Notes:

(1) Further detailed information could be found in the common reporting format tables of the Party's greenhouse gas inventory, namely "Emission trends (CO₂)", "Emission trends (CH₄)", "Emission trends (N₂O)" and "Emission trends (HFCs, PFCs and SF₆)", which is included in an annex to this biennial report.

(2) 2011 is the latest reported inventory year.

(3) 1 kt CO₂ eq equals 1 Gg CO₂ eq.

Abbreviation: LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Includes net CO₂, CH₄ and N₂O from LULUCF.

Custom Footnotes

The relative changes from base to latest reported year are not provided for gases with no or virtually no emissions in the base year.

Emission trends (CO₂)

Abbreviations: CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Fill in net emissions/removals as reported in CRF table Summary 1.A of the latest reported inventory year. For the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+).

Custom Footnotes

The relative changes from base to latest reported year are not provided for gases with no or virtually no emissions in the base year.

CO₂ emissions from biomass include biogenic CO₂ emissions from the sectors 1A and 5C (but not from other sectors such as the sectors 2, 5A, 5B, 5D).

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

Custom Footnotes

The relative changes from base to latest reported year are not provided for gases with no or virtually no emissions in the base year.

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and for

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

Custom Footnotes

The relative changes from base to latest reported year are not provided for gases with no or virtually no emissions in the base year.

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^cEnter actual emissions estimates. If only potential emissions estimates are available, these should be reported in this table and an indication for this be provided in the documentation box. Only in these rows are the emissions expressed as CO₂ equivalent emissions.

^dIn accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual inventories", HFC and PFC emissions should be reported for each relevant chemical. However, if it is not possible to report values for each chemical (i.e. mixtures, confidential data, lack of disaggregation), this row could be used for reporting aggregate figures for HFCs and PFCs, respectively. Note that the unit used for this row is kt of CO₂ equivalent and that appropriate notation keys should be entered in the cells for the individual chemicals.)

Custom Footnotes

The relative changes from base to latest reported year are not provided for gases with no or virtually no emissions in the base year.

Documentation Box:

Table 2(a)

CHE_BR2_v1.0

Description of quantified economy-wide emission reduction target: base year^a

<i>Party</i>	<i>Switzerland</i>	
Base year /base period	1990	
Emission reduction target	% of base year/base period	% of 1990 ^b
	20.00	
Period for reaching target	BY-2020	

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Optional.

Description of quantified economy-wide emission reduction target: gases and sectors covered^a

<i>Gases covered</i>		<i>Base year for each gas (year):</i>	
CO ₂		1990	
CH ₄		1990	
N ₂ O		1990	
HFCs		1990	
PFCs		1990	
SF ₆		1990	
NF ₃		1990	
Other Gases (specify)			
Sectors covered ^b	Energy	Yes	
	Transport ^f	Yes	
	Industrial processes ^g	Yes	
	Agriculture	Yes	
	LULUCF	No	
	Waste	Yes	
	Other Sectors (specify)		
	Other	No	

Abbreviations : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b More than one selection will be allowed. If Parties use sectors other than those indicated above, the explanation of how these sectors relate to the sectors defined by the IPCC should be provided.

^f Transport is reported as a subsector of the energy sector.

^g Industrial processes refer to the industrial processes and solvent and other product use sectors.

Description of quantified economy-wide emission reduction target: global warming potential values (GWP)^a

<i>Gases</i>	<i>GWP values^b</i>
CO ₂	4th AR
CH ₄	4th AR
N ₂ O	4th AR
HFCs	4th AR
PFCs	4th AR
SF ₆	4th AR
NF ₃	4th AR
Other Gases (specify)	

Abbreviations : GWP = global warming potential

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Please specify the reference for the GWP: Second Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) or the Fourth Assessment Report of the IPCC.

