Conference of the Parties serving as the meeting of the Parties to the Paris Agreement
Eighth session
Antalya, 9–20 November 2026
Item 5 of the provisional agenda
United Arab Emirates just transition work programme

Mapping of relevant instruments, initiatives and processes under the Convention and the Paris Agreement and relevant entities in the United Nations system

Synthesis report by the secretariat

Summary

This report synthesizes information on relevant instruments, initiatives and processes under the Convention and the Paris Agreement and inputs received from relevant entities in the United Nations system with a view to providing Parties with accurate information on the current landscape of the instruments, initiatives, processes and United Nations entities of relevance to just transition. It is intended to support the implementation of the United Arab Emirates just transition work programme and serve as input to the review of its effectiveness and efficiency mandated to take place at the eighth session of the Conference of the Parties serving as the meeting of the Parties to the Paris Agreement.

III.	Inputs received from relevant entities in the United Nations system	59

I. Introduction

A. Background and mandate

1. The United Arab Emirates just transition work programme was established at the fourth session of the Conference of the Parties serving as the meeting of the Parties to the Paris Agreement (CMA)[1] and operationalized at CMA 5.[2] CMA 5 confirmed that the objective of the work programme shall be the discussion of pathways to achieving the goals of the Paris Agreement outlined in Article 2, paragraph 1, in the context of Article 2, paragraph 2, and decided on the elements of the work programme.[3]

2. CMA 7 welcomed the establishment of and progress under the work programme and affirmed that the work programme fosters a collective understanding of just transitions, is not policy-prescriptive and encourages a holistic and integrated approach to pursuing just transition pathways that reflect diverse national circumstances and capacities.[4] It welcomed that the first to fourth dialogues held as part of the work programme enabled Parties, and observers and other non-Party stakeholders to share information on opportunities, best practices, actionable solutions, challenges and barriers related to the dialogue topics and recognized a range of key messages relevant to the design and implementation of and provision of support for nationally determined just transition pathways.[5]

3. CMA 7 decided to develop a just transition mechanism, the purpose of which is to enhance international cooperation, technical assistance, capacity-building and knowledge-sharing and enable equitable and inclusive just transitions, and requested the subsidiary bodies to recommend, at their sixty-fourth sessions, a draft decision on the process for its operationalization for consideration at CMA 8.[6]

4. CMA 7 also requested the subsidiary bodies, at their sixty-fourth sessions, to develop terms of reference for the review of the effectiveness and efficiency of the work programme, which is scheduled to take place at CMA 8 alongside consideration of its continuation,[7] and to consider, inter alia, ways to improve existing modalities of the work programme in developing the terms of reference, without prejudice to the outcome of the consideration of the continuation of the work programme.[8] The subsidiary bodies developed, at their sixty-fourth sessions, the terms of reference for the review, agreed that the review will be conducted at their sixty-fifth sessions in accordance with the terms of reference and initiated discussions on the process for the operationalization of the just transition mechanism.[9]

5. CMA 7 requested the secretariat to map relevant instruments, initiatives and processes under the Convention and the Paris Agreement and relevant entities in the United Nations system to support the implementation of the work programme and as input to the review referred to in paragraph 3 of decision 3/CMA.5, and also requested the secretariat to prepare a synthesis report thereon.[10]

B. Scope and methodology

6. In responding to the mandate referred to in paragraph 5 above, the secretariat made available an initial interim output of the mapping[11] on 9 June 2026 to inform deliberations on

[1] Decision 1/CMA.4, para. 52.

[7] Decision 3/CMA.5, para. 3.
[8] Decision 2/CMA.7, paras. 27–28.
[9] FCCC/SBI/2026/15, paras. 37 and 41; and FCCC/SBSTA/2026/5, paras. 63 and 67. The terms of reference are contained in annex I and the annex to those documents respectively.
[10] Decision 2/CMA.7, para. 24.
[11] Available at https://unfccc.int/documents/658666.

the matter at the sixty-fourth sessions of the subsidiary bodies, with those deliberations serving as input to the preparation of this synthesis report.

7. The mapping aims to capture existing mandates, initiatives, tools, reports, knowledge products and partnerships, as well as examples of activities, technical support and capacity-building efforts, of relevance to the work programme and, more broadly, to the design and implementation of and provision of support for nationally determined just transition pathways. The aim is to provide Parties with accurate information on the current landscape of instruments, initiatives, processes and United Nations entities of relevance to just transition and strengthen the evidence base on this matter, which serves both the implementation of the work programme and its review at CMA 8. The mapping is descriptive in nature, relies on inputs received from across secretariat teams and relevant United Nations systems entities and is not intended to assess the performance of, identify gaps or needs related to or prejudge the outcome of the review of the work programme or related negotiations.

8. The mapping was conducted as an iterative exercise drawing on two complementary sources. For the purpose of compiling information on relevant instruments, initiatives and processes under the Convention and the Paris Agreement, the secretariat drew on information collected across its teams on relevant areas of work under the Convention and the Paris Agreement.

9. For the purpose of compiling information on relevant entities in the United Nations system, the secretariat circulated a request for information, accompanied by a template, to the designated contact points for the 77 United Nations system and specialized agencies and other organizations relevant to the UNFCCC process.[12] They were invited to provide factual, concise and current information, including links to publicly available materials, on the instrument, initiative or process in question, including its name; the relevant mandate, if applicable; its geographical scope and target beneficiaries; its time frame and status; key partners; and any other relevant information, as well as to provide a brief description thereof, including of any outputs and type of support provided thereunder.

II. Structure of the synthesis report

10. The mapping requested in the mandate referred to in paragraph 5 above covers two distinct categories: (1) relevant instruments, initiatives and processes under the Convention and the Paris Agreement and (2) relevant entities in the United Nations system. This synthesis report responds to that mandate through the three annexes described below.

11. Annex II contains the full mapping pertaining to relevant instruments, initiatives and processes under the Convention and the Paris Agreement. This annex contains 56 entries received from teams across the secretariat, of which 53 were included in the initial interim output. A number of entries previously included in the initial interim output have been updated.

12. Annex III contains the full mapping of inputs received by relevant entities in the United Nations system. Inputs were received from 31 such entities,[13] which provided a total

[12] The list of designated contact points is available at https://unfccc.int/documents/645801.

[13] Division for Ocean Affairs and the Law of the Sea of the Office of Legal Affairs; Food and Agriculture Organization of the United Nations; Intergovernmental Panel on Climate Change; International Labour Organization; International Monetary Fund; International Organization for Migration; International Telecommunication Union; International Trade Centre; Joint SDG Fund; Office of the United Nations High Commissioner for Human Rights; secretariat of the Basel, Rotterdam and Stockholm conventions; United Nations Capital Development Fund; United Nations Children's Fund; United Nations Conference on Trade and Development; United Nations Department of Economic and Social Affairs, through an entry submitted jointly with the United Nations Conference on Trade and Development; United Nations Development Programme; United Nations Economic Commission for Europe; United Nations Educational, Scientific and Cultural Organization; United Nations Entity for Gender Equality and the Empowerment of Women; United Nations Environment Programme; United Nations Industrial Development Organization; United Nations Office for Disaster Risk Reduction; United Nations Permanent Forum on Indigenous Issues, through

of 371 entries. Of these entries, 146 from 12 entities were included in the initial interim output, and 225 from a further 19 entities were received thereafter.

13. Annex I describes the inputs received under both categories.

its secretariat; United Nations Population Fund; United Nations Research Institute for Social Development; United Nations System Staff College; World Bank Group; World Intellectual Property Organization; World Meteorological Organization; World Tourism Organization; and World Trade Organization.

Annex I

Landscape of relevant instruments, initiatives and processes under the Convention and the Paris Agreement and relevant entities in the United Nations system*

I. Introduction

1. This annex presents the landscape of relevant instruments, initiatives and processes that emerges from the information received in response to decision 2/CMA.7, paragraph 24.[1] It brings together the information compiled across the secretariat on instruments, initiatives and processes under the Convention and the Paris Agreement as well as the information provided by 31 entities in the United Nations system, which are reproduced in full in annexes II and III respectively. Like the report to which it is annexed, this annex is descriptive in nature and it is not intended to assess the performance of any instrument, initiative, process or entity, to identify gaps or needs, or to prejudge the outcome of the review of the work programme or of related negotiations.

2. Chapter II describes how the information is presented. Chapter III describes the instruments, initiatives and processes under the Convention and the Paris Agreement. Chapters IV and V describe the information provided by entities in the United Nations system, first by dialogue topic and then by the nature of the activities reported.

II. Approach

A. Instruments, initiatives and processes under the Convention and the Paris Agreement

3. The relevance of considering synergies with instruments, initiatives and processes under the Convention and the Paris Agreement has consistently emerged in the implementation of the work programme, including in the dialogues. CMA 7 recognized the benefit of building on relevant work on designing and implementing just transition pathways under and outside the Convention and the Paris Agreement and invited the UNFCCC constituted bodies to integrate just transition elements and the outcomes of the work programme into their existing workplans.[2]

4. The 56 entries compiled by the secretariat, across its teams, on instruments, initiatives and processes under the Convention and the Paris Agreement are presented in chapter III in four clusters: work programmes, UNFCCC constituted bodies and other processes; reports and knowledge products; guidance to, and the strategies of, the operating entities of the Financial Mechanism and other funds; and global climate action. For each cluster, the entries are described with reference, as relevant, to their mandate or governing body, timeframe and status, and scope and recent outputs. Chapter III also distinguishes between entries that refer to just transition explicitly in the relevant mandate, decision, workplan or output, and entries identified as relevant because they address aspects identified in the key messages recognized in decision 2/CMA.7, paragraph 12, such as participation, social protection, locally led adaptation and gender equality. Of the 56 entries, 53 were included in the initial interim output and three were added through a second internal round concluded in October 2026, in which a number of other entries were also updated.

* Not formally edited or formatted.

[1] Decision 2/CMA.7, para. 24.

[2] Decision 2/CMA.7, paras. 16–17.

B. Information provided by entities in the United Nations system

5. Given the multisectoral, multidimensional and cross-cutting nature of just transitions, relevant mandates, expertise and activities are found across a range of entities in the United Nations system. Participants in the dialogues have reflected on the value of strengthening coherence and synergies between the work programme and such entities, while emphasizing that engagement with them should complement, and not substitute for, the Party-driven nature of the work programme.

6. The secretariat circulated a request for information, accompanied by a template, to the designated contact points of the 77 United Nations system and specialized agencies and other relevant organizations in the UNFCCC process.[3] Entities were invited to provide factual, concise and current information, including links to publicly available materials, on the name of the instrument, initiative or process; its mandate, if applicable; its geographic scope and target beneficiaries; its timeframe and status; a short description, including outputs and the type of support provided; key partners; and any other relevant information. A background annex accompanying the request set out the elements of the work programme, the dialogue topics and the key messages recognized in decision 2/CMA.7, paragraph 12, to help entities identify relevant information without prejudging their inputs. Following the initial interim output, entities were invited to provide new information, additions and updates in a second round, by 31 August 2026, and in a final call, by 10 October 2026. The secretariat presented a progress update at the informal intersessional workshop on the work programme held in Sydney, Australia, on 30 September 2026.[4] Information received up to 5 November 2026 is reflected in this annex and is reproduced as received in annex III, without modification, supplementation or assessment.

7. Inputs were received from 31 entities,[5] which provided a total of 371 entries: 146 entries from 12 entities[6] were included in the initial interim output and 225 entries from a further 19 entities were received thereafter. In addition, 17 further entities are referred to in the information contained in the annexes, most of them as partners, co-implementers or funders of instruments, initiatives and processes described in other entries. The Green Climate Fund, the Global Environment Facility and the Fund for responding to Loss and Damage are also included through entries compiled by the secretariat on their respective strategies and modalities. Together with the 30 contributing entities[7] that are on the list of

[3] The list of designated contact points of United Nations system and specialized agencies and other relevant organizations in the UNFCCC process is available at https://unfccc.int/documents/645801.

[4] The presentation is available at https://unfccc.int/event/informal-intersessional-workshop-on-just-transition.

[5] The United Nations system entities that provided inputs to the secretariat are: Division for Ocean Affairs and the Law of the Sea of the Office of Legal Affairs (DOALOS); Food and Agriculture Organization of the United Nations (FAO); Intergovernmental Panel on Climate Change (IPCC); International Labour Organization (ILO); International Monetary Fund (IMF); International Organization for Migration (IOM); International Telecommunication Union (ITU); International Trade Centre (ITC); Joint SDG Fund; Office of the United Nations High Commissioner for Human Rights (OHCHR); secretariat of the Basel, Rotterdam and Stockholm conventions (BRS Secretariat); United Nations Capital Development Fund (UNCDF); United Nations Children's Fund (UNICEF); United Nations Conference on Trade and Development (UNCTAD); United Nations Department of Economic and Social Affairs (UN DESA), through an entry submitted jointly with UNCTAD; United Nations Development Programme (UNDP); United Nations Economic Commission for Europe (UNECE); United Nations Educational, Scientific and Cultural Organization (UNESCO); United Nations Entity for Gender Equality and the Empowerment of Women (UN Women); United Nations Environment Programme (UNEP); United Nations Industrial Development Organization (UNIDO); United Nations Office for Disaster Risk Reduction (UNDRR); United Nations Permanent Forum on Indigenous Issues (UNPFII), through its secretariat; United Nations Population Fund (UNFPA); United Nations Research Institute for Social Development (UNRISD); United Nations System Staff College (UNSSC); World Bank Group; World Intellectual Property Organization (WIPO); World Meteorological Organization (WMO); World Tourism Organization (UN Tourism); and World Trade Organization (WTO).

[6] Including UN DESA, through its joint entry with UNCTAD.

[7] The Permanent Forum on Indigenous Issues, which contributed through its secretariat, is not included separately on the list of designated contact points.

designated contact points, 47 of the 77 organizations on that list therefore feature in the mapping.

8. The entries provided by entities in the United Nations system are varied in nature, scale and time span. They range from instruments adopted by governing, intergovernmental, treaty and expert bodies, and guidance, methodologies and toolkits, to reports and research, databases and digital platforms, programmes and projects at the global, regional, national and local levels, training courses, partnerships and coordination platforms, and submissions made under the work programme. Entities also reported in different ways: some at the level of programmes or initiatives, others by listing individual publications or events. The activities described include completed outputs as well as ongoing and planned work.

9. The elements of the work programme set out in decision 3/CMA.5, paragraph 2, are broad, and a single entry can relate to several of them. The information provided by entities in the United Nations system is therefore first described in chapter IV against the topics of the six dialogues held to date, which have structured the work programme since 2024 and draw on those elements. Table 1 sets out each dialogue topic alongside the elements of paragraph 2 to which it can be broadly related.

Table 1
Dialogue topics and the elements of the work programme in decision 3/CMA.5, paragraph 2

Dialogue	*Topic*	*Elements of paragraph 2*[8]
First *Bonn, June 2024*	Just transition pathways to achieving the goals of the Paris Agreement through NDCs, NAPs and LT-LEDS	(a)
Second *Sharm el-Sheikh, October 2024*	Ensuring support for people-centric and equitable just transition pathways with a focus on the whole-of-society approach and the workforce	(e), (f)
Third *Panama City, May 2025*	Approaches to enhancing adaptation and climate resilience in the context of just transitions	(d), (g)
Fourth *Addis Ababa, September 2025*	Just energy transition pathways and holistic approaches to just transitions, including socioeconomic, workforce, social protection and other dimensions, based on nationally defined development priorities	(b),(g)
Fifth *Yeosu, April 2026*	Just transition pathways for holistic approaches to food security, including with a focus on agriculture and oceans, in the context of element (c), paragraph 2, of decision 3/CMA.5	(c),(g)
Sixth *Baku, September 2026*	Holistic approaches to nationally determined just transition pathways for the industry sector: technology, innovation and equitable value chains	(c), (g)

[8] Elements of paragraph 2: (a) just transition pathways to achieving the goals of the Paris Agreement outlined in Article 2, paragraph 1, in the context of Article 2, paragraph 2; (b) just and equitable transition, which encompasses pathways that include energy, socioeconomic, workforce and other dimensions, all of which must be based on nationally defined development priorities and include social protection so as to mitigate potential impacts associated with the transition; (c) opportunities, challenges and barriers relating to sustainable development and poverty eradication as part of transitions globally to low emissions and climate resilience, taking into account nationally defined

10. The information provided by entities in the United Nations system is also then described in chapter V according to the nature of the activities and contributions reported, across dialogue topics, as entries that can be broadly categorized as normative frameworks and guidance, including instruments adopted by governing, intergovernmental, treaty and expert bodies and guidance on their application; knowledge products and evidence, such as scientific assessments, research, policy analysis and events; tools, data and platforms; country-level programmes and projects, including advisory services and reviews undertaken in and for specific countries; capacity-building and training; and partnerships and coordination initiatives. These broad groupings serve only to better illustrate the nature of the information provided and provide Parties with a clear sense of what level of detail is contained in the inputs received.

11. Each entry was considered under the dialogue topics and broad groupings to which it relates, based on the information provided by the submitting entity and many entries relate to more than one and are considered under each. Each section of chapters IV and V opens with a summary of the information received and describes a selection of entries.[9] Examples have been selected to illustrate the range of information received, they are not exhaustive and they should not be understood as implying an assessment of the entries described or of those not mentioned. This annex describes the information received, and is not intended to provide the full scope of the work of the entities concerned that might be relevant to just transition. The number of entries provided by an entity should not be read as indicative of the scale of its work relevant to just transitions. Likewise, where an entity in the United Nations system is not included in this mapping, this reflects the information received and not necessarily an absence of relevant activities.

12. Geographic scope and target beneficiaries are described as reported by each entity and range from named localities to regions or global coverage. In chapters IV and V, activities are described at a summary level, without reference to individual countries or to numbers of beneficiaries, as such detail, where provided, is contained in annex III. Each entry presents an instrument or activity from the perspective of the entity offering it and the mapping does not capture how Parties or others have used it. Where an entity in the United Nations system does not appear, this reflects the information received and not necessarily an absence of relevant activity.

13. Some entries do not refer to just transition explicitly but were identified as relevant to the work programme by those providing the information, for example in relation to aspects identified in the key messages recognized in decision 2/CMA.7, paragraph 12.

III. Instruments, initiatives and processes under the Convention and the Paris Agreement

14. This chapter describes the 56 entries compiled by the secretariat on instruments, initiatives and processes under the Convention and the Paris Agreement that were identified as relevant to the design, implementation and support of just transition pathways. The information is presented in the four clusters described in chapter II.A. The examples below have been selected to illustrate the range of information received and are not exhaustive. All entries provided across teams are reproduced in annex II.

15. In some entries, just transition is referred to explicitly in the relevant mandate, decision, workplan or output. Others were identified as relevant because they address aspects

development priorities; (d) approaches to enhancing adaptation and climate resilience at the national and international level; (e) just transition of the workforce and the creation of decent work and quality jobs in accordance with nationally defined development priorities, including through social dialogue, social protection and the recognition of labour rights; (f) inclusive and participatory approaches to just transitions that leave no one behind; (g) international cooperation as an enabler of just transition pathways towards achieving the goals of the Paris Agreement.

[9] Entries are generally referred to by the name of the submitting entity and the title of the entry as submitted; implementing partners are named in some cases, and the partners identified in each entry are reproduced in annex III. Some entries are described without their title for brevity. Full entries, including links to publicly available material, are reproduced in annex III.

identified in the key messages recognized by CMA 7, such as participation, social protection, locally led adaptation and gender equality.[10] Several entries also relate to the national climate plans, policies and strategies, including nationally determined contributions (NDCs), national adaptation plans (NAPs) and long-term low greenhouse gas emission development strategies (LT-LEDS), through which, as recognized by CMA 7, nationally determined just transition pathways are implemented at the national level.[11]

A. Work programmes, UNFCCC constituted bodies and other processes

16. This cluster comprises work programmes, UNFCCC constituted bodies and other processes, such as the Sharm el-Sheikh mitigation ambition and implementation work programme, the forum on the impact of the implementation of response measures, the enhanced Lima work programme on gender, the Glasgow work programme on Action for Climate Empowerment, the Local Communities and Indigenous Peoples Platform, the Paris Committee on Capacity-building, processes related to finance and the framework for non-market approaches referred to in Article 6.8 of the Paris Agreement . In several of them, just transition is referred to in the relevant mandate or workplan and the examples below describe how this is reflected in more detail.

17. The scope of the Sharm el-Sheikh mitigation ambition and implementation work programme includes just transitions, alongside relevant enabling conditions, technologies and cross-cutting issues, and the investment-focused events under the work programme are to be organized with a view to unlocking finance, including for just transitions.[12]

18. One of the four work programme areas of the forum on the impact of the implementation of response measures and its Katowice Committee of Experts on the Impacts of the Implementation of Response Measures is just transition of the workforce and the creation of decent work and quality jobs. The forum and the Committee implement a workplan for 2026–2030, and the Committee produces technical papers and case studies and implements a capacity-building programme on the impacts of the implementation of response measures.[13]

19. The enhanced Lima work programme on gender takes into account the imperatives of a just transition of the workforce and the creation of decent work and quality jobs. It also links gender-responsive implementation and means of implementation of climate policy and action to raising ambition, enhancing gender equality and the workforce dimensions of just transitions.[14] The Belém gender action plan provides for a high-level event and a related technical dialogue at the thirty-first session of the Conference of the Parties (COP). The event is to focus on how Parties are engaging all women and girls, men and boys as agents of change for socially just transitions.[15] Earlier outputs include an in-session workshop held by the International Labour Organization (ILO) and the UNFCCC at COP 28 on delivering gender-responsive just transitions.[16]

20. Several processes provide avenues for the participation of those affected by transitions. The Glasgow work programme on Action for Climate Empowerment (ACE) supports public empowerment and engagement for equitable, effective and just transitions. Through its pillar on public engagement in climate policy, the ACE Hub promotes climate literacy and public participation in climate policy.[17] An in-session ACE event organized with

[17] Decisions 18/CP.26 and 22/CMA.3. Additional information on the ACE Hub can be found at https://unfccc.int/ace-hub.

the COP 28 Presidency raised awareness of how the ACE toolbox may be incorporated in the design and implementation of strategies for just transitions.[18]

21. The Local Communities and Indigenous Peoples Platform was established to enhance the engagement of Indigenous Peoples and local communities in the UNFCCC process. Under the Platform's workplans, its Facilitative Working Group convenes global and regional gatherings of knowledge holders and practitioners from Indigenous Peoples and local communities and facilitates intergenerational dialogues at COP sessions. Under the Baku workplan, it is also compiling case stories that document the knowledge systems, perspectives and experiences of Indigenous Peoples and local communities. These activities can inform discussions under the work programme and its review by providing perspectives on just transitions grounded in Indigenous values, worldviews and local knowledge systems.[19]

22. Just transitions also feature in processes related to finance. The decision on the new collective quantified goal on climate finance recognizes the importance of continued efforts to support just transitions across all sectors and thematic areas, and cross-cutting efforts, including transparency, readiness, capacity-building and technology development and transfer, in developing country Parties.[20] The Baku to Belém Roadmap to USD 1.3 trillion, a report published by the COP 29 and COP 30 Presidencies in 2025, links just transition finance to social protection, education, skills development, reskilling and regional economic diversification.[21] The 2025 workshops under the Sharm el-Sheikh dialogue on Article 2, paragraph 1(c), of the Paris Agreement and its complementarity with Article 9 included transition planning and financing just transition pathways as a dedicated discussion topic. Country platforms and Just Energy Transition Partnerships were discussed as examples of approaches to mobilizing finance for nationally determined transition priorities.[22] The workplan of the Veredas Dialogue, which builds on that dialogue, was expected to have substantive linkages with just transition work in 2026. While some submissions under the work programme on climate finance established at CMA 7 contain elements on just transitions, the direction of that work programme and its activities remain to be defined.[23]

23. The framework for non-market approaches referred to in Article 6, paragraph 8, of the Paris Agreement facilitates voluntary international cooperation between Parties, including through finance, technology development and transfer and capacity-building. The decision on its work programme takes into account the imperatives of a just transition of the workforce and the creation of decent work and quality jobs.[24] The Paris Committee on Capacity-building addressed capacities for translating climate plans into investable projects through its 2025–2026 focus area on holistic investment strategies, bankable projects and stakeholder engagement, which ended in June 2026. Its new focus area is also to address finance and the links between the climate and national development landscapes. Its Capacity-building Hub, the eighth edition of which will take place at COP 31, has featured energy transition and gender-just transitions, and the energy cluster of its network promotes skills development and peer-to-peer learning across the energy value chain.[25]

B. Reports and knowledge products

24. Reports and knowledge products prepared under the Convention and the Paris Agreement also contain information relevant to just transitions. They fall into two broad groups: synthesis and transparency reports that describe how Parties are reflecting just transitions in their national climate planning and action, and knowledge products and guidance prepared by or with constituted bodies.

25. According to the 2026 synthesis report on NDCs, 82 per cent of Parties considered just transition in preparing their NDCs, across mitigation, adaptation and means of implementation, and for a variety of sectors and stakeholders, which points to a whole-of-economy and whole-of-society approach. Some Parties described just transition as helping to ensure that the shift to low-carbon, climate-resilient economies does not exacerbate existing or create new inequalities. Indicators for tracking just transitions as part of NDC implementation were explicitly included or envisaged by 13 per cent of Parties, some of which proposed integrating them into their measurement, reporting and verification systems.[26] The synthesis of information reported in biennial transparency reports notes that several Parties reported information related to just transition policies to mitigate the negative impacts of structural changes to economies arising from energy transitions. Parties also described social and economic co-benefits of climate action, including improved public health and the creation of green jobs.[27] Under the enhanced transparency framework, the facilitative multilateral consideration of progress offers a space for exchanging experience and good practices, including on ways to foster just transition pathways.[28]

26. Constituted bodies have also prepared knowledge products relevant to just transitions. The Standing Committee on Finance dedicated its 2023 Forum to financing just transitions.[29] Its sixth Biennial Assessment and Overview of Climate Finance Flows refers to the work programme and notes growing work on measuring the impacts of climate finance in the areas of resilience and just transitions.[30] Its second report on the determination of the needs of developing country Parties does not focus explicitly on just transition pathways but provides information on sectoral investment needs, means of implementation and country-level planning processes that may help inform discussions on financing and implementing equitable transition pathways.[31] CMA 5 encouraged consideration of the relevant outcomes of the work programme by UNFCCC constituted bodies.[32] In that context, the Technology Executive Committee, in partnership with UNIDO and the UNEP Copenhagen Climate Centre, developed a guidebook for technology needs assessments on renewable energy with aspects of just transition (2025).[33] The second edition of the step-by-step guidebook for technology needs assessments, developed by the UNEP Copenhagen Climate Centre with inputs from the Technology Executive Committee, includes just transition aspects among the criteria for technology prioritization.[34] The updated technical guidelines for national adaptation plans prepared by the Least Developed Countries Expert Group recognize the

[26] FCCC/PA/CMA/2026/9, para. 10.

process to formulate and implement national adaptation plans as an important vehicle for embedding just transition pathways in national adaptation planning.[35]

C. Guidance to, and the strategies of, the operating entities of the Financial Mechanism and other funds

27. Guidance from the COP and the CMA to the operating entities of the Financial Mechanism has addressed just transitions, and the strategies and modalities of the funds covered in this cluster either refer to just transitions or emphasize related aspects.

28. CMA 4 requested the Board of the Green Climate Fund (GCF) to consider how to enhance support for just transitions of developing countries across economic sectors.[36] The GCF Strategic Plan for 2024–2027 identifies just transitions as part of its mitigation and adaptation programming priorities and commits the Fund to incorporating the evolving understanding of just and equitable transition pathways under the Convention and the Paris Agreement.[37] COP 29 invited the Global Environment Facility (GEF), in the context of programming for the climate change focal area under its ninth replenishment, to consider, inter alia, working with developing countries on ways of incorporating just transition elements into national climate plans and programmes.[38] The climate change focal area strategy for the ninth replenishment, on "Integrated Long-Term Net-Zero Planning and Just Transition", includes proposed support for job retraining and reskilling programmes, social protection measures and multi-stakeholder platforms, among other things.[39]

29. The strategies and implementation modalities of the Adaptation Fund, the Least Developed Countries Fund (LDCF) and the Special Climate Change Fund (SCCF), and the Fund for responding to Loss and Damage do not refer to just transitions explicitly but were identified as relevant because they emphasize aspects identified in the key messages recognized by CMA 7, such as participation, social protection and locally led adaptation.[40] The Medium-Term Strategy 2023–2027 of the Adaptation Fund emphasizes locally led adaptation, the empowerment of vulnerable groups, gender equality and inclusive governance. The programming strategy of the LDCF and the SCCF for the GEF-9 period emphasizes whole-of-society and locally led adaptation approaches, adaptive social protection, climate-resilient livelihoods and green jobs, and equitable access to adaptation finance. The Barbados Implementation Modalities of the Fund for responding to Loss and Damage reflect country-led and country-owned approaches, stakeholder engagement, attention to the needs of climate-vulnerable communities and equitable, safe and dignified approaches to displacement, relocation and migration.[41]

D. Global climate action

30. This cluster comprises 22 Plans to Accelerate Solutions and the Granary of Solutions under the Global Climate Action Agenda.

