### "iSeeT" at Copenhagen

The UNFCCC secretariat's Climate Change Kiosk will feature the theme of information and communication technology (ICT) and the role ICT is playing in increasing awareness and support for action on climate change in developing and developed countries. This exhibit is undertaken in cooperation with the COP 15 host government, Denmark.

The exhibition will tell stories about current ICT-related projects undertaken by governments, United Nations and other intergovernmental organizations, non-governmental organizations and media organizations on their own or with private sector partners. Confirmed contributors include UNDP, UNEP, UNITAR, UNSPIDER, the GEF, CBD, the Sustainable UN (SUN), UN Asian and Pacific Training Centre for ICT for Development (APCICT), IISD's Earth Negotiations Bulletin, Green Belt Movement, Resources for the Future and The Nature Conservancy, among many others. The International Telecommunications Union (ITU) is contributing a special programme of daily “business talks” by leaders in the ICT sector from both developing and developed countries.

Parties and observer organizations interested in contributing to the exhibit may find more information on the UNFCCC COP 15 web page at:
