CAPACITY-BUILDING FOR RECOVERING BETTER TOGETHER:

Supporting NDC Implementation and Enhancement

Emerging Capacity-building Expertise, Needs, And Approaches For A More Sustainable Recovery?

Yamide Dagnet

WRI, Director of Climate Negotiations | NDC Partnership, Senior Country Engagement Specialist

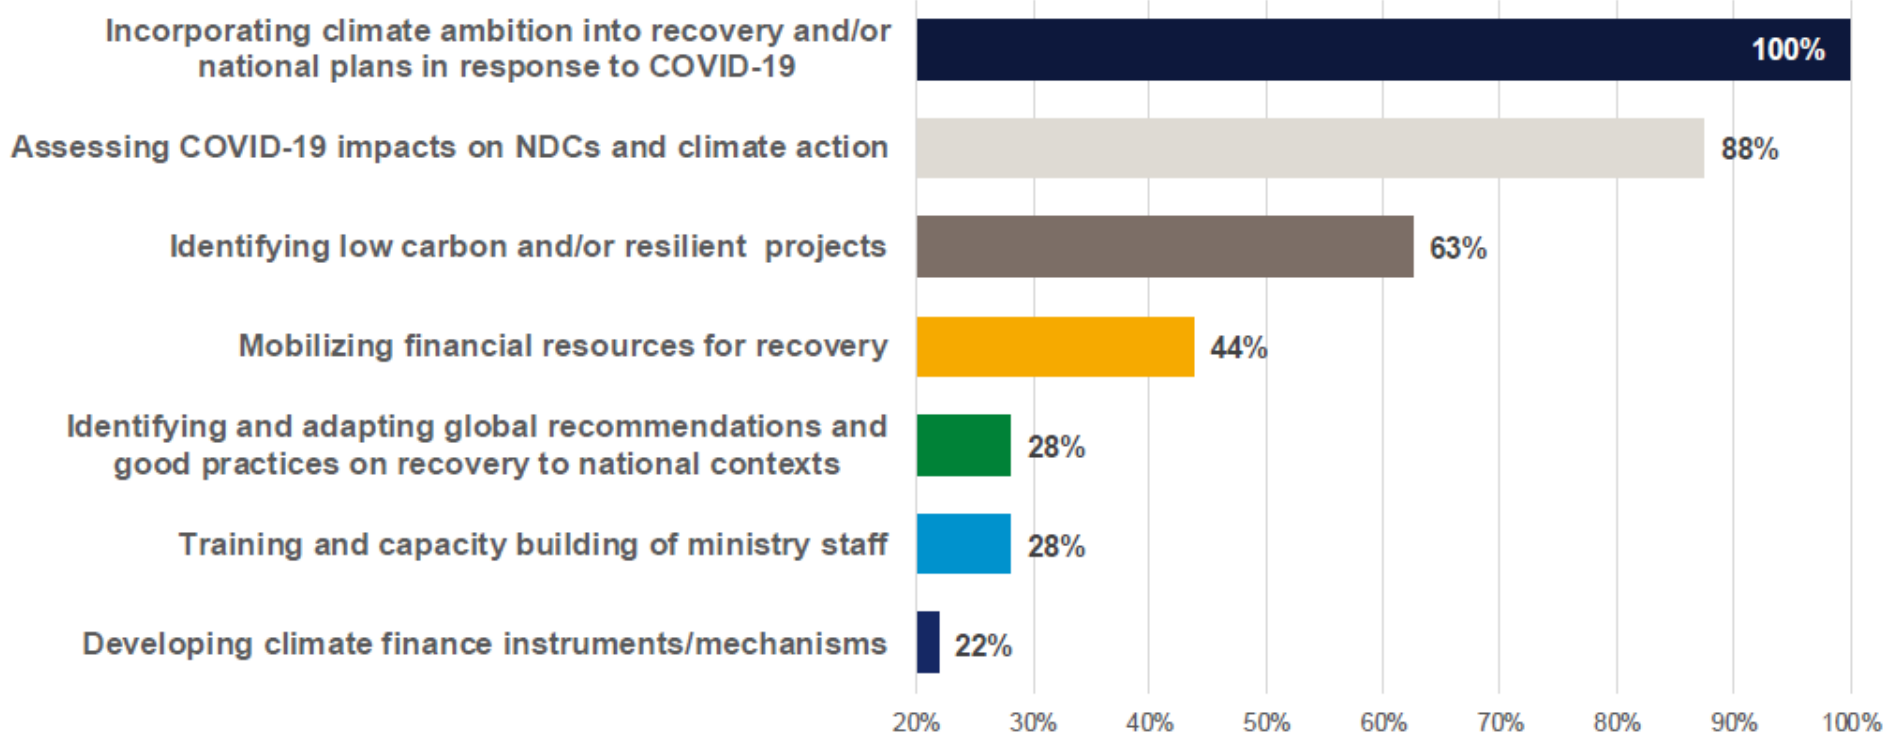

IMPACTS OF COVID-19 ON CLIMATE ACTION: 5 KEY MESSAGES

1. **Reduced climate spending** due to the expense of COVID-19 responses, alongside capital flight, revenue loss, and increased debt.
2. **Quality, ambition and revision timeline of NDCs are at risk** due to the challenges of collecting and validating data; maintaining communications and decision-making processes; and convening stakeholders.
3. **Stimulus packages may include NDCs**, presenting an enormous and immediate opportunity to promote a 'green growth' agenda in developing countries.
4. **Technical assistance is urgently needed**, and all Ministry of Finance or Planning respondents indicated their governments would benefit from an embedded economic advisor.
5. **Countries are eager to learn from each other**, particularly on strategies for deploying special fiscal instruments for economic recovery.

ANTICIPATED RESULTS OF THE ECONOMIC ADVISORY INITIATIVE

32 countries will incorporate climate priorities into their recovery and/or national plans in response to COVID-19.

Country TOR Activities Requested (% of Countries)

OTHER EMERGING SOLUTIONS

- **Technical Assistance & Support**
 - Digitalization
 - Engagement with the private sector to create an ambition-and data loop
 - Other types of mobilization: entrepreneurs and investors, Parliamentarians, citizens and governments
- **Peer learning**
 - NDCP Green Recovery Network
 - Platform Redesign 2020
 - PCCB Network

QUESTION FOR DISCUSSION

In the COVID-19 context, what innovative tools and methods are you using to engage stakeholders and support capacity-building efforts?

Especially with the most vulnerable people – to create a more transformative agency?