---

31. Initiatives under the Marrakech Partnership for Global Climate Action, supported by the Climate High-Level Champions, refer to just transitions across several themes. Plans to Accelerate Solutions include plans on just and inclusive planning of the energy transition, including just transition indicators and inclusive data systems; accelerating coal transitions in a just and orderly manner; and new skills development for women and youth.[42] Other plans address the social dimensions of sectoral transitions, including the retraining of seafarers, workforce reskilling in green industrial hubs and corridors, climate-resilient social protection and finance for smallholder agriculture, and just solutions for climate mobility.[43] Further plans refer to just transitions in relation to universal access to electricity, public procurement in high-impact sectors and the protection of environmental defenders.[44] The Granary of Solutions brings together related case studies, including on skills for the energy sector and inclusive energy transitions.[45]

IV. Relevant entities in the United Nations system: overview by dialogue topic

32. This chapter describes the information provided by entities in the United Nations system under the topics of the six dialogues. The entries received reflect a broad range of mandates within the United Nations system, from labour, human rights and social development to finance, trade, technology, disaster risk reduction and scientific assessment. Most entities describe at least some of their activities explicitly in terms of relevance to just transitions. Other entities have identified their respective activities on finance, trade, technology and training as relevant to the work programme without explicit reference to just transitions.

33. Information was received in relation to all six dialogue topics, with entries relating to the workforce and whole-of-society approaches, and to adaptation and climate resilience, each provided by more than 20 entities. Many entities refer to workers and local communities, as well as to women and young people. Entries also refer to Indigenous Peoples, informal workers, migrants, persons with disabilities and children, all of whom are among the groups explicitly identified in the key messages recognized by CMA 7.[46] The information received also includes entries on the ILO Guidelines for a just transition towards environmentally sustainable economies and societies for all and on the Global Accelerator on Jobs and Social Protection for Just Transitions, both referred to in decision 2/CMA.7, paragraph 18, as well as entries that refer to the other instruments mentioned in that paragraph, namely the United Nations Guiding Principles on Business and Human Rights and the United Nations Declaration on the Rights of Indigenous Peoples.[47]

34. Several themes recur across topics. National climate plans, including NDCs, NAPs and LT-LEDS, are a common point of reference for activities described under several topics. Social protection and skills development recur in entries relating to the workforce, adaptation and food security. Human rights frameworks are referred to in entries relating to energy and

[42] Additional information on the plans on energy transition planning, coal transitions and skills development can be found at https://climateaction.unfccc.int/assets/documents/106_.pdf, https://climateaction.unfccc.int/assets/documents/37_.pdf and https://climateaction.unfccc.int/assets/documents/69_.pdf, respectively.

[43] Additional information on the plans on the maritime sector, green industrial hubs and corridors, climate-resilient social protection and climate mobility can be found at https://climateaction.unfccc.int/assets/documents/25_.pdf, https://climateaction.unfccc.int/assets/documents/12_.pdf, https://climateaction.unfccc.int/assets/documents/94_.pdf and https://climateaction.unfccc.int/assets/documents/70_.pdf, respectively.

[44] Additional information on the plans on universal access to electricity, public procurement and the protection of environmental defenders can be found at https://climateaction.unfccc.int/assets/documents/105_.pdf, https://climateaction.unfccc.int/assets/documents/47_.pdf and https://climateaction.unfccc.int/assets/documents/39_.pdf, respectively.

[45] Additional information can be found at https://cop30.br/en/action-agenda/granary-of-solutions-1.

[46] Decision 2/CMA.7, para. 12(d).

[47] Decision 2/CMA.7, para. 18.

food security and more than half of the entities refer to finance, including blended finance and the strengthening of national financial institutions. Most entities also describe activities undertaken jointly with other entities in the United Nations system.

B. Just transition pathways to achieving the goals of the Paris Agreement through NDCs, NAPs and LT-LEDS

35. Entries received in relation to this topic refer mainly to the preparation and implementation of NDCs, NAPs and LT-LEDS, and to methods for taking particular groups and dimensions, such as gender, human mobility, small business and trade, and disaster risk reduction, into account in those plans. Many entries described under other topics, including those relating to the workforce, adaptation and agrifood systems, also refer to national plans (see chap. IV.B, C and E below). Many of the activities described are aimed at integrating just transition considerations, including the assessment of social and employment impacts, stakeholder engagement and finance, into the preparation, implementation and reporting of national plans. Information relevant to this topic was provided by FAO, the ILO, IOM, ITC, UN Women, UNCDF, UNCTAD, UNDP, UNDRR, UNEP, UNESCO, UNFPA, UNIDO and WMO.

36. By way of example, UNDP reports that, through its Climate Promise, it supports countries in integrating just transition principles, processes and practices into the design and implementation of NDCs, NAPs and LT-LEDS.[48] According to UNDP, this work is organized around five building blocks: transition impact assessment; stakeholder engagement and social dialogue; policy, institutional and capacity-building support; transition finance; and monitoring and reporting.

37. FAO reports that the Scaling up Climate Ambition on Land Use and Agriculture through NDCs and NAPs (SCALA) programme, a joint FAO–UNDP programme, supports countries in translating NDC and NAP priorities in land use and agriculture into appraised, budgeted and financed actions.[49] The programme's gender and social inclusion strategy is described as requiring social analysis, inclusive consultation and equitable allocation of resources.

38. Entities also report methods for addressing specific dimensions of national plans. UN Women reports a methodology, developed with the Global Green Growth Institute, for integrating gender considerations into LT-LEDS.[50] IOM reports a technical guide, prepared by the Task Force on Displacement of the Warsaw International Mechanism for Loss and Damage under the lead of IOM, with recommendations for integrating dimensions of human mobility, from labour migration to diaspora engagement, into national climate change planning processes.[51] ITC reports a guide, prepared with UNCTAD, that sets out a five-step approach to integrating small business perspectives into the development and implementation of NDCs,[52] and UNDRR reports a supplement to the technical guidelines for the NAP process on integrating disaster risk reduction into NAPs.[53]

[48] Additional information can be found at https://climatepromise.undp.org/what-we-do/areas-of-work/just-transition.

[49] Additional information can be found at https://www.fao.org/in-action/scala/en.

[52] Additional information can be found at https://www.intracen.org/resources/publications/small-business-and-trade-with-ndc.

[53] UNDRR. 2021. Promoting synergy and alignment between climate change adaptation and disaster risk reduction in the context of national adaptation plans: A supplement to the UNFCCC NAP Technical Guidelines. Available at https://www.undrr.org/quick/65984.

C. Ensuring support for people-centric and equitable just transition pathways with a focus on the whole-of-society approach and the workforce

39. Entries received in relation to this topic include knowledge products and events, such as research and webinars on care work, gender and labour, and research on labour migration and diaspora engagement. They also include entries on employment, skills and social protection that can be broadly categorized as country-level programmes and projects, normative frameworks and guidance, capacity-building and training, and partnerships and coordination initiatives. The entries refer not only to workers in sectors directly affected by transitions but also to people in care work, informal and subsistence livelihoods and labour migration. Many of the programmes described combine several measures, such as skills development, social protection, enterprise development and access to finance, and entries frequently refer to the participation of workers, employers and affected communities in the design of such measures. Skills development links this topic to the information on food security (see chap. IV.E below) and to the entries described in chapter V.E, and social protection links it to the information on adaptation (see chap. IV.C below). Information relevant to this topic was provided by the BRS Secretariat, FAO, the ILO, the IMF, IOM, the IPCC, ITC, ITU, the Joint SDG Fund, OHCHR, UN Tourism, UN Women, UNCDF, UNDP, UNECE, UNEP, UNESCO, UNFPA, UNICEF, UNIDO, UNPFII, UNRISD and the World Bank Group.

40. For instance, ILO reports a project in a mangrove delta region that works with women engaged in subsistence farming, aquaculture and dead wood collection to develop value chains and establish cooperatives and microenterprises, and to improve their access to social protection.

41. The Joint SDG Fund, which serves as a financing vehicle for the Global Accelerator on Jobs and Social Protection for Just Transitions, describes the Global Accelerator, launched by the Secretary-General in 2021, as a United Nations system-wide platform for the creation of decent jobs and the extension of social protection, implemented through national roadmaps in pathfinder countries.[54] The Fund reports having approved joint programmes in support of it, including with World Bank country offices, and notes that most pathfinder countries have identified climate change and just transitions as a priority in their national roadmaps.

42. Other examples include the Global Initiative on Labour Migration and Climate Resilience (2025–2027) of IOM, which IOM reports aims to link climate action with labour migration policies and programming,[55] and a joint programme, reported by UNCDF and implemented by FAO (as lead), the ILO and UNCDF, that provides vocational training for young people and women, diversifies agricultural value chains through climate-smart farming, and offers mobile banking and parametric micro-insurance to vulnerable households. The World Bank Group reports research by IFC, *Hidden Potential: Accelerating Inclusive Jobs in the Green Transition* (2026), which examines how existing labour market inequalities can limit women's access to green jobs and identifies measures to expand their participation. An accompanying action guide sets out practical actions for companies and investors, including on skills, recruitment, supply chains, women-led businesses and climate finance.[56]

D. Approaches to enhancing adaptation and climate resilience in the context of just transitions

43. Many of the entries received in relation to this topic address just transition considerations in terms of how climate risks, and the means to manage them, are distributed

[54] Additional information can be found at https://www.unglobalaccelerator.org/.

[55] Additional information can be found at https://www.iom.int/empowering-climate-resilience-through-labour-migration-global-initiative.

[56] IFC. 2026. Hidden Potential: Accelerating Inclusive Jobs in the Green Transition. Washington, D.C.: IFC. Available at https://www.ifc.org/en/insights-reports/2026/accelerating-inclusive-jobs-in-the-green-transition.

across groups and places. They refer mainly to activities at the level of local governments, communities and small enterprises; to data and tools on hazards, exposure and losses; and to guidance on integrating disaster risk reduction and adaptation, together with partnerships such as Early Warnings for All. Risk-transfer instruments and social protection connect this topic with the information included under chapter IV.B above. Several entries describe the channelling of resources through local institutions, including local governments, community organizations and local financial intermediaries, and the linking of local action to national plans and budgets. Several entries also refer to extreme heat, including its effects on workers. Information relevant to this topic was provided by DOALOS, FAO, the ILO, IOM, the IPCC, ITC, ITU, the Joint SDG Fund, UN Tourism, UN Women, UNCDF, UNCTAD, UNDP, UNDRR, UNEP, UNESCO, UNFPA, UNICEF, UNIDO, UNRISD, WMO and the WTO.

44. For example, UNCDF reports that its Local Climate Adaptive Living Facility (LoCAL) links NAPs and NDCs to local planning, budgeting and investment and provides performance-based climate resilience grants to local governments, together with capacity-building and technical support.[57] According to UNCDF, LoCAL+, the next-generation evolution of the facility launched in 2026, expands the model by adding guarantees, loans and other instruments to mobilize public and private capital for locally led adaptation

45. UNCDF also reports the Pacific Insurance and Climate Adaptation Programme, which develops parametric micro- and meso-insurance for households, low-income communities, small businesses, smallholder farmers and fishers, and explores links with national social protection schemes.[58] The Joint SDG Fund reports financing for the Building Climate Resilience with the Urban Poor programme, which develops neighbourhood investment plans for climate-resilient housing, basic services and urban livelihoods.

46. UNEP reports that its Beat the Heat initiative, launched with the COP 30 Presidency, provides guidance, tools and training on heat action, passive cooling, nature-based solutions and urban design to help protect workers and communities from extreme heat.[59] UN Tourism reports that it is preparing a briefing on regenerative approaches to climate action in tourism that are place-based, participatory and community-centred and linked to local livelihoods, as a deliverable under a Plan to Accelerate Solutions.[60]

E. Just energy transition pathways and holistic approaches to just transitions, including socioeconomic, workforce, social protection and other dimensions, based on nationally defined development priorities

47. Entries received in relation to this topic refer mainly to energy planning, investment and project preparation, together with research and policy analysis and material on gender equality and on the rights of communities and Indigenous Peoples in relation to energy infrastructure and minerals. The relevant inputs provided address energy transitions both at the level of territories and affected communities and at the level of national energy systems. Much of the information relates to three areas: transitions in regions dependent on coal, where the activities described centre on regional planning involving government, industry, workers and communities; minerals used in energy transitions (referred to in the entries as critical minerals, critical energy transition minerals or energy transition minerals), where entries refer to rights, participation and the management of social and environmental impacts in extractive areas; and energy access, where planning is combined with finance. Entries also address the power sector and the macroeconomic implications of energy transitions for economies dependent on fossil fuel production. The first two areas link this topic to the information on the workforce (see chap. IV.B above) and to entries described in chapter V.A and F. Entries also link energy access with livelihood and food security objectives, including through energy for agrifood systems, cold storage and clean cooking. Information relevant to this topic was provided by the BRS Secretariat, FAO, the ILO, the IMF, IOM, the IPCC, the Joint

[57] Additional information can be found at https://www.uncdf.org/local/homepage.

[60] The entry is reproduced in annex III.

SDG Fund, OHCHR, UN Women, UNCDF, UNDP, UNECE, UNEP, UNIDO, UNPFII, UNRISD, WMO and the World Bank Group.

48. As an illustration, ILO reports that the Innovation Regions for a Just Energy Transition project, which it implements as part of a consortium of partners, works with government, industry, trade unions, communities, civil society and academia in coal regions. According to the ILO, the project supports the development of local pathways to sustainable energy systems, economies and jobs, together with peer exchange, technical assistance and policy dialogue across a network of regions.[61] At the level of national energy systems, the World Bank Group refers to a 2023 report that sets out an approach to expanding affordable and reliable clean energy while creating the conditions to phase down coal power in low- and middle-income countries, and to a 2024 follow-on report that examines approaches to managing transition costs, reusing assets and addressing the impacts on affected stakeholders.[62] Addressing economies dependent on fossil fuel production, the IMF reports analysis that has examined the economic consequences of large extraction declines[63] and the challenges facing fossil fuel exporters during the energy transition.[64]

49. UNECE reports just transition country studies and roadmaps that assess potential employment and social impacts, governance arrangements and measures to support affected workers and communities.[65] UNDP reports work with countries on integrated and inclusive energy transition pathways linked to industrial development, jobs and investment. The World Bank Group refers to a 2025 report, Fostering a Just Transition in the Energy Transition Minerals Sector in the Eastern and Southern Africa Region, which examines how mineral development can support more inclusive development while addressing risks of exclusion and fragility.[66] OHCHR refers to a report of the Special Rapporteur on human rights and climate change, presented to the General Assembly in October 2025, which synthesizes evidence of the positive and negative human rights impacts of renewable energy development and its reliance on minerals.[67]

F. Just transition pathways for holistic approaches to food security, including with a focus on agriculture and oceans, in the context of element (c), paragraph 2, of decision 3/CMA.5

50. Entries received in relation to this topic refer mainly to those who produce food, including smallholders, fishers, women, producer organizations and rural enterprises, and to their access to finance, markets and secure tenure. Entries on oceans and fisheries refer to international legal frameworks, assessment, data and training. Several entries describe resources channelled directly to producers and their organizations, including through grants, savings groups and women's networks managing adaptation funds, together with activities to facilitate their participation in policy processes. The agricultural components of NDCs and

[67] A/80/188. Available at https://www.ohchr.org/en/documents/thematic-reports/a80188-human-rights-based-approach-energy-transition.

NAPs link this topic to that on national plans and adaptation (see chap. IV.A and C above), and tenure and right-to-food frameworks link it to the entries described in chapter V.A. Information relevant to this topic was provided by DOALOS, FAO, the ILO, IOM, the IPCC, ITC, the Joint SDG Fund, UN DESA, UNCDF, UNCTAD, UNESCO, UNIDO and UNRISD.

51. By way of example, FAO reports that the Forest and Farm Facility, a multi-donor partnership hosted by FAO, provides grants directly to organizations of smallholders, women, Indigenous Peoples and local communities, with technical assistance to strengthen their participation in policy processes, enterprise development and access to markets and finance.[68]

52. FAO also reports that the second phase of its Food Security and Agriculture: Accelerating Adaptation programme supports the planning, implementation and monitoring of the adaptation components of NDCs and NAPs for agricultural sectors, through activities that include gender-sensitive farmer field schools and savings groups, and pilots enabling women's networks to access and manage adaptation funds directly.[69] UNCDF reports that it leads the financial facility of a programme, in its initiation phase, that aims to reduce post-harvest losses for smallholder farmers through solar-powered cold chain services.

53. Several entries combine food security with finance for enterprises and value chains. UNCDF reports blended finance facilities and programmes for food systems, including a food security accelerator in Africa, a blended finance model for a poultry value chain combining loans with risk-sharing guarantees, and joint programmes that combine local finance with vocational training and climate-smart value chains (see also chap. IV.B above).[70] FAO reports a three-year initiative, from 2026, on integrating climate objectives into social protection and social protection into national climate strategies, as well as guidance on integrating human mobility and rural livelihoods into NAPs and NDCs.[71]

54. DOALOS reports on the obligations under the United Nations Fish Stocks Agreement relating to the adaptive, precautionary and ecosystem-based management of high seas fisheries, noting that the 2024 informal consultations of States Parties to that Agreement focused on sustainable fisheries management in the face of climate change.[72] UNCTAD and UN DESA report a project that aims to strengthen the ability of small island developing States in the Caribbean to monitor and analyse maritime transport, trade, fisheries and related greenhouse gas emissions using artificial intelligence and data.[73]

55. Within its Man and the Biosphere Programme, UNESCO reports initiatives in biosphere reserves that link the conservation of ecosystems with livelihoods, including an initiative with women beekeepers in 10 countries.[74]

[68] Additional information can be found at https://www.fao.org/forest-farm-facility/en/.

[69] Additional information can be found at https://www.fao.org/in-action/saga/en/.

[70] The entries, including the Food Security Accelerator, Leveraging Public and Private Sector Investments in Sustainable Food (Poultry) Value Chains and the Livelihood Enhancement and Economic Diversification Programme implemented with FAO and the ILO, are reproduced in annex III.

[71] Additional information can be found at https://www.fao.org/social-protection/news-and-events/news/news-detail/fao-and-ireland-join-forces-to-strengthen-social-protection-systems-for-inclusive-climate-action-in-agrifood-systems/en, https://openknowledge.fao.org/items/756cffc9-2203-4876-b765-af583c7a5504 and https://openknowledge.fao.org/items/2724c1d9-f6d3-46f0-b0d0-e27e0046001e.

G. Holistic approaches to nationally determined just transition pathways for the industry sector: technology, innovation and equitable value chains

56. Entries received in relation to this topic refer mainly to industrial decarbonization and to enterprises and workplaces, including the competitiveness of small and medium-sized enterprises, access to technology and working conditions in waste management and the environmental and social impacts of mining. They also include partnerships on industry, buildings and construction (see chap. V.F below) and information on digital technologies and on science, technology and innovation. Several entries describe programmes that combine decarbonization or resource-efficiency objectives with improvements in working conditions and the inclusion of informal workers. Entries address access to technology through information platforms, intellectual property services and grant financing for demonstration projects, and equitable value chains through standards, traceability and enterprise development. The information on mining and minerals links this topic to that on energy (see chap. IV.D above), and the information on technology and value chains links it to that on trade (see chap. IV.G below). Information relevant to this topic was provided by the BRS Secretariat, the ILO, the IMF, the IPCC, ITC, ITU, UN DESA, UN Tourism, UNCDF, UNCTAD, UNDP, UNEP, UNESCO, UNFPA, UNIDO, WIPO, the World Bank Group and the WTO.

57. As an example, UNIDO reports that its Global Eco-Industrial Parks Programme helps industrial parks in developing countries to decarbonize while improving resource efficiency, competitiveness and working conditions, with a particular focus on small and medium-sized enterprises and local communities.

58. UNDP reports that the Environmental Governance Programme on Mining, implemented with the Swedish Environmental Protection Agency, aims to minimize the environmental and social impacts of mining, including the extraction of critical raw materials. Its work covers environmental and social impact assessment, gender and mining, participatory environmental monitoring and mine closure.[75] Under the Basel Convention, the framework and toolkit for the environmentally sound management of wastes reported by the BRS Secretariat include guidance on the informal sector that addresses the recognition and organization of waste workers, their participation in local waste planning, training and safer practices.[76]

59. WIPO reports that WIPO GREEN, an online platform operating since 2013, connects providers and seekers of environmentally friendly technologies.[77] WIPO also reports programmes, coordinated with publishers and patent information providers, that offer free or low-cost access to academic research and patent information to institutions in selected developing countries.

60. Other entries address digital technologies, green industrialization and science, technology and innovation. ITU reports a multi-stakeholder initiative advancing implementation of the COP 29 Declaration on Green Digital Action.[78] UNIDO reports a Global Matchmaking Platform that matches requests from emerging market and developing economies for green industrialization projects with technical and financial assistance, and also reports on the Global Green Industrialization Agenda, which is to be launched by the COP 31 Presidency as the outcome of the Belém Declaration on Global Green Industrialization.[79] UNESCO reports a toolkit for policymakers on governing artificial intelligence within planetary boundaries, which, according to the entry, was due to be

launched in September 2026, and assessments of national science, technology and innovation systems.[80]

V. Relevant entities in the United Nations system: overview by nature of activity

61. This chapter describes the inputs received from United Nations system entities according to the nature of the activities and contributions reported. Entries can be broadly categorized as normative frameworks and guidance; knowledge products and evidence; tools, data and platforms; country-level programmes and projects; capacity-building and training; or partnerships and coordination initiatives. These broad and general groupings are merely indicative and serve only to help describe the information received in a more accessible manner: many entries fit more than one, and most entities provided entries that fit several. Examples already described in chapter IV are not repeated.

B. Normative frameworks and guidance

62. Entries that can be broadly categorized as normative frameworks and guidance include instruments adopted by governing, intergovernmental, treaty and expert bodies, and guidance prepared by entities on how such instruments, and just transition considerations more broadly, may be applied in national policy. Entities refer both to frameworks that address just transition directly and to broader bodies of international labour, human rights and environmental law that they consider applicable to transitions. These cover procedural as well as substantive dimensions: participation, consultation and free, prior and informed consent are referred to alongside the protection of rights and livelihoods. Labour and human rights frameworks are also referred to in much of the information on the workforce, energy and food security (see chap. IV.B, D and E above). Entries of this kind were provided by the BRS Secretariat, DOALOS, FAO, the ILO, IOM, ITC, ITU, OHCHR, UN Tourism, UN Women, UNCTAD, UNDP, UNDRR, UNECE, UNEP, UNESCO, UNICEF, UNIDO, UNPFII, UNRISD, WMO and the World Bank Group.

63. Some frameworks address just transition directly. The ILO describes its 2015 *Guidelines for a just transition towards environmentally sustainable economies and societies for all* as "both a policy framework and a practical tool".[81] They cover macroeconomic and growth policies; industrial and sectoral policies; enterprise policies; skills development; occupational safety and health; social protection; active labour market policies; rights; and social dialogue and tripartism, with gender equality as a cross-cutting element. According to the ILO, a 2023 resolution of the International Labour Conference endorsed the Guidelines as the central reference for policymaking and a basis for action.[82] UNDP reports a regional adaptation of the Guidelines for Latin America, prepared with the ILO, with a focus on gender equality. The UNECE *Guiding Principles for Just Transition* are described as setting out four pillars (participatory governance, workers' protection and empowerment, environmental responsibility and economic success), underpinned by foundational principles that include planning for and financing the transition and measuring and reporting outcomes.[83]

[80] Additional information on the toolkit can be found at https://www.unesco.org/ethics-ai/en/node/288. The entries are reproduced in annex III.

[81] ILO. 2015. Guidelines for a just transition towards environmentally sustainable economies and societies for all. Geneva: ILO. Available at https://www.ilo.org/publications/guidelines-just-transition-towards-environmentally-sustainable-economies.

[82] ILO. 2023. Resolution concerning a just transition towards environmentally sustainable economies and societies for all. International Labour Conference, 111th Session. Geneva: ILO. [83] UNECE. 2025. Guiding Principles for Just Transition. Geneva: UNECE. Available at https://unece.org/sed/documents/2026/03/reports/unece-guiding-principles-just-transition.

64. Other entries set out how human rights frameworks may apply to transitions. OHCHR refers to Human Rights Council resolution 56/8, in which the Council called upon States to implement fair and inclusive policies for transitioning from high-carbon to low-carbon economies, aligned with national development priorities.[84] It also refers to the Key Messages on a Just Transition and Human Rights, prepared with the ILO.[85] UNICEF refers to general comment No. 26 (2023) of the Committee on the Rights of the Child, which addresses States' obligations on environmental protection and climate change in relation to children's rights.[86] UNPFII reports that, at its twenty-fifth session (2026), the Permanent Forum called upon States Parties to operationalize free, prior and informed consent in national frameworks covering all just transition pathways.[87] FAO describes applying the Right to Food Guidelines as a normative and operational basis for just transition pathways,[88] and reports work on securing land, forest and fisheries tenure where climate, restoration and energy transitions increase pressure on these resources.

65. DOALOS describes treaty frameworks on the ocean. For example, it reports that the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction provides a framework for action on the impacts of climate change on marine biodiversity.[89]

66. Other entries describe instruments adopted by governing or intergovernmental bodies that guide the work of entities on climate change and transitions. These include resolutions of ITU on information and communication technologies, the environment and climate change;[90] the Recommendation on the Ethics of Artificial Intelligence and the Recommendations on Open Science and on Science and Scientific Researchers adopted by the General Conference of UNESCO;[91] and the Global Compact for Safe, Orderly and Regular Migration, which IOM describes as a framework for managing mobility that addresses the climate drivers of displacement and regular labour migration pathways.[92]

C. Knowledge products and evidence

67. Entries that can be broadly categorized as knowledge products and evidence include scientific assessment, research and policy analysis, reports to intergovernmental bodies, and events. Many address the distributional dimensions of transitions, namely who is affected, in what ways and with what implications for policy. Some research is described as drawing on the perspectives of the groups concerned, and one assessment as drawing on Indigenous, traditional and local knowledge. Entries of this kind were provided by the BRS Secretariat, DOALOS, FAO, the ILO, the IMF, IOM, the IPCC, ITC, OHCHR, UN Tourism, UN Women, UNCTAD, UNDP, UNDRR, UNECE, UNESCO, UNFPA, UNICEF, UNIDO, UNPFII, UNRISD, UNSSC, WMO, the World Bank Group and the WTO.

68. Entries on scientific assessment were provided by the IPCC, WMO and DOALOS. According to the IPCC, the outline of the Working Group III contribution to its Seventh Assessment Report addresses distributional consequences and the livelihood and economic impacts of transitions related to mitigation. The outline of its *Special Report on Climate Change and Cities* includes "urban vulnerabilities, marginalized areas and people, gender,

[92] General Assembly resolution 73/195.

equity, informality and justice".[93] WMO describes its annual *State of the Global Climate* report as an assessment of the climate system and its socioeconomic impacts.[94] DOALOS reports that the third *World Ocean Assessment* (2026) includes cross-cutting themes on gender and equity and draws on Indigenous, traditional owner and local community knowledge.[95]

69. Research and policy analysis address the situation of specific groups in transitions. As an illustration, UNRISD reports that its 2025 report *Just Transition and Care Work: An International Inquiry* draws on the perspectives of people working in housework and care, peasant and Indigenous food provision, community-led conservation and restoration, healthcare and education.[96] UNRISD also reports case studies that examine, among other examples, the Green Livelihood Campaign of the Self-Employed Women's Association and a gender-just transition toolkit developed by a national trade union confederation. UNICEF reports *Children's Rights in the Just Green Transition*, a research report on the implications of just transition pathways for children's rights, and *Children's Voices on Just Transition*, which presents children's and young people's own perspectives on transition pathways.[97] The IOM issue brief *Green Light: Unlocking Labour Migration Pathways for a Just Transition* is described as examining the role of migrant workers in just transitions.[98] From a macroeconomic and fiscal perspective, the IMF reports analysis of the poverty and distributional impacts of carbon pricing and of the fiscal implications of global decarbonization, as well as the Staff Climate Note Getting on Track to Net Zero: *Accelerating a Global Just Transition in This Decade* (2022).[99]

70. OHCHR refers to a synthesis report of the Secretary-General on opportunities, best practices, actionable solutions, challenges and barriers relevant to just transition and the full realization of human rights for all people.[100] UNECE describes its publication *Good Practices for Just Transition* as compiling international experience on planning approaches, financing models, worker-support measures and governance arrangements.[101]

71. Events are also reported. For instance, the ILO reports that the Just Transition Pavilion, convened since 2022 by the ILO and the European Commission with employers'

and workers' organizations and the UNFCCC, provides a space at sessions of the Conference of the Parties for dialogue among governments, workers' and employers' organizations and other stakeholders on the employment and social dimensions of climate action.[102] UNRISD also reports webinars, workshops and side events, including at COP 30.

