

**Órgano Subsidiario de Asesoramiento
Científico y Tecnológico**

38° período de sesiones

Bonn, 3 a 14 de junio de 2013

Tema 10 b) del programa

Cuestiones metodológicas relacionadas con la Convención:

**Directrices generales para la medición, notificación y
verificación interna de las medidas de mitigación
apropiadas para cada país adoptadas por las Partes que
son países en desarrollo que reciben apoyo nacional**

**Directrices generales para la medición, notificación y
verificación interna de las medidas de mitigación
apropiadas para cada país adoptadas por las Partes
que son países en desarrollo que reciben apoyo nacional**

Proyecto de conclusiones propuesto por la Presidencia

1. El Órgano Subsidiario de Asesoramiento Científico y Tecnológico (OSACT) tomó nota del documento FCCC/SBSTA/2013/MISC.7 y Add.1, que incluía las opiniones de las Partes sobre las directrices generales para la medición, notificación y verificación interna de las medidas de mitigación apropiadas para cada país adoptadas por las Partes que son países en desarrollo que reciben apoyo nacional (en lo sucesivo, las directrices).
2. El OSACT inició el proceso de elaboración de las directrices y acordó proseguir dicho proceso durante el OSACT 39 (noviembre de 2013), sobre la base de los elementos de las directrices generales que figuran en el anexo de las presentes conclusiones, y sin prejuzgar dónde deberían recogerse esos elementos, en un proyecto de decisión o en el proyecto de directrices.
3. El OSACT reiteró que remitiría el proyecto de directrices a la CP para que lo aprobara en su 19° período de sesiones¹.

Anexo

[Inglés únicamente]

[Elements of general guidelines for domestic measurement, reporting and verification of domestically supported nationally appropriate mitigation actions by developing country Parties]

[Principles of Guidelines]

The Subsidiary Body for Scientific and Technical Advice reiterated its conclusion that the guidelines are to be general, voluntary, pragmatic, non-prescriptive, non-intrusive and country driven, take into account national circumstances and national priorities, respect the diversity of nationally appropriate mitigation actions (NAMAs), build on existing domestic systems and capacities, recognize existing domestic measurement, reporting and verification systems and promote a cost-effective approach².

[Purpose]

The purpose is to provide general guidelines, for voluntary use by developing country Parties, based on the above-mentioned agreed principles, to describe the domestic measurement, reporting and verification of domestically supported NAMAs.

[Recognizing, using and reporting on domestic verification of NAMAs]

Option 1

Developing country Parties are encouraged to utilize existing domestic systems, including domestically available information, methodologies, experts and other aspects.

Where they exist, recognize existing domestic verification systems, if appropriate, and encourage domestic verification processes, thereby enhancing cost-effectiveness, including adverse impacts and costs of mitigation. Otherwise developing country Parties may wish to put into place domestic verification processes, as necessary, for their domestically supported nationally appropriate mitigation actions.

Option 2

Developing country Parties are encouraged to utilize existing domestic processes, arrangements or systems, including domestically available information, methodologies, experts and other aspects for domestic measurement, reporting and verification. Otherwise, developing country Parties may wish to voluntarily establish domestic processes, arrangements or systems for the domestic measurement, reporting and verification of domestically supported NAMAs and apply these general guidelines for the domestic measurement, reporting and verification of NAMAs.

While describing the domestic measurement, reporting and verification of domestically supported NAMAs developing country Parties may, taking into account national circumstances, capacities and national priorities, indicate the general approach adopted:

- To establish, when appropriate, and/or recognize, where relevant, inter alia, the institutions, entities, arrangements and systems involved in the domestic measurement, reporting and verification of NAMAs;

² FCCC/SBSTA/2012/5, paragraph 89.

- To measure domestically supported NAMAs, including the collection and management of relevant and available [quantitative and/or qualitative] information and the documentation of methodologies;
- To verify domestically supported NAMAs, including the use of domestic experts using domestically developed processes, thereby enhancing cost-effectiveness, including, but not limited to, adverse and/or positive impacts and costs of nationally appropriate mitigation actions.

Support [capacity-building]

Option 1

Decides that, in accordance with Article 4, paragraph 3, of the Convention, developed country Parties [shall] [may] provide enhanced support to interested developing countries, including financial, technical and capacity-building support, and address specific capacity-building needs as determined nationally, including the training of domestic experts and local practitioners in applying the best available approaches.

Option 2

Enhanced support to interested developing country Parties, including financial, technical and capacity-building support, and address specific capacity-building needs as determined nationally, including the training of domestic experts and local practitioners in applying the best available approaches should be ensured by developed country Parties and developed country Parties included in Annex II to the Convention by means of resources, in accordance with Article 4.3 of the Convention.

Option 3

Developed country Parties and developed country Parties included in annex II of the Convention provide new and additional financial resources at the agreed full cost in accordance with Article 4 paragraph 3 of the Convention with the view to supporting communication of information on domestic MRV in accordance with decision 2.CP.17.]
