2. Conclusions

12. The SBI took note of the status of submission and review of fifth national communications contained in document FCCC/SBI/2012/INF.6.

13. The SBI acknowledged the considerable improvement in the timeliness of the submission of national communications from Parties included in Annex I to the Convention (Annex I Parties). Sixteen Annex I Parties submitted their fifth national communications before the due date in accordance with decision 10/CP.13, 24 submitted after that date and one Party has yet to submit its fifth national communication.

14. The SBI urged Annex I Parties to submit their national communications by the relevant due date in the future.

15. The SBI noted that as at 30 April 2012 the secretariat had coordinated in-depth reviews of all the national communications submitted.

16. The SBI welcomed the compilation and synthesis of the fifth national communications from Annex I Parties prepared by the secretariat and took note thereof.⁸

17. The SBI noted that Annex I Parties, as reported in their fifth national communications, are continuing to make progress in implementing their commitments under the Convention and calls on Annex I Parties to continue to intensify their efforts aimed at meeting their commitments under the Convention. The coverage of their respective domestic activities and the provision of the essential information on the implementation of the Convention at the international level have improved in the fifth national communications when compared with the preceding national communications. Despite these improvements, some reporting issues and problems remain, and the usefulness of the reported information could be enhanced by addressing these matters. Such issues include the need for reporting on the following: all elements (not only mandatory elements) of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications” (hereinafter referred to as the UNFCCC reporting guidelines, Part II);⁹ emission scenarios and estimates of the impact of policies and measures; and financial assistance and technology transfer, using approaches that are fully consistent with the UNFCCC reporting guidelines, Part II.

18. The SBI called on Annex I Parties to enhance further, where appropriate, the completeness, comparability and level of detail of the reported information in accordance with the UNFCCC reporting guidelines, Part II.

19. The SBI noted that over the period 1990–2008 the total aggregate greenhouse gas (GHG) emissions excluding emissions/removals from land use, land-use change and forestry (LULUCF) for all Annex I Parties decreased by 6.0 per cent, and the total GHG emissions/removals including LULUCF decreased by 10.7 per cent. For Annex I Parties with economies in transition, GHG emissions excluding and including LULUCF decreased by 36.7 per cent and 49.7 per cent, respectively. For Annex I Parties that do not have economies in transition, GHG emissions excluding and including LULUCF increased by 8.0 per cent and 8.4 per cent, respectively.

20. The SBI decided to recommend a draft decision on the status of submission and review of fifth national communications from Annex I Parties and the compilation and synthesis of fifth national communications from Annex I Parties for adoption by the Conference of the Parties (COP) at its eighteenth session (for the final text of the draft decision, see document FCCC/SBI/2012/15/Add.1).

26. The SBI noted that the information reported in the fifth national communications shows that Annex I Parties that are also Parties to the Kyoto Protocol are improving the quality of their reporting under the Kyoto Protocol.

27. The SBI urged Annex I Parties that are also Parties to the Kyoto Protocol to enhance further the completeness, comparability and level of detail of the reported information in accordance with the “Guidelines for the preparation of the information required under Article 7 of the Kyoto Protocol”.¹³

28. The SBI noted that the total aggregate GHG emissions of Annex I Parties that are also Parties to the Kyoto Protocol, excluding emissions and removals from LULUCF, decreased by 16.2 per cent; GHG emissions, excluding emissions and removals from LULUCF, from Annex I Parties that are also Parties to the Kyoto Protocol with economies in transition decreased by 36.4 per cent; and GHG emissions, excluding emissions and removals from LULUCF, from Annex I Parties that are also Parties to the Kyoto Protocol that do not have economies in transition increased by 0.1 per cent from the base year¹⁴ to 2008, and for several of these Parties the increase was higher than that level.

¹⁰ Adopted as document FCCC/SBI/2012/L.15.

The SBI noted the submission²⁸ made by a non-Annex I Party on the detailed costs it incurred, including in-kind contributions, for the preparation of its most recent national communication and on the financial resources received through the GEF, as invited by the SBI at its thirty-fifth session.²⁹ It invited other non-Annex I Parties that have not already done so to submit their views on this issue by 17 September 2012. The SBI requested the secretariat to compile these submissions into a miscellaneous document for consideration by the SBI at its thirty-seventh session.

60. The SBI recommended that the COP, at its eighteenth session, request the GEF to provide funds for technical support for the preparation of BURs from non-Annex I Parties, similar to that provided by the National Communications Support Programme, recognizing that the costs of such technical support are not deducted from the funds provided to non-Annex I Parties for the preparation of their BURs. It invited the GEF to report on this matter in its report to the COP at its nineteenth session.

61. The SBI noted with appreciation that, as at 24 May 2012, 142 initial, 73 second and three third national communications, and one fourth national communication, from non-Annex I Parties had been submitted. It also noted that 44 non-Annex I Parties are expected to submit their second national communications by the end of 2012.

IX. Approaches to address loss and damage associated with climate change impacts in developing countries that are particularly vulnerable to the adverse effects of climate change to enhance adaptive capacity⁵²

- Activities to be undertaken under the work programme

(Agenda item 9)

1. Proceedings

145. The SBI considered this item at its 2nd and 3rd meetings. It had before it documents FCCC/SBI/2012/INF.3 and FCCC/TP/2012/1. Representatives of four Parties made statements, including one on behalf of AOSIS and one on behalf of the LDCs.

