REGIONSADAPT

Capacity-building through cooperation

The Network of Regional Governments for Sustainable Development - nrg4SD is an international association that represents regional governments in the global agendas of climate change, biodiversity and sustainable development.

Initiatives

- **RegionsAdapt**
- Regions for Biodiversity Learning Platform
- SDG from subnational level

Programmes

- Visiting experts
- Call for projects
- Financial assistance for events

We are an information hub of good practices and experiences of regional governments, we promote the exchange of knowledge, the development of capacities and cooperation projects.

RegionsAdapt

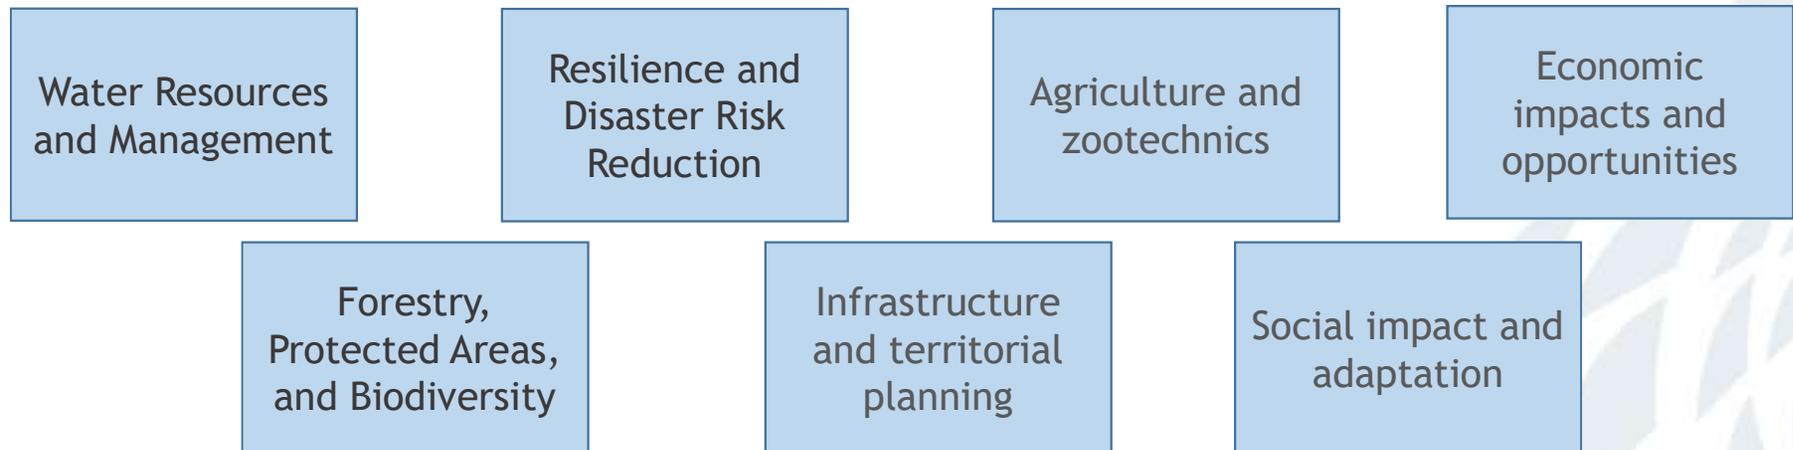

- First global initiative for regional governments to take concrete actions, cooperate and report efforts on climate adaptation.
- 27 founding members.
- Currently 71 members.
- More than 250 adaptation practices applied and shared.

RegionsAdapt

- Regions to cooperate and share best practices within their different capacities and experiences on climate adaptation;
- Promoting and supporting the acceleration of the adoption or revision, as well as implementation of regional climate adaptation plans and strategies;
- Fostering concrete actions on adaptation;
- Tracking regional adaptation plans and strategies across the world;
- Reporting and monitoring adaptation processes, actions and their outcomes;

Working groups

Their purpose is to exchange experiences and learning processes related to cases of success and failure, to commonly develop and adopt good practice standards, and to implement joint pilot projects after identifying international cooperation matchmaking opportunities.

Cases of success:

- More than 25 (online) formal meetings were organized within the RegionsAdapt working groups.
- Exchange of practices between Catalonia and California on water management for Mediterranean climate regions with the support of Universitat Politècnica de Valencia.
- Cornell University's support for research on "Multi-level governance and subnational adaptation in Agriculture.
- Universidad dos Santos and BC3 exchange of practices in "Economic impacts on coastal regions".
- BC3's APC tool applied in regions.
- Partnership with the IFDD to qualify scientific papers that participated in the youth initiative.

The future of RegionsAdapt:

- Knowledge exchange
 - Output 1: Guide of good practices.
 - Output 2: Library of practices.
- Supporting the development of regional adaptation plans
 - Output: Guideline document for regional adaptation plans.
- Map adaptation challenges and possible solutions
 - An interactive document to share with our members divided in challenges and adaptation solutions.
- Involvement in the international adaptation policy debates
- Reporting platform and data report.

Thank you!
