Distr.: General 5 June 2020

English only

Status report of the annual inventory of Croatia

- 1. This status report was prepared by the secretariat pursuant to decision 22/CMP.1 in conjunction with decision 4/CMP.11 as part of the initial check of Croatia's 2020 annual greenhouse gas inventory, submitted in accordance with decisions 24/CP.19 and 15/CMP.1 in conjunction with decisions 3/CMP.11 and 2/CMP.8.
- 2. The report reflects the content of the inventory submission as submitted by the Party, which, in accordance with decision 24/CP.19, is due by 15 April each year (dates of submission are provided in the table on page 2).
- 3. In accordance with decision 24/CP.19, Parties report aggregate emissions and removals in carbon dioxide equivalent using the global warming potential values from the Fourth Assessment Report of the Intergovernmental Panel on Climate Change over a 100-year time-horizon.
- 4. In this report, the following abbreviations are used:

CRF: common reporting format

GHG: greenhouse gas

HWP: harvested wood products

IPCC: Intergovernmental Panel on Climate Change

IPPU: industrial processes and product use

KP-LULUCF activities: activities under Article 3,

paragraphs 3-4, of the Kyoto Protocol

LULUCF: land use, land-use change and forestry

NIR: national inventory report SEF: standard electronic format

Gases

CH₄: methane

CO: carbon monoxide CO₂: carbon dioxide HFC: hydrofluorocarbon

HFC/PFC mix: unspecified mix of hydrofluorocarbons

and perfluorocarbons NF₃: nitrogen trifluoride

NMVOC: non-methane volatile organic compound

NO_X: nitrogen oxides N₂O: nitrous oxide PFC: perfluorocarbon SF₆: sulfur hexafluoride SO₂: sulfur dioxide Kyoto Protocol units
AAU: assigned amount unit
CER: certified emission

reduction

ERU: emission reduction unit ICER: long-term certified emission reduction RMU: removal unit tCER: temporary certified emission reduction

Notation keys C: confidential

IE: included elsewhere NA: not applicable NE: not estimated NO: not occurring

GE 20 07/71(E)

CRF ^h tables	Source categories accounting for 7% or more of Party's aggregate emissions from sources included in Annex A to the Kyoto Protocol	No n	nissing	source	catego	ry acco	ounting for 7	% or	more ha	s been id	lentified			

^a The comment field is used to indicate the name of the inventory being assessed (relevant to CRF tables), the names of the files submitted as additional information (relevant to the row for additional information) and any other information relevant to the submission.

- ^b The CRF tables are contained in annex II to decision 24/CP.19.
- ^c Additional information can be any information submitted by a Party in conjunction with its NIR or CRF tables.
- ^d Parties included in Annex I to the Convention undergoing the process of transition to a market economy may use a base year or a period of years other than 1990 in accordance with the provisions of Article 4, para. 6, of the Convention and decisions 9/CP.2 and 11/CP.4.
 - ^e A Party may select 1995 as the base year for HFCs, PFCs and SF₆ in accordance with Article 3, para. 8, of the Kyoto Protocol.
 - ^f A Party may select 1995 or 2000 as the base year for NF₃ in accordance with Article 3, para. 8 bis, in the Doha Amendment.
- ^g If, in the latest year, for a given gas, a Party reports a numerical value or a notation key other than "NE", a tick is shown in the respective cell; if "NE", zero or no value is reported, the cell is left blank.
 - h In accordance with decision 15/CMP.1, para. 3(b), in conjunction with decision 3/CMP.11.