D. Tools, data and platforms

72. Entries that can be broadly categorized as tools, data and platforms include tools for policy design, data on exposure to climate risks and on losses, and methods that combine technical data with local knowledge. They are described as intended to help assess the social and economic effects of transitions and of climate impacts and to identify those affected, and many relate to the planning processes and adaptation measures described in chapter IV.A and C. Entries of this kind were provided by the BRS Secretariat, FAO, the ILO, the IMF, the IPCC, ITC, ITU, UN Women, UNCTAD, UNDP, UNDRR, UNEP, UNESCO, UNFPA, UNICEF, UNIDO, UNPFII, UNRISD, WIPO, WMO and the World Bank Group.

73. Some tools are intended to inform policy design. By way of example, the ILO reports that its Just Transition Policy Gateway is designed to provide a searchable collection of policies and instruments that link labour markets, ecological transition and socioeconomic development, complemented by a policy help desk.[103] The ILO describes its Just Transition Assessment Model as allowing national strategies to be tested against scenarios for their effects on employment, growth, emissions and equity. Focusing on the private sector, the World Bank Group Just Transition Tool for Private Sector Activities (2025) is described as providing guidance to policymakers on developing place-based economic strategies that use private sector activity to create employment and opportunities for workers, suppliers and communities during the low-carbon transition.[104] UN Women reports a Gender Equality and Climate Policy Scorecard that assesses NDCs for their gender responsiveness across six dimensions of gender equality.[105] UNDP reports a 2026 tool for national human rights institutions on monitoring the right to a healthy environment, which includes guidance on monitoring that right in the context of just transitions.[106] ITC describes its Standards Map as allowing users to compare sustainability standards covering environmental protection, labour rights and traceability.[107]

74. Other entries provide data on exposure to climate risks and on losses. UNICEF reports that its Global Child Hazard Database, which it reported as due to be launched in the second or third quarter of 2026, is designed to compile standardized data on children's exposure to multiple hazards. UNFPA reports high-resolution population datasets for Latin America and the Caribbean, disaggregated by age and sex, developed with WorldPop and the German Aerospace Center. UNDRR describes its DELTA Resilience tool as allowing countries to record losses and damages from extreme and slow-onset events down to the lowest administrative level.[108] The IPCC Interactive Atlas is described as offering regional climate information relevant to adaptation and transition planning.[109]

75. Several entries describe methods that combine technical data with local knowledge. For example, WMO reports that its guidelines on national renewable energy atlases are being piloted in a number of countries; in one pilot, seasonal climate information for hydropower was co-produced with local stakeholders drawing on generational knowledge of river

[102] Additional information can be found at https://www.ilo.org/topics-and-sectors/just-transition-towards-environmentally-sustainable-economies-and-societies/ilo-cop30.

[109] Additional information can be found at https://interactive-atlas.ipcc.ch/.

behaviour.[110] UNESCO reports that its Climate Risk Informed Decision Analysis, a participatory method for water resources planning, has been applied in more than 25 case studies in 23 countries.[111] FAO describes its water tenure assessment methodology as providing an overview of water users and rights to support equitable allocation.[112]

E. Country-level programmes and projects

76. Entries that can be broadly categorized as country-level programmes and projects cover projects, programmes, advisory services and reviews in and for specific countries, through which guidance, knowledge products, tools and training are applied in national contexts. Many of the examples in chapter IV are of this kind. The entries refer mainly to national policy and planning, programmes at the local level, finance for investment, and trade and natural resources. Many activities are described as undertaken jointly by several entities, and some programmes as connecting national plans with local planning and budgeting. Entries of this kind were provided by the BRS Secretariat, FAO, the ILO, the IMF, IOM, ITC, ITU, the Joint SDG Fund, UN DESA, UN Women, UNCDF, UNCTAD, UNDP, UNDRR, UNECE, UNEP, UNESCO, UNFPA, UNIDO, WIPO, WMO and the World Bank Group.

77. Some programmes address national policy and planning. As an example, the ILO reports that its project Social Partners as Agents for Just Transition, covering 10 countries, focuses on strengthening the engagement of employers' and workers' organizations as countries revise their climate commitments.[113] FAO reports that its NDC Agrifood System Help Desk includes a pillar dedicated to just transitions in agrifood systems.[114] UNECE reports that it is developing and implementing pilot technical cooperation projects with countries in its region on just transition policies, strategies and roadmaps.

78. The ILO also reports national projects on a multi-stakeholder platform for just transitions, skills for green and digital jobs, micro-, small and medium-sized enterprises and their financing, and jobs and social protection in the context of green and demographic transitions.

79. Other programmes operate at the local level. For instance, IOM reports a programme (2025–2027) to increase a government's engagement with its diaspora so that the diaspora can contribute skills, expertise and financial resources to local climate resilience initiatives. UNESCO reports that its MangRes initiative restores and manages mangroves in seven biosphere reserves in Latin America through community-led, science-based projects.[115] UNCDF reports an area-based joint programme coordinating 16 United Nations entities that serves host communities, refugees and asylum seekers, persons with disabilities and smallholder households, in which UNCDF leads local finance and economic interventions.

80. Several entries describe finance for investment linked to just transitions. By way of example, UNIDO reports that its Accelerate-to-Demonstrate Facility provides grant financing for demonstration-stage climate innovation projects in developing countries.[116] WMO describes the Systematic Observations Financing Facility, a United Nations multi-partner trust fund co-founded by WMO, UNDP and UNEP, as providing grants and technical assistance for weather and climate observations to least developed countries and small island developing States.[117]

[116] Additional information can be found at https://a2dfacility.unido.org/.
[117] Additional information can be found at https://un-soff.org/.

81. Activities related to trade and natural resources are also reported. UNCTAD reports national green export reviews, carried out between 2014 and 2018, that identified sectors for the production and export of sustainable products.[118] FAO reports that it supports countries in ensuring that Indigenous Peoples, local communities and forest-dependent producers benefit from reducing emissions from deforestation and forest degradation (REDD+) and forest climate finance, including by securing land and customary rights and designing participatory benefit-sharing arrangements.[119]

F. Capacity-building and training

82. Entries that can be broadly categorized as capacity-building and training address individuals working in policy and practice, the institutions that deliver education and training, and enterprises and young people engaging in new economic activities. Many combine just transition content with established areas of expertise, such as climate policy and transparency, trade, social protection and occupational safety and health, and some bring governments, employers and workers together in the same training. This information relates to the key message on education systems and skills development, including through upskilling and reskilling,[120] and to the information on the workforce (see chap. IV.B above). Entries of this kind were provided by the BRS Secretariat, DOALOS, FAO, the ILO, ITC, ITU, UN DESA, UN Women, UNCDF, UNCTAD, UNDP, UNDRR, UNECE, UNEP, UNESCO, UNFPA, UNIDO, UNSSC, WIPO and WMO.

83. Training for policymakers and practitioners includes, for example, the programmes of the International Training Centre of the ILO, which the ILO reports offers standing and on-demand courses. These include tripartite courses on integrating just transition considerations into policies on climate plans, social protection, occupational safety and health, and skills and enterprise development.[121] UNSSC reports online courses on the Paris Agreement as a development agenda (with the UNFCCC) and on transforming economies for sustainable development (with OHCHR), as well as a blended training programme on climate transparency and the enhanced transparency framework (with the Initiative for Climate Action Transparency, the UNFCCC and the UNEP Copenhagen Climate Centre); all three are reported as offered free of charge to selected cohorts. UNCTAD reports an online course on harnessing trade to advance national climate and development goals.[122]

84. Other entries concern education and skills systems. UNESCO reports that, under the Climate Smart Education Systems Initiative, funded by the Global Partnership for Education and implemented with the International Institute for Educational Planning of UNESCO and Save the Children, it leads work on integrating climate change adaptation and resilience into curricula, learning materials and teacher education.[123] It also reports on the Greening Education Partnership, launched in 2022 at the Transforming Education Summit, which works with countries on greening schools, curricula, teacher training and communities,[124] and on work through its International Centre for Technical and Vocational Education and Training on greening institutions and curricula in that field.

85. Activities for enterprises and young people include the GreenToCompete Hubs of ITC, which ITC reports offer coaching, tools and training to small and medium-sized enterprises,[125] and its Youth Ecopreneur Programme. UNFPA describes its Climate Hacklab

[118] Additional information can be found at https://unctad.org/project/supporting-member-states-developing-and-launching-sustainable-product-export-strategies.

[125] Additional information can be found at https://environment.intracen.org/hubs/.

as combining entrepreneurship training for young people with seed funding for selected solutions.

86. DOALOS reports that, with the Nippon Foundation, it has offered fellowships since 2004 on ocean affairs and the law of the sea, including on climate impacts on the ocean, with a dedicated fellowship for small island developing States.[126] WIPO reports that it supports Technology and Innovation Support Centers, hosted by universities, research centres and business support institutions, that help inventors and entrepreneurs manage intellectual property.[127]

G. Partnerships and coordination initiatives

87. Entries that can be broadly categorized as partnerships and coordination initiatives include coordination mechanisms within the United Nations system, intergovernmental and multi-stakeholder platforms, partnerships on industry, energy and finance, and networks. They bring entities, Parties and non-Party stakeholders together around sectors such as energy, buildings, cooling, industry and agrifood systems, and around cross-cutting functions such as finance and early warning; several involve Parties directly, through intergovernmental platforms, pledges and groups of friends. Entries of this kind were provided by the BRS Secretariat, FAO, the ILO, ITU, the Joint SDG Fund, UN Tourism, UNCDF, UNCTAD, UNDP, UNDRR, UNECE, UNEP, UNESCO, UNFPA, UNIDO, UNPFII, UNRISD, WIPO and WMO.

88. Some are coordination mechanisms within the United Nations system. As an illustration, UNDP reports on UN-Energy, which brings together more than 30 United Nations entities in support of Sustainable Development Goal 7 and just energy transitions, and on the United Nations Task Force on Critical Energy Transition Minerals, operating since 2025, which is described as supporting coordinated approaches and country-level work on such minerals. The secretariat of the Permanent Forum on Indigenous Issues reports that it coordinates United Nations system inputs on Indigenous Peoples' issues.

89. Others are intergovernmental or multi-stakeholder platforms. UNEP reports that the Intergovernmental Council for Buildings and Climate convenes governments to align national buildings policies with climate goals, with the Global Alliance for Buildings and Construction as its secretariat.[128] It also reports that the Global Cooling Pledge and its Intergovernmental Committee on Cooling provide a platform for aligning national cooling action with climate plans.[129] UNECE describes its Just Transition Task Force as a platform for policy dialogue among member States, initially focused on regions undergoing coal phase-down.[130] According to UNESCO, the Group of Friends on Culture-based Climate Action, which brings together Parties to the Convention and intergovernmental and civil society organizations, with UNESCO as knowledge partner, has launched a workstream on including culture in NAPs. Early Warnings for All, launched by the Secretary-General, is described as seeking universal coverage of multi-hazard early warning systems; UNDRR and ITU are among the entities reporting their contributions.[131] The ILO reports on the Global Coalition for Social Justice, a multi-stakeholder platform established by the ILO in 2023, one of whose key interventions concerns "a just transition towards environmentally sustainable economies and societies for all".

90. Partnerships on industry and energy include the Net Zero Partnership for Industrial Decarbonization, which UNIDO reports supports emerging market and developing economies in designing just industrial transition pathways and in decarbonizing heavy-emitting sectors such as steel and cement.[132] They also include the Global Network of

Regional Sustainable Energy Centres, coordinated by UNIDO and described as a South–South and triangular cooperation platform covering 120 countries, including most least developed countries and small island developing States.[133] UNDP reports on its partnership in Mission 300, with the World Bank and the African Development Bank, which aims to accelerate energy access in African countries.[134]

91. Some partnerships focus on mobilizing finance. FAO describes the Food and Agriculture for Sustainable Transformation Partnership, which implements an initiative launched by the COP 27 Presidency, as aiming to increase the quantity and quality of climate finance for agrifood systems; it hosts a finance help desk.[135] UNCDF reports on the Global Fund for Coral Reefs, a blended finance coalition that supports reef-positive businesses and the coastal communities that depend on reefs.[136]

Annex II

Inputs received on relevant instruments, initiatives and processes under the Convention and the Paris Agreement*

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
The Sharm el-Sheikh mitigation ambition and implementation work programme	CMA Decision 4/CMA.4, para. 4 Decision 4/CMA.4, para. 11	2021-2026	The scope of the work programme should be based on broad thematic areas relevant to urgently scaling up mitigation ambition and implementation in this critical decade and include all sectors covered in the 2006 IPCC Guidelines for National Greenhouse Gas Inventories of the Intergovernmental Panel on Climate Change, thematic areas in the contribution of Working Group III to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change, and relevant enabling conditions, technologies, just transitions and cross-cutting issues. (Decision 4/CMA.4, para. 4) The secretariat is requested to organize, under the guidance of the co-chairs of the work programme and with the support of the high-level champions, investment-focused events, considering the cost of mitigation implementation, with a view to unlocking finance, including for just transitions, overcoming barriers to access to finance and identifying investment opportunities and actionable solutions informed by nationally determined contributions to help public and private financers, investors and international climate finance providers direct finance flows towards supporting areas of opportunity to enhance mitigation in this critical decade. (Decision 4/CMA.4, para. 11)			https://unfccc.int/topics/mitigation/workstreams/mitigation-work-programme

			The annual reports (2023-2026), comprising a compilation of the individual dialogue reports, have been published on the webpage.			
NDC synthesis report	Decision 1/CMA.3, para. 30	Ongoing	CMA 3 requested the secretariat to annually update the NDC synthesis report and to make it available to the CMA at each of its sessions. According to the 2026 NDC synthesis report prepared by the secretariat, a total of 82 per cent of Parties considered just transition in preparing their new NDCs and the majority of those Parties plan to integrate consideration of just transition into NDC implementation. The synthesis report also highlighted that Parties considered just transition across all aspects of their NDCs, including mitigation, adaptation and means of implementation, and for a variety of sectors and stakeholders, which points to a whole-of-economy and -society approach to considering just transition. The synthesis report noted that some Parties contextualized just transition as helping to ensure that the shift to low-carbon, climate-resilient economies does not exacerbate existing or create new inequalities in societies, thus enabling climate action that is socially inclusive and economically empowering. The synthesis report indicated that indicators for tracking just transition as part of NDC implementation were explicitly included or envisaged by 13 per cent of Parties, some of which proposed integrating them into their MRV systems.			https://unfccc.int/sites/default/files/resource/cma2026_09.pdf
Forum on the impact of the implementation of response measures and the KCI	COP, CMP and CMA	Active/ ongoing; an agenda item under SBs and GBs	The forum on the impact of the implementation of response measures is a platform for Parties to exchange information, experiences and best practices on the economic, social and environmental impacts of climate mitigation actions. The KCI is a technical constituted body established to support the work of the forum. The forum and the KCI have the following work programme areas:	Various partners in different activities	-	https://unfccc.int/topics/response-measures https://unfccc.int/constituted-bodies/KCI

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			• Economic diversification and transformation; • Just transition of the workforce and the creation of decent work and quality jobs; • Assessing and analysing the impacts of the implementation of response measures; • Facilitating and building capacity on the identification, development, customization and use of tools and methodologies to assess the impacts of the implementation of response measures. The forum and the KCI implement the workplan for 2026–2030, consisting of specific activities related to the work programme areas. The KCI produces knowledge products such as technical papers and case studies that covers one or more work programme areas. It also implements capacity-building programme on impacts of the implementation of response measures aiming to enhance capacity of Parties in the areas related to response measures workstream.			
Enhanced Transparency Framework	Paris Agreement Art. 13; Decisions 1/CP.24, 18/CMA.1, 5/CMA.3, 9/CMA.4	Ongoing	The ETF supports the implementation of just transition pathways by providing robust and verifiable information about greenhouse gas emissions, climate change impacts, relevant national circumstances, countries' climate policies and measures, support provided, needed and received, as well as progress towards achieving NDCs. Parties and other stakeholders can use this information to identify needs and improvement plans, and inform actions going forward. As indicated in the BTR synthesis report, several Parties reported information related to just transition policies to mitigate the negative impacts of structural changes to economies arising from energy transitions. Parties also	GEF, CBIT-GSP, UNEP, UNDP, ICAT, PATPA, FAO, Commonwealth secretariat	The UNFCCC Transparency Division provides capacity building for developing countries to implement the ETF; develops and supports databases, and reporting and review tools (including training) for climate information and policy briefs and analysis; it reaches out to different	https://unfccc.int/Transparency

The 2023 Forum of the SCF on Financing Just Transitions (Event / Publication)	SCF	2023	The 2023 Forum of the SCF, held in Bangkok on 17–18 July 2023, focused on "Financing Just Transitions." The Forum explored how finance can support low-emission and climate-resilient transitions while addressing social and economic impacts on workers, communities and vulnerable groups. Discussions covered enabling policy environments, access to finance, social protection, capacity-building and the role of public and private actors. The SCF subsequently published a report summarizing the key discussions and findings from the Forum.	Speakers included: ILO, Grantham Institute, MDBs, UNDP, FAO, GFLAC, UNFCCC Funds, WWF, UNESCAP, UNEP FI, WRI, UNCDF, UN Global Compact,		Website
Sixth BA of the SCF (Publication)	SCF	2024	BA6 includes several elements relevant to the design and support of just transition pathways. • It references the Just Transition Work Programme, including its emphasis on means of implementation such as climate finance, technology transfer and capacity-building for developing countries. • It highlights the 2023 SCF Forum on financing just transitions as a relevant SCF	SCF		Link to BA6 Technical Report

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			knowledge product. The Forum emphasized that just transitions extend beyond the energy sector to areas such as transport, agriculture, water, forestry and land use, and underscored the importance of country-specific, multi-stakeholder approaches involving governments, MDBs, climate funds, financial institutions, workers and local communities. • It discusses country platforms and Just Energy Transition Partnerships (JETPs) as emerging mechanisms to support country-owned transition pathways, while also identifying implementation challenges related to inclusive governance, institutional capacity and access to finance. • It further notes growing work on measuring climate finance impacts in the areas of resilience and just transitions, as well as increasing references to just transition elements in sustainable finance taxonomies and transition finance approaches. • In the broader context of Article 2.1(c), BA6 also highlights the importance of ensuring that shifts in financial flows toward low-emission and climate-resilient development pathways are implemented in an orderly, equitable and just manner.			
NDR2 of the SCF (Publication)	SCF	2024	The SCF's Second Report on the Determination of the Needs of Developing Country Parties (NDR2) provides a relevant knowledge product and evidence base for just transition discussions by identifying the climate-related needs, enabling conditions and implementation challenges faced by developing countries across sectors and regions. While the report does not focus explicitly on just transition pathways, it highlights several elements directly relevant to their design and implementation. Through its assessment of			

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			national reports, NDR2 provides information on sectoral investment needs, means of implementation, and country-level planning processes that may help inform discussions on financing and implementing equitable transition pathways in developing countries.			
Decision on NCQG	CMA	2024 and ongoing	• Paragraph 20 explicitly recognizes the importance of supporting just transitions across sectors and thematic areas, including through readiness, capacity-building, transparency and technology development and transfer. • Paragraph 1 links the NCQG to Article 2.1(c) of the Paris Agreement, including making finance flows consistent with pathways toward low greenhouse gas emissions and climate-resilient development. • Paragraphs 4, 6, 15 and 21 recognize high costs of capital, debt burdens, limited fiscal space and barriers to redirecting capital toward climate action, which are not necessarily expressed in the context of JT, but still is applicable substantively. • Paragraphs 21–24 emphasize enhanced access to climate finance through direct access, locally led approaches, demand-driven capacity-building and simplified access procedures. Paragraph 26 calls for climate finance efforts to promote inclusion and extend benefits to vulnerable groups, including women, Indigenous Peoples, local communities, migrants and climate-vulnerable populations. These points are substantively highly relevant to the issue of JT Financing.			
Baku to Belem Roadmap to USD 1.3 Trillion (Publication)	COP 30 Presidency	2025	• The Roadmap frames just transition as essential to socially inclusive and fair implementation of NDCs and NAPs, placing people at the center of climate action. • It emphasizes protecting livelihoods, involving affected communities in decision-making, and creating decent work and resilient			B2B website

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			communities during the transition to low-emission and climate-resilient economies. • The report links just transition finance to social protection, education, skills development, reskilling and regional economic diversification. • According to IHLEG estimates cited in the report, just transition spending in developing countries would need to increase from around USD 10 billion annually today to USD 50 billion annually by 2035. • Key proposed actions include improving direct access to finance for vulnerable communities, embedding social safeguards in climate finance, scaling sustainability-linked and social bonds, and providing concessional finance for reskilling and social safety nets.			
Sharm el-Sheikh dialogue on Article 2, paragraph 1(c), of the Paris Agreement and its complementarity with Article 9 (Process / Events / Report)	CMA Co-chairs of the Dialogue	2023–2025	The Sharm el-Sheikh dialogue on Article 2, paragraph 1(c), of the Paris Agreement and its complementarity with Article 9 was established to exchange views and enhance understanding on making finance flows consistent with low-emission and climate-resilient development pathways, while considering its relationship with the provision and mobilization of climate finance support for developing countries. • Discussions under the dialogue linked Article 2.1(c) implementation with financing just and equitable transition pathways that reflect national circumstances, sustainable development priorities and poverty eradication objectives. • The 2025 workshops explicitly included “transition planning” and “financing just transition pathways” as a dedicated discussion topic, including the role of financial-sector development, transition planning frameworks and investment strategies. • Discussions highlighted the importance of ensuring that financial-sector alignment and			SeS website

			transition-related investment shifts do not create adverse socioeconomic impacts, particularly in developing countries with transition-related vulnerabilities. • Country platforms and Just Energy Transition Partnerships (JETPs) were discussed as examples of approaches that can help redirect investment and mobilize broader financial flows in support of nationally determined transition priorities. • The dialogue also emphasized the importance of policy coherence, regulatory frameworks, transition plans and credible market signals to help align private-sector and financial-sector decision-making with climate and development objectives.			
Veredas Dialogue (Process/Events/Reports)	CMA	2026	Veredas dialogue on Article 2, paragraph 1(c), of the Paris Agreement and its complementarity with Article 9 was established at CMA 7, building on the substantive discussion under the Sharm el Sheikh dialogue. Its workplan is expected to have substantive linkages with Just Transition work in 2026, following the past three years' work on Sharm El Sheikh Dialogue. More information on the Veredas Dialogue mandate: As a part of the Dialogue, the Presidency of the CMA was requested to convene the Xingu Finance Talks under the Veredas Dialogue and in consultation with the co-chairs thereof as an annual high-level round table with a view to facilitating a cooperative exchange of views among all interested Parties and non-Party stakeholders, in particular academia, international financial institutions and the private sector, on practical solutions that address the challenges and opportunities in the implementation of Article 2, paragraph 1(c), of			Veredas Dialogue | UNFCCC

			submissions received and the views expressed in the consultations. • Co-chairs will organize engagement events during the SBs.			
GEF (GEF-9 Strategy)	COP	2026–2030	COP 29 invited the GEF, in the context of programming for the climate change focal area under its ninth replenishment, to consider, inter alia, working with developing countries on ways of incorporating just transition elements into national climate plans and programmes. The GEF-9 replenishment outcomes include several elements relevant to the design and implementation of just transition pathways, particularly under the Climate Change focal area strategy on "Integrated Long-Term Net-Zero Planning and Just Transition." Proposed support includes country-led planning for low-emission and climate-resilient development pathways, inclusive energy transition and fossil fuel phase-out roadmaps, job retraining and reskilling programmes, social protection measures, and multi-stakeholder platforms involving governments, labour unions, civil society and the private sector. The strategy also highlights support for women, youth and Indigenous Peoples and local communities (IPLCs), and links just transition planning with national investment platforms, policy coherence efforts and blended finance approaches. More broadly, GEF-9 emphasizes "whole-of-society" and "whole-of-government" approaches across integrated programmes and focal areas, including blended finance and non-grant instruments, country engagement platforms, support for resilient and regenerative production systems, and strengthened monitoring of socio-	GEF		GEF-9 Programming Direction

			economic co-benefits and impacts on IPLCs, women and youth.			
LDCF/SCCF (Programming Strategy under GEF-9 period)	COP	2026–2030	The LDCF/SCCF GEF-9 Programming Strategy does not contain direct references to "just transition" as a standalone concept. However, the strategy emphasizes several related principles and approaches aimed at ensuring fairness, inclusion and equitable access to climate adaptation support for vulnerable countries and communities, particularly LDCs and SIDS. Relevant elements include: • Whole-of-society and locally-led adaptation approaches, including gender equality, youth, Indigenous Peoples and local communities (IPLCs), CSOs and vulnerable populations as cross-cutting enablers of transformational adaptation. • Adaptive social protection measures to strengthen income security, livelihood diversification and resilience of poor and vulnerable populations facing climate risks. • Support for climate-resilient livelihoods, green jobs, entrepreneurship and income diversification, including through agriculture, food systems and jobs-for-nature initiatives. • Financial inclusion and equitable access to adaptation finance through microfinance, guarantees, blended finance and support for smallholder farmers, MSMEs, cooperatives and underserved groups, including references to financial services provided "on just terms".	GEF		LDCF SCCF Programming 2026–2030
GCF (GCF-2 Updated Strategic Plan)	COP	2024–2027	CMA 4 requested the GCF Board to consider how to enhance support for just transitions of developing countries across economic sectors and transition to resilient economies, and how to provide better access to climate finance and enablers of just transitions, to the extent that this is in line with the existing mandate, investment	GCF		USP-2 of GCF

