  - National Expenditure Program (NEP)
  - General Appropriations Act (GAA)
  - Expenditure
- Local
  - Climate-tagged Annual Investment Plan (AIP)

### JOINT MEMORANDUM CIRCULAR

No. 2015-01  
March 24, 2015

**FOR :** All Heads of Departments, Agencies, Bureaus, Offices, Commissions, State Universities and Colleges, Government-Owned and Controlled Corporations, and Other Instrumentalities of the Nation and All Others Concerned

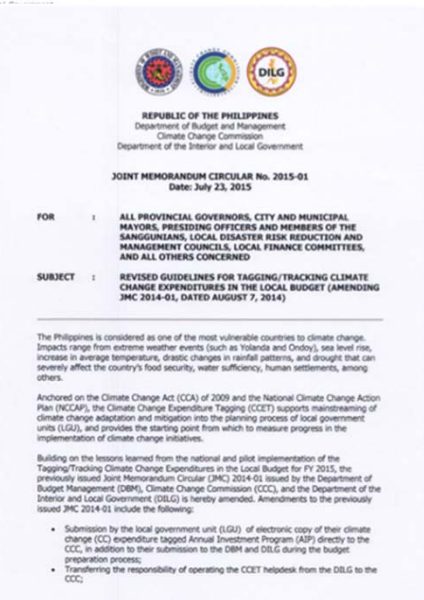

**SUBJECT :** Revised Guidelines for Climate Change Expenditure Tagging (CCET) amending JMC No. 2013-01

#### 1. OBJECTIVE

The Government of the Philippines has demonstrated leadership commitment in implementing a comprehensive reform agenda to redress climate change (CC). With the goal of using the budget process to plan, monitor, and report on CC expenditures, the Government has mobilized the Preparation Process to tag climate change expenditures using a performance-based typology and guidelines. The Government also developed the Program (PAP), a program that constitutes a major part of the change expenditure.

Building on the lessons learned during the 2015 budget process, developments in the budgeting system introduced by the implementation of the Unified Accounts Code Structure (UACS) to process for tracking, monitoring, and reporting of CC expenditure, and the performance-based budgeting system starting 2015, and the climate change typologies, the previously issued Joint Memorandum Circular (JMC) No. 2013-01 dated December 27, 2013 is hereby amended.

To be consistent with outcome-based budgeting of the DBM, performance specific to climate change expenditures shall also be formulated in the National Climate Change Action Plan.

# Climate Change Expenditure Tagging

Centralized system to track and monitor climate change related programs, projects, and activities both at the national and local levels

Finance

# Gaps and Challenges

- Monitoring, Evaluation and Reporting Protocols
- Institutional arrangements for national GHG Inventory, national & local climate budget tagging in place but still a work in progress for other elements
- Lack of capacities for some stakeholders to undertake reporting
- Sustainability vs timeliness of reporting