Description of quantified economy-wide emission reduction target: approach to counting emissions and removals from the LULUCF sector^a

Role of LULUCF	LULUCF in base year level and target	Excluded
	Contribution of LULUCF is calculated using	Activity-based approach

Abbreviation : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: market-based mechanisms under the Convention^a

<i>Market-based mechanisms under the Convention</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>
CERs	NE
ERUs	NE
AAUs ⁱ	NE
Carry-over units ^j	NE
Other mechanism units under the Convention (specify) ^d	

Abbreviations : AAU = assigned amount unit, CER = certified emission reduction, ERU = emission reduction unit.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^d As indicated in paragraph 5(e) of the guidelines contained in annex I of decision 2/CP.17 .

ⁱ AAUs issued to or purchased by a Party.

^j Units carried over from the first to the second commitment periods of the Kyoto Protocol, as described in decision 13/CMP.1 and consistent with decision 1/CMP.8.

Description of quantified economy-wide emission reduction target: other market-based mechanisms^a

<i>Other market-based mechanisms</i>	<i>Possible scale of contributions</i>
<i>(Specify)</i>	<i>(estimated kt CO₂ eq)</i>

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: any other information^{a,b}

Switzerland will use carbon credits generated from the flexible mechanisms under the Kyoto Protocol (CERs and ERUs) and from the new market-based mechanisms under the Convention to reduce its emissions over the period 2013-2020. The exact amount of carbon credits is not yet known. The revised CO₂ Act for the 2013-2020 period defines Switzerland's 20% reduction target as domestic, however carbon credits will play a role in the case of fossil fuel thermal power plants, the ETS, companies exempted from the CO₂ levy that are not participating in the ETS, as well as in the sanction mechanism. Furthermore, Switzerland will use additional carbon credits recognized under the Kyoto Protocol to meet the difference between the approach used under the national legislation (i.e. emission reduction target defined for the year 2020) and the one of the Kyoto Protocol (i.e. "carbon budget" approach used to calculate the QELRC). Under the Kyoto Protocol, Switzerland does not plan to buy AAUs from other countries but does not exclude the use of AAUs from other countries through the linking of its ETS with other schemes. Switzerland may use a limited amount of its own carried-over AAUs. For a possibly higher target than 20% reduction by 2020 compared to 1990, in addition to the carbon credits that will be used for achieving the 20% reduction target, carbon credits will also be used by Switzerland for maximum three fourth of the additional emission reductions beyond the 20% reduction target by 2020 compared to 1990, as planned in the CO₂ Act for the 2013-2020 period.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b This information could include information on the domestic legal status of the target or the total assigned amount of emission units for the period for reaching a target. Some of this information is presented in the narrative part of the biennial report.

Custom Footnotes

Emission reductions target: As part of a global and comprehensive agreement for the period beyond 2012, Switzerland reiterates its conditional offer to move to a 30% reduction by 2020 compared to the 1990 levels, provided that other developed countries commit themselves to comparable emission reductions and that developing countries contribute adequately according to their responsibilities and respective capabilities.

Gases and sectors covered, LULUCF: The land-based approach, which is used for the reporting of emissions from the LULUCF sector under the UNFCCC, is not considered in Switzerland's quantified economy-wide emission reduction target. However, Switzerland's quantified economy-wide emission reduction target accounts for the activity-based approach, in accordance with the accounting under the Kyoto Protocol. Under article 3.3 of the Kyoto Protocol, Switzerland accounts for afforestation and reforestation, as well as deforestation, and under article 3.4 of the Kyoto Protocol for forest management.

Possible scale of contributions of market-based mechanisms under the Convention: For more information see BR CTF Table 2(f).