147. At the 3rd meeting, Mr. Lemmen reported on the consultations and the SBI considered and adopted the conclusions below.⁵³

2. Conclusions

148. The SBI welcomed the documents prepared for the session⁵⁴ and expressed its appreciation to the Government of Japan for hosting the expert meeting held in Tokyo, Japan, from 26 to 28 March 2012 to address issues related to assessing the risk of loss and damage associated with the adverse effects of climate change.⁵⁵

149. The SBI took note of the existing relevant knowledge and work under and outside the Convention, including the Intergovernmental Panel on Climate Change (IPCC) *Special Report on Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation*⁵⁶ and the United Nations *Global Assessment Report on Disaster Risk Reduction*.⁵⁷

150. The SBI considered the progress made on the implementation of the work programme on loss and damage, and noted the remaining work to be undertaken under this work programme.⁵⁸ It further noted a number of points relevant to assessing the risk of loss and damage associated with the adverse effects of climate change and the current knowledge on the same, including the following:

(a) The assessment of climate-related risk is complex, involving the consideration of hazards, exposure and vulnerability, and takes into account underlying risk drivers;

(b) A range of approaches, methods and tools is available to assess the risk of loss and damage associated with the adverse effects of climate change. The selection of

appropriate approaches, methods and tools depends upon regional, national and local capacity, contexts and circumstances and involves the engagement of all relevant stakeholders;

(c) Gaps in the assessment of the risk of loss and damage for vulnerable communities and populations, including women and children, can be addressed by involving these communities and populations in risk assessment processes;

(d) The use of local and indigenous knowledge and observations helps to fill gaps in information about historical exposure and vulnerability;

(e) Assessment of the risk of loss and damage is often constrained by the limited availability of data and knowledge, including, but not limited to, that on weather, climate, socioeconomic conditions and ecosystems. Risk management actions can still be taken in the absence of complete sets of data and knowledge, taking into account the national circumstances;

(f) Access to, sharing and the use of information and data, such as hydrometeorological data and metadata, on a voluntary basis is important to facilitate the assessment and management of climate-related risk;

(g) Enhanced technical and institutional capacities supported by technical and financial assistance and other resources will help developing countries to continue to determine, prioritize and address their needs in assessing the risk of loss and damage associated with the adverse effects of climate change;

(h) Involvement of, and dialogue with, decision makers at all levels can strengthen the design, dissemination and delivery of information on climate risk;

(i) Numerical data are sometimes not sufficient in conveying a comprehensive range of the risks of loss and damage associated with the adverse effects of climate change since available estimates on losses typically lack numbers on non-economic losses.

151. The SBI noted the importance of adopting a holistic approach in considering the three thematic areas of the work programme on loss and damage associated with the adverse effects of climate change,⁵⁹ and of drawing upon relevant work under and outside the Convention.

152. The SBI recalled that the COP, at its seventeenth session, requested the secretariat to organize four expert meetings, three at the regional level and one for small island developing States, to be held before the thirty-seventh session of the SBI, to address issues related to a range of approaches to address loss and damage associated with the adverse effects of climate change, including impacts related to extreme weather events and slow onset events, taking into consideration experience at all levels of the work programme.⁶⁰

153. The SBI recalled the objective of the work programme to consider approaches to address loss and damage associated with the adverse effects of climate change, and appreciated the need to explore a range of approaches and potential mechanisms, including an international mechanism, to address loss and damage associated with the adverse effects of climate change, with a view to making recommendations on loss and damage associated with the adverse effects of climate change to the COP for its consideration at its eighteenth session.

154. The SBI requested the secretariat, in consultation with Parties and relevant stakeholders, in organizing the four expert meetings mentioned in paragraph 152 above to take into account, to the extent possible, the following:

⁵⁹ FCCC/SBI/2011/7, paragraph 109(a-c).

⁶⁰ Decision 7/CP.17, paragraph 8(a).

(a) Inviting representatives from regional centres and networks, as well as experts from a wide range of relevant domains, disciplines and communities, including those involved in the development of the IPCC assessments and special reports, and experts in disaster risk reduction and in financial approaches to risk management, subject to the availability of financial resources, to attend the expert meetings;

(b) Requesting presenters to make available the abstracts of the materials to be presented at the expert meetings in advance, in order to assist participants to better prepare for the discussions.

155. To facilitate the completion of its work, the SBI requested its Chair to convene an informal pre-session meeting of Parties, in conjunction with its thirty-seventh session, subject to the availability of resources and conflicts of timing, to exchange further views on the possible recommendations on loss and damage associated with the adverse effects of climate change.

156. The SBI took note of the estimated budgetary implications to implement the activities referred to in these conclusions, as provided by the secretariat.

157. The SBI requested that the actions of the secretariat called for in these conclusions be undertaken subject to the availability of financial resources.

It urged the Host Government to expedite the completion of conference and office facilities, including by supporting the city of Bonn in its efforts and by cooperating closely with the secretariat.