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			framework, results framework, and funding windows and structures of the Green Climate Fund. The GCF Strategic Plan 2024–2027 provides references for just transition-related work of the GCF. It identifies just transitions as part of GCF's mitigation and adaptation programming priority, particularly through cross-cutting projects and programmes that support paradigm shifts across sectors. The Plan specifically refers to advancing just transitions in energy, buildings, industry and transport systems, and commits GCF to incorporate the evolving understanding of just and equitable transition pathways under the UNFCCC and Paris Agreement. Relevant GCF instruments, processes and support areas include readiness and preparatory support for NDC, NAP and LTS implementation, integrated climate investment planning, direct access programming, and support for national and regional financial institutions to integrate climate considerations and access finance. These can support countries in translating just transition priorities into investment-ready pipelines and financing approaches.			
AF (Medium Term Strategy 2023–2027)	CMP CMA	2023–2027	The Adaptation Fund Medium-Term Strategy 2023-2027 has no direct references to just transitions. However, the AF strategy do emphasize several concepts aimed at ensuring fairness and equity in climate adaptation: • Locally Led Adaptation: The strategy introduces a new cross-cutting theme focused on devolving decision-making and access to finance to the local level to empower those most affected by climate change. • Empowering Vulnerable Groups: A core focus is on benefitting and empowering the most	AF		AF MTS

			vulnerable people and communities—such as women, youth, and indigenous peoples—as "agents of change". • Gender Equality: The strategy is committed to advancing gender equality and using gender-responsive adaptation finance to address systemic power imbalances and structural barriers. • Inclusive Governance: The Fund champions inclusive processes in adaptation planning and implementation to avoid "maladaptation" and ensure that climate actions do not exacerbate existing inequalities.			
FRLD (Barbados Implementation Modalities)	COP CMA		The Barbados Implementation Modalities (BIM) consist of the first set of interventions to respond to loss and damage under the FRLD, established to assist developing countries that are particularly vulnerable to the adverse effects of climate change through country-led responses to economic and non-economic loss and damage. Under the BIM, grant-based support will be provided for activities such as climate-resilient recovery and reconstruction, displacement and relocation responses, and strengthening national systems for addressing loss and damage. While the BIM does not explicitly reference just transitions, its design principles and operational requirements align closely with core just transition elements, reflecting the shared emphasis across the UNFCCC architecture on equity, inclusion, and country ownership in responding to climate impacts. The BIM is particularly relevant given its explicit requirements on stakeholder engagement and protection of affected populations, which mirror the procedural and substantive dimensions of just transition pathways. Relevant elements include:	FRLD		FRLD BIM webpage

			gathering for the Pacific. The FWG also facilitates intergenerational dialogues at COP sessions, guided by the seventh-generation principle. Under the Baku Workplan of the LCIPP, the FWG is compiling case stories documenting the diverse knowledge systems, perspectives and experiences of Indigenous Peoples and local communities. These activities can inform discussions and the review of the UAE just transition work programme by providing perspectives on just transition grounded in Indigenous values, worldviews and local knowledge systems.			
COP Presidency ACE Event: Empowering a Fair, Inclusive, and Just Transition	COP CMA	2023	This event raises awareness on how the ACE toolbox could play an important role in providing enabling conditions, in particular through education and public awareness, training, and public participation—in line with the objectives of the Convention and efforts to achieve the goals of the Paris Agreement. The ACE toolbox may be incorporated in the design and implementation of strategies for just transitions to ensure inclusive, fair, and equitable outcomes for all, particularly vulnerable communities/workers affected by transitions.	COP28 Presidency		https://unfccc.int/event/ace-in-session-event-empowering-a-fair-inclusive-and-just-transition
10-year enhanced Lima Work Programme on Gender (LWPG) and Belém Gender Action Plan (GAP)	Decision 7/CP.29 and 7/CP. 30 COP	Work programme (2025 – 2034) Action Plan (2026 - 2034)	The 10-year enhanced Lima work programme on gender (LWPG) sets the vision for the work on gender and climate change under the UNFCCC process and the Belém GAP the roadmap for its implementation, through 27 activities and 98 deliverables to be implemented through 2034. Implementation is to be delivered from the international to the local level, by a wide range of actors, including the secretariat, Parties, UN entities, civil society and other relevant organizations. Following its predecessors (decisions 21/CP.22 and 3/CP.25), the 10-year enhanced LWPG takes	In the context of the work on just transition: ILO, NDC Partnership, UNDP, UNRISD, Women & Gender Constituency.		https://unfccc.int/topics/gender/workstreams/the-enhanced-lima-work-programme-on-gender https://unfccc.int/gender/cop31 https://www.cop28.com/en/cop28-gender-responsive-just-transitions-

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			into account the imperative of the just transition for the workforce and the creation of decent work and quality jobs in accordance with nationally defined development priorities (7/CP.29, preambular para. 6). The work programme notes that gender-responsive implementation and means of implementing climate policy and action can raise ambition and enhance gender equality and just transition (7/CP.29, para. 10). The Belém Gender Action Plan (GAP) calls for the realization of a High-level event on how Parties are engaging all women and girls, men and boys as agents of change for socially just transitions at COP 31 (7/CP.30, Annex, Table 1, deliverable A.3.8). A related technical dialogue will also be delivered at COP 31 (7/CP.30, Annex, Table 3, C.4.1). Just transition-related outputs under the enhanced LWPG have included: • COP 28 Mandated in-session workshop by the ILO and the UNFCCC on delivering a gender-responsive just transition for all • COP 28 Gender Day - High-level dialogue on gender-responsive just-transitions and climate action, where the COP 28 Gender-responsive Just Transitions and Climate Action Partnership • COP 28 Gender Day Technical dialogue: Financing for gender-responsive just transitions and climate action • Submission of the technical paper “Just transition: An essential pathway to achieving gender equality and social justice” to COP 27 by the ILO			and-climate-action-partnership https://unfccc.int/gender/cop28

Plan to Accelerate Solutions (PAS): Just and Inclusive Planning of the Energy Transition	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This Plan to Accelerate Solutions (PAS) supports the development of just transition indicators and inclusive data systems, while advancing gender-responsive policies, finance, and leadership across the global clean energy transition.	Host initiative(s): Global Coalition for Energy Planning (GCEP); Participating initiatives and institutions: Gender and Energy Compact; IEA; IRENA	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/106_.pdf
Plan to Accelerate Solutions (PAS): Accelerating Coal Transitions	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period); with the plan aiming to unlock measurable progress by 2028 and contribute to 2030 coal-transition targets.	This PAS aims to accelerate the coal-to-clean transition in the power sector in a just and orderly fashion, in line with the Paris Agreement, by identifying and scaling up policy, planning and finance solutions. The plan centres on three key pillars: (1) supporting governments in developing and implementing strong enabling policies, (2) scaling up public and private finance for the transition, and (3) accelerating project pipeline development.	Host initiative: Powering Past Coal Alliance	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/37_.pdf
Plan to Accelerate Solutions (PAS): Collaborative Exporter-Importer Governance for Shared Prosperity Post-Fossil Fuels	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This PAS aims to provide an innovative approach for exporter-importer coordination and cooperation to support the implementation of the first GST agreed outcome on transitioning away from fossil fuels in a just, orderly and equitable manner. Among others, it aims to have, by 2028, a tried and tested blueprint on collaborative exporter-importer governance for just oil and gas transitions developed through a multi-stakeholder consultative process as part of on-going EFFECT implementation.	Host initiative: Equitable Framework and Finance for Extractive-based Countries in Transition (EFFECT)	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/122_.pdf
Plan to Accelerate Solutions (PAS): Plan to Accelerate the Phase-Out of Fossil	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	PAS on phasing out fossil fuel incentives, including direct and indirect fossil fuel subsidies, through transparency, common methods, national phase-out plans and removal of international barriers. This includes direct transfers;	Host: Coalition on Phasing Out Fossil Fuel Incentives Including Subsidies	PAS background: ; Full PAS list:	https://climateaction.unfccc.int/assets/documents/115_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
Fuel Incentives Including Subsidies			incomplete pricing (tax expenditures/exemptions; under-charging for externalities), and measures regulated through international agreements (e.g., aviation & maritime).			
Plan to Accelerate Solutions (PAS): High-level, global dialogue on economic enablers and aligning financial flows to accelerate the transition away from fossil fuels	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	PAS to make visible progress on implementing a just, orderly and equitable transition away from fossil fuels in global energy systems, in line with the COP28 Global Stocktake outcomes, through High-level, inclusive dialogue on economic incentives, financial flows and enabling conditions to accelerate the orderly and equitable transition away from fossil fuels.	Host initiative: Clean Energy Transition Partnership (CETP) Secretariat (hosted at E3G)	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/117_.pdf
Plan to Accelerate Solutions (PAS): Decarbonization of the maritime sector	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	PAS that targets the achievement of Shipping's Breakthrough Goals of 5% (striving for 10%) adoption of scalable zero-emission fuels by 2030 and upskilling and retraining at least 400,000 seafarers by 2030. The scope includes International Shipping and Maritime, and its relation to land-side energy transition, and landside-related energy production, supply and distribution facilities, including on-shore power systems; zero-near-zero fuels (ZNZ) and non-emitting propulsion systems; Just and Equitable Transition (JET); cargo emissions reduction technologies such as refrigerated maritime transport; mitigation measures; and public and private finance.	Host initiative: Green Hydrogen Catapult (GHC) Action / Committed Initiatives: IMO, Getting to Zero Coalition (GtZ), Zero-Emission Shipping Mission (ZESM), ZEMBA, ICCT, Sustainable Freight Transport Framework (UNCTAD), Kuehne Climate Center, Environmental Defense Fund (EDF)	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/25_.pdf
Plan to Accelerate Solutions (PAS): Green Industrial Hubs / Corridors	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period); expected contribution to 2030 energy, industry and finance targets.	PAS to accelerate green industrial hubs and corridors for low-carbon industrial production, cleantech manufacturing and decarbonised infrastructure. Expected impacts include that green hubs and corridors can support just transition and equity by embedding workforce reskilling, SME participation, community-level resilience and gender-equitable access to green jobs and technologies.	Host initiative: Net Zero Partnership for Industrial Decarbonization	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/12_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
Plan to Accelerate Solutions (PAS): Offshore wind as a reliable, scalable, and clean energy solution	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This PAS aims at enabling the deployment of offshore wind as it is a reliable, scalable, and clean energy solution, and to contribute to achieving a collective total offshore wind capacity of a minimum of 380 GW by 2030 and 2000 GW by 2050. The PAS is focusing on achieving this ambitious uptake of offshore wind through multistakeholder collaboration, knowledge sharing, clear communication, capacity building, an explicit focus on a nature positive, just energy transition, and strengthening regional collaboration.	Host initiative: The Global Offshore Wind Alliance	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/116_.pdf
Plan to Accelerate Solutions (PAS): Plan to Accelerate Universal Access to Electricity	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This PAS encompasses actions aimed at closing the electricity access gap globally by 2035, while also strengthening the resilience, flexibility, and inclusiveness of power systems to support sustainable and inclusive economic growth and climate goals. As a whole, the PAS acts as a multi-level accelerator—linking last-mile electrification, system resilience, and just transition principles with activities focussed on strengthening enabling environments, building state and institutional capacity, innovative financing mechanisms, and strategic electrification of sectors such as agriculture, industry, health and cooling.	Host initiative: SEforALL Participating initiatives and institutions: Energy Saving Trust, Gender and Energy Compact, Global Energy Alliance, Green Powered Future Mission (GPFM), IEA, Universal Energy Facility, UNOPS	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/105_.pdf
Plan to Accelerate Solutions (PAS): Building Efficiency, Electrification, and Renewable Integration (BEERI)	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period); with expected impacts by 2028 and contributions to 2030 GST.	PAS that defines sectoral sub-targets, aligns national and subnational policies, mobilises blended finance, and embeds transparent MRV systems. It supports governments and industry in accelerating electrification and deep efficiency retrofits, while ensuring measurable contributions to the 2028 Global Stocktake goals. The PAS promotes the adoption of high-impact policy bundles – including MEPS, electrification mandates, and renewable integration requirements—and supports policy coherence	Host initiative(s): World Green Building Council - Building the Transition, with supporting partners C40 and International Energy Agency (IEA)	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/52_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			across national and subnational levels, with technical assistance for implementation.			
Plan to Accelerate Solutions (PAS): Renewable and Low-Emissions Hydrogen	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; The plan aligns with the Hydrogen Breakthrough 2030 goal by 2030; with actions and tracking designed to support progress ahead of the second GST.	This PAS responds to the persistent challenge that, while momentum is building, fragmented standards, insufficient demand visibility, and limited access to finance continue to constrain progress across the hydrogen ecosystem. The PAS aims to close that gap by unifying international efforts, providing a bird's eye view of who is doing what, and where support is most needed to ensure tangible progress ahead of the second Global Stocktake (GST). It brings structure to a fragmented landscape, encouraging coherence and enabling mutual accountability under a shared vision.	Host initiative: Global Green Industrialization Agenda (GGIA) Participating Initiatives: AFID, Breakthrough Agenda, Clean Energy Ministerial (CEM), Clean Hydrogen Mission, CCAC, EDF, Green Hydrogen Organisation (GH2), SEforAL and the Clean Energy Economy Transition (CEET)), H2Global, Hydrogen Breakthrough, Hydrogen Council, World Bank, IEA, International Hydrogen Trade Forum (IHTF), International Organization for Standardization (ISO), International Partnership for Hydrogen and Fuel Cells in the Economy (IPHE), Net Zero Partnership for Industrial Decarbonization, OECD, RMI, UNIDO, WBCSD, WCO, WTO.	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/19_.pdf
Plan to Accelerate Solutions (PAS): Blue Package: Ocean-Based Solutions for the Climate Crisis	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	PAS to accelerate ocean-based climate solutions under the Blue Package, across marine conservation, shipping, aquatic food systems, offshore renewable energy, coastal tourism, and an exploratory focus on offshore oil and gas transition issues. It sets out science-based and practical targets to support system-wide action	Host initiative(s): Marrakech Partnership for Global Climate Action's Ocean & Coastal Zones group, Climate Champions Team, Brazilian Ministry	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/92_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			across key ocean sectors, contributing to a just and equitable transition and providing a common roadmap for governments, non-State actors and other stakeholders.	of Environment and Climate Change		
Plan to Accelerate Solutions (PAS): Integrating Agricultural Development and Methane Mitigation	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period); at least one action extending to December 2030.	This PAS provides global coordination to accelerate the integration of climate action implementation and development of livestock and rice systems, positioning agriculture as a solution to bend the climate curve this decade. Acknowledging the interdependency between healthy and sustainable diets for all, emissions abatement (particularly methane), and long-term resiliency of livestock and rice systems, the proposed framework is farmer-centered and recognizes the need to reconcile economic development and food production with the urgent delivery of contextually appropriate climate solutions.	Host initiative(s): Clean Air Task Force, Climate & Clean Air Coalition, Environmental Defense Fund; Participating Initiatives/Partners: Clim-Eat, ILRI, IRRI, World Bank, TNC, Spark Climate Solutions, FAO, Aim for Scale, Soils for Life, Brazilian government (MAPA), Imaflora, Global Roundtable of Sustainable Beef, and a growing coalition of regional partners, research institutions and private sector actors.	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/91_.pdf
Plan to Accelerate Solutions (PAS): TERRA - Together for the Expansion of Resilient and Restorative Agroecology and Agroforestry	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	Plan to Accelerate Solution to position Family Farming at the center of the global response to the climate, biodiversity, and food security crises. The goal is to catalyze the adoption by a large number of small and medium producers of economically thriving and socially inclusive Agroecology and Agroforestry systems.	Host initiative(s): Ministry of Agrarian Development and Family Farming (MDA) of Brazil; FAO/Forest and Farm Facility (FFF) FFF; Now Partners Foundation and additional partner institutions (Agroecology Coalition; Alliance Bioversity and CIAT - CGIAR; IFAD).	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/120_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
Plan to Accelerate Solutions (PAS): Multilevel, multisectoral and participatory governance model for implementing the Paris Agreement (MMA & MCid)	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This plan aims to unlock measurable progress through three main impact pathways: 1. Institutionalising multilevel governance as an enabler of Paris Agreement implementation; 2 Building institutional capacity and knowledge ecosystems for multilevel action; 3. Unlocking climate finance for subnational implementation (Strengthened means of implementation and alignment between national climate finance strategies and subnational investment pipelines, supporting just, resilient, and low-carbon transitions).	Host initiative: Coalition for High Ambition Multi Level Partnerships	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/66_.pdf
Plan to Accelerate Solutions (PAS): No Organic Waste (NOW): Prevention, Diversion, and Management to Turn Waste into a Resource for Climate, Livelihoods, and Food Security	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	Integrated action plan to accelerate food waste prevention, circular and inclusive food and organic waste management systems for methane mitigation, enhanced resource recovery, and strengthened community resilience; Other aspects include food redistribution and recovery, food security, organic waste valorization, municipal finance, cities livability, valorization of waste pickers, indigenous people and women empowerment	Host initiative(s): UN Environment Programme (UNEP) - Climate and Clean Air Coalition (CCAC)/Food Waste Breakthrough & The Global Food Banking Network. Led by Brazilian Ministry of Environment	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/62_.pdf
Plan to Accelerate Solutions (PAS): Climate-Resilient Social Protection and Smallholder Agriculture Finance Partnership	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	PAS to reduce the Effects of Climate Change on the Fight against Hunger and Poverty; Contributing to social protection, small-holders and family farming, food systems, financing; with a focus on reaching populations most vulnerable to hunger and poverty. Expected outputs include mobilizing climate finance from all sources promoting projects to promote sustainable and decent jobs and livelihood opportunities for the poor and vulnerable people in regions of high-forest cover and sensitive ecosystems); or increasing the number of countries that include specific actions in the areas of social protection, resilient agri-food systems, and promotion of sustainable livelihoods and just	Host initiative: Global Alliance Against Hunger & Poverty	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/94_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			transitions in their NDCs, National Climate Plan/Strategies, Nature Strategies and/or NAPs.			
Plan to Accelerate Solutions (PAS): The Belém Health Action Plan for the Adaptation of the Health Sector to Climate Change	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This PAS is underpinned by two cross-cutting principles that inform the design and implementation of all actions, which are 1) Health Equity and Climate Justice and 2) Leadership and Governance on Climate and Health with Social Participation. The main expected impact of this PAS is to strengthen the adaptation and resilience of the health sector to climate change by advancing integrated surveillance and monitoring systems, accelerating capacity-building efforts, promoting evidence-based and participatory policy implementation, and fostering innovation and sustainable production—while considering the diverse needs of health systems globally according to their national realities, and recognizing that effective adaptation can also advance mitigation efforts and promote health co-benefits.	Host initiative: Alliance for Transformative Action on Climate and Health (ATACH)	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/72_.pdf
Plan to Accelerate Solutions (PAS): Just solutions for climate mobility	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; Actions are framed mainly for delivery by end-2026 and end-2027, with expected impact pathways contributing to 2030 targets.	This Plan to Accelerate Solutions aims to contribute to reducing the effects of climate change on hunger and poverty by promoting just and inclusive solutions for addressing climate mobility, focusing on the people and communities who are at risk of displacement, and communities affected by displacement, including IDPs, refugees, host communities, as well as migrants.	Host initiative: IOM	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/70_.pdf
Plan to Accelerate Solutions (PAS): New Skills Development for the Future: Empowering Women and Youth for a Just Transition - A Global Multi-Stakeholder Partnership	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period); with expected contribution to 2030 skills, jobs, gender equality and youth	This PAS directly advances the 2030 Agenda for Sustainable Development outcomes by embedding skills development as an important aspect for fostering decent work, gender equality, women's empowerment and youth empowerment at the heart of climate action. The PAS operationalises this vision through practical, multi-stakeholder activities that strengthen youth	Host initiative(s): ILO Global Skills Programme, Gender Energy Compact Host organizations/stakeholders: Care About Climate, UNIDO, Sustainable Energy for All	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/69_.pdf

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		empowerment targets.	and women's skills, employability, and leadership for the green economy.	(SEforALL), ENERGIA, Creatives for Climate, WFF Youth Initiative, Student Energy, IRENA		
Plan to Accelerate Solutions (PAS): Protection of Environmental Defenders in the context of the climate crisis and just transition	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period).	This PAS seeks to strengthen the protection of environmental defenders through international integration, technological development, data production, and the expansion of financing directed at community and territorial initiatives.	Host initiative(s): Ministry of Human Rights and Citizenship of Brazil, Ministry of Indigenous Peoples of Brazil, and Ministry of Racial Equality of Brazil	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/39_.pdf
Plan to Accelerate Solutions (PAS): Harnessing public procurement in high-impact sectors to drive climate action and a just transition	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action	Active; delivery timeline through 2028 (through GST-2 period); with selected expected outcomes and impact targets extending to 2030.	This PAS includes two complementary public procurement pathways addressing different SDG objectives within high-impact sectors: a) Advancing sustainable public procurement as a comprehensive policy approach across key sectors — including food, health, transport, built environment, and Information and Communication Technology — by operationalizing three complementary approaches; and b) Advancing public procurement of low-carbon products from hard-to-abate sectors, starting with cement, concrete, and steel for construction, to create demand signals that accelerate industrial transformation and reduce embodied carbon. Common to both pathways is an alignment with a just transition that leaves no one behind, and efforts to improve indicators including accounting of embodied GHG emissions to support net zero targets.	Host initiative(s): UNEP/ 10YFP, MGI Brazil, UNIDO/IDDI (on hard-to-abate industrial sectors); Supporting partners: Brazil's Attorney General´s Office (AGU), Jataí Institute; FAO, UNOPS, UN ECLAC, UN Global Compact, Oxford Net Zero and the Climate Policy Hub at the University of Oxford; UNDP, GIZ, SKAO	PAS background: Global Climate Action Agenda five-year vision; Full PAS list: NAZCA portal	https://climateaction.unfccc.int/assets/documents/47_.pdf
Granary of Solutions	Climate High-Level Champions and the Marrakech Partnership for Global Climate Action		The Granary of Solutions is a repository under the Marrakech Partnership for Global Climate Action that brings together existing solutions to accelerate and scale up impact in alignment with the outcomes of the Global Stocktake and the goals of the Paris Agreement. It features initiatives, concrete actions and case studies. The following are illustrative, non-exhaustive case	Various (depending on the solution/case studies)	Various (depending on the case study)	https://cop30.br/en/action-agenda/granary-of-solutions-1

			studies that may be relevant for the UAE JTWP, organized around key objectives of the renewed Global Climate Action Agenda 2026-2030, including: • Ensuring Universal Access to Energy: Global Network of Sustainable Energy Centre (GN-SEC) Gender & Youth Network: Driving Inclusive Energy Transitions through Regional Collaboration. • More Resilient, Adaptive, and Sustainable Food Systems: Climate Adaptation Through Community Participation in Timor-Leste. • Education, Capacity Building and Job Creation: ILO's Skills for Energy in Southern Africa (SESA) Project; Enel Foundation and SEforALL launch Open Africa Power initiative to provide technical, business, and regulatory skills to young energy professionals.			
Updated UNFCCC NAP technical guidelines (publication)	LEG Decision 2/CMA.5, para 47	Published in August 2025	The updated UNFCCC NAP technical guidelines are revised guidance developed by the LEG to support countries in the formulation and implementation of NAPs. They provide guidance on how to reflect new developments under the Paris Agreement in the NAPs, particularly the UAE Framework for Global Climate Resilience, and the latest climate science from the IPCC Sixth Assessment Report. The guidelines recognize the NAP process as an important vehicle for embedding just transition pathways into national adaptation planning by ensuring that adaptation efforts are equitable, inclusive and leave no one behind. They emphasize meaningful participation of vulnerable and affected groups, including workers, women, Indigenous Peoples, local communities, children and youth, in decision-			https://unfccc.int/documents/649321

Name of the instrument, initiative or processes	*Mandate/ Governing body*	*Timeframe and status*	*Short description of scope including recent outputs, where relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			making processes. The guidelines encourage countries to integrate measures that protect livelihoods, strengthen social protection, uphold labour rights, and support education, upskilling and reskilling as part of adaptation planning. They also highlight the need to align NAPs with broader employment, education and social development policies so that adaptation contributes to both climate resilience and inclusive development.			
Framework for non-market approaches referred to in Article 6, paragraph 8, of the Paris Agreement and in decision 4/CMA.3	Decision 4/CMA.3	Work programme under implementation since 2022 (ongoing)	The framework for non-market approaches under Article 6, paragraph 8, of the Paris Agreement facilitates voluntary international cooperation between Parties, including through finance, technology development and transfer, and capacity-building. With sustainable development and poverty eradication at its core, the framework can support the development and implementation of initiatives aimed at advancing a just transition.		Decision 4/CMA.3 explicitly takes into account the imperatives of a just transition of the workforce and the creation of decent work and quality jobs, in accordance with nationally defined development priorities.	https://unfccc.int/nma-platform

Annex III

Inputs received from relevant entities in the United Nations system*

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
UNIDO	UNIDO Climate Change Strategy	GC.19/Res.2 IDB.51/Dec.8	Global in scope. Special emphasis is placed on developing countries, with priority attention to least developed countries, small island developing States, landlocked developing countries, and other structurally vulnerable economies.	The Strategy was adopted in July 2023. The action plan covers the period 2025–2029 and subject to periodic review and update. Progress is reported annually to the General Conference and the Industrial Development Board.	The Strategy includes a dedicated area of work to "a just transition of the workforce that creates decent jobs, taking into consideration social dimensions of such transition." Circular economy pilots in North Africa and South Asia have generated thousands of green jobs for women and youth. Policy support explicitly incorporates just transition considerations, including impacts on employment in carbon-intensive sectors and informal sector inclusion. UNIDO supports South Africa and Indonesia in assessing industrial transition scenarios that safeguard jobs while pursuing net-zero pathways, providing evidence-based input to national just transition commissions and planning processes.	Please refer to the Strategy.	The action plan explicitly references the UAE just transition work programme as part of the global climate change developments that frame UNIDO's work.	UNIDO Climate Change Strategy Update on the development of the action plan for the implementation of the UNIDO Climate Change Strategy

* Not formally edited or formatted.

					The Strategy commits to "climate justice," with dedicated attention to women-led MSMEs, youth, and informal sector actors in accessing climate finance, technologies, and skills. UNIDO assists developing countries in incorporating just transition and industry considerations into their NDCs, NAPs, and long-term low greenhouse gas emission development strategies, ensuring industrial transitions support development gains while enhancing resilience.			
	Knowledge product "Technology Needs Assessment (TNA) Technologies for Climate Change Mitigation in Developing Countries: Renewable Energy" and its dissemination activities		Global (developing countries)	Published in 2025. The dissemination activities were organized in June 2025 at SB62 and International Vienna Climate and Energy Forum in April 2026.	As part of the project "Support to the technology framework under Article 10 of the Paris Agreement", UNIDO, in collaboration with UNFCCC TEC and UNEP-CCC, developed this TNA guidebook. The guidebook is to provide practical guidance for developing countries to conduct updating their TNAs. The guidebook examines mitigation technologies and practices from three categories of 1) energy supply; 2) energy storage; and 3) energy transportation,	UNFCCC TEC, UNEP-CCC	At the side event at the International Vienna Climate and Energy Forum in 2026, the guidebook was disseminated and promoted to the wider audience.	Finance Guide for Implementation of Technology Action Plans

					transmission and distribution. It highlights aspects of just transition that could be considered to promote a fair and inclusive workforce transition to meet Paris Agreement goals. It was officially launched on 16 June 2025 during the Technology Action Plans for Energy Systems Transformation event, co-organized by UNIDO, UNFCCC, UNEP-CCC. The event featured experiences from countries including Liberia and Brazil, highlighting how Technology Action Plans (TAPs) developed through TNAs are paving the way for tangible implementation of clean energy technologies.			
	Blue Industry Programmatic Framework		Global, with a particular focus on developing countries, SIDS, and coastal and inland water-dependent communities.	Framework development: 2023–2025. Ongoing implementation phase.	The Blue Industry Programmatic Framework supports sustainable and inclusive development of water-based industries through policy advice, capacity-building and technical assistance. It promotes just transition pathways by strengthening livelihoods, decent work and climate resilience for coastal and water-	Member State governments, African Development Bank (AfDB), Government of Norway (Norad), UNCTAD, and IMO		UNIDO Blue Industry Programmatic Framework

					dependent communities, while enabling MSMEs and small-scale producers to access sustainable and higher-value blue economy markets.			
	Global Matchmaking Platform (GMP)		Global	Ongoing	It supports the design, implementation and scaling of just transition pathways in food systems, oceans and coastal economies by promoting inclusive economic transformation, decent work, resilient livelihoods, and climate adaptation for coastal communities, while strengthening MSME participation and international cooperation. The GMP for industry decarbonization is a facility that supports EMDEs to develop their custom requests for green industrialization projects and programmes and matches these needs with best available technical and financial assistance, creating economic and job creation opportunities as part of national just transition pathways. Since its launch at COP 29, the GMP has matched 27 country requested projects from 11 countries, and convenes a partner network	Climate Club, UNIDO, UNDP, World Bank, Climate Investment Funds, RMI, WRI, dena, GIH, and GIZ		https://globalmatchmakingplatform.org/

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					with over 20 international partner organizations.			
	Net Zero Partnership for Industrial Decarbonization		Global	Ongoing	The Net Zero Partnership for Industrial Decarbonization supports EMDEs to design and implement just industrial transition pathways by providing technical assistance, tailored policy support, technology solutions, finance-related guidance, knowledge products and nationally determined contributions tools for decarbonizing heavy-emitting sectors, including steel, cement and concrete. Doing so positions EMDEs to better establish themselves in new markets for green industrial products, increasing their development outcomes from industrial decarbonization.	Funded by the German International Climate Initiative (IKI)		https://decarbonization.unido.org/projects/net-zero-partnership/
	City-Industry-Climate-Nexus framework		Global	Ongoing	The City-Industry-Climate Nexus framework provides a strategic approach for integrating urban development, industrial transformation, and climate action to support low-carbon, resilient, and just development pathways. Guiding UNIDO's work of UNIDO on urban decarbonization, the framework promotes	Global Environment Facility		Decarbonization of cities and urban communities - UNIDO

					gender equality and women's empowerment to accelerate a just, inclusive and sustainable energy transition. Currently the initiative has over 120 members, amongst them 11 governments.			
	Parliamentarians for Climate Finance		Regional - Sub-Saharan Africa	Ongoing project: April 2024 – October 2026	The Parliamentarians for Climate Finance project strengthens the capacity of national parliaments across 15 African countries to design, oversee, and champion just energy transition policies and climate finance mobilisation. Working directly with Members of Parliament, it builds legislative and oversight capacity, improves enabling policy environments, and supports the development of bankable climate investment pipelines. The project contributes to just transition pathways by fostering inclusive parliamentary participation in climate governance, supporting equitable renewable energy expansion, and building institutional capacity for climate finance decision-making at the national level. To date, 464	Climate Parliament, Green Climate Fund (GCF)	Funded by GCF under readiness programme	https://www.climateparl.net/projects/parliamentarians-for-climate-finance

