	The efforts taken to rehabilitate the land for which the provisions contained in decision 2/CMP.7, annex, paragraph 33, are applied	√	The Party does not apply the provisions for natural disturbances.		
	That emissions associated with salvage logging were not excluded from the accounting	√	The Party does not apply the provisions for natural disturbances.		
	If not accounted for by instantaneous oxidation, information on GHG emissions/removals resulting from changes in the HWP pool accounted for in accordance with decision 2/CMP.7, including:				
	Activity data for the HWP categories used for estimating the pool removed from domestic forests, for domestic consumption and for export	✓			
	Half-lives used in estimating emissions/removals for the HWP categories used	✓			
	Whether emissions from HWP originating from forests prior to the start of the second commitment period have been included in the accounting, if the forest management reference level is based on a projection	✓			
	How emissions from the HWP pool accounted for in the first commitment period on the basis of instantaneous oxidation have been excluded from the accounting for the second commitment period	✓			
	How HWP resulting from deforestation has been accounted on the basis of instantaneous oxidation	✓			
	How CO ₂ emissions from HWP in solid waste disposal sites and from wood harvested for energy purposes have been accounted on the basis of instantaneous oxidation	✓			
	How emissions/removals from changes in the HWP pool accounted for do not include imported HWP	✓			
	Information on anthropogenic GHG emissions from LULUCF activities under Article 3, paragraph 3, and Article 3, paragraph 4, factoring out removals from:				
	Elevated CO ₂ concentrations above pre-industrial levels	✓			
	Indirect nitrogen deposition	✓			
	The dynamic effects of age structure resulting from activities prior to 1 January 1990	✓			
Specific	Specific information to be reported for activities under Article 3, paragraph. 3:				
	Activities that began on or after 1 January 1990 and before 31 December of the last year of the commitment period, and are directly human-induced	√			

PART IV					
Provision of information relating to KP-LULUCF activities under Article 3, paragraphs 3 and 4, of the Kyoto Protocol					
		Provided	Observation		
	How harvesting or forest disturbance that is followed by the re-establishment of forest is distinguished from deforestation	✓			
Specifi	information to be reported for activities under Article 3, paragraph 4:				
	Activities that have occurred since 1 January 1990 and are human induced	✓			
	Cropland management, grazing land management, revegetation, wetland drainage and rewetting: emissions/removals reported for each year of the commitment period and for the base year for each of the elected activities on the geographical locations reported				
	Emissions/removals from activities under Article 3, paragraph 4, are not accounted for under activities under Article 3, paragraph 3				
	Information on how emissions arising from the conversion of natural forests to planted forests are accounted for				
	Methodological consistency between the reference level and reporting for forest management				
	Technical corrections made pursuant to decision 2/CMP.7, annex, paragraph 14				
	Forest management: if emissions/removals from the harvest and conversion of forest plantations to non-forest land were included, information on how requirements set out in decision 2/CMP.7, annex, paragraphs 37–39 were met, including:				
	The identification of all lands and associated carbon pools subject to decision 2/CMP.7, annex, paragraph 37, including the georeferenced location and year of conversion	✓	In chapter 11.1.1 of the NIR, the Party reports that it does not apply the provisions of carbon equivalent forest.		
	A demonstration that the forest plantation was first established through direct human-induced planting and/or seeding of non-forest land before 1 January 1990, and, if the forest plantation was re-established, that this last occurred on forest land through direct human-induced planting and/or seeding after 1 January 1960	✓	In chapter 11.1.1 of the NIR, the Party reports that it does not apply the provisions of carbon equivalent forest.		
	A demonstration that a new forest of at least equivalent area to the harvested forest plantation is established through direct human-induced planting and/or seeding of non-forested land that did not contain forest on 31 December 1989	✓	In chapter 11.1.1 of the NIR, the Party reports that it does not apply the provisions of carbon equivalent forest.		
	A demonstration that this newly established forest will reach at least the equivalent carbon stock that was contained in the harvested forest plantation at the time of harvest, within the normal harvesting cycle of the harvested forest plantation, and, if not, a debit would be generated under Article 3, paragraph 4	✓	In chapter 11.1.1 of the NIR, the Party reports that it does not apply the provisions of carbon equivalent forest.
