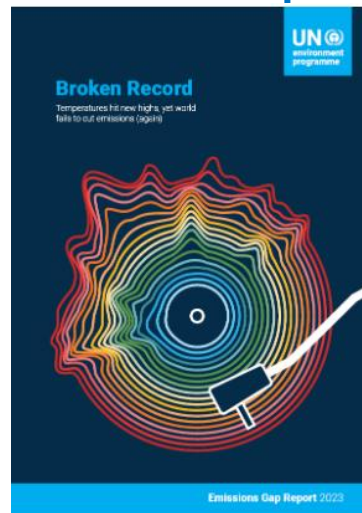

# Climate Science

## Policy:

- Strengthen climate policy and planning.
- Provide science-based advice for information and setting policy directions

**UNEP-CCC** curated the 2023 Flagship Emission and Adaptation Gap reports - co-produced by UNEP Science Division, WASP and Concito.

### Emissions Gap Report

**EGR 2023** is the 14th edition in an annual series. The report finds that the world is far off track to limiting global warming.

Only an urgent system-wide transformation can deliver the enormous cuts needed to limit greenhouse gas emissions by 2030: **45%** compared with projections based on policies currently in place to get on track to 1.5°C and 30 per cent for 2°C.

### Adaptation Gap Report

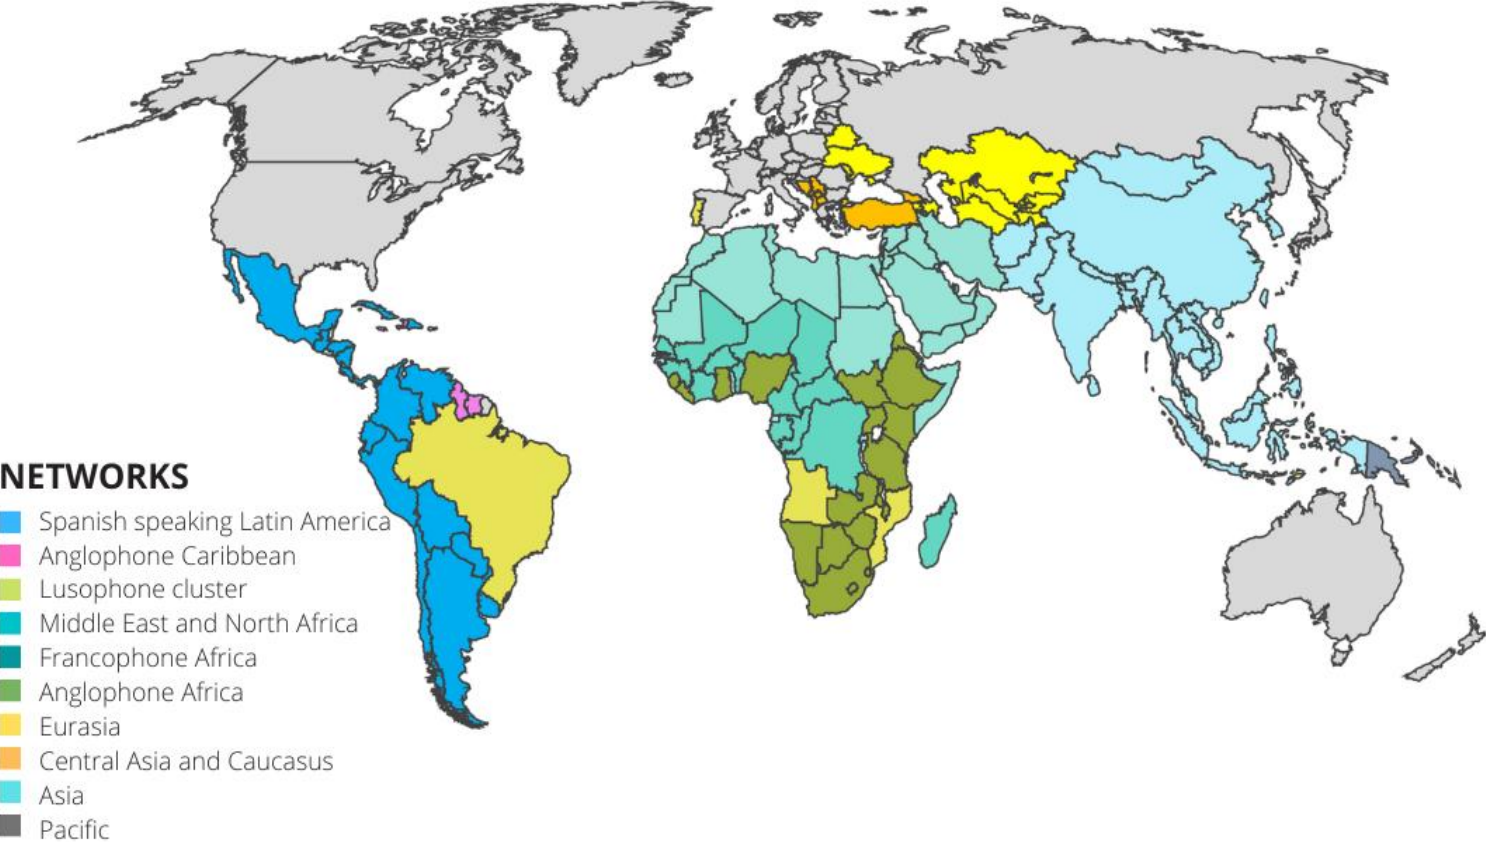

**AGR 2023** is the 10th edition in an annual series. The report tracks progress in planning, financing and implementing adaptation actions. At least 84 per cent of Parties to the UNFCCC have established adaptation plans, strategies, laws and policies. However, international adaptation finance flows to developing countries are 5-10 times below estimated needs and the gap is widening.