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					parliamentarians have been engaged as climate champions and 15 parliamentary oversight committees on climate finance established.			
	Accelerate-to-Demonstrate (A2D) Facility		Global (developing countries)	April 2023 – March 2031	The A2D Facility is a grant-financing facility managed by UNIDO with GBP 65 million of Official Development Assistance (ODA) from the UK Government's Department for Energy Security and Net Zero. It contributes to a just transition by supporting inclusive low-carbon industrialization in developing countries through demonstration-stage climate innovation projects. Its emphasis on scalable clean energy solutions, public-private partnerships, and institutional safeguards helps ensure that the benefits of the green transition are distributed more equitably while strengthening the industrial and technological capacities of developing economies.	Donor: UK Government (DESNZ)		A2D Facility website
	Global Network of Regional Sustainable Energy		Africa and Arab region, Latin America and Caribbean, Asia	Ongoing since 2010; expanding number of centres and programmes	Coordinated by UNIDO, the GN-SEC is a unique south-south and triangular cooperation (SSTC)	ECOWAS, SADC, EAC, ECCAS, CARICOM, SICA, ICIMOD, ECO,	Funded by Austria, the European Union (EU) and a broad range of	https://www.gn-sec.net

					SMEs and local communities.			
	Resource Efficiency and Cleaner Production (RECP) Programme		Global. Developing countries and economies in transition, SMEs and institutions.	Ongoing	The Programme contributes to a just transition by supporting industries—especially SMEs—in reducing energy, water, and material use and adopting circular production practices. By helping firms adopt cleaner technologies, the programme enables industries to remain competitive and resilient in a low-carbon economy while strengthening local capacities for sustainable industrial development. Its emphasis on inclusive industrial upgrading ensures that environmental improvements are linked with economic resilience and social well-being.	Governments, GACERE, GEF, ADB, private sector, and so on		https://www.recpnet.org
	Promotion of Sustainable Industrialisation Hubs		Africa		By mobilizing bankable projects and strengthening industrial ecosystems, Sustainable Industrialization Hubs (SIHs) can promote resilient, competitive, and low-carbon economic growth with strong national ownership and social inclusion. Example UNIDO Programmes on SIH: Supporting the Just Energy Transition in South Africa	GEF, and so on		Supporting the just energy transition in South Africa by strengthening local value chains and enhancing quality assurance for electric vehicle batteries

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					through strengthened local value chains and enhanced quality assurance for EV batteries: The project aims to build a sustainable and locally anchored electric mobility ecosystem in South Africa as part of the Just Energy Transition by combining policy support, industrial development, quality infrastructure, and skills development to strengthen EV battery value chains and accelerate low-carbon e-mobility. Strengthening Cleantech Value Chains in Africa to Accelerate the Energy Transition: The programme catalyses Sustainable Industrialisation Hubs along regional economic corridors, harmonises regulatory, standards and certification frameworks, strengthens data systems and market intelligence, and develops skills, entrepreneurship and access to finance, including blended-finance instruments that de-risk private investment.			
	Climate resilient and sustainable livelihoods		Pakistan, Afghanistan, Philippines	Ongoing	UNIDO implements projects that strengthen climate-resilient and sustainable livelihoods for vulnerable communities	Member States, donors (EU, Special Trust fund for Afghanistan, Adaptation Fund)		Inclusive Development Across Rural Sindh

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					(for example, in Pakistan, Afghanistan and the Philippines). It contributes to just transition pathways by supporting vulnerable communities through inclusive livelihood development, climate adaptation, job creation and improved access to essential services. The approach focuses on job creation and enterprise development, improved access to basic services and infrastructure, and community empowerment through participatory planning, supporting inclusive and resilient transition pathways.			Harnessing the Water-energy-food Nexus to Address and Adapt to Climate Change Impacts
	Global Green Industrialization Agenda (GGIA)		Global	To be launched at COP 31 by the COP 31 Presidency	The GGIA is the outcome of the "Belém Declaration on Global Green Industrialization", published at COP 30. The Declaration, and the forthcoming GGIA, recognize that green industrialization is not just a requisite for climate objectives. It is a major opportunity to promote sustainable economic development, strengthen resilient supply chains, and promote just and inclusive	Leadership is being provided by Brazil and Türkiye. See full list of 50 partners here.		COP30 launches Belém Declaration Supporters of Belém Declaration advance Global Green Industrialization Agenda

	guide for policymakers and stakeholders			implementation processes.	nationally determined climate pathways and implementation planning.		through NDCs, NAPs and LT-LEDS.	
	Green Performance Toolkit		Global. SMEs and business support ecosystem actors. Focus on developing countries.	Ongoing/ Global Public Good	Free online platform helping businesses assess and track environmental performance across energy, water, waste, wastewater, environmental management systems, air emissions, GHG emissions, chemicals and soil. Provides qualitative and quantitative assessments, supports monitoring over time, helps identify improvement areas, reduce costs, increase productivity and prepare for environmental certification.		Relevant to low-carbon operations, resource efficiency, circularity, standards compliance and enterprise-level transition planning.	https://greenperformance.intracen.org/home
	Sustainable Trade Faculty		Global. SMEs, business support ecosystem actors.	Ongoing/ Global Public Good	The Sustainable Trade Faculty provides training, advisory support, tools and learning opportunities on sustainability-related topics including environmental sustainability, standards, responsible business practices, circularity and green competitiveness. Support includes training programmes, expert networks and knowledge-sharing platforms to strengthen institutional and enterprise capacities.		Relevant to JTWP elements related to skills development, institutional strengthening, capacity-building and enabling SMEs to participate in sustainable and inclusive transitions.	https://sustainability.intracen.org/

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	GreenToCompete Hubs		Caribbean, Ghana, Kenya, Lao PDR, Nepal, Peru and Viet Nam; targets SMEs and business support organizations.	Established	GreenToCompete Hubs function as locally hosted one-stop support platforms helping SMEs transition to greener business models. Support includes coaching, workshops, tools and training on climate resilience, resource efficiency and circular production, sustainability standards, market access and green finance. The Hubs also strengthen institutional capacity through local business support organizations and networks.	Local business support organizations	Relevant to JTWP through support for SME transitions, capacity-building, climate resilience, green finance and inclusive economic approaches.	https://environment.intracen.org/hubs/
	Deforestation-Free Trade Gateway		Global; SMEs, smallholder producers, business support organizations and value chain actors, particularly in developing countries.	Ongoing	The Deforestation-Free Trade Gateway is a digital public platform that supports businesses and producers in meeting emerging sustainability and deforestation-related market requirements. The platform provides tools and guidance to strengthen traceability, improve access to information and reduce barriers linked to sustainability transitions. It supports more inclusive and resilient agricultural value chains and helps smaller actors maintain access to international markets.		Relevant to JTWP through support for inclusive transition pathways, SME participation, sustainable livelihoods and reducing transition barriers for rural economy actors and smallholders. Supports people-centred value chain approaches to climate and sustainability transitions.	https://www.intracen.org/resources/tools/deforestation-free-trade-gateway

	Standards Map		Global; SMEs, producers, exporters, policymakers, business support organizations and value chain actors, especially in developing countries.	Ongoing. Global Public Good	Standards Map is a free online platform and database enabling users to identify, compare and understand sustainability standards related to environmental protection, labour rights, business ethics, due diligence and traceability. It provides knowledge and decision-support tools to help businesses and institutions navigate sustainability requirements and strengthen sustainable trade practices.		Relevant to JTWP through support to SMEs, sustainability transitions, capacity-building and reducing information barriers related to sustainable production and value chains.	https://www.standardsmap.org/en/home
	Youth Ecopreneur Programme (including Youth Ecopreneur Awards)		Global; youth entrepreneurs under 35, especially from developing countries.	Ongoing.	Provides bootcamps, acceleration support, mentoring, networking opportunities and visibility for youth-led green businesses and sustainability solutions. Supports development of entrepreneurship skills and scaling of green enterprises.		Relevant to JTWP through support for green jobs, skills development, inclusive participation, innovation and sustainable livelihood opportunities for youth.	https://social.yecommunity.com/page/youth-ecopreneur-programme
UN Tourism	Regenerative Approaches to Climate Action in Tourism	Deliverable under the Plan to Accelerate Solutions (PAS) for Tourism under the UNFCCC High-Level Climate Champions'	Global scope; Targeting Tourism policymakers, businesses and other tourism stakeholders	Estimated publication date September 2026	UN Tourism is developing the Briefing Paper "Regenerative Approaches to Climate Action in Tourism" as a deliverable of the Plan to Accelerate Solutions "Towards a Global Partnership for Enhanced Climate Action in Tourism" and in	Ministry of Tourism of Brazil	.	Publication forthcoming September 2026 (draft already available and could be shared if needed)

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		Programme of Work.			collaboration with the Ministry of Tourism of Brazil. The paper aims to provide guidance to make climate action in tourism more holistic by applying regenerative principles across measurement, decarbonization, adaptation, collaboration and finance. It contributes to a just transition by promoting place-based, participatory and community-centered climate action in tourism that connects emissions reduction and climate resilience with ecosystem health, local livelihoods, community wellbeing and inclusive governance.			
	Glasgow Declaration on Climate Action in Tourism	A Global Climate Action Initiative (NAZCA portal) launched at COP26 to mobilize tourism stakeholders on climate action.	Global scope; Targeting Tourism policymakers, businesses and other tourism stakeholders	Launched in 2021; ongoing.	The Glasgow Declaration Initiative, led by UN Tourism within the framework of the One Planet Sustainable Tourism Programme and with support from UNEP, is a voluntary commitment that promotes the development of climate action plans by tourism stakeholders and tracks implementation progress annually. By the end of 2024, 381 climate action plans had been developed by signatories. References to climate			Glasgow Declaration in One Planet website Glasgow Declaration in NAZCA portal

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					justice are found in 28% of plans, with related actions including support to local communities and inclusive approaches. Additionally, 92% of plans include collaborative actions across public and private tourism stakeholders globally. The initiative helps track and encourage more inclusive, participatory and community-linked approaches to tourism climate action.			
UNICEF	CRC General Comment No. 26 on children's rights and the environment with a special focus on climate change	Issued by the UN Committee on the Rights of the Child under the Convention on the Rights of the Child (CRC), providing authoritative guidance on States' obligations	Global; States Parties to the CRC; children as primary rights-holders	Adopted in 2023; ongoing relevance and application	Provides normative guidance on States' obligations related to environmental protection and climate change in relation to children's rights, supporting the integration of child rights into climate policies and just transition pathways, including adaptation, mitigation, and decision-making processes.	Committee on the Rights of the Child; UNICEF and other UN agencies supported consultations and dissemination	Recognized as the first comprehensive interpretation of children's rights in the context of climate change and environmental harm. The General Comment also addresses the role of business enterprises, highlighting States' obligations to regulate private sector activities and ensure that business operations do not harm children's rights in the context of environmental degradation and climate change.	https://www.ohchr.org/en/documents/general-comments-and-recommendations/general-comment-no-26-2023-childrens-rights-and
	Global Child Hazard Database	Developed by UNICEF	Global coverage. Beneficiaries include UN country and regional offices,	Will be launched in Q2/Q3 2026	The Global Child Hazard Database provides comprehensive, high-resolution, and globally standardized datasets on	UNICEF	The database compiles a wide range of hazard data at the highest resolution available to provide a detailed sub-national	Will be available once launched.

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			governments, and all stakeholders, supporting informed decision-making.		children's exposure to multiple hazards. The database aims to improve accessibility and provide actionable insights for country and regional offices, host governments, and other key stakeholders, thereby supporting informed decision-making and policy advocacy.		picture of risks to children, covering climate hazards (riverine floods, coastal floods, tropical storms, agricultural and meteorological drought, heatwaves, extreme heat, fires, and sand and dust storms), climate-sensitive hazards (vector-borne diseases such as malaria, and air pollution), geophysical hazards (earthquakes, volcanoes, and landslides), and complex emergencies (conflict). Using the newly released high-resolution under-18 population layer, it estimates the number of children, boys, and girls exposed to each of these hazards.	
	Children's Rights in the Just Green Transition - Research Report	Derived from UNICEF's mandate under the Convention on the Rights of the Child (CRC), and informed by CRC General Comment No. 26 (2023) on children's rights and the environment,	Global; policymakers, UN entities, development partners, and private sector actors across transition-relevant sectors (e.g., energy, extractives, manufacturing); children as primary rights-holders.	Published in 2026 covering desk research and interviews in 2024; available for ongoing use	Analytical report examining the implications of just transition pathways for children's rights, including environmental, social, and economic dimensions. It analyses both current and potential impacts of climate and industrial transitions on children - such as exposure to environmental harm, access to essential services, and socio-economic	UNICEF (lead), with contributions from partners supporting data and analysis	Supports integration of child rights considerations into climate policy, economic transition planning, and responsible business practices.	https://www.unicef.org/childrightsandbusiness/media/1801/file/UNICEF-Research-Report-Just-Transition.pdf

ILO[1]	Overall	The ILO is the United Nations agency for the world of work.	Global		The ILO is the only tripartite UN agency, since 1919 the ILO brings together governments, employers and workers of 187 Member States, to set	Governments and employers' and workers' organizations are the ILO's constituents.		https://www.ilo.org/

[1] The initiatives highlighted above represent only a selection of the numerous interventions currently being implemented by the ILO, particularly at the national level. Together, they illustrate the breadth and diversity of the ILO's work, spanning global and national action and a wide range of policy areas aimed at advancing a just transition for all.

The ILO has also developed a wide range of knowledge products on just transition, covering diverse themes and policy areas. Selected examples include:

- World Employment and Social Outlook 2018: Greening with jobs
- Working on a warmer planet: The impact of heat stress on labour productivity and decent work
- Heat at work: Implications for safety and health
- Workforce 2030: Skills for thriving in the green and digital transition
- Employment in the circular economy: Leveraging circularity to create decent work (In partnership with Circle Economy, World Bank Group, PAGE)
- Renewable Energy and Jobs: Annual Review 2025 (in partnership with IRENA)
- Decent Work in Nature-Based Solutions 2024: Unlocking jobs through investment in skills and nature-based infrastructure (In partnership with UNEP and IUCN)
- Just Transition Finance - Pathways for banking and insurance (In partnership with UNEP-FI)
- Just Transition Finance Tool for banking and investing activities (In partnership with LSE Grantham Research Institute)
- Gender, equality and inclusion for a just transition in climate action

Just Transition policy briefs

					labour standards, develop policies and devise programmes promoting decent work for all. The ILO's leadership role in supporting a just transition has been formally endorsed, including through the International Labour Conference with the ILC Resolution concerning a just transition towards environmentally sustainable economies and societies for all.	The ILO collaborates with other agencies in the UN system and external actors.		
	Resolution concerning a just transition towards environmentally sustainable economies and societies for all	Adopted by the International Labour Conference (ILC).	Global	Adopted in 2023	Resolutions adopted by the International Labour Conference contain formal and authoritative statements reaffirming the importance which Member States attach to certain principles and values. They express the collective will or opinion of the Conference on important issues or serve to follow in-depth tripartite discussions within technical committees, enabling comprehensive exploration of complex topics. The 2023 Resolution, among other aspects, engages with: Guiding	Governments and employers' and workers' organizations	The ILC sets the international labour standards and the broad policies of the ILO. It meets annually in Geneva. Often called an international parliament of labour, the Conference is also a forum for discussion of key social and labour questions.	Link here

					principles for a just transition for all; the roles of governments and employers' and workers' organizations; and the role of the International Labour Organization. The Resolution endorses the ILO Just Transition Guidelines as the central reference for policymaking and a basis for action.			
	Guidelines for a just transition towards environmentally sustainable economies and societies for all	Adopted following an ILO tripartite meeting of experts.	Global	Adopted in 2015	These Guidelines are both a policy framework and a practical tool to help countries at all levels of development manage the transition to low-carbon economies and can also help them achieve their Nationally Determined Contributions (NDCs) and the 2030 Sustainable Development Goals. They provide a comprehensive framework comprising policies in the following key areas: macroeconomic and growth policies; industrial and sectoral policies; enterprise policies; skills development; occupational safety and health; social protection; active labour market policies; rights; and	Governments and employers' and workers' organizations	The Guidelines were drafted by a tripartite meeting of experts convened in 2015. Eight of the experts were nominated by Governments, while the Employers' and the Workers' Group in the ILO appointed another eight for each of the two groups.	Link here

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					social dialogue and tripartism, with gender equality as a cross-cutting element. The Guidelines also underline that the four pillars of the Decent Work Agenda are indispensable building blocks of sustainable development.			
	Just Transition Policy Gateway	Dedicated platform for exploring and advancing just transition policies and policy assistance.	National, Regional, Sectoral, and Global	Conceived in 2024 and due to be launched in June 2026.	The Just Transition Policy Gateway is intended to serve as a global, publicly accessible space that facilitates the translation of just transition commitments and principles into effective policy design and implementation by showcasing policies, plans and strategies. It offers a curated, searchable collection of integrated policies and other instruments that link labour markets, ecological transition and socioeconomic development. It is designed to become a key reference for governments building coherent policy frameworks, employers' and workers' organizations navigating structural transformations, and development partners and practitioners, supporting country level action. The	Development/funding partner: BMZ	The Gateway goes beyond sharing policy documents by examining how these policies were developed, the role played by governments and social partners, the challenges that emerged and how they were addressed; and the impacts that are expected for workers, enterprises, and their communities, turning static documentation into dynamic learning.	To be launched in June 2026.

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					Gateway was developed with support from BMZ. The knowledge-sharing component of the Gateway is complemented by operational support through a Policy Helpdesk. The Policy Help Desk is a function to provide tailored assistance to countries, governments and social partners, in addressing emerging needs on policy development and practical implementation challenges related to just transition. The Gateway and Helpdesk adopt a modular approach, with the view to scaling up support with the expansion of partnerships and collaborations.			
	Integration of just transition and decent work considerations into climate policies and planning processes, including NDCs; and supporting implementation.	Addressing the employment and social dimensions of climate action in climate policies.	National; Global knowledge exchanges	Ongoing	The ILO works with government and social partners to support them in advancing just transition and decent work in climate plans, The ILO has offered technical assistance, capacity building and knowledge sharing in order to support to several countries in this regard. For instance, through cooperation with the German Federal Ministry	BMZ; PAGE; Sida; France; others	The ILO has also provided support on integrating just transition and decent work considerations into NDCs, including through a focus on specific policy areas such as social protection, skills development, and sustainable enterprise development, among others and on social dialogue	ILO's offer on strengthening NDCs for a just transition and decent work; Mapping just transition in NDC 3.0: global trends across 123 countries

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					for Economic Cooperation and Development (BMZ), the ILO supports just transition policies through strengthened social dialogue and the participation of workers' and employers' organisations, including in NDC processes. The ILO has also supported knowledge sharing by organising international workshops and fora bringing together ministries responsible for labour and climate policy alongside employers' and workers' organisations to exchange experiences on advancing a just transition, with different entry points and thematic focuses. Based on a mapping of 123 countries that had submitted updated NDCs by November 2025, explicit references to "just transition" appear in 79 per cent of NDC 3.0 submissions, up from 50 per cent in the previous cycle, with increasing commitments across multiple policy areas, such as skills development, sustainable enterprises,			

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					social protection, occupational health and safety and social dialogue. The ILO continues to offer support to multiple countries as they move towards implementing their just transition and decent work commitments.. It provides assistance as part of the UN system and engaging with the NDC Partnership.			
	Project: Innovation Regions for a Just Energy Transition	The project 'Innovation Regions for a Just Energy Transition' collaborates with countries and actors to plan for and implement regional just energy transition pathways in coal regions.	National	2023 onwards	Focusing on the economic transformations in coal regions, IKI-JET works with government, industry, unions, communities, civil society and academia to spur localized pathways to sustainable energy systems and sustainable and just local economies and jobs. It supports interregional peer-to-peer exchange, learning, capacity building, technical assistance and policy dialogue in an International Network of coal regions from Latin America, Africa and Asia and information sharing on JET and innovation in coal regions.	Implementation partners include: ILO, CAN International, GIZ, IISD, Solidarity Center Wuppertal Institute. Funding partners: International Climate Initiative (IKI) and the European Commission	The project is implemented by the ILO as part of a consortium that includes CAN International, the International Institute for Sustainable Development, GIZ, Solidarity Centre and Wuppertal Institute. Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	United Nations Partnership for Action on Green Economy (PAGE)	The UN-PAGE puts sustainability at the heart of global economic policymaking for a shift in finance and investment towards a just, circular, and green economic transformation.	National, Regional, Sectoral and Global	PAGE was launched in 2013	The partnership brings together five United Nations agencies; UNEP, UNDP, ILO, UNIDO, and UNITAR, whose expertise and support assist and lead partner countries (more than 20 countries) towards their transition to an Inclusive Green Economy by providing policy advice, assessments, capacity building and analytical tools outputs. Within the PAGE programme, which includes three policy pillars (just transition and green jobs; circular economy; sustainable finance), the ILO is leading on the just transition pillar and promoting the 2015 ILO Just Transition Guidelines. For instance, recently, PAGE contributed towards analytical work, such as the report Employment in the circular economy: Leveraging circularity to create decent work; facilitated cross-regional policy dialogue and peer learning on the economic and labour market	PAGE is a collaboration between the ILO, UNEP, UNDP, UNIDO and UNITAR.	PAGE is a demand-driven initiative, well-positioned to respond to the specific needs and priorities of countries. By directly linking to national planning frameworks, PAGE facilitates the integration of green and circular economy principles through evidence-based analysis and policy advice.	Link here

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					dimensions of energy transitions, sustainable finance and circular economy approaches; facilitated a virtual policy dialogue series between policymakers and practitioners from South Africa and Indonesia to explore pathways to a just energy transition; and held a PAGE Regional Academy For Africa on Financing a just transition to green and circular economies.			
	Project: Social Partners as Agents for Just Transition	An initiative to support governments, workers and employers organizations in integrating just transition principles into the 2025 NDCs	10 countries	2024 onwards	As countries revise their climate commitments, this project aims to ensure that the ILO Just Transition principles are reflected through social dialogue and specific capacity-building to enhance social partners' engagement. Focusing on 10 countries, the project strengthens social partner capacities, promotes evidence-based policies, and fosters knowledge-sharing through a Just Transition Gateway. The project facilitates tripartite dialogue in six core countries, with potential expansion. Led by multiple ILO departments, this initiative ensures that climate action supports	Development/funding partner: BMZ	Also see: Tripartite constituents gather in Johannesburg to drive just transition in climate action	Link here (ILO Development Cooperation Dashboard)

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					decent work, economic stability, and social equity.			
	Project: Just transition and environmental sustainability	This project is contributes to promoting decent and green employment opportunities and a just transition towards more sustainable and resilient economies.	Global, National	2022 onwards	The just transition component of the ILO-Sida partnership promotes decent and green employment opportunities and a just transition. It supports countries in advancing just transition and decent work in NDCs and other environmental plans, on developing integrated just transition strategies, on skills for green jobs policies, and on addressing decent work in Nature-Based Solutions. It has a particular emphasis on women, youth and people living in poverty.	Funding partner. Sida	The project connects global processes and guidance and country level support on just transition policy-making.	https://webapps.ilo.org/DevelopmentCooperationDashboard/p/project/108573
	Select project example at National level: Women Work Greener and Better – Green Jobs for Women and Youth in the Saloum Delta	The project seeks to address decent work deficits in the context of climate and environmental challenges in a mangrove region.	Senegal	2022 onwards	This project focuses on the mangrove Saloum Delta in Senegal where in particular women are engaged in subsistence farming, aquaculture and dead wood collection. It improves value chains and creates decent jobs opportunities for women and youth through a market systems development approach and concretely establishing cooperatives and microenterprises. It seeks	Development/funding partners: BMZ. The intervention was designed within the framework of the BMZ's Special Initiative on training and job creation and the UN-wide Global Accelerator on Jobs and Social	The project combines specific interventions such as cooperation with medium-sized and international companies and value chains development for green jobs creation, with existing efforts by the ILO and other actors to create an enabling environment for sustainable development in Senegal.	Link here (ILO Development Cooperation Dashboard)

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					to enhance access to social protection benefits to reduce the risks they face and help secure and sustain these livelihoods. It promotes green entrepreneurship will support economic diversification and increase the demand for mangrove produce and services while creating job opportunities for young men and women.	Protection for Just Transitions		
	Select project example at National level: Advancing Just Transition in Bangladesh	This initiative aims at institutionalizing and operationalizing Just Transition in Bangladesh.	Bangladesh	2025 onwards	Bangladesh is among the most climate-vulnerable countries in the world, already facing heat stress, rising seas and extreme weather that threaten livelihoods—especially for informal and coastal workers. As the country moves toward middle-income status and tighter global sustainability requirements, its labour force and enterprises remain poorly equipped for the transition, and existing Just Transition efforts are fragmented. This initiative, led by the ILO with the Laudes Foundation, aims to institutionalize and operationalize Just Transition in Bangladesh	Development/funding partner: Laudes Foundation	The project also focuses at the sectoral level, and will develop roadmaps and pilot interventions in priority climate-vulnerable sectors - such as Ready-Made Garment (RMG), construction, agriculture and aquaculture - to test practical models for green jobs, enterprise adaptation and climate-resilient livelihoods.	Link here (ILO Development Cooperation Dashboard)

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					by creating a nationally anchored, multi-stakeholder platform that brings government, employers, workers and key partners around one agenda. It strengthens social dialogue, reinforces policy coherence and supports the integration of Just Transition principles into national frameworks such as NDC 3.0 and the evolving employment and sectoral policies.			
	Select project example at National level: Integrated Action for Green Jobs and Skills	Supports the development of skills for green jobs by strengthening policies, capacities, and TVET systems.	Ghana	2024 onwards	The ILO focuses on three main issues: (1) The promotion of policy coherence across skills-development programmes and environmental policies to promote green and digital jobs; (2) The reinforcement of national/sectoral constituents' and stakeholders' capacities to address skills gaps, design and implement skills strategies for green and digital economy; (3) The relevance and accessibility of competency-based TVET programmes that respond to current and future labour market needs.	Development/ funding partner: European Commission	The Integrated Action for Green Jobs and Skills Project developed pursuant to the EU-Ghana Pact for Skills Programme. 					their businesses on its Start and Improve Your Business (SIYB) and Financial Education programmes, and support their access to much-needed financial services. Along with ILO social partners, it also engages with the Central Bank of Iraq, Iraqi Company for Banking Guarantee, partner banks, Microfinance Institutions, Business Services Providers, and others.			
	Select project example at National level: Strengthening jobs and social protection systems in response to green and demographic transitions in Viet Nam	The project supports Viet Nam's green and aging transitions by strengthening gender-responsive labour market and social protection systems.	Viet Nam	2025 onwards	Viet Nam is one of the five countries most vulnerable to climate change and the green transition presents significant labour market opportunities. While the transition has large potential to create jobs, it requires skills development and active labour market interventions for all workers, including vulnerable ones. Viet Nam is also one of the fastest aging countries in the world, has a social insurance (SI) system that requires significant reforms in order to meet the ambitious coverage targets.	Development/funding partner: Multi Partner Trust Fund Office, UNDP	This project is part of the Global Flagship Programme on Building Social Protection Floors for All.	Link here

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					The Joint Programme supports Viet Nam in facing the challenges brought about by two megatrends: Aging transition and green transition. The aging challenge is acute, Viet Nam being one of the fastest aging countries in the world, while having low pension coverage, high exit rates of social insurance, and modest contribution of GDP to social assistance programs. While the green transformation brings employment opportunities, including formal employment, gender disparities persist. Career development support systems are not yet adapted to guide workers, including youth and women, to skills and labour market information needed for green jobs. Climate change further exacerbates risks facing vulnerable population groups directly and indirectly. The Programme aims (1) to enhance gender-responsive labour market measures for green transition, and (2) to strengthen gender-

					responsive social protection systems.			
	Project: Climate Prosperity Plans, heat stress and decent work	The project has a focus on the implications of heat stress on jobs and productivity.	National – multiple countries	2023 onwards	The CVF-V20's Climate Prosperity Plans enables country-specific development plans that integrate socio-economic development and climate agendas. They are purpose-built to expand finance mobilization across a range of sources for robust socio-economic progress and reduce emissions while building greater climate and disaster resilience as well as safeguarding SDG progress to 2030. The project responds to a growing policy imperative to address heat stress as a core occupational safety and health as well as productivity challenge, with far reaching implications for socio-economic resilience and decent work. This includes the development of country-level research and scenarios related to heat stress and its implications for jobs and productivity that could feed into the CPPs; bringing together relevant government ministries, workers' and	Development/funding partner: Climate Vulnerable Forum and the Vulnerable 20 Finance Ministers (CVF–V20)	For more information on Climate Prosperity Plans. Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					employers' organizations in each country to reflect on policy issues; as well as to explore opportunities for further initiatives to address the challenges arising from heat stress, including through the Green Climate Fund.			
	Trainings	The ILO provides capacity development to governments, employers' and workers' organisations and other stakeholders. This includes national and international training courses.	Global, regional, national	Ongoing	The ILO International Training Centre (ILO-ITC) has a menu of training programmes while also offering tailored on-demand courses. Tripartite capacity development initiatives bring together government institutions, employers and workers to explore practical approaches to advance decent work in the climate transition and integrate just transition into policies across areas such as climate plans, social protection, occupational safety and health, green job creation, skills and enterprises development, among others. These can have either a policy or thematic focus, and selected examples include: • Fostering green business growth	Depending on the training programme, experts from the ILO, other UN agencies, or other relevant organizations may be invited to contribute.	The International Training Centre is the training arm of the International Labour Organization.	To explore the multiple courses offered at the ITC-ILO, see here.

