For further information and scheduling of an interview, please contact Mr. Vineet Topa at the Side Events and Exhibits Coordination Office (Cancunmesse Hall C) or via email at see@unfccc.int</p>

15.00– 15.20	<p>Agriculture and Food Security in Climate Change Negotiations Agriculture is a highly neglected subject in climate negotiations. For developing countries in Asia, Africa and Latin America, it is not only the most important source of food security but also livelihoods. Agriculture is already experiencing huge negative impacts due to climate change and unpredictability of the climate. 8 billion out of 10 billion population by the end of the century will be living in developing countries, and will mainly depend on agriculture for food. It is high time that agriculture was brought out of parenthesis and included in the mainstream negotiations, and in both tracks (AWG KP and AWG LCA), as it has huge potential for mitigation as well as adaptation.</p>	<p>PAIRVI Mr. Ajay K. Jha Director, PAIRVI Associates and Coordinator, Beyond Copenhagen pairvidelhi@rediffmail.com</p> <p>Jayesh V. Bhairavia Advocate jbbhairavia@hotmail.com</p>	<p>Climate Change Studio (Cancunmesse Hall C)</p>
15.20– 15.40	<p>Life cycle energy and climate change; Technology Choices KP has emphasized technology as both mitigation and adaptation measure and these are tied to financing, whereas many developing country communities evolved/innovated their own technologies which can be more effective and socially more acceptable. Also the technology on offer from developed countries does not come with life cycle energy and emission analysis and thus finally may aggravate the problem. We need to recognize, support and promote with adequate climate financing these locally evolved technology.</p>	<p>PAIRVI Mr. Soumya Dutta National General Secretary, India Peoples Science Forum and Beyond Copenhagen soumyadutta_delhi@rediffmail.com</p>	<p>Climate Change Studio (Cancunmesse Hall C)</p>

15.40– 16.00	<p>Impacts of Climate Change on small and marginal farmers; Ground realities from Rajasthan Climate change is already affecting rain fed agriculture severely. The worst hit are the lot of small and marginal farmers, which comprise more than 70% of Indian farmers. They are experiencing a constant decline in precipitation, increasing temperatures, and decline in the number of rainy days and resultant decrease in the produce. It has affected a range of rights of farmers who have no other employable skills. The UNFCCC must focus on supporting agriculture through mitigation and adaptation immediately.</p>	<p>Centre for Community Economics and Development Mr. Subhas Chandr Purohit Director, Goudwad Rural Development and Research Institute goudwadinstitute@yahoo.co.in</p>	<p>Climate Change Studio (Cancunmesse Hall C)</p>