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
First CO ₂ Act (1999)*	Cross-cutting	CO ₂	-10% CO ₂ from fossil fuel use by 2008–2012 relative to 1990.	Regulatory	Implemented	The CO ₂ Act of 1999 was the first legal basis for Swiss climate policy including the implementation of the first commitment period of the Kyoto Protocol. It is no longer in place (superseded by the revised CO ₂ Act of 2011).	2000	FOEN		See target
Revised CO ₂ Act (2011)*	Cross-cutting	CH ₄ , CO ₂ , HFCs, N ₂ O, NF ₃ , PFCs, SF ₆	-20% CO ₂ eq by 2020 relative to 1990.	Regulatory	Implemented	The revised CO ₂ Act of 2011 is the current legal basis of Swiss climate policy including the implementation of the second commitment period of the Kyoto Protocol. It contains provisions covering mitigation as well as adaptation.	2013	FOEN		See target
CO ₂ levy on heating and process fuels*	Cross-cutting	CO ₂	Promote energy efficiency, less CO ₂ intensive energy sources and reduced use of fossil heating/process fuels.	Other (Economic)	Implemented	Surcharge on fossil heating/process. Two thirds of the revenues are redistributed to households and businesses, up to one third goes into the National buildings refurbishment programme and - to a small extent - to a technology fund granting loan guarantees for climate-friendly equipment and processes.	2008	FOEN		2000
Emissions Trading Scheme (ETS)*	Cross-cutting	CO ₂ , N ₂ O, PFCs	Making market mechanisms available to emission intensive companies.	Economic	Implemented	Emissions trading scheme based on the cap and trade principle, enabling the cost-effective achievement of climate-protection targets. Large, greenhouse gas-intensive companies are required to participate, medium-sized companies may voluntarily participate. Companies included in the ETS are exempted from the CO ₂ levy.	2008	FOEN		800
Negotiated reduction commitments (for exemption from the CO ₂ levy)*	Cross-cutting	CO ₂ , N ₂ O, PFCs	Emission reduction targets agreed with companies wishing to obtain exemption from the CO ₂ levy.	Regulatory	Implemented	Binding agreements with eligible small and medium-sized companies not admitted to the ETS. Definition of emission reduction targets, which take into account the technological potential and economic viability of measures.	2008	FOEN (in cooperation with SFOE)		525
SwissEnergy programme*	Energy	CO ₂	Promotion of energy efficiency and the increased use of renewables.	Other (Information)	Implemented	Major policy instrument in the energy sector engaging cantons, municipalities, industry, as well as environmental and consumer associations for awareness raising and the promotion of increased energy efficiency and the enhanced use of renewable energy.	2001	SFOE		n.a.
National buildings refurbishment programme (Part A)*	Energy	CO ₂	Refurbishment of existing buildings envelope	Economic	Implemented	The national buildings programme (Part A and Part B) increases the energy efficiency of buildings and promotes the use of renewable energies in the buildings sector. It is financed by one third of the revenue from the CO ₂ levy.	2010	FOEN, SFOE		900.00