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					• Green Works and Nature-Based Solutions to Respond to Unemployment and Rural Poverty • The social impacts of climate policies: Planning for a just transition • Promoting gender equality in climate action: pathways to a just transition • Making Green Microfinance Work • Just Energy Transition courses			
	Assessment and modelling	The ILO offers assessment and modelling tools to help countries evaluate the impacts of climate and transition policies on jobs, skills, enterprises and livelihoods, and to design evidence-based just transition pathways.	National	Ongoing	Just Transition Assessment Model (JTAM): Provides decision-makers with a powerful platform to simulate and analyse the socio-economic and environmental impacts of key policies. This means that national strategies, from the implementation of NDCs to National Employment Policies, can be tested against multiple scenarios before adoption, offering insights into trade-offs, risks, and opportunities. By projecting how policies affect employment, growth, greenhouse gas emissions, and equity, the JTAM allows government institutions to adopt a more	Such tools may be deployed with diverse partners. For example, in Thailand, a JTAM-related consultation was jointly organized by the ILO, the National Economic and Social Development Council (NESDC), and Thammasat University under the United Nations Partnership for Action on Green Economy (PAGE).	A key strength of such tools is their adaptability to country contexts, allowing the integration of national realities that reflect local economic, sectoral, and labour market conditions.	JTAM country case link; SPEED link; GED link

					more equitable and sustainable outcomes.			
	Case Study: Micro-Hydro Power in Indonesia: The Role of Decentralized Energy in Just Transition Strategies		Indonesia	Published Dec. 2025	By examining the diverse MHP initiatives, this case study explores the extent to which decentralized renewable energy can advance just transition goals in the global South. The MHP cases highlight how reliable, small-scale renewable systems can generate multidimensional benefits while minimizing negative environmental impacts. Yet, persistent challenges remain including gender inclusion gaps, policy fragmentation, and the difficulty of sustaining initiatives overtime. Through a feminist analytical lens, this study shows that sustained implementation depends largely on the extent of community involvement. Inclusive processes build ownership and continuity, while government-or private-led arrangements that limit engagement often result in weaker attachment and reduced durability. These findings offer lessons for achieving more inclusive, participatory, and equitable energy transitions			https://www.unrisd.org/en/library/publications/micro-hydro-power-in-indonesia-the-role-of-decentralized-energy-in-just-transition-strategies

					throughout the global South.			
	Report: Just Transition and Care Work: An International Inquiry		Global	Published Nov. 2025	This report is based on an international 'workers' inquiry' process involving actors in different areas of care work, collecting their perspectives on the social and ecological challenges they face and what they see as necessary to tackle them, with particular attention to just transition strategy. The sectors we examined include: 1) housework and care for people, in both domestic and community spaces; 2) peasant and Indigenous food provision; 3) environmental care in community-led conservation and restoration; 4) healthcare; and 5) education. In short, this report claims that, to protect people and the planet, just transition policies must properly include the rights and needs of care workers.	Just Transition and Care Network		https://www.unrisd.org/en/library/publications/just-transition-and-care-work-an-international-inquiry
	Report: Just Energy Transition in Brazil		Brazil	Published Nov. 2025	This report reflects on Brazil's national characteristics and energy history in order to address three questions: The first question discusses multiple kinds of energy in Brazil			https://www.unrisd.org/en/library/publications/just-energy-transition-in-brazil

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					with the aim of identifying how much and what kind of energy transition is actually happening. As in many countries, energy transition in Brazil is uneven and partial, with oil and gas production continuing to grow alongside new low-carbon energy sources. The second question focuses on the justice issues that arose with the historical status quo of Brazil's energy sector before turning to the third question of the justice dimensions of the transition itself. Unfortunately, there is no form of energy in Brazil that is free from negative socioenvironmental and developmental impacts that might present an energy injustice. However, different kinds of energy present different constellations of impacts on different people and groups. Thus, thinking about a just energy transition requires thinking of this bundle of impacts, of both new sources of energy and existing ones. Despite challenges, Brazil retains considerable scope for action to achieve its climate and development

					expands the scope of climate policy towards inclusive, resilient, life-sustaining economies.			
	Side Event at COP30: Fostering Human and Social Development Amid Climate Change—the Power of Social Protection for All		Global	12 Nov. 2025	This side event at COP30 in Belém, aimed to foster a holistic understanding of social protection's role in climate mitigation, adaptation, loss and damage, and in tackling structural inequalities for a just transition.	ILO, FAO, UNICEF		https://www.unrisd.org/en/activities/events/fostering-human-and-social-development-amid-climate-change-the-power-of-social-protection-for-all
	Report: Just Transition in South Africa: An Overview and Possible Future Scenarios		South Africa	Published Oct. 2025	This report situates the evolution of the different visions for a just transition in South Africa within the social and political context of the country, examining the competing interests of labour, civil society, private capital and the state, and the underlying tensions concerning finance, the nature of ownership, and local governance. It offers historical perspective, exploring the foundations of the country's coal dependency and mapping how key power dynamics between state formation, elite contestation and worker struggles have shaped the terrain of the sector, with a specific focus on the energy			https://www.unrisd.org/en/library/publications/just-transition-in-south-africa-an-overview-and-possible-future-scenarios

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					transition. Ultimately, South Africa's energy transition cannot be separated from the legacies of the coal-based minerals-energy-complex, which entrenched inequality by subsidizing heavy industry at the expense of Black working-class communities. This case study shows how just transition is not only about changing the technologies that generate electricity. It is about rebuilding the social contract, ensuring that decarbonization goes hand in hand with justice, equity, and the creation of a more inclusive economy.			
	Case Study: Sewa's Green Livelihood Campaign: Transforming Lives and Livelihoods in India		India	Published Aug. 2025	By looking at the work of the Self-Employed Women's Association (SEWA), a union representing nearly two million informal women workers across India, this case study examines gender-transformative approaches to just transitions through grassroots initiatives in the global South. SEWA launched its Green Livelihood Campaign in 2009 with a transformative vision: to position energy access as a tool for	GI-ESCR		https://www.unrisd.org/en/library/publications/sewas-green-livelihood-campaign-transforming-lives-and-livelihoods-in-india

	Transition for All: From Concepts to Action				Low-Carbon Economy, the session brought together global organizations to accelerate a just transition through scalable job creation, social protection, and inclusive social dialogue. With a focus on action over theory, it spotlights practical solutions that empower youth, elevate women's voices, and protect vulnerable communities in the shift to a green economy.	Foundation, GIZ, FES, IDOS		all-from-concepts-to-action
	Policy Brief: Just Energy Transition Partnerships: Toward a Collective Assessment			Published Dec. 2023	One of the more recent phenomena to emerge on the international climate policy horizon, Just Energy Transition Partnerships (JETPs) promised to deliver quickly and effectively on just energy transitions in a select few developing countries. However, forged among a small group of partners outside the multilateral climate policy space, it is not yet clear how ambitious, just and inclusive they are. UNRISD convened a series of expert conversations and calls for an in-depth collective assessment to improve climate justice outcomes of JETPs.			https://www.unrisd.org/en/library/publications/just-energy-transition-partnerships-toward-a-collective-assessment

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Webinar: Just Energy Transition Partnerships (JETPs): What Do We Need to Know to Assess Them?		Global	7 Dec. 2023	Just Energy Transition Partnerships (JETPs) promised to deliver quickly and effectively on just energy transitions in a select few developing countries. However, forged among a small group of partners outside the multilateral climate policy space, it is not yet clear how ambitious, just and inclusive they are. This webinar introduced a common framework for assessing JETPs performance on justice and the energy transition.	Rosa Luxemburg Stiftung		https://www.unrisd.org/en/activities/events/just-energy-transition-partnerships-jetps-what-do-we-need-to-know-to-assess-them
	Webinar: Working-Class Environmentalism and Just Transition Struggles in the Americas		Americas	22 Mar. 2022	This session zoomed in on questions of alliance building and seeking common ground in three case studies on working-class environmentalism. The case of Ecuador shows that workers' struggles are not limited to areas typically examined by labour studies, but include struggles of Indigenous peoples and agricultural workers. Our Brazil case study analyses agrarian protest and resistance against environmental degradation, examining the role of faith and religious institutions in enabling resistance through teaching	Centre for Environmental Justice at Colorado State University, Global Labour University (GLU), European Trade Union Institute (ETUI), University of São Paulo		https://www.unrisd.org/en/activities/events/working-class-environmentalism-and-just-transition-struggles-in-the-americas

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					and connecting individuals to social movements. Finally, the example of Canada showcases the challenges of coalition building among different stakeholder groups by comparing a worker-focused approach with a more inclusive campaign for just transition. The session illustrates the diverse challenges of working-class environmentalism and explore strengths and challenges of environmental labour mobilizations for a just transition.			
	Side Event at CSW66: Shifting Narratives and Practices to Achieve Gender Just Climate Transitions		Global	15 Mar. 2022	This CSW66 side event brings together insights from ecofeminist research in global North and South arguing that both narratives and practices must change to secure gender just transitions: ecofeminism offers powerful alternative narratives that value care for people and planet, in contrast to mainstream development. Much just transition policy attention still focuses on male-dominated, formal work such as coal mining. Who is represented in narratives for just low-carbon	IDRC, Climate and Development Knowledge Network		https://www.unrisd.org/en/activities/events/shifting-narratives-and-practices-to-achieve-gender-just-climate-transitions

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					transitions makes a difference. Women's voices and lived experiences need to influence debates and decision making to achieve gender-egalitarian practices and low-carbon transitions that contribute to climate action and justice.			
	Webinar: Challenges and Perspectives of a Just Transition in Europe		Europe	7 Mar. 2022	What are the main challenges of a just transition to a zero-carbon economy in the EU? Taking a broad-based theoretical approach, speakers at this webinar present the current EU context for a just transition, paying particular attention to the European Green Deal and the Fit for 55 package.	Centre for Environmental Justice at Colorado State University, Global Labour University (GLU), European Trade Union Institute (ETUI), University of São Paulo		https://www.unrisd.org/en/activities/events/challenges-and-perspectives-of-a-just-transition-in-europe
	Webinar: Moving Beyond Extractive Industries: Resistance and Alternatives		Global	21 Feb. 2022	This webinar looks at the disastrous impact of extractive industries on working-class communities, both in terms of the environmental crisis but also energy poverty. The main focus of the webinar is on ongoing struggles which are building spaces of resistance and envisioning alternatives beyond extractive industries.	Centre for Environmental Justice at Colorado State University, Global Labour University (GLU), European Trade Union Institute (ETUI), University of São Paulo		https://www.unrisd.org/en/activities/events/moving-beyond-extractive-industries-resistance-and-alternatives

					equity and locally appropriate responses.		sustainable development for all, and involves equity and system transitions.	
	AR6 — Working Group I: The Physical Science Basis	Same as above	Global and regional. Main users include governments, climate service providers, researchers and practitioners needing physical climate information.	Published in 2021	Provides the assessed physical science basis of climate change, including observed and projected changes in temperature, precipitation, extremes, sea level and climatic impact-drivers. It supports just transition planning by providing the climate-risk context within which low-emission and climate-resilient development pathways are considered.	Same as above	Relevant to JTWP elements on adaptation, resilience, risk-informed planning and nationally determined pathways, particularly where transitions need to account for regional climate hazards.	Link (here)
	AR6 WGI Interactive Atlas	Part of the AR6 WGI assessment products	Global and regional; intended for users who need spatial and temporal climate information, including governments, researchers and practitioners	Operational AR6 knowledge product	Provides flexible spatial and temporal analysis of observed and projected climate change information, including variables, indices and warming levels. It can help users explore regional climate information relevant to adaptation, resilience and transition planning	Developed in support of IPCC WGI AR6; linked to underlying climate datasets	The Interactive Atlas includes a selection of extremes and climatic impact-drivers, supporting broader use of the assessment findings for regional climate-risk information.	Link (here)
	AR6 WGI Climatic Impact-Driver and Extreme Indices / data products	Part of the AR6 WGI assessment and supporting materials.	Global and regional; relevant for climate-risk assessment and adaptation planning	Published with AR6 WGI; supporting data products available	Provides assessed information and indices on climatic impact-drivers and extremes, such as changes in temperature, precipitation, snowfall and wind, which can inform understanding of hazards	IPCC WGI; climate modelling and data communities.	Gridded data from global and regional projections are available for variables and indices included in the IPCC Interactive Atlas	Link (here)

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					relevant to resilient and just transition pathways.			
	AR6 Synthesis Report	Synthesizes the three Working Group contributions and relevant Special Reports	Global; intended primarily for policymakers and UNFCCC processes	Published in 2023	Provides an integrated synthesis of physical science, impacts, adaptation, vulnerability and mitigation. It can support holistic consideration of climate-resilient development pathways, including the interlinkages between mitigation, adaptation, sustainable development, equity and finance	IPCC member governments; scientific author teams; WMO and UNEP as parent organizations.	Useful as a concise entry point for Parties and stakeholders seeking integrated findings relevant to just transition pathways, including synergies and trade-offs across mitigation, adaptation and sustainable development	Link (here)
	AR7 — Special Report on Climate Change and Cities	Agreed by the Panel at IPCC-61	Global, with city types and regions; relevant for national and subnational policymakers, urban practitioners and stakeholders	In preparation; approval of the Summary for Policymakers and acceptance of the Special Report are scheduled for March 2027.	The agreed outline includes treatment of urban vulnerabilities, marginalized areas and people, gender, equity, informality and justice; urban mitigation and adaptation options; local risk assessments; and integration of mitigation and adaptation into sustainable development and just transitions	Same as above	Potentially relevant to urban dimensions of just transitions, including informal settlements, local risk assessments, infrastructure, mobility, buildings, air quality, service provision, finance and inclusive governance	Outline link (here)
	AR7 — Working Group III chapter outline	Agreed AR7 assessment product	Global and sectoral; relevant for governments, UNFCCC processes, researchers and stakeholders concerned with mitigation and transitions	In preparation as part of AR7	The WGIII outline includes sustainable development and mitigation, distributional consequences, livelihood and economic impacts of mitigation-related transitions, enabling conditions including technology, finance and	Same as above	The outline also includes enablers and barriers, finance, services and demand, energy systems, industry, transport, buildings, AFOLU, and cross-cutting links to sustainable development, justice, equity, adaptation, Indigenous	Outline link (here)

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					cooperation, and equity and justice with a focus on just transitions at sectoral, national, regional and global levels		Peoples, local communities and gender	
	AR7 — Working Group II chapter outline	Same as above	Global, regional and thematic; relevant for adaptation, resilience, risk and vulnerability communities.	Same as above	The WGII outline includes observed and projected impacts, vulnerability and adaptive capacity, key risks under different warming levels and development pathways, locally led adaptation, barriers and enablers including finance, capacity-building and technology transfer, and the distributional nature of impacts, including human rights, equity and justice	Same as above	Particularly relevant to just transition pathways that integrate adaptation, resilience, food systems, livelihoods, poverty, human mobility, infrastructure, health, ecosystems and social protection	Outline link (here)
	AR7 — Working Group I chapter outline	Same as above	Global and regional; relevant for governments, UNFCCC processes, researchers, climate service providers, adaptation planners and other stakeholders requiring physical climate information	Same as above	The WGI outline includes assessment of large-scale changes in the climate system and their causes; changes in regional climate and extremes; scenarios and projected future global temperatures; global and regional projections of Earth system responses; abrupt changes, low-likelihood high-impact events and tipping points; and climate information and services. It is relevant to just transition pathways by providing the physical climate-risk context needed for planning low-emission	Same as above	Particularly relevant to JTWP elements on adaptation, climate resilience, risk-informed planning and nationally determined pathways. The outline includes climate information from multiple lines of evidence and knowledge sources, including Indigenous Peoples' knowledge and local knowledge, for public awareness, impact and risk assessment, losses and damages, adaptation and mitigation. It also includes climatic impact-	Outline link (here)

		GAW established 1989; IG3IS launched 2016 under the WMO Research Board			GAW to provide independent, science-based verification of greenhouse gas emission trajectories, complementing self-reported national inventories. Together they offer a credible accountability layer for transition milestones, including those of the COP30 Roadmap on Transitioning Away from Fossil Fuels.			
UNCTAD	Trade policies to advance national climate plans: Guide for policymakers	Geneva Consensus (UNCTAD's mandate), para. 80.50: Assist Member States to design and implement Nationally Determined Contributions (NDCs) measures related to trade and investment policies.	All Member States, especially developing countries	2025, Completed	The guide provides a step-by-step checklist and tools for policymakers to harness trade measures to advance national climate plans aligned with the SDGs. The guide shows how public procurement, subsidies, and tax exemptions can drive the adoption of sustainable goods and support low-carbon transitions. The guide also noting these measures must be designed to comply with international principles and avoid discrimination. The Guide has been translated and operationalized into a	—	—	https://unctad.org/publication/trade-policies-advance-national-climate-plans

					technical cooperation tool that allows national stakeholders from developing countries to initiate a country-level dialogue on trade and climate change.			
	Leveraging foreign direct investment to advance national climate plans: Guide for policymakers	Geneva Consensus, para. 80.50 (ibid)	All Member States, especially developing countries.	2025, Completed	The Guide offers policymakers a practical roadmap to integrate investment and FDI needs into NDCs, align national policy frameworks with climate objectives, and strengthen promotion efforts to attract bankable climate-aligned projects. The Guide contributes to just transition by encouraging policymakers' attention to making infrastructure and training accessible, affordable and responsive to the needs of all people, enabling equal participation in the low carbon transition and ensuring that climate aligned investments are consistent with national long-term development goals.	—	—	https://unctad.org/publication/leveraging-foreign-direct-investment-advance-national-climate-plans
	Mapping Trade-Related Measures in the Nationally Determined	Geneva Consensus, para. 80.50 (ibid)	All Member States, especially developing countries	2023, Completed	The report mapped 60 developing countries' NDCs and identified 680 trade-related measures. The mapping showed that	—	—	https://unctad.org/publication/mapping-trade-related-measures-nationally-

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Contributions: Technical Note				trade-related measures, such as technical regulations and market-based measures, can contribute to advancing climate goals. Especially for developing countries, harnessing trade and trade policy can facilitate access to environmentally preferable goods and lower the cost of transition. The report provides guidance for countries to integrate trade and investment policy into their NDCs to further accelerate their climate change goals.			determined-contributions
	Trade Regulations for Climate Action: New Insights from the Global Non-Tariff Measures Database	Geneva Consensus, para. 80.50 (ibid)	All Member States	2023, Completed	The report identified 2366 climate change-related Non-tariff Measures from UNCTAD's global NTM database TRAINS. TRAINS comprises detailed information on trade-related regulations from over 142 countries, accounting for over 95 per cent of global trade. The report helps policymakers and other stakeholders better understand the linkages between trade and climate policies and make more informed decisions to use	—	TRAINS database: https://trainsonline.unctad.org/home	https://unctad.org/publication/trade-regulations-climate-action-new-insights-global-non-tariff-measures-database

					trade as a driver for climate action. The report further points out that NTMs have a disproportionate effect on least developed countries and vulnerable groups, and suggests that the technical complexity of requirements and the lack of transparency can be prohibitive. This is important for just transition and future international coordination.			
	eLearning course: Harnessing trade to advance national climate and development goals	Geneva Consensus, para. 80.50 (ibid)	All Member States. Target audiences include government officials, academia, regional organizations, private sector and finance professionals, and civil society.	1st edition: 2025, Completed. 2nd edition: 2026, Ongoing.	The online course enhances public and private stakeholders' ability to harness trade as a driver of low-carbon development, climate resilience, and mitigation. Drawing on UNCTAD's research and technical cooperation experience on trade and climate change, the course guides participants to identify climate-strategic sectors and design relevant trade policies to contribute to the attainment of the climate and other sustainable goals of the 2030 Agenda for Sustainable Development, while promoting coherence and alignment with other national development strategies.	UN ECA, ISO, ITC, STDF, Forum on Trade, Environment & the SDGs (TESS), Curtin University, Chalmers University of Technology and the University of Gothenburg, Global South Nexus	—	1st edition: https://unctad.org/meeting/elearning-course-harnessing-trade-advance-national-climate-and-development-goals； 2nd edition: https://unctad.org/meeting/elearning-course-harnessing-trade-advance-national-climate-and-development-goals-2nd

		strategies for the conservation and sustainable use of oceans and their resources.						
Entries below were submitted after the Initial interim output on the mapping of relevant instruments, initiatives and processes under the Convention and the Paris Agreement and relevant entities in the United Nations system								
UNFPA	Resilient Futures: Empowering National Climate Actors for Gender-Transformative Adaptation (Funded by the African Development Bank's Africa Climate Change Fund - ACCF)	Support countries in utilizing demographic data to integrate health and gender equity into national climate adaptation strategies. It supports just transitions by building local institutional capacities and safe social protection mechanisms	Multinational scope covering 10 East and Southern African countries, with primary focus on Kenya, Madagascar, Mozambique, and South Sudan, alongside Ethiopia, Malawi, Namibia, Tanzania, Zambia, and Zimbabwe. Targets: National and sub-national government officials, climate negotiators, National Gender and Climate Change Focal Points (NGCCFPs), youth-led civil society networks, and climate-vulnerable communities	2023 – 2026; Active and ongoing.	This initiative provides multi-sectoral technical assistance and capacity-building to national actors to integrate gender-transformative approaches into national climate policies. It directly addresses the workforce readiness and human capital dimensions of just transition pathways by embedding technical skills within youth networks. Key outputs and types of support include: • Conducting national-level capacity gap assessments and hosting multi-stakeholder policy formulation workshops across 10 ministries. • Delivery of integrated Climate Change and Comprehensive Sexuality Education (CSE) modules to build	African Development Bank (AfDB) Group, national line ministries (Environment, Health, Gender, Youth, and Finance), civil society organizations, and local youth networks		AfDB ACCF Project Portal https://accf.afdb.org/en/projects/ongoing/multinational-strengthening-climate-resilience-through-enhanced-capacity

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					community-level youth resilience. • Provision of technical support to scale up youth and women-led circular economy and low-carbon climate initiatives.			
	UNFPA Climate Hacklab Initiative (including the "Let's Hack Climate Change" Hacklab framework)	Operationalized under the regional Safeguard Young People (SYP) flagship programme, the ACCF Resilient Futures project, and Zonta International's ClimateEmpower project to center meaningful youth participation and innovation in climate resilience systems	East and Southern Africa region, with country-specific implementation hubs in Kenya, Madagascar, Mozambique, South Sudan, Zambia, and Tanzania Targets: Young African entrepreneurs and innovators (under 35 years), youth-led social enterprise hubs, adolescents, and specifically girls and young women who face disproportionate climate shocks	Launched in 2021; Active, ongoing, and currently expanding into multi-country cohorts	An innovation crowdsourcing and business incubation platform that enables young people to co-create and scale commercially viable solutions addressing the intersection of climate change and human well-being. The Hacklab actively addresses the workforce and socioeconomic dimensions of the Just Transition by shifting youth from passive recipients of climate aid to active producers of green jobs, circular economy supply chains, and localized resilience technology. Type of support includes: • Technical and entrepreneurial capacity-building through intensive design-thinking and business development bootcamps. • Provision of early-stage seed capital funding ($5,000 to $10,000 per winning solution) to de-	Swiss and Dutch Governments (via SYP funding), AfriLabs (regional incubation network partner), Zonta International, and national ministries responsible for Youth and ICT		UNFPA Innovation and Youth Portal https://micro.page/UNFPA

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					risk and launch youth enterprises. • Ongoing business coaching, customer acquisition, and brand-positioning mentorship via regional incubator networks. • Key scaled outputs include women-led micro-credit solar irrigation projects and solar-powered zero-emission motorcycle medical supply chains for remote maternal health clinics.			
	Demographic Intelligence for Disaster Risk Reduction: Estimating Population Exposure to Multiple Hazards in Latin America and the Caribbean	UNFPA mandate on population data and demographic intelligence; supports evidence-based, inclusive disaster risk reduction, climate adaptation and resilience.	Latin America and the Caribbean; national and subnational authorities and populations exposed to climate-related and other hazards, with demographic disaggregation.	Published; methodology available for national and global application.	Joint UNFPA–UNDRR regional analysis integrating high-resolution gridded population data with probabilistic hazard information for earthquakes, riverine floods and hurricane winds. It produces spatially explicit estimates of exposed populations, including by age and sex, and identifies multi-hazard exposure. The analysis estimated that 19.2% of the LAC population is exposed to earthquake hazards, 15.4% to hurricane winds and 9.8% to riverine floods. It provides an evidence base for geographically targeted disaster risk reduction,	UNDRR.	Provides a methodological basis for identifying populations and territories disproportionately exposed to hazards and for prioritizing adaptation and resilience investments. Subsequent phases envisage incorporating socioeconomic and other dimensions of vulnerability.	https://lac.unfpa.org/en/publications/demographic-intelligence-drr-population-emergency-hospital-lac?page=0

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					adaptation, preparedness and resilience planning.			
	National Demographic Intelligence and Vulnerability Assessments / Country Pilots	UNFPA mandate on population data, censuses and demographic intelligence, applied to climate adaptation, disaster preparedness and resilient systems.	Initial country applications in Latin America and the Caribbean, including El Salvador, Brasil, Mexico and Cuba; national institutions responsible for statistics, planning, disaster risk management and service delivery, and populations living in vulnerable and hazard-exposed areas.	Ongoing / under development.	National applications integrate census and population data with geospatial hazard information and other socioeconomic and sectoral data to move from population exposure analysis toward vulnerability assessment. Support includes methodological development, spatial analysis, technical assistance and national capacity-building. Intended applications include preparedness and territorial planning, continuity and targeting of health and SRHR services, vulnerability mapping and development of evidence for climate-finance proposals.	National statistical and government institutions; UNDRR; other technical partners depending on the country.	Designed to institutionalize demographic intelligence within national planning rather than produce stand-alone analyses. The approach can help identify populations and territories requiring differentiated support in climate adaptation and transition processes.	
	Risk-Ready Futures / Public-private partnership for demographic intelligence and climate resilience	Supports UNFPA's work on demographic resilience, disaster preparedness, climate adaptation and innovative financing.	Latin America and the Caribbean, with country-level applications and potential regional scaling; national institutions and populations exposed and vulnerable to	Ongoing / scaling phase.	Partnership model to scale demographic intelligence from regional exposure analysis toward national vulnerability assessment and operational application. It combines demographic, hazard and service-related information to support preparedness, adaptation and resilience	Bayer; UNDRR; IFRC, national institutions and other technical partners.	Demonstrates a public-private partnership model for applying demographic intelligence to climate resilience and mobilizing resources. The initiative provides an avenue for translating demographic evidence into national planning and investment decisions,	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			climate and disaster risks.		decisions, while developing approaches for mobilizing additional climate and resilience financing.		particularly where climate risks and social vulnerabilities intersect.	
	High-resolution gridded population datasets for Latin America and the Caribbean	UNFPA mandate to strengthen population data systems and make demographic information available for development, humanitarian action and evidence-based planning.	Latin America and the Caribbean; governments, national statistical offices, UN entities, humanitarian and development partners and researchers.	Completed and available; datasets can be updated and applied to subsequent climate and risk analyses.	UNFPA, WorldPop and the German Aerospace Center developed high-resolution gridded population datasets based on the best available official subnational population projections, disaggregated by age and sex. The datasets provide spatially detailed information on where people live and can be overlaid with climate, environmental, infrastructure and hazard information to support adaptation, preparedness and localized planning.	WorldPop, University of Southampton; German Aerospace Center (DLR); national statistical offices and UN humanitarian partners.	Provides foundational demographic data for assessing where populations are potentially affected by climate hazards and other environmental changes. These datasets underpin subsequent UNFPA demographic-intelligence applications in Latin America and the Caribbean.	https://data.worldpop.org/repo/prj/UNFPA_LACRO/?utm_source=chatgpt.com
International Organization for Migration (IOM)[2]	The Global Compact for Safe, Orderly and	IOM is the UN Migration Agency and coordinator of the UN	Global	2018	The GCM provides the most comprehensive framework on managing mobility, including in the context of climate change.			https://docs.un.org/en/A/RES/73/195

