Information required for the booklets produced by the informal coordination group for capacity-building under the Convention and the Paris Agreement (ICG)

Booklet on Capacity-building for Adaptation and Resilience

Guidance to fill in the template: We kindly invite you to provide us with the relevant information under each category of capacity-building products and activities.

- We would appreciate if you could send a photo/visual for at least some of your submitted resources (please attach to an e-mail or place on SharePoint/a shared drive, with clear reference to the corresponding resource in the file name and credit).
- Please add the resources in the order of priority for their inclusion in the booklets (Resource 1 = highest, Resource 6= lowest). That way we can make sure to include the resources with the higher priority, in case not all resources can be placed in the final booklets.
- Similarly, in case of repetitive similar activities (e.g. high number of technical assistance projects or a series with a large number of individual publications), please make sure to submit only a sample of the most relevant examples that you would like to showcase individually, and to bundle the others under a common header with a link to the page where all resources under that header can be accessed.
- Should you intend to submit more than 6 resources under one or several resource categories, please duplicate this template and submit the other resources in the duplicate (please change the numbering in the respective section of the duplicate from Resource 1 to Resource 7, Resource 2 to Resource 8, etc.).

Contact details of the body (to be put in the brochure):

Booklet 2: Capacity-building for Adaptation and Resilience					
Tools and methodologies; handbooks, manuals and guides; case studies and technical reports/publications					
	Resource 1	*Resource 2*	*Resource 3*	*Resource 4*	*Resource 5*	*Resource 6*
Title of resource and year of publication/ launch:	Scoping paper on slow onset events (SOEs) as reported by partners in the SOEs database, as of Feb 2018	Compendium on Comprehensive Risk Management (TEG-CRM Compendium)	Disaster risk reduction capacity assessment tool	Capacity building activities on Migration, Capacity Building and Climate Change		Technical paper on Elaboration of the sources of and modalities for accessing financial support for addressing loss and damage
Description of the resource on objective(s) and its relation to capacity-building) (2-3 sentences):	The Slow onset events (SOE) scoping paper (2018) provides a review of the scope of work undertaken on SOEs as reported by partners in the SOEs database to date, presented by regions, and contains references to capacity building initiatives (see section: enhancing action and support). Slow onset events, as initially introduced by the Cancun Agreement (COP16), refer to the risks and impacts associated with: increasing temperatures; desertification; loss of biodiversity; land and forest degradation; glacial retreat and related impacts; ocean acidification; sea level rise; and salinization.	The Compendium on CRM contains a collection of case studies reflecting good practices and lessons learnt in relation to capacity building to facilitate comprehensive risk management.	These tools aim to enhance Parties' capacity for data collection, risk assessment and analysis in relation to displacement through technical support and sharing tools and practices. The capacity-building activities address capacity needs of countries and provide them the opportunity to consider migration, environment and climate change in their long-term planning.			This technical paper reviews existing sources of financial support, including the Financial Mechanism and a broader set of funds and institutions which channel financial support relevant for addressing loss and damage associated with climate change impacts. The paper briefly explores how "addressing loss and damage" is conceptualized in order to provide a basis for examining sources of relevant financial support. It also discusses current limitations and challenges in elaborating finance for addressing loss and damage. The paper concludes with reflections on insights gained from the elaboration of such financial support and areas for potential further analysis which may contribute to further discussion on finance for addressing loss and damage.
Audience/Target group(s):	Broad (e.g. practitioners, policy-makers, academics, knowledge brokers, etc.) at all levels	Broad (e.g. practitioners, policy-makers, academics, knowledge brokers, etc.) at all levels				Broad (e.g. practitioners, policy-makers, academics, knowledge brokers, etc.) at all levels