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
National buildings refurbishment programme (Part B)*	Energy	CO ₂	Incentives for renewable energy, energy recuperation and optimization of building technology.	Economic	Implemented	The national buildings programme (Part A and Part B) increases the energy efficiency of buildings and promotes the use of renewable energies in the buildings sector. It is financed by one third of the revenue from the CO ₂ levy.	2010	Cantons		2,070.00
Building codes of the cantons*	Energy	CO ₂	Stringent energy consumption standards for new buildings.	Regulatory	Implemented	A set of common energy and insulation standards (model ordinances) to reduce energy consumption of buildings agreed on by the Cantonal Energy Directors. Implementation of the further tightening of standards by 2018 has been agreed in 2011.	1992	Cantons in coordination with SFOE		1,750.00
Negotiated commitments on energy efficiency*	Energy	CO ₂	Exemption from electricity network surcharges under the Energy Act.	Economic	Implemented	Full or partial refund of network surcharges (raised for the promotion of renewable energies) to energy-intensive companies if they commit to enhancing energy efficiency in a target agreement.	2014	SFOE		n.e.
Obligation to offset emissions from gas-fired combined-cycle power plants*	Energy	CO ₂	Avoid new large sources of CO ₂ from domestic electricity or heat generation.	Regulatory	Implemented	Fossil thermal power plants with a capacity larger than 100 megawatt obtain planning permission only if their CO ₂ emissions are fully compensated. Under the revised CO ₂ Act, at least half of the compensation has to be achieved domestically.	2008	FOEN		n.a.
Negotiated reduction commitment by MSWI operators	Energy	CO ₂	Contribution to emission reduction by MSWI through energy efficiency and metal recuperation.	Regulatory	Implemented	Agreement committing the association of MSWI operators to establish a monitoring system and to reduce net CO ₂ emissions. Implementation of the agreement exempts MSWI operators from participation in the emissions trading system.	2014	FOEN		200.00
CO ₂ emission regulations for new passenger cars*	Transport	CO ₂	Reduction of average fuel consumption / CO ₂ emissions from new cars.	Regulatory	Implemented	CO ₂ emission targets for newly registered vehicles in line with EU regulation. The first target for the fleet average has been set at 130g CO ₂ /km by 2015. Vehicle importers have to pay a sanction if the individually specified target level is not met.	2012	SFOE, FEDRO		1,700.00
Energy label for new motor vehicles*	Transport	CO ₂	Raise visibility of cars with low average fuel consumption / CO ₂ emissions.	Other (Information)	Implemented	Mandatory label displayed at the point of sale providing information about the fuel consumption (litres per 100 kilometre) and CO ₂ emissions (in grams per kilometre) of every passenger car.	2003	SFOE		i.e.

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
Climate Cent (international)*	Transport	CO ₂ , CH ₄ , N ₂ O	Compensation of transport emissions by use of Kyoto credits.	Voluntary Agreement	Implemented	Voluntary agreement with a private sector initiative in place of a CO ₂ levy on fossil transport fuels. Obligation to purchase a total of 17 million emission reduction certificates for compliance with the Swiss target for the first commitment period of the Kyoto Protocol. Financed by a surcharge of CHF 0.015 per litre on transport fuels.	2005	Climate Cent Foundation		n.a.
Climate Cent (domestic)*	Transport	CO ₂	Compensation of transport emissions through funding of mitigation projects within Switzerland.	Voluntary Agreement	Implemented	See measure above	2005	Climate Cent Foundation		n.a.
Partial compensation of CO ₂ emissions from transport fuel use*	Transport	Other (All Kyoto gases)	Domestic mitigation projects as compensatory measure (instead of a CO ₂ levy on transport fuel emissions).	Regulatory	Implemented	Obligation for fossil fuel importers to offset part of the CO ₂ emissions from transport fuel use through investments in domestic emission reduction projects. Financed by a surcharge on imported fuels not exceeding CHF 0.05 per litre of fuel. The share of CO ₂ emissions to be offset is gradually increased from 2 to 10 per cent by 2020.	2013	Foundation for Climate Protection and Carbon Offset, FOEN		1,500.00
Heavy vehicle charges*	Transport	CO ₂	Reduction of transalpine road traffic, increase of transport rates on rail, limit increase in heavy vehicles on the road.	Fiscal	Implemented	Charges applied to passenger and freight transport vehicles of more than 3.5 tonnes gross weight, aiming at a shift of transalpine transport from road to rail. The level of the charge depends on the maximum weight and emission standards of the individual vehicle.	2001	ARE, FEDRO		175.00
Mineral oil tax reduction on biofuels and natural gas*	Transport	CO ₂	Promotion of low carbon motor fuels.	Economic	Implemented	Tax reduction of CHF 0.4 per litre of petrol equivalent for natural and liquefied petroleum gas (LPG). Complete tax exemption for biogas and other fuels from renewable sources if certain (ecological and social) criteria are met. Tax revenue losses are compensated by increasing tax rates on liquid fossil transport fuels.	2008	FCA in collaboration with FOEN and SECO		100.00
Inclusion of aviation in the emissions trading scheme	Transport	CO ₂	Limit/offset CO ₂ emissions from international aviation.	Other (Economic)	Planned	Inclusion of (international) aviation into the emissions trading scheme. Implementation is contingent on the conclusion of a bilateral agreement between Switzerland and European Union on the linking of the respective emissions trading schemes.		FOCA, FOEN		n.e.

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
Provisions relating to substances stable in the atmosphere*	Industry/industrial processes	HFCs, PFCs, SF ₆ , NF ₃ , Other (HFEs)	Reduction in use and emissions of fluorinated gases.	Regulatory	Implemented	Regulations relating to, inter alia, compressed gas containers, plastic foams, solvents containing PFC, HFC or HFE, refrigerants, extinguishing agents, and SF ₆ in electrical distribution equipment.	2003	FOEN, cantons		1,050.00
NMVOC incentive fee	Industry/industrial processes	Other (NMVOC)	Improvement of air quality due to reduced NMVOC emissions.	Economic	Implemented	Financial incentive to reduce NMVOC emissions.	2000	FOEN		n.e.
Proof of ecological performance*	Agriculture	CH ₄ , N ₂ O, CO ₂	Incentives related to ecological goals.	Economic	Implemented	Direct payments are contingent on appropriate soil nutrient balance, suitable proportion of ecological compensation areas, crop rotation system, soil protection, selective application of crop protection agents, and animal husbandry in line with legal provisions.	early 1990s	FOAG		n.e.
Resource programme*	Agriculture	CH ₄ , N ₂ O, CO ₂	Promotion of efficient use of natural resources	Economic	Implemented	Subsidizing measures for more efficient use of natural resources such as nitrogen, phosphorous and energy, protection and sustainable use of soils, and biodiversity. To qualify for subsidies, measures must go beyond legal requirements or the criteria for other funding programmes.	2008	FOAG		n.e.
Agricultural Policy 2014–2017*	Agriculture	CH ₄ , N ₂ O, CO ₂	More targeted use of direct payments system	Economic	Implemented	Abolition of unspecific direct payments (livestock subsidies, general acreage payments). Additional funds for environment-friendly production systems and for the efficient use of resources, e.g., increase in nutrient efficiency and ecological set-aside areas, reduction of ammonia emissions.	2014	FOAG		n.e.
Climate strategy for agriculture*	Agriculture	CH ₄ , N ₂ O, CO ₂	Long-term mitigation and adaptation in the sector	Other (Research)	Implemented	Declaration of intent to reduce emissions by one third with technical, operational and organizational measures and by another third with measures influencing food consumption and production. Framework for the development, testing and implementation of specific future measures in mitigation and adaptation.	2011	FOAG		n.e.
Sustainable forest management and forest area conservation*	Forestry/LULUCF	CO ₂	Limiting harvest to size of growth increment in forests, obligation to compensate for any deforestation.	Regulatory	Implemented	Ban on clear-cutting, no deforestation unless it is replaced by an equal area of afforested land or an equivalent measure to improve biodiversity.	1876, main amendments 1902, 1993	FOEN, cantons		n.e.

Table 3

CHE_BR2_v1.0

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
Measures within Forest Policy 2020*	Forestry/LULUCF	CO ₂	Promote the use of wood and the substitution of carbon intensive resources.	Information	Implemented	Improvement of conditions for an efficient and innovative forestry and wood industry. Targets for the consumption of sawn timber and timber products and for CO ₂ emission reductions through enhanced use of wood. Long-term target of a CO ₂ balance between forest sink, wood use and wood substitution effects.	2011	FOEN, cantons		1,200.00
Wood Action Plan*	Forestry/LULUCF	CO ₂	Ecologically and economically effective use of wood.	Information Education Research	Implemented	Policy package implementing Forest Policy 2020 (see above) in the area of better use of the wood harvest potential. Focal areas comprise state-of-the-art wood burning technologies (reduced pollution) and greater overall efficiency in the chain from harvesting to final consumption.	2009	FOEN		i.e.
Ban on landfilling of combustible waste*	Waste management/waste	CH ₄	Avoid landfill emissions, use waste as an energy source.	Regulatory	Implemented	Interdiction of landfilling of combustible waste.	2000	FOEN		200.00

Note : The two final columns specify the year identified by the Party for estimating impacts (based on the status of the measure and whether an ex post or ex ante estimation is available).