[2] In providing its submission, IOM provided the following contextual information: Human mobility, including migration, displacement and planned relocation, has been integrated in several decisions and discussions under the UNFCCC. Key decisions and mechanisms include: The Cancun Adaptation Framework, in paragraph 14(f) invites Parties to undertake measures to enhance understanding, coordination and cooperation with regard to climate change induced displacement, migration and planned relocation. The Doha Decision (3/CP.18) in paragraph 7(a)(vi) acknowledges the need to further advance the understanding of how impacts of climate change are affecting patterns of migration, displacement and human mobility. At COP21 in 2015, the Task Force on Displacement (TFD) was established to develop recommendations for integrated approaches to avert, minimize and address displacement related to the adverse impacts of climate change (Decision 1/CP.21). In 2018, the TFD's mandate extended at the recommendation by the Executive Committee of the Warsaw International Mechanism for Loss and Damage (WIM ExCom). Human mobility considerations are also integrated in the outcome of the first global stocktake concluded in 2023, in the Belem Adaptation Indicators, and in the Belem Gender Action Plan, and has been identified as a priority for action on loss and damage. amongst others. Human mobility has furthermore been included as

					Transition Stratgey and Action Plan to enhance the decent work imapcts of its NDC.			
	Multi-Stakeholder Engagement to Implement the UN Global Accelerator and the World Bank Social Protection and Jobs (SPJ) Compass (M-GA) ILO, FAO, ILO, UNDP, UNICEF, UN Women and WFP. World Bank and Joint SDG Fund as financing vehicles.	A joint UN-World Bank partnership initiated in 2023, with support from the German Federal Ministry for Economic Cooperation and Development (BMZ), later joined by the Governments of Ireland and Spain, to accelerate progress toward universal social protection and decent, productive employment by aligning the UN Global Accelerator and the World Bank's SPJ Compass. UN Joint SDG Fund as financing	Global mechanism operating through Global Accelerator pathfinder countries and additional pre-selected countries. Funding Round 1 (2024) supported 9 countries; Round 2 (2025) supported 23 proposals across a Pathfinder Track (18 countries) and a Thematic Track (covering fragility, climate change and informality) spanning Africa, Asia, Central Asia, Europe, Latin America & the Caribbean, and the Middle East & North Africa. Target beneficiaries include workers, women, youth, informal-economy workers, persons with disabilities and other vulnerable groups.	Ongoing since 2023; two funding rounds completed (2024 and 2025) with a third round in preparation, financed by a USD 17.5 million commitment from BMZ via the World Bank's Social Protection Response (SPR) Umbrella Trust Fund. Status: operational, having mobilized approximately USD 44.7 million to date supporting 32 joint UN-World Bank country programmes and 4 global knowledge products.	M-GA gives countries a single point of entry to harmonized UN-World Bank diagnostics, programming and funding for integrated social protection and jobs policy. It pursues five development objectives: (1) integrated national policies and strategies; (2) national financing frameworks for social protection and employment; (3) strengthened national programmes/systems; (4) national ownership and consensus-building; and (5) knowledge generation and dialogue. Financing is channelled through two dedicated windows, split equally between the UN Joint SDG Fund and the World Bank's Social Protection Response (SPR) Umbrella Trust Fund, which together finance joint country programmes, global knowledge products and the M-GA Management Team's operations. Country	ILO, World Bank, FAO, UNDP, UNICEF, UN Women and WFP (M-GA Management Team); the UN Joint SDG Fund and the World Bank's Social Protection Response (SPR) Umbrella Trust Fund (the two financing windows/vehicles through which M-GA resources are channelled); the Governments of Germany (BMZ), Ireland and Spain (donors); the Global Partnership on Universal Social Protection (USP2030); pathfinder-country governments, social partners and civil society.	Governed by an M-GA Coordinating Council (donors, UN agencies, international financial institutions, pathfinder countries, social partners, civil society), coordinating with the Global Accelerator Steering Group; day-to-day design/monitoring led by the Management Team. Financing structure: donor contributions are split equally between the UN Joint SDG Fund and the World Bank SPR Umbrella Trust Fund, giving the mechanism a joint UN-World Bank financing architecture rather than a single trust fund. Three funding rounds have taken place between 2025 and 2026, with the first two going through both the UN Joint SDG Fund and the World Bank.	https://www.unglobalaccelerator.org/m-ga

					and proposes a set of actions conducive to a fair and equitable operationalization of open science for all.			
	Call to Action and Assessment Tool on the Freedom and Safety of Scientific Researchers	The Call to Action was co-sponsored by 60 Member States and welcomed by the Executive Board in 2024 (219 EX/Decision 30)	Global; policy makers, scientific researchers, scientific institutions	Call to Action is from 2024 (implementation ongoing); Assessment Tool was launched in 2026.	This Call to Action urges UNESCO Member States, scientific institutions, and stakeholders to strengthen the freedom, protection, and safety of scientific researchers worldwide. It promotes open and inclusive scientific ecosystems, safeguards researchers from threats and harassment, supports evidence-based policymaking, and calls for stronger international cooperation, data collection, capacity-building, and monitoring mechanisms. The initiative seeks to ensure that science can flourish independently and safely, enabling researchers to contribute effectively to sustainable development, public trust in science, and solutions to global challenges.	Member States, scientific communities, organizations	Climate scientists play a critical role in generating the evidence needed to inform climate action, assess risks, guide adaptation and mitigation strategies, and support equitable decision-making. Protecting their freedom, safety and ability to work without intimidation, harassment or political pressure is therefore essential for the effective implementation of the JTWP. By fostering open scientific ecosystems, protecting researchers, and strengthening trust in science, the Call to Action helps ensure that climate policies are informed by the best available evidence.	Call to Action on the Freedom and Safety of Scientists Assessment tool on the freedom and safety of scientific researchers

					poverty reduction, and community resilience. Biosphere reserves are learning places for sustainable development, where communities, scientists, and policymakers work together to reconcile biodiversity conservation with the sustainable use of natural resources. Through this model, MAB helps countries test interdisciplinary approaches to managing social and ecological change, including biodiversity loss, climate resilience, and social and economic development. The Programme coordinates the designation, review, and governance of biosphere reserves through its International Coordinating Council and regional and thematic networks. It also leads flagship initiatives that turn scientific research into community benefits. By linking science, policy, and local knowledge, MAB helps Member States build more resilient relationships between people and the environment.

					Creative Livelihoods: Promoting technical and vocational education and training (TVET) and lifelong learning to prepare workforces for decent, sustainable jobs in the cultural and creative sectors.• Indigenous & Local Knowledge: Embedding traditional ecological practices and local environmental sciences within educational systems to support community-led adaptation.• Museums as Learning Spaces: Transforming cultural spaces and museums into accessible environments for public climate education and community dialogue			
	Group of Friends on Culture-based climate action (GFCBCA)	The GFCBCA is a community of practice created in 2023 at COP28 to advocate for and support the inclusion of culture in climate action. The mandate of the Group, enshrined in its terms of reference,	Global – Currently chaired by Brazil and UAE, the Group brings together 55 UNFCCC Parties and 20 intergovernmental or civil society organizations, including UNFCCC and UNESCO.	Established in 2023 - ongoing	As part of its 2026-2027 workplan, the group has launched a focused workstream on the inclusion of culture in national adaptation plans. A series of 5 knowledge building webinars were organized and a global survey was launched to collect data and map countries' experience. A policy guidance instrument will subsequently be	UNESCO, UNFCCC	The work of the GFCBCA is directly relevant to the Just Transition programme as it supports place-based, community driven adaptation pathways, anchored in rights and whole-of-society approaches.	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		focuses on advocacy, knowledge building and policy advice at the global and national levels.			prepared as a supplement to the NAP guidance tool. A high-level ministerial meeting of the Group will be organized at COP31 (further to the three high level meetings organized in 2023, 2024 and 2025). UNESCO has been serving as a knowledge partner to the Group since its creation, providing technical assistance and supporting high level advocacy.			
FAO	Just transition in agrifood systems: policy framework, country support and knowledge	FAO Strategy on Climate Change 2022–2031 and its Action Plan; FAO Strategic Framework 2022–2031 (Better Environment 1).	Global. National governments and climate-policy institutions; women, youth, family farmers, small-scale producers, rural communities and Indigenous Peoples.	Ongoing. Policy brief published November 2025; deliberative dialogues July–September 2025; detailed policy framework to be released Feb 2027; thematic briefs in preparation.	Generates knoweldge and evidence on how to delievr a just transition via agrifood systems. Provides technical expertise and knowledge to help countries integrate agriculture, food production and rural development into just transition planning, including through the Just Transition Mechanism, NDCs, NAPs and LT-LEDS. Outputs include a policy brief Pathways towards a just transition in agrifood systems (FAO, 2025), a policy framework for delivering just transitions in and through	CGIAR; ODI Global; ILO; UNRISD	Direct just transition support, based on inclusive governance and rights-based approaches. JTWP relevance: E(a), E(b), E(c), E(f); P(a), P(b), P(e), P(q), P(s).	https://www.fao.org/climate-change/thematic-areas/just-transition-in-agrifood-systems/en https://doi.org/10.4060/cd7550en

					agrifood systems (FAO 2027), a series of multistakeholder dialogues and a meeting report (FAO 2025) and submissions to the JTWP. A monitoring and performance framework is in preparation.			
	NDC Agrifood System Help Desk	FAO Strategy on Climate Change 2022–2031; responds to country requests for NDC enhancement. FAO Strategic Framework 2022–2031 (Better Environment 1; Better Life 1 and 2; Better Production 4).	Global. National governments preparing and implementing NDCs, particularly developing countries.	Ongoing. Established to support third-round NDCs (NDC 3.0) and second-round submissions.	Provides technical and capacity-building support on the agrifood components of NDCs through five pillars, including a dedicated just agrifood system transition pillar that strengthens local capacities and facilitates multistakeholder engagement to formulate inclusive and equitable climate solutions. The other pillars cover adaptation, mitigation targets, transparency and access to climate finance. Promotes alignment with NAPs, LT-LEDS, NBSAPs and food systems transformation pathways.	NDC Partnership; GIZ; Germany's Federal Ministry for Economic Cooperation and Development (BMZ, funding); coordination with IFAD, World Bank and CGIAR.	Dedicated just transition pillar within national climate-plan support. JTWP relevance: E(a), E(f), E(g); P(a), P(q), P(r), P(s).	https://www.fao.org/climate-change/what-we-do/policy-support/nationally-determined-contributions-and-long-term-strategies-3-0/en
	Scaling up Climate Ambition on Land Use and Agriculture through NDCs and NAPs (SCALA)	Joint FAO–UNDP programme funded by Germany's International Climate Initiative (IKI).	Argentina, Cambodia, Colombia, Costa Rica, Côte d'Ivoire (Ivory Coast), Egypt, Ethiopia, Mongolia, Nepal, Senegal, Thailand,	2021–2028; ongoing. EUR 26 million.	Supports countries to turn NDC and NAP priorities in land use and agriculture into appraised, budgeted and financed actions, through whole-of-government planning and private-sector engagement.	UNDP; German Federal Ministry for the Environment, Climate Action, Nature Conservation and	Builds equity and participation into how national climate pathways are designed and budgeted. JTWP relevance: E(a), E(d), E(f), E(g); P(a), P(c), P(g), P(q), P(r), P(s).	https://www.fao.org/in-action/scala/en

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
			Uganda. Agriculture, environment, planning and finance ministries; private sector; farmers' and women's organisations.		Its Gender and Social Inclusion Strategy requires social analysis, inclusive consultation and equitable allocation of resources. The UNDP–FAO Climate Action Review Tool scores proposed actions on gender equality, social inclusion and Indigenous and traditional knowledge.	Nuclear Safety (BMUKN/IKI).		
	Food Security and Agriculture: Accelerating Adaptation (SAGA 2)	FAO–Government of Quebec financial and technical partnership.	Côte d'Ivoire, Haiti and Senegal. National and local institutions; agricultural producers, particularly women farmers.	2023–2027 (second phase), following a 2019–2023 pilot in Haiti and Senegal. Ongoing.	Supports planning, implementation and monitoring of the adaptation components of NDCs and NAPs for agricultural sectors through a multistakeholder, multiscale partnership. Support includes capacity development for climate-integrated government planning, design of bankable climate projects, gender-sensitive Farmer Field Schools and savings groups, and pilots that let women's networks access and manage adaptation funds directly.	Government of Quebec; national ministries and local authorities.	Inclusive, locally led adaptation as part of just transition pathways. JTWP relevance: E(d), E(f); P(a), P(g), P(h), P(i), P(s).	https://www.fao.org/in-action/saga/en/
	Energy-Smart Agrifood Systems programme, including the Bioenergy and Food Security (BEFS) Approach and Global	FAO is a founding partner of GBEP and has hosted its Secretariat since 2006.	Global. Governments, agrifood value-chain actors and small-scale producers.	Ongoing.	Supports access to renewable energy, energy efficiency, sustainable bioenergy and clean cooking in agrifood systems. The BEFS Approach assesses the technical, economic and	GBEP partners (23 countries and 16 international organisations); UN Joint SDG Fund.	Assessment of the socioeconomic risks and opportunities of energy transitions (2/CMA.7). 	Bioenergy Partnership (GBEP) sustainability indicators				social feasibility of bioenergy options against food-security and rural-development priorities. GBEP's voluntary indicators assess the environmental, social and economic sustainability of bioenergy. Country examples include Joint SDG Fund just energy transition programmes in Burkina Faso and Equatorial Guinea.			security-(befs)-approach/en
	Food and Agriculture for Sustainable Transformation (FAST) Partnership	Implements the FAST Initiative launched by the COP27 Presidency (2022); implementing mechanism for COP Presidency initiatives, including the Baku Harmoniya Climate Initiative for Farmers (COP29) and RAIZ (COP30).	International. Member countries and partners; agrifood-system actors, with emphasis on food and economic security for the most vulnerable.	Ongoing. 2026 Partnership meeting held 16–18 September 2026.	Multistakeholder partnership to increase the quantity and quality of climate finance for agrifood systems. Its access-to-finance pillar maps funding opportunities, provides country climate-finance snapshots, reviews proposals and hosts a finance help desk; a multi-country climate-finance access methodology is forthcoming. A 2026 FAO–CIRAD review on the quality of climate finance examines who pays and bears risk, the equity–efficiency trade-off, and the just transition framework for agrifood systems.	FAST Partnership members. https://www.fao.org/food-agriculture-sustainable-transformation-partnership/about-fast/members/en	International cooperation on finance for transition pathways. JTWP relevance: E(g); P(c), P(q), P(r). [Specify how support reaches small-scale producers and vulnerable groups]	https://www.fao.org/food-agriculture-sustainable-transformation-partnership/en

	Forest and Farm Facility (FFF)	Multi-donor partnership hosted by FAO, established in 2012.	Forest and farm producer organisations representing smallholders, rural women's groups, local communities and Indigenous Peoples' institutions. Phase II core countries: Bolivia, Ecuador, Ghana, Kenya, Madagascar, Nepal, Togo, Tanzania, Viet Nam and Zambia.	Established 2012; Phase II launched 2018. Ongoing	Provides grants directly to producer organisations, with technical assistance to strengthen their participation in policy processes, enterprises, access to markets and finance, and management of climate-resilient landscapes. Enables organisations of smallholders, women, Indigenous Peoples and local communities to manage climate finance and advocate for enabling policies.	IIED; IUCN; AgriCord. Funded by Sweden, Germany, the United Kingdom, Finland, the United States, the Netherlands and IKEA.	Direct-finance mechanism for affected rural producers. JTWP relevance: E(d), E(f), E(g); P(a), P(c), P(f), P(h), P(r).	https://www.fao.org/forest-farm-facility/en/
	FAO support for REDD+ and forest climate finance, including the UN-REDD Programme	UNFCCC REDD+ framework, including the Cancun safeguards and decisions 12/CP.17 and 12/CP.19 on safeguard information; UN-REDD Programme (FAO, UNDP, UNEP) 2026–2030 Strategy.	Over 40 forest countries [to confirm]; Indigenous Peoples, local communities and forest-dependent producers.	Ongoing since 2008; UN-REDD Strategy 2026–2030.	Supports countries to ensure that Indigenous Peoples, local communities and forest-dependent producers benefit from REDD+ and forest climate finance and participate meaningfully in its governance. FAO supports governments to secure land and customary rights, clarify carbon rights, design participatory benefit-sharing arrangements, and establish safeguard information systems that demonstrate respect for community rights and full and effective participation	UNDP, UNEP (UN-REDD); Green Climate Fund. 	Responsible governance of water tenure: assessment methodology and Global Dialogue on Water Tenure	Mandated by the FAO Committee on Agriculture (COAG); complements the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests.	Global, with national assessments in Cambodia, Colombia, Indonesia, Rwanda, Senegal, Sri Lanka, Thailand and Viet Nam; small farmers, fisherfolk, pastoralists and Indigenous Peoples whose customary water rights are often unrecognized.	Ongoing. Draft Principles for the Responsible Governance of Water Tenure under multi-stakeholder review in 2026.	A water tenure assessment methodology, combined with water accounting, gives decision makers an inclusive overview of water users and rights to support equitable and sustainable allocation under climate change and water scarcity. The Global Dialogue on Water Tenure is developing non-binding principles for water security, food systems and climate resilience through national, regional and global dialogues.	Governments; civil society; academia	JTWP relevance: E(c), E(f); P(a), P(e), P(f), P(i), P(u).	https://www.fao.org/land-water/water/governance/water-tenure/en https://www.fao.org/in-action/scalewat/water-tenure-dialogues/global-dialogue/en
	Tenure security and Indigenous Peoples' rights in climate transitions	Voluntary Guidelines on the Responsible Governance of Tenure (VGGT, CFS 2012); FAO Framework for Environmental and Social Management (2022), ESS 7 and ESS 8; FAO Free, Prior and Informed Consent Manual (2016).	Global, with activities in Africa, Asia-Pacific and Latin America. Governments, Indigenous Peoples, local communities and smallholders.	Ongoing since 2022; AIM4Forests 2024–2030.	Technical assistance and capacity development to secure tenure rights where climate, restoration and energy transitions increase pressure on land, forests and fisheries, and to support FPIC processes. Tools include the Global Technical Mechanism for Indigenous Peoples and local communities, GeoTech4Tenure, Open Tenure, and AIM4Forests support for Indigenous Peoples' forest monitoring and access to climate finance. FAO has also proposed tenure indicators for the Global Goal on Adaptation framework.	Indigenous Peoples' organisations; International Land Coalition; IFAD; Tenure Facility; LandMark; REPALEAC. 	Right to Food Guidelines	Voluntary Guidelines to Support the Progressive Realization of the Right to Adequate Food in the Context of National Food Security (adopted by the FAO Council, November 2004).	Global. Governments and rights-holders, particularly people facing food insecurity.	Guidelines in force since 2004; just transition application ongoing (policy brief in preparation).	Practical guidance to states on realising the right to adequate food. FAO applies it as a normative and operational basis for just transition pathways: making food security a core transition outcome, supporting policy coherence, accountability and inclusion, and avoiding maladaptation that displaces food producers or restricts access to productive resources.	OHCHR	JTWP relevance: E(a), E(f); P(a), P(e), P(i).	https://www.fao.org/right-to-food/resources/voluntary-guidelines/en
	Integrating social protection into national climate plans and climate finance: guidance and technical support	USP2030 Working Group on Social Protection and Climate Change.	Global, with focus on low- and middle-income countries. Ministries responsible for social protection, environment and finance; rural populations.	Ongoing. Guidance and evidence published 2024–2026.	Provides guidance, evidence and technical support to integrate social protection into NDCs, NAPs and climate-finance programming. Outputs include guidance on integrating social protection in NDCs (2024); Placing people at the centre of NDCs 3.0 (2025); a review of social protection in 23 Green Climate Fund projects (2025); a review of gender-, disability- and inclusion-responsive programming (2025); Social protection and the limits to climate adaptation (2026); and, with ILO and UNICEF, a note on the Belém Adaptation Indicators on social protection (2026).	USP2030; NDC Partnership; ILO; UNICEF; Green Climate Fund; STAAR Facility.	Social protection as the means of mitigating transition impacts (3/CMA.5 element b). JTWP relevance: E(a), E(b), E(d), E(g); P(d), P(h), P(q), P(r), P(s).	https://www.fao.org/social-protection/resources/publications/en

	Inclusive Climate Action in Agrifood Systems through Social Protection	Three-year FAO initiative supported by Ireland's Department of Agriculture, Food and the Marine.	National governments in up to two countries or regions [confirm]; marginalised rural populations, with a focus on gender equality.	2026–2028; ongoing (announced February 2026).	Supports governments to integrate climate objectives into social protection policies and programmes, and social protection into national climate strategies, to enable access to climate finance. Generates evidence on environmentally conditioned cash transfers, public works and integrated programmes; convenes regional workshops; and develops a method for monitoring climate-finance flows to social protection. Builds on the Global Accelerator on Jobs and Social Protection for Just Transitions.	Government of Ireland (Department of Agriculture, Food and the Marine).	JTWP relevance: E(a), E(b), E(f), E(g); P(d), P(h), P(q), P(r), P(s).	https://www.fao.org/social-protection/news-and-events/news/news-detail/fao-and-ireland-join-forces-to-strengthen-social-protection-systems-for-inclusive-climate-action-in-agrifood-systems/en
	FAO contribution to the Global Accelerator on Jobs and Social Protection for Just Transitions	UN Secretary-General initiative launched in September 2021; operationalisation coordinated by ILO. FAO participates in the Coordination Team of the Technical Support Facility.	Pathfinder countries (19 at the February 2026 forum); rural populations and agrifood-system workers.	Ongoing. FAO participation since 2024.	FAO contributes agrifood-system expertise to integrated national approaches that link decent and green jobs, social protection and just transitions, including the integration of social protection with agricultural and environmental policies. Agriculture was identified as a priority area at the February 2026 capacity-building and knowledge-exchange forum.	ILO and participating UN entities; pathfinder governments.	Explicit just transition initiative; reports FAO's contribution only. JTWP relevance: E(b), E(e), E(g); P(b), P(d), P(h), P(r).	https://www.fao.org/social-protection/news-and-events/news/news-detail/global-accelerator-on-jobs-and-social-protection-for-just-transitions--investing-in-food-and-agriculture-to-achieve-the-sdgs/en

	Integrating human mobility through a rural livelihood lens into national adaptation and mitigation planning: Guiding Framework and Toolkit	FAO Migration Framework.	Global. Policymakers and practitioners developing NAPs and NDCs; rural people who move, are displaced or remain.	Published 2025. Related work ongoing.	Two companion publications provide approaches, tools, checklists and examples to integrate human mobility and rural livelihoods into NAPs and NDCs, and to improve coordination across climate, agriculture, rural development and migration policy. The related just transition paper examines how agrifood transitions create opportunities and risks for migrant workers, smallholders, women and youth, including the risk of displacement and distress migration.	United Nations University Institute for Environment and Human Security (UNU-EHS); Government of Ireland (loss-and-damage work).	JTWP relevance: E(a), E(b), E(d), E(f); P(a), P(g), P(h), P(i), P(s).	https://openknowledge.fao.org/items/756cffc9-2203-4876-b765-af583c7a5504 https://openknowledge.fao.org/items/2724c1d9-f6d3-46f0-b0d0-e27e0046001e
	Global Alliance Against Hunger and Poverty – Support Mechanism hosted by FAO	Established under Brazil's G20 Presidency and launched in November 2024; FAO is a founding member and hosts the Support Mechanism at its headquarters. The Belém Declaration on Hunger, Poverty and Human-Centred Climate Action	Global; country-led implementation for people experiencing hunger and poverty, including smallholders, rural workers and forest-dependent communities.	Ongoing; mission to 2030. Belém Declaration interim assessment by 2028 and stocktake by 2030.	The Support Mechanism maintains a policy basket of evidence-based instruments and brokers partnerships between governments and members providing finance or technical support. FAO led the Alliance's guidance note on integrating hunger and poverty solutions into NDCs 3.0, including support for just transitions. Through the Belém Declaration, signatories commit to use social protection to address adverse impacts of transition policies and to	Alliance members and Board of Champions https://globalallianceagainsthungerandpoverty.org/members/	Complements the Plan to Accelerate Solutions on climate-resilient social protection and smallholder agriculture finance already listed in Annex I of the interim mapping. [Text to be cleared with the Support Mechanism.] JTWP relevance: E(b), E(e), E(g); P(h), P(i), P(r), P(s).	https://globalallianceagainsthungerandpoverty.org/about/ https://www.gov.br/mds/pt-br/noticias-e-conteudos/desenvolvimento-social/noticias-desenvolvimento-social/cop30-lideres-de-xx-paises-lancam-declaracao-que-une-acao-climatica-a-erradicacao-da-fome-e-da-pobreza/COP30BelemDeclarationonHungerPovertyandHumanCenteredClimateActi

