PART IV Provision of information relating to KP-LULUCF activities under Article 3, paragraphs 3 and 4, of the Kyoto Protocol (continued) Observation Provided ✓ That emissions associated with salvage logging were not excluded from the accounting If not accounted for by instantaneous oxidation, information on GHG emissions/removals resulting from changes in the HWP pool accounted for in accordance with decision 2/CMP.7, including: ✓ Activity data for the HWP categories used for estimating the pool removed from domestic forests, for domestic consumption and for export ✓ Half-lives used in estimating emissions/removals for the HWP categories used Whether emissions from HWP originating from forests prior to the start of the second commitment period have been Information required in paragraph 2(g)(iii)of annex included in the accounting, if the forest management reference level is based on a projection II to decision 2/CMP.8 could not be identified in the submission. How emissions from the HWP pool accounted for in the first commitment period on the basis of instantaneous oxidation Information required in paragraph 2(g)(iv)of annex have been excluded from the accounting for the second commitment period II to decision 2/CMP.8 could not be identified in the submission. ✓ How HWP resulting from deforestation has been accounted on the basis of instantaneous oxidation How CO2 emissions from HWP in solid waste disposal sites and from wood harvested for energy purposes have been Information required in paragraph 2(g)(vi)of annex accounted on the basis of instantaneous oxidation II to decision 2/CMP.8 could not be identified in the submission. How emissions/removals from changes in the HWP pool accounted for do not include imported HWP Information required in paragraph 2(g)(vii)of annex II to decision 2/CMP.8 could not be identified in the submission.