Abbreviations : GHG = greenhouse gas; LULUCF = land use, land-use change and forestry.

^a Parties should use an asterisk (*) to indicate that a mitigation action is included in the 'with measures' projection.

^b To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors, cross-cutting, as appropriate.

^c To the extent possible, the following types of instrument should be used: economic, fiscal, voluntary agreement, regulatory, information, education, research, other.

^d To the extent possible, the following descriptive terms should be used to report on the status of implementation: implemented, adopted, planned.

^e Additional information may be provided on the cost of the mitigation actions and the relevant timescale.

^f Optional year or years deemed relevant by the Party.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For the base year, information reported on the emission reduction target shall include the following: (a) total GHG emissions, excluding emissions and removals from the LULUCF sector; (b) emissions and/or removals from the LULUCF sector based on the accounting approach applied taking into consideration any relevant decisions of the Conference of the Parties and the activities and/or land that will be accounted for; (c) total GHG emissions, including emissions and removals from the LULUCF sector. For each reported year, information reported on progress made towards the emission reduction targets shall include, in addition to the information noted in paragraphs 9(a--c) of the UNFCCC biennial reporting guidelines for developed country Parties, information on the use of units from market-based mechanisms.

^c Parties may add additional rows for years other than those specified below.

^d Information in this column should be consistent with the information reported in table 4(a)I or 4(a)II, as appropriate. The Parties for which all relevant information on the LULUCF contribution is reported in table 1 of this common tabular format can refer to table 1.

Custom Footnotes

Base year emissions may be subject to change, as the Initial Report for the second commitment period is not yet submitted and reviewed.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Parties that use the LULUCF approach that is based on table 1 do not need to complete this table, but should indicate the approach in table 2. Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^c For each category, enter the net emissions or removals reported in the most recent inventory submission for the corresponding inventory year. If a category differs from that used for the reporting under the Convention or its Kyoto Protocol, explain in the biennial report how the value was derived.

^d Enter one reference level or base year/period value for each category. Explain in the biennial report how these values have been calculated.

^e If applicable to the accounting approach chosen. Explain in this biennial report to which years or period the cumulative contribution refers to.

^f Label each accounting approach and indicate where additional information is provided within this biennial report explaining how it was implemented, including all relevant accounting parameters (i.e. natural disturbances, caps).

^g Specify what was used for the category “other”. Explain in this biennial report how each was defined and how it relates to the categories used for reporting under the Convention or its Kyoto Protocol.

Custom Footnotes

The land-based approach, which is used for the reporting of emissions from the LULUCF sector under the UNFCCC, is not considered in Switzerland's quantified economy-wide emission reduction target. However, Switzerland's quantified economy-wide emission reduction target accounts for the activity-based approach, in accordance with the accounting under the Kyoto Protocol. Under article 3.3 of the Kyoto Protocol, Switzerland accounts for afforestation and reforestation, as well as deforestation, and under article 3.4 of the Kyoto Protocol for forest management.

Abbreviations: CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Developed country Parties with a quantified economy-wide emission reduction target as communicated to the secretariat and contained in document FCCC/SB/2011/INF.1/Rev.1 or any update to that document, that are Parties to the Kyoto Protocol, may use table 4(a)II for reporting of accounting quantities if LULUCF is contributing to the attainment of that target.

^c Parties can include references to the relevant parts of the national inventory report, where accounting methodologies regarding LULUCF are further described in the documentation box or in the biennial

^d Net emissions and removals in the Party's base year, as established by decision 9/CP.2.