		(COP30) recognizes the Alliance and calls on FAO and other organizations to track progress.			increase the number of NDCs and NAPs with actions on social protection, resilient agrifood systems and just transitions.			on.pdf/@@download/file
	Small-Scale Fisheries Guidelines and climate policy support for aquatic food systems	Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Food Security and Poverty Eradication (COFI, 2014); Blue Transformation Roadmap 2022–2030.	Global, regional and national. Small-scale fishers, fish workers and their communities, including women.	Guidelines endorsed 2014; support for national plans of action since 2021; ongoing.	Human-rights-based guidance for securing sustainable small-scale fisheries, including a section on disaster risks and climate change. FAO supports national plans of action developed through participatory processes, integration of the right to food, and a framework and diagnostic tool for coherence between social protection and fisheries policy, so that fishers are included in shock-responsive social protection. FAO also provides a supplement to the UNFCCC NAP technical guidelines on fisheries and aquaculture (2020) and a guide for the aquatic food sector on UNFCCC processes (2024), which addresses just transition and encourages engagement with the JTWP.	Small-scale fisheries organisations; governments; regional organisations.	Relevant to ocean and fisheries pathways (fifth JTWP dialogue). JTWP relevance: E(c), E(d), E(f), E(g); P(a), P(c), P(e), P(h), P(i).	https://www.fao.org/voluntary-guidelines-small-scale-fisheries/en

					determined transition pathways that strengthen resilience and channel finance to communities and local economies.			
	Food Security Accelerator (FSA)	UNCDF deploys catalytic finance and investment instruments to address market failures and mobilize additional capital in underserved markets.	Africa; agrifood MSMEs, entrepreneurs, producers and investment funds operating in emerging and frontier markets, with intended benefits for local communities and food-system actors.	2023–2028; ongoing.	The Accelerator mobilizes investment for sustainable and resilient food systems through blended finance, concessional loans, investment grants, financial advisory and technical assistance. It supports the enabling environment for investment, direct investments in agrifood businesses, and locally led investment ecosystems. The programme seeks to overcome financing and investment-readiness barriers while supporting food security, sustainable land use, innovation, jobs and private capital mobilization.	Africa Adaptation Initiative (AAI); Sustainable Solutions for Africa (SSA); United States Department of State; Government of Canada through Environment and Climate Change Canada;	Particularly relevant to the JTWP focus on food security and agriculture, MSMEs, rural economies, sustainable development, resilience, innovation, finance and locally led economic transitions.	
	Pro-Congo – Catalytic Private Sector Investment in Congo Basin Natural Capital	UNCDF applies catalytic finance to build investable pipelines and mobilize private investment for nature-positive enterprises and sustainable	Democratic Republic of the Congo, Republic of the Congo, Gabon and Cameroon; nature-positive enterprises, MSMEs, local communities and investors across the Congo Basin.	2025–2029; ongoing.	Implemented jointly by UNEP and UNCDF, Pro-Congo combines venture development, pipeline building, investment-readiness support and catalytic finance to mobilize private-sector investment in nature-positive enterprises. Target sectors include agriculture, forestry, renewable energy,	United Nations Environment Programme (UNEP); Central African Forest Initiative (CAFI); national and local partners; private-sector enterprises and investors.	Relevant to the JTWP recognition of ecosystem integrity, biodiversity, ecosystem-based adaptation, sustainable livelihoods, private-sector participation and the need to address financial and technical barriers to transition.	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		local economic development.			restoration and ecotourism. Expected results include forest and biodiversity protection, lower emissions, jobs, improved livelihoods and increased private investment in nature-based businesses.			
	Kibira Peace and Forest Sanctuary / nature, peace and blended-finance programme in Burundi	UNCDF combines catalytic finance with local development, nature conservation and peacebuilding approaches in fragile settings, including the use of blended finance and public-private investment structures.	Burundi, particularly communities in and around Kibira National Park; local communities, women, Indigenous Batwa communities, nature-positive enterprises and public institutions.	Launched in 2021; ongoing implementation and operationalization.	The programme links peacebuilding, conservation, renewable energy and inclusive local development. UNCDF invested USD 1.5 million in the Mpanda hydropower public-private partnership and helped structure a payment-for-ecosystem-services mechanism designed to generate a long-term revenue stream for the Kibira Foundation. The wider programme supports participatory park management, local livelihoods, biodiversity conservation, job creation and nature-positive enterprise development.	Government of Burundi; UN Peacebuilding Fund; UNDP; UNESCO; Nature Investment Facility; Office Burundais pour la Protection de l'Environnement (OBPE); Kibira Foundation; Hydroneo; community and conservation partners.	Illustrates an integrated approach to transition in a fragile setting: catalytic finance is tied to renewable energy, ecosystem protection, community participation, social cohesion and sustainable livelihoods. The example may be particularly useful in demonstrating how financing structures can intentionally generate environmental, economic and peace dividends.	
	Global Fund for Coral Reefs (GFCR)	UNCDF deploys blended finance and de-risking instruments to unlock public and private capital for nature-positive	Global, across coral reef countries in Latin America, the Caribbean, Africa and Asia-Pacific, with country programmes in Fiji, Kenya, the United Republic of	2021–2030; ongoing.	A global blended finance coalition that mobilizes public and private capital to protect climate-resilient coral reefs and the coastal communities that depend on them. Operating through a UN fund and a private equity fund, it	UNDP; UNEP; Wildlife Conservation Society (WCS); WWF; Fiji Development Bank; Development Bank of Solomon	Relevant to the JTWP focus on ecosystem integrity, ocean and coastal resilience, sustainable livelihoods for coastal and fishing communities, and the role of blended finance in mobilizing private	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		enterprises and the resilience of coastal communities.	Tanzania and Solomon Islands; coastal communities, artisanal fishers and local SMEs.		incubates reef-positive businesses, establishes sustainable revenue streams for marine protected areas, and provides de-risking capital in sustainable fisheries, ecotourism, blue carbon and waste recycling. UNCDF support includes investment grants, concessional loans and portfolio credit guarantees, alongside capacity building for local financial institutions.	Islands; local reef-positive enterprises.	investment for transition.	
	Pacific Insurance and Climate Adaptation Programme (PICAP)	UNCDF develops inclusive, market-based financial solutions, including climate and disaster risk finance and insurance, to strengthen the resilience of households, communities and local economies.	Pacific Small Island Developing States; households, low-income communities, small businesses, smallholder farmers and fishers exposed to natural hazards and extreme weather.	2021–2026; ongoing.	PICAP develops and implements market-based climate and disaster risk financing and insurance solutions, notably parametric micro- and meso-insurance, across eight Pacific Island countries. It works through multi-stakeholder co-creation, capacity building and digital delivery channels, tests parametric insurance for anticipatory humanitarian action, explores linkages with national social protection schemes and builds evidence on addressing disaster-induced loss and damage. Support includes investment grants and credit guarantees.	Pacific Island governments; Reserve Bank of Fiji; Solomon Islands National Provident Fund; Aon; regional disaster risk management entities.	Relevant to the JTWP focus on social protection, resilience and adaptation for vulnerable communities, and financial instruments that address climate-related loss and damage in SIDS.

	Reducing Post-Harvest Losses through Solar-Powered Cold Chain Services in Kenya	UNCDF structures blended finance facilities that de-risk lending in underserved markets and crowd private capital into climate-aligned enterprises.	Kenya; around 60,000 smallholder farmers, agricultural cooperatives, microfinance institutions and solar cold storage operators.	2025–2030 (initiation phase 2025–2026); ongoing.	Backed by a EUR 16.9 million commitment from the Mitigation Action Facility, the programme de-risks solar-powered cold chains to cut post-harvest losses of 40–60 per cent in Kenyan agriculture. UNCDF leads the financial facility: selecting and conducting due diligence on microfinance institutions and cold storage operators, structuring loan and guarantee mechanisms, and designing a tariff support facility. The initiation phase prepares the full programme ahead of capital deployment. Planned support includes concessional loans, partial credit guarantees and investment grants.	Mitigation Action Facility (MAF); UNDP; Kenyan microfinance institutions; solar cold chain providers.	Relevant to the JTWP focus on food security and agriculture, clean energy access, smallholder livelihoods and mitigation co-benefits in agrifood systems.	
	Mali Food Systems and Energy Transition Acceleration Programme	UNCDF lays the financial and institutional foundations for investment in underserved markets, including feasibility work and innovative financing models for sustainable energy access.	Mali, targeting 100 rural localities; underserved rural communities, smallholders and households without reliable electricity, with gender safeguards for women and youth.	2026–2028; ongoing.	Supports Mali's SNEDD 2024–2033 and Plan Yeelen Kura by building the institutional, financial and technical basis for inclusive sustainable energy access. Outputs include energy access and investment viability assessments across 100 localities, a national implementation strategy and financing models for underserved communities,	Government of Mali; UNDP.	Relevant to the JTWP focus on energy access, food systems, rural economies and nationally determined transition pathways, with attention to women and youth.	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					geological hydrogen mapping and design for a 50 kW pilot plant, and a feasibility proof of concept for a Mali Food Systems and Energy Transformation Investment Facility. Planned support comprises blended finance, feasibility grants and technical assistance.			
	Renewable Energy Fund – Zimbabwe	UNCDF deploys seed capital and concessional finance to catalyse private investment in clean energy where commercial borrowing terms are prohibitive.	Zimbabwe; underserved rural and peri-urban populations, renewable energy entrepreneurs and local businesses affected by power deficits, with a focus on women and youth.	2023–2028; ongoing.	An open-ended private equity fund addressing Zimbabwe's energy crisis, low electrification rates and the production losses they cause across key economic sectors. The fund uses blended finance to bring private capital into renewable energy projects through an inclusive, gender-responsive investment mechanism. UNCDF deploys seed capital through a dedicated special purpose vehicle and structures co-financing to overcome prohibitive local borrowing terms. Support recorded to date is a concessional loan to the fund.	Government of Zimbabwe; Renewable Energy Fund (special purpose vehicle); co-financiers and private equity investors.	Relevant to the JTWP focus on energy transition, energy access and clean entrepreneurship, and to mobilizing domestic and private capital for an inclusive energy transition.	
	WISE – Water Infrastructure and Smart Energy in Cambodia	UNCDF designs revolving blended finance facilities that	Cambodia; rural residents in areas not served by public water utilities, with	2025–2027; ongoing.	A joint programme establishing a revolving blended finance facility to expand rural clean water access and accelerate	UNICEF; Joint SDG Fund; Credit Guarantee Corporation of Cambodia	Relevant to the JTWP focus on water security, climate-resilient infrastructure and clean energy, and to reducing	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		lower the cost of capital for local service providers and strengthen domestic credit guarantee systems.	around 200,000 direct beneficiaries, and private water operators.		renewable energy adoption among private water operators. It blends concessional Joint SDG Fund resources with commercial co-financing to bring borrowing rates down from 12–14 per cent to 8–10 per cent, provides technical assistance to financial institutions and operators, strengthens credit guarantees through the Credit Guarantee Corporation of Cambodia, and aligns with Cambodia's national Water Development Fund. Planned support includes revolving concessional debt, credit guarantees and technical assistance.	(CGCC); domestic financial institutions; private water operators.	the cost of capital for local providers serving rural communities.	
	Sustainable Pacific Blue Circle Fund (SPBCF)	UNCDF combines investment origination with concessional and risk-sharing instruments to scale enterprises in markets that commercial lenders do not yet serve.	Fiji, Papua New Guinea, Solomon Islands, Vanuatu and Samoa; coastal communities, SMEs with positive environmental impact, women and youth.	2026–2032; ongoing.	A regional blended finance facility combining UNCDF and UNDP origination and investment capabilities to scale sustainable enterprises in the blue, green and circular economy across five Pacific countries. It plans to deploy investment grants, concessional capital, incubation and credit guarantees to overcome high market risk and strict collateral requirements, and to strengthen financial	European Union; UNDP; Pacific commercial financial institutions; regional impact investors.	Relevant to the JTWP focus on the blue and circular economy, SMEs and sustainable livelihoods in SIDS, and the development of local financial markets for climate-resilient growth.	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					institutions' capacity to lend to nature-positive enterprises. By helping local businesses become investment-ready and access finance, the programme advances EU Global Gaateway priorities for climate resilience and sustainable private investment, while supporting economic opportunities for women, youth and coastal communities. The facility is designed to transition into an independent, private-sector-led impact fund.			
	Tiger Landscapes Investment Fund – Guarantee Instruments (scoping phase)	UNCDF designs credit guarantee and risk-sharing instruments that expand lending by local financial institutions to nature-positive enterprises.	Asian tiger range countries, with transactions in Thailand, Malaysia, Bhutan and Nepal; communities living in and around tiger habitats, nature-positive entrepreneurs and lending institutions.	2025–2026 (scoping phase); ongoing.	Led by UNDP, with UNCDF as Responsible Party, this initiation phase scopes and structures credit guarantee instruments for the Tiger Landscapes Investment Fund. The fund mobilizes private capital into nature-positive enterprises across critical tiger habitats, building a bankable pipeline of sustainable businesses and the capacity of financial institutions to lend for biodiversity conservation. UNCDF support includes portfolio credit guarantees, working capital grants and project preparation grants	UNDP (lead agency); Bank for Agriculture and Agricultural Cooperatives (Thailand); Bhutan Development Bank; Global IME Bank (Nepal); a partner bank in Malaysia; conservation organizations.	Relevant to the JTWP focus on biodiversity and ecosystem integrity, livelihoods of forest-dependent communities, and mobilizing local financial systems for a nature-positive transition.	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					with partner banks in four countries.			
	Leveraging Public and Private Sector Investments in Sustainable Food (Poultry) Value Chains	UNCDF uses blended finance and risk-sharing guarantees to unlock commercial lending for agrifood value chains in underserved markets.	Ethiopia, starting in Oromia region; smallholder poultry producers, chick and feed producers, rural women, youth and agrifood MSMEs.	2025–2028; ongoing.	A systems-based blended finance model addressing structural bottlenecks in Ethiopia's poultry sector, reducing reliance on imports and strengthening climate-resilient agrifood production. It combines technical capacity building with a blended finance facility offering loans and risk-sharing guarantees covering 70 per cent of loan risk, alongside commercial co-investment. It targets quality feed, breeding infrastructure, cold chains and credit access for smallholders, with the aim of a commercial model for national replication.	Regional Government of Oromia; commercial agricultural lenders; private feed and breeding operators; private investors.	Relevant to the JTWP focus on food security and agriculture, MSMEs, livelihoods for rural women and youth, and climate-resilient value chains.	
	Zanzibar Joint Programme	UNCDF co-leads food system and climate adaptation work within integrated UN joint programmes, linking local investment to national development priorities.	United Republic of Tanzania (Zanzibar: Kaskazini Unguja and Kaskazini Pemba); low-lying coastal communities, smallholder farmers, artisanal fishers, women and youth.	2024–2027; ongoing.	An integrated UN joint programme supporting the Revolutionary Government of Zanzibar to address multidimensional poverty, food insecurity and climate vulnerability in northern Unguja and Pemba. UNCDF co-leads work on food system transformation and climate adaptation for low-lying coastal populations. The programme also upgrades	Revolutionary Government of Zanzibar; FAO; UNEP; ILO; UNICEF; UNFPA; UN Women; WHO; UNESCO; IOM.	Relevant to the JTWP focus on adaptation for vulnerable coastal communities, food systems, decent work and the integration of social and economic dimensions of transition.	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
					social and WASH services, strengthens coastal communities' capacity to adapt, and expands inclusive agricultural value chains and access to decent local employment. Planned support includes technical assistance, value-chain development grants and capacity building.			
	Livelihood Enhancement and Economic Diversification Programme (LEED)	UNCDF deploys inclusive financial tools, including digital finance, guarantees and micro-insurance, to strengthen economic resilience in fragile and excluded communities.	Papua New Guinea (National Capital District; Enga, Hela and Southern Highlands provinces); around 3,000 vulnerable households, unemployed youth, rural women and conflict-affected farming communities.	2026–2027; ongoing.	Part of the UN Highlands Joint Programme Phase 2, LEED addresses extreme poverty, tribal conflict and a 75 per cent financial exclusion rate in Papua New Guinea's Highlands. Implemented by FAO (lead), ILO and UNCDF, it provides vocational training for youth and women, diversifies agricultural value chains through climate-smart farming, and deploys inclusive financial tools including mobile banking, digital capital and parametric micro-insurance. Support recorded to date includes a direct credit guarantee with Women's Microbank Limited.	FAO (lead); ILO; Papua New Guinea UN Country Fund; Women's Microbank Limited.	Relevant to the JTWP focus on livelihoods, skills and decent work, economic diversification and climate-smart agriculture in fragile, conflict-affected settings.	
	Kigoma Joint Programme Phase II (KJP II)	UNCDF leads local finance and economic	United Republic of Tanzania (Kigoma Region: Kigoma,	2023–2027; ongoing.	An area-based joint programme coordinating 16 UN entities to address	FAO; ILO; IOM; ITC; UNDP; UNEP; UNESCO;	Relevant to the JTWP focus on inclusion of displaced populations	

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		development interventions within area-based UN joint programmes, working through local government systems.	Buhigwe, Kasulu, Uvinza, Kibondo and Kakonko districts); host communities, refugees and asylum seekers, persons with disabilities and smallholder households.		human security and socio-economic challenges in Kigoma Region. UNCDF leads local finance and economic interventions across three outcomes: sustainable agriculture and MSME productivity; natural resource management, disaster resilience and access to renewable energy; and inclusive economic and local governance systems. The programme aligns with Tanzania's Third Five-Year Development Plan. Planned support includes local development grants, concessional MSME finance and technical assistance.	UNFPA; UN-Habitat; UNHCR; UNICEF; UNIDO; UN Women; WFP; WHO; Kigoma Regional Secretariat; local government authorities.	and persons with disabilities, MSMEs, renewable energy access and locally governed transition in a refugee-hosting region.	
	European Fund for Sustainable Development Plus (EFSD+) Sustainable Cities Guarantee Facility	UNCDF deploys guarantees to mitigate investment risks and mobilise public and private capital for sustainable, climate-resilient infrastructure at the subnational level, including water and energy systems.	Sub-Saharan Africa, Asia, the Pacific and the Middle East, with a focus on least developed countries, small island developing States and fragile settings. Supports urban and subnational investments benefiting communities underserved by	2026-2028	Backed by an EU guarantee of up to €50 million under the EFSD+, one of the financing tools of the EU's Global Gateway strategy, UNCDF will provide guarantees to eligible financial intermediaries to mobilise additional public and private financing for sustainable, climate-resilient urban infrastructure. The facility contributes directly to Global Gateway by translating EU risk-sharing	European Union	This represents the first EFSD+ guarantee agreement between the European Union and a United Nations fund. The facility connects Global Gateway's investment mobilization objectives with inclusive, nationally determined transitions. Its contribution is to expand financing opportunities for local infrastructure and essential services serving communities underserved by conventional finance.	https://www.uncdf.org/article/9335/european-union-and-uncdf-announce-landmark-eur-50-million-guarantee-partnership-for-sustainable-cities-during-unga81

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
		These interventions support local climate adaptation and mitigation efforts, contributing to the objectives of the Paris Agreement and UNCDF's Strategic Framework 2026–2029.	conventional finance.		into financing for urban and subnational investments in markets where investment risks constrain access to capital, particularly in least developed countries, small island developing States, and fragile settings. Expected outputs include guarantees issued, financing mobilised and infrastructure investments facilitated. Priority climate-relevant sectors include renewable energy, water and utility services, sustainable transport and waste management. Through these investments, the facility aims to contribute to climate change adaptation by strengthening the resilience of urban infrastructure and essential services, and to climate change mitigation by supporting clean energy solutions and lower-emission urban systems.		From a climate finance reporting perspective, its principal contribution is to mobilise additional public and private investment in climate-resilient infrastructure and local climate action. The €50 million represents the EU's maximum guarantee coverage rather than directly disbursed climate finance. Actual climate finance mobilised, together with the resulting climate adaptation and mitigation outcomes, will be measured and reported based on the underlying investments supported by the facility

					a capacity-building project on UNFSA.			
	The Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects (Regular Process) and its World Ocean Assessments (WOAs)	General Assembly resolution 65/37 from 2010 established the Regular Process	Geographic scope: Global. Beneficiaries: Policy makers, Scientific community; Youth, General public.	Status: Ongoing Timeframe: Every cycle of the Regular Process runs for 5 years, with the current ongoing 4th cycle covering the period 2026-2030.	The Regular Process aims to regularly review the environmental, economic and social aspects of the state of the world's oceans, both current and foreseeable. Its purpose is to contribute to the strengthening of the regular scientific assessment of the state of the marine environment, in order to enhance the scientific basis for policymaking. This is done through, inter alia, its World Ocean Assessments, the main output of each cycle of the Regular Process. The World Ocean Assessment is the only global integrated assessment of the world's ocean covering environmental, economic and social aspects. While the First World Ocean Assessment (WOA I in 2016) provided the first baseline study of the United Nations General Assembly on the state of the marine environment, the second World Ocean Assessment (WOA II in 2021) provided an update	Member States, UN Entities, IGOs, NGOs, Private Sector. 	and Policy Implications							
	Analytical Work - Proposal for an International Carbon Price Floor Among Large Emitters		Global or cross-country	Completed; published in 2021	Staff Climate Note analyzing carbon pricing.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2021&issue=001
	Analytical Work - Mitigating Climate Change: Growth-Friendly Policies to Achieve Net Zero Emissions by 2050		Global or cross-country	Completed; published in 2021	IMF Working Paper analyzing net zero.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2021&issue=195
	Analytical Work - Carbon Pricing: What Role for Border Carbon Adjustments?		Global or cross-country	Completed; published in 2021	Staff Climate Note analyzing carbon pricing.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2021&issue=004
	Analytical Work - Energy Transition Metals		Global or cross-country	Completed; published in 2021	IMF Working Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2021&issue=243
	Analytical Work - Still Not Getting Energy Prices Right: A Global and Country Update of Fossil Fuel Subsidies		Global or cross-country	Completed; published in 2021	IMF Working Paper analyzing energy prices and fossil fuel subsidies.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2021&issue=236
	Analytical Work - Not Yet on Track to Net Zero: The Urgent Need for Greater Ambition		Global or cross-country	Completed; published in 2021	Staff Climate Note analyzing the net-zero transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2021&issue=005

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	and Policy Action to Achieve Paris Temperature Goals							
	Analytical Work - Carbon Taxes or Emissions Trading Systems?: Instrument Choice and Design		Global or cross-country	Completed; published in 2022	Staff Climate Note analyzing carbon taxation and emissions trading.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2022&issue=006
	Analytical Work - The Distributional Impact of a Carbon Tax in Asia and the Pacific		Asia and the Pacific	Completed; published in 2022	IMF Working Paper analyzing carbon taxation.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2022&issue=116
	Analytical Work - A Comprehensive Package of Macroeconomic Policy Measures for Implementing China's Climate Mitigation Strategy		China	Completed; published in 2022	IMF Working Paper analyzing climate mitigation.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2022&issue=142
	Analytical Work - Chasing the Sun and Catching the Wind: Energy Transition and Electricity Prices in Europe		Europe	Completed; published in 2022	IMF Working Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2022&issue=220
	Analytical Work - Getting on Track to Net Zero: Accelerating a Global Just Transition in This Decade		Global or cross-country	Completed; published in 2022	Staff Climate Note analyzing net zero.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2022&issue=010

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Analytical Work - Labor Market Implications for Green Investments and Carbon Pricing in Spain: Spain		Spain	Completed; published in 2023	Selected Issues Paper analyzing carbon pricing and green investment.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2023&issue=001
	Analytical Work - Economic Consequences of Large Extraction Declines: Lessons for the Green Transition		Global or cross-country	Completed; published in 2023	IMF Working Paper analyzing green transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2023&issue=097
	Analytical Work - Cars and the Green Transition: Challenges and Opportunities for European Workers		Europe	Completed; published in 2023	IMF Working Paper analyzing green transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2023&issue=116
	Analytical Work - South Africa Carbon Pricing and Climate Mitigation Policy		South Africa	Completed; published in 2023	Selected Issues Paper analyzing carbon pricing and climate mitigation policy.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2023&issue=040
	Analytical Work - Structural Reforms to Accelerate Growth, Ease Policy Trade-offs, and Support the Green Transition in Emerging Market and Developing Economies		Global or cross-country	Completed; published in 2023	Staff Discussion Note analyzing green transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2617-6750&volume=2023&issue=007

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Analytical Work - Getting to Know GMMET: The Global Macroeconomic Model for the Energy Transition		Global or cross-country	Completed; published in 2023	IMF Working Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2023&issue=269
	Analytical Work - Carbon Prices and Inflation in the Euro Area		Global or cross-country	Completed; published in 2024	IMF Working Paper analyzing carbon pricing.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2024&issue=031
	Analytical Work - The Energy Security Gains from Strengthening Europe's Climate Action		Europe	Completed; published in 2024	Departmental Paper analyzing energy security.			https://elibrary.imf.org/openurl?genre=journal&issn=2616-5333&volume=2024&issue=005
	Analytical Work - Fiscal Implications of Global Decarbonization		Global or cross-country	Completed; published in 2024	IMF Working Paper analyzing decarbonization.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2024&issue=045
	Analytical Work - Key Challenges Faced by Fossil Fuel Exporters during the Energy Transition		Global or cross-country	Completed; published in 2024	Staff Climate Note analyzing the energy transition and challenges facing fossil fuel exporters.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2024&issue=001
	Analytical Work - Distributional Impacts of Heterogenous Carbon Prices in the EU		Global or cross-country	Completed; published in 2024	IMF Working Paper analyzing carbon pricing.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2024&issue=149

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Analytical Work - Balancing Environmental, Fiscal, and Welfare Impacts of Transportation Decarbonization in France		France	Completed; published in 2024	IMF Working Paper analyzing decarbonization.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2024&issue=145
	Analytical Work - Policy Options for Climate Mitigation: Emissions Trading Schemes in Asia-Pacific		Asia-Pacific	Completed; published in 2024	IMF Working Paper analyzing climate mitigation and emissions trading.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2024&issue=155
	Analytical Work - Destination Net Zero: The Urgent Need for a Global Carbon Tax on Aviation and Shipping		Global or cross-country	Completed; published in 2024	Staff Climate Note analyzing carbon taxation and net zero.			https://elibrary.imf.org/openurl?genre=journal&issn=2789-0600&volume=2024&issue=003
	Analytical Work - The EU's CBAM: Implications for Member States and Trading Partners		Global or cross-country	Completed; published in 2025	IMF Working Paper analyzing the EU Carbon Border Adjustment Mechanism (CBAM).			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2025&issue=125
	Analytical Work - Powering the Future: Energy Transition Strategies for the ECCU		Eastern Caribbean Currency Union	Completed; published in 2025	Selected Issues Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2025&issue=066
	Analytical Work - Revamping Fiscal Decentralization to Secure Peru's Position as a		Peru	Completed; published in 2025	Selected Issues Paper analyzing critical minerals.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Leading Critical Mineral Exporter: Peru							7875&volume=2025 &issue=080
	Analytical Work - Macroeconomic Exposure to the EU's Carbon Border Adjustment Mechanism: The Case of the Middle East and Central Asia		Middle East and Central Asia	Completed; published in 2025	IMF Working Paper analyzing carbon border adjustment mechanisms.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2025 &issue=182
	Analytical Work - Macro-Fiscal Impacts of Colombia's Energy Transition Plan		Colombia	Completed; published in 2025	Selected Issues Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2025 &issue=145
	Analytical Work - Emerging Climate and Energy Transition Issues: Kingdom of the Netherlands - The Netherlands		Netherlands	Completed; published in 2025	Selected Issues Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2025 &issue=147
	Analytical Work - The Economic Implications of the Energy Transition in Asia-Pacific		Asia-Pacific	Completed; published in 2026	IMF Working Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2026 &issue=001
	Analytical Work - Renewable Energy Transition in the Philippines: Trends, Opportunities, Challenges		Philippines	Completed; published in 2026	Selected Issues Paper analyzing the renewable energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2026 &issue=005

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Analytical Work - The EU's Energy Transition		Global or cross-country	Completed; published in 2026	IMF Working Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2026&issue=046
	Analytical Work - Macroeconomic Effects of Rare Earths Supply Chain Disruptions		Global or cross-country	Completed; published in 2026	IMF Working Paper analyzing rare earth elements.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2026&issue=073
	Analytical Work - Estimating the Impacts of AI, Trade Policy, and the Energy Transition: An Application to Ireland		Ireland	Completed; published in 2026	Selected Issues Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2026&issue=070
	Analytical Work - The Impact of the EU CBAM and Carbon Pricing in Bosnia and Herzegovina		Bosnia and Herzegovina	Completed; published in 2026	Selected Issues Paper analyzing carbon pricing and the EU Carbon Border Adjustment Mechanism (CBAM).			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2026&issue=078
	Analytical Work - Macroeconomic Impacts of China's Energy Transition		China	Completed; published in 2026	IMF Working Paper analyzing energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=1018-5941&volume=2026&issue=185
	Analytical Work - Estonia's Energy Transition: Expanding Domestic Generation and		Estonia	Completed; published in 2026	Selected Issues Paper analyzing electricity markets and the energy transition.			https://elibrary.imf.org/openurl?genre=journal&issn=2958-7875&volume=2026&issue=096

Entity name	*Name of the instrument, initiative or processes*	*Mandate, if applicable*	*Geographic scope and target beneficiaries, if relevant*	*Timeframe and status*	*Short description including outputs and type of support provided, as relevant*	*Key partners, if relevant*	*Any other relevant information*	*Webpage link (if available)*
	Electricity Market Integration							
	Analytical Work - Fiscal Monitor, October 2019: How to Mitigate Climate Change		Global or cross-country	Completed; published in 2019	Fiscal Monitor analyzing carbon pricing and greenhouse gas emissions mitigation.			https://elibrary.imf.org/openurl?genre=book&isbn=9781498321228
	Analytical Work - World Economic Outlook, October 2020: A Long and Difficult Ascent		Global or cross-country	Completed; published in 2020	World Economic Outlook analyzing carbon pricing, greenhouse gas emissions mitigation, and fossil fuel transition policy.			https://elibrary.imf.org/openurl?genre=book&isbn=9781513556055
	Analytical Work - Global Financial Stability Report, October 2021: COVID-19, Crypto, and Climate: Navigating Challenging Transitions		Global or cross-country	Completed; published in 2021	Global Financial Stability Report analyzing greenhouse gas emissions mitigation and transition finance.			https://elibrary.imf.org/openurl?genre=book&isbn=9781513595603
	Analytical Work - Global Financial Stability Report, October 2023: Financial and Climate Policies for a High-Interest-Rate Era		Global or cross-country	Completed; published in 2023	Global Financial Stability Report analyzing transition finance.			https://elibrary.imf.org/openurl?genre=book&isbn=9798400249686
	Analytical Work - Fiscal Monitor, October 2023: Climate Crossroads: Fiscal		Global or cross-country	Completed; published in 2023	Fiscal Monitor analyzing greenhouse gas emissions mitigation.			https://elibrary.imf.org/openurl?genre=book&isbn=9798400250286