- ^a Where applicable the comments field indicates the location of the reported information in the NIR.
- ^b Parties are required to include in their annual submission information on anthropogenic GHG emissions by sources and removals by sinks from LULUCF activities under Article 3, para. 3, of the Kyoto Protocol, and, if any, elected activities under Article 3, para. 4, in accordance with decision 2/CMP.8, annex II, paras. 1–5.
- ^c Parties are required to report anthropogenic GHG emissions by sources and removals by sinks from LULUCF activities under Article 3, para. 3, of the Kyoto Protocol, forest management and, if any, elected activities under Article 3, para. 4. Parties may also elect to report these tables for the base year or 1990.
- ^d Parties are required to include in their annual submission information on AAUs, CERs, ICERs, tCERs, ERUs and RMUs in accordance with decision 15/CMP.1, annex, chap. I.E, in conjunction with annex II to decision 3/CMP.11.
 - ^e As required by annex II to decision 3/CMP.11.
- ^f The requirements for Parties to report on changes in their national systems in accordance with Article 5, para. 1, of the Kyoto Protocol, changes in national registries, and the minimization of adverse impacts in accordance with Article 3, para. 14, of the Kyoto Protocol are set out in decision 15/CMP.1, annex, chaps. I.F, I.G and I.H, respectively, in conjunction with annex II to decision 3/CMP.11.

Part VII							
Provision of information relating to KP-LULUCF activities							
	Provided ^a	Observation					
Elevated CO ₂ concentrations above pre-industrial levels	✓						
Indirect nitrogen deposition	✓						
The dynamic effects of age structure resulting from activities prior to 1 January 1990	✓						
Specific information to be reported for activities under Article 3, paragraph 3:							
Activities that began on or after 1 January 1990 and before 31 December of the last year of the commitment period and are directly human-induced	✓						
How harvesting or forest disturbance that is followed by the re-establishment of forest is distinguished from deforestation	✓						
Specific information to be reported for activities under Article 3, paragraph 4:							
Activities that have occurred since 1 January 1990 and are human-induced	✓						
Cropland management, grazing land management, revegetation, wetland drainage and rewetting: emissions/removals reported for each year of the commitment period and for the base year for each of the elected activities at the geographical locations reported	√	The Party have not elected cropland management, grazi land management, revegetation, wetland drainage and rewetting					
Emissions/removals from activities under Article 3, paragraph 4, are not accounted for under activities under Article 3, paragraph 3	✓						
Information on how emissions arising from the conversion of natural forests to planted forests are accounted for	✓						
Methodological consistency between the reference level and reporting for forest management	✓						
Technical corrections made pursuant to decision 2/CMP.7, annex, paragraph 14	✓						
Forest management: if emissions/removals from the harvest and conversion of forest plantations to non-forest land were included, information on how requirements set out in decision 2/CMP.7, annex, paragraphs 37–39, were met, including:							
The identification of all lands and associated carbon pools subject to decision 2/CMP.7, annex, paragraph 37, including the georeferenced location and year of conversion	*	In chapter 11.5.3 of the NIR, the Party reported that conversion from natural forests to plantations do not occordia					

Part VII Provision of information relating to KP-LULUCF activities								
Pr	Provided ^a	Observation						
A demonstration that the forest plantation was first established through direct human-induced planting and/or seeding of non-forest land before 1 January 1990, and, if the forest plantation was reestablished, that this last occurred on forest land through direct human-induced planting and/or seeding after 1 January 1960	√	In chapter 11.5.3 of the NIR, the Party reported that conversion from natural forests to plantations do not occur in Croatia						
A demonstration that a new forest of area at least equivalent to the harvested forest plantation is established through direct human-induced planting and/or seeding of non-forest land that did not contain forest on 31 December 1989	✓	In chapter 11.5.3 of the NIR, the Party reported that conversion from natural forests to plantations do not occur in Croatia						
A demonstration that this newly established forest will reach at least the equivalent carbon stock that was contained in the harvested forest plantation at the time of harvest, within the normal harvesting cycle of the harvested forest plantation, and, if not, that a debit would be generated under Article 3, paragraph 4	✓	In chapter 11.5.3 of the NIR, the Party reported that conversion from natural forests to plantations do not occur in Croatia