^e All values are reported in the information table on accounting for activities under Article 3, paragraphs 3 and 4, of the Kyoto Protocol, of the CRF for the relevant inventory year as reported in the current submission and are automatically entered in this table.

^f Additional columns for relevant years should be added, if applicable.

^g Cumulative net emissions and removals for all years of the commitment period reported in the current submission.

^h The values in the cells "3.3 offset" and "Forest management cap" are absolute values.

ⁱ The accounting quantity is the total quantity of units to be added to or subtracted from a Party's assigned amount for a particular activity in accordance with the provisions of Article 7, paragraph 4, of the Kyoto Protocol.

^j In accordance with paragraph 4 of the annex to decision 16/CMP.1, debits resulting from harvesting during the first commitment period following afforestation and reforestation since 1990 shall not be greater than the credits accounted for on that unit of land.

^k In accordance with paragraph 10 of the annex to decision 16/CMP.1, for the first commitment period a Party included in Annex I that incurs a net source of emissions under the provisions of Article 3 paragraph 3, may account for anthropogenic greenhouse gas emissions by sources and removals by sinks in areas under forest management under Article 3, paragraph 4, up to a level that is equal to the net source of emissions under the provisions of Article 3, paragraph 3, but not greater than 9.0 megatonnes of carbon times five, if the total anthropogenic greenhouse gas emissions by sources and removals by sinks in the managed forest since 1990 is equal to, or larger than, the net source of emissions incurred under Article 3, paragraph 3.

^l In accordance with paragraph 11 of the annex to decision 16/CMP.1, for the first commitment period of the Kyoto Protocol only, additions to and subtractions from the assigned amount of a Party resulting from Forest management under Article 3, paragraph 4, after the application of paragraph 10 of the annex to decision 16/CMP.1 and resulting from forest management project activities undertaken under Article 6, shall not exceed the value inscribed in the appendix of the annex to decision 16/CMP.1, times five.

Information on updated greenhouse gas projections under a ‘with measures’ scenario^a

	<i>GHG emissions and removals^b</i>							GHG emission projections	
	<i>(kt CO₂ eq)</i>							<i>(kt CO₂ eq)</i>	
	<i>Base year (1990)</i>	1990	1995	2000	2005	2010	2013	2020	2030

Abbreviations : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, at a minimum Parties shall report a ‘with measures’ scenario, and may report ‘without measures’ and ‘with additional measures’ scenarios. If a Party chooses to report ‘without measures’ and/or ‘with additional measures’ scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report ‘without measures’ or ‘with additional measures’ scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this biennial report. Where the sectoral breakdown differs from that reported in the GHG inventory Parties should explain in their biennial report how the inventory sectors relate to the sectors reported in this table.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors (i.e. cross-cutting), as appropriate.

^f Parties may choose to report total emissions with or without LULUCF, as appropriate.

Custom Footnotes

Domestic compensation is included in the total, but not allocated to any of the sectors or gases.

Note that for the projections a revised approach to estimate fugitive emissions from biogas facilities is used in the sector ‘Waste’ and small adjustments are included in the sector ‘Agriculture’, while,

^g Multilateral climate change funds listed in paragraph 17(a) of the "UNFCCC biennial reporting guidelines for developed country Parties" in decision 2/CP.17.

^h Other multilateral climate change funds as referred in paragraph 17(b) of the "UNFCCC biennial reporting guidelines for developed country Parties" in decision 2/CP.17.

Custom Footnotes

Data source for total contributions through bilateral, regional and other channels: <http://www.seco-cooperation.admin.ch/org/00808/05138/index.html?lang=en>. Note that the core/general contributions for multilateral channels only cover contributions with a climate-specific share, i.e. Switzerland's overall ODA is larger than the total in BR CTF Table 7 (see Biennial Report 2016 for more details).

