The Climate Change Kiosk

Located in the foyer of the Hotel Maritim, the Climate Change Kiosk is staffed daily between 9 a.m. and 7 p.m. The Climate Change Kiosk's primary goal is to provide information about climate change and the secretariat. Further details on the facilities and services provided by the Kiosk are given in the booklet "Information for participants".

Official documents on CD-ROM

All participants are welcome to join in these hands-on sessions featuring the secretariat's new multi-volume CD-ROM collection containing all official documentation issued since 1991 as part of the Convention and Kyoto Protocol processes. As well as the full text of all documents in all available United Nations official languages, the CD-ROMs contain interpretive guides, national communications on greenhouse gas emissions trends and policy responses, in-depth reviews of national communications, daily programmes, lists of participants and agendas for all UNFCCC meetings.

The CD-ROMs provide a good solution for those participants without easy access to UNFCCC documents through the Internet.

Progress is evaluated by the EU Commission, in consultation with member states, and is based on national and community climate change programmes.	Environment 1

Wigley Tel.: (+1-303) 497 2690 E-mail: wigley@ucar.edu	Interactive software for the development of future climate change scenarios and for the quantification of uncertainties at both the global-mean and regional level. The global-mean component uses the MAGICC coupled gas-cycle/climate model, which is the model that was used to make the projections of global-mean temperature given in the IPCC Third Assessment Report. Users can emulate TAR results or expand these to other emissions scenarios. The SCENGEN components translate the global-mean projections to regional scale (gridpoint) results using results from 17 different coupled atmosphere/ocean general circulation models. The uncertainty analysis allows results to be given in probabilistic terms.	Environment 2