Each Party shall provide an indication of what new and additional financial resources they have provided, and clarify how they have determined that such resources are new and additional. Please provide this information in relation to table 7(a) and table 7(b).

Documentation Box:

Switzerland uses the currency exchange rates from <http://stats.oecd.org/index.aspx?queryid=169#>, which are 0.9270165 USD/CHF for 2013 and 0.9150472 USD/CHF for 2014.

Abbreviations: ODA = official development assistance, OOF = other official flows.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^c Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^d This refers to support to multilateral institutions that Parties cannot specify as climate-specific.

^e Parties should explain in their biennial reports how they define funds as being climate-specific.

^f Please specify.

^g Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

The shares for imputed multilateral contribution are as follows: 100% for Global Environmental Facility (55% of the core contribution is ODA), 100% for Least Developed Countries Fund, 100% for Special Climate Change Fund, 100% for Adaptation Fund, 100% for Green Climate Fund, 100% for UNFCCC (61% of the core contribution is ODA), 100% for IPCC, 33% for African Development Fund, 25% for Asian Development Bank, no share available for UNCCD, no share available for IFAD, no share available for UNISDR (only 75% of the total contribution is ODA), no share available for CGIAR, 100% for Fonds multilatéral pour l'application du Protocole de Montréal.

UNFCCC Trust Fund for Supplementary Activities: The reported amounts include all contributions of Switzerland to the UNFCCC.

World Bank includes contributions from IDA (with a share for imputed multilateral contribution of 20%) and IBRD (no share available for imputed multilateral contribution).

Abbreviations: ODA = official development assistance, OOF = other official flows; USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

Provision of public financial support: contribution through bilateral, regional and other channels in 2013^a

<i>Recipient country/ region/project/programme^b</i>	<i>Total amount</i>		<i>Status^c</i>	<i>Funding source^g</i>	<i>Financial instrument^g</i>	<i>Type of support^{g, h}</i>	<i>Sector^d</i>	<i>Additional information^e</i>
	<i>Climate-specific^f</i>							
	<i>Swiss franc - CHF</i>	<i>USD</i>						

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Abbreviations: ODA = official development assistance, OOF = other official flows; USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

Provision of public financial support: contribution through bilateral, regional and other channels in 2014^a

<i>Recipient country/ region/project/programme^b</i>	<i>Total amount</i>		<i>Status^c</i>	<i>Funding source^g</i>	<i>Financial instrument^g</i>	<i>Type of support^{g, h}</i>	<i>Sector^d</i>	<i>Additional information^e</i>
	<i>Climate-specific^f</i>							
	<i>Swiss franc - CHF</i>	<i>USD</i>						

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

Provision of technology development and transfer support^{a,b}

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>

^a To be reported to the extent possible.

^b The tables should include measures and activities since the last national communication or biennial report.

^c Parties may report sectoral disaggregation, as appropriate.

^d Additional information may include, for example, funding for technology development and transfer provided, a short description of the measure or activity and co-financing arrangements.

Custom Footnotes

Most projects funded by Switzerland include technology transfer and capacity-building components. However, since they form an integral part of a project, it is not possible to account for them separately. Therefore, all information is available in BR CTF Table 7, and BR CTF Tables 8 and 9 are not reported by Switzerland.

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>

^a To be reported to the extent possible.

^b Each Party included in Annex II to the Convention shall provide information, to the extent possible, on how it has provided capacity-building support that responds to the existing and emerging capacity-building needs identified by Parties not included in Annex I to the Convention in the areas of mitigation, adaptation and technology development and transfer.

^c Additional information may be provided on, for example, the measure or activity and co-financing arrangements.

Custom Footnotes

Most projects funded by Switzerland include technology transfer and capacity-building components. However, since they form an integral part of a project, it is not possible to account for them separately. Therefore, all information is available in BR CTF Table 7, and BR CTF Tables 8 and 9 are not reported by Switzerland.
