ÓRGANO SUBSIDIARIO DE ASESORAMIENTO
CIENTÍFICO Y TECNOLÓGICO
20º período de sesiones
Bonn, 16 a 25 de junio de 2004

Tema 3 a) del programa provisional
Cuestiones metodológicas
Orientación sobre las buenas prácticas en relación con las
actividades de uso de la tierra, cambio de uso de la tierra y
silvicultura (UTS) previstas en el Protocolo de Kyoto,
productos madereros y otras cuestiones relativas al UTS

**PROYECTO DE CONCLUSIONES PROPUESTO POR LOS
COPRESIDENTES DEL GRUPO DE CONTACTO SOBRE
EL TEMA 3 a) DEL PROGRAMA**

Adición

**Recomendación del Órgano Subsidiario de Asesoramiento
Científico y Tecnológico**

[El Órgano Subsidiario de Asesoramiento Científico y Tecnológico (OSACT) en
su 21º período de sesiones decidió recomendar la adopción del siguiente proyecto de decisión a
la Conferencia de las Partes en su décimo período de sesiones:]

Proyecto de decisión .../CP.10

[Orientación sobre las buenas prácticas en relación con las actividades de uso de la tierra, cambio de uso de la tierra y silvicultura con arreglo a los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto]

La Conferencia de las Partes,

Recordando sus decisiones 11/CP.7, 19/CP.7, 21/CP.7, 22/CP.7 y 13/CP.9,

[1. *Recomienda que la Conferencia de las Partes en calidad de reunión de las Partes en el Protocolo de Kyoto apruebe el proyecto de decisión .../CMP.1 *infra* (Orientación sobre las buenas prácticas en el uso de la tierra, cambio de uso de la tierra y silvicultura con arreglo a los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto)];*

2. *Alienta a las Partes incluidas en el anexo I de la Convención que hayan ratificado el Protocolo de Kyoto a que presenten, a título voluntario, estimaciones de las emisiones por las fuentes y la absorción por los sumideros de gases de efecto invernadero vinculadas a las actividades previstas en los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto en los informes que deben presentar el 15 de abril de 2007 empleando los cuadros del formulario común para los informes¹ para las actividades con arreglo a los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto, que figuran en el anexo II de la presente decisión, e información complementaria que se incluirá en un anexo del informe del inventario nacional, que figura en el anexo I de la presente decisión;*

3. *Invita a las Partes a que presenten a la secretaría, antes del 30 de junio de 2007, sus opiniones acerca de los cuadros que se mencionan en el párrafo 2 *supra* y de la experiencia adquirida al usarlos;*

¹ El formulario común para los informes es un formulario estandarizado que deben utilizar las Partes en sus informes electrónicos sobre las estimaciones de las emisiones y absorciones de gases de efecto invernadero y otros datos conexos. Por razones técnicas (debido, por ejemplo, al tamaño de los cuadros y la letra) en este documento no es posible estandarizar la versión impresa de los cuadros del formulario común para los informes sobre uso de la tierra, cambio de uso de la tierra y silvicultura.

4. *Pide* a la secretaría que sintetice las opiniones de las Partes para su examen por el Órgano Subsidiario de Asesoramiento Científico y Tecnológico en su 27º período de sesiones;
5. *Pide* al Órgano Subsidiario de Asesoramiento Científico y Tecnológico que, tras examinar la experiencia adquirida al usar los cuadros que se mencionan en el párrafo 2 *supra*, los actualice y los incluya en el anexo de la decisión que se menciona en el párrafo 1 *supra*;
6. *Pide* a la secretaría, con sujeción a la disponibilidad de fondos complementarios, que cree un módulo provisional para los cuadros que se mencionan en el párrafo 2 *supra* que facilite los informes que deben presentarse el 15 de abril de 2007.

Anexo I

ORIENTACIÓN ACERCA DE LA COMUNICACIÓN DE INFORMACIÓN SUPLEMENTARIA SOBRE LAS ACTIVIDADES DE USO DE LA TIERRA, CAMBIO DE USO DE LA TIERRA Y SILVICULTURA (UTS) CON ARREGLO A LOS PÁRRAFOS 3 Y 4 DEL ARTÍCULO 3 QUE DEBEN FIGURAR EN EL INFORME DEL INVENTARIO NACIONAL

1. En el presente anexo se ofrece orientación acerca de la comunicación de información suplementaria sobre las actividades de uso de la tierra, cambio de uso de la tierra y silvicultura que debe figurar en el informe del inventario nacional (IIN)². Esta orientación se facilita para ayudar a las Partes a cumplir los requisitos previstos en la decisión 22/CP.7 y se basa, cuando procede, en la *Orientación del IPCC sobre las buenas prácticas en el uso de la tierra, cambio de uso de la tierra y silvicultura* (orientación del IPCC sobre las buenas prácticas en el UTS). En los informes del inventario nacional se puede incluir información adicional, en función de los criterios nacionales de la Parte para la estimación de las emisiones de gases de efecto invernadero (GEI) y la absorción por UTS con arreglo al Protocolo de Kyoto.
2. De conformidad con la orientación que figura a continuación, las Partes deben presentar:
 - a) Información general;
 - b) Información relacionada con las tierras;
 - c) Información específica sobre las actividades;
 - d) Otra información;
 - e) Información relativa al artículo 6.
3. Debe presentarse información específica acerca de cada una de las actividades previstas en el párrafo 3 del artículo 3 y cada una de las actividades elegidas con arreglo al párrafo 4 del artículo 3. Dado que tanto la forestación como la reforestación están sujetas a las mismas disposiciones que figuran en el anexo del proyecto de decisión -/ CPM.1 (*Uso de la tierra,*

² El informe del inventario nacional se presenta de conformidad con la decisión 18/CP.8, en su forma modificada por la decisión 13/CP.9.

cambio del uso de la tierra y silvicultura), adjunto a la decisión 11/CP.7, se puede informar sobre ambas al mismo tiempo.

1. Información general

- 1.1. Definición de bosque (como en el cuadro NIR 1.1) y cualquier otro criterio (por ejemplo, anchura mínima).
- 1.2. Actividades elegidas con arreglo al párrafo 4 del artículo 3 (como en el cuadro IIN 1).
- 1.3. Reseña sobre la manera en que se han aplicado las definiciones de cada actividad con arreglo al párrafo 3 del artículo 3 y cada actividad elegida con arreglo al párrafo 4 del artículo 3.
- 1.4. Reseña de las condiciones de precedencia y/o jerarquía entre las actividades del párrafo 4 del artículo 3 y sobre la manera en que se han aplicado coherentemente para determinar la clasificación de las tierras.

2. Información sobre las tierras

- 2.1. Unidad de medición espacial empleada para determinar la superficie de las unidades de tierra con arreglo al párrafo 3 del artículo 3 (de conformidad con el párrafo 3 del anexo del proyecto de decisión .../CMP.1 (*Uso de la tierra, cambio de uso de la tierra y silvicultura*), adjunto a la decisión 11/CP.7).
- 2.2. Metodología empleada para elaborar la matriz de transición de las tierras que figura en el cuadro IIN 2.
- 2.3. Mapas y/o bases de datos para identificar las ubicaciones geográficas y sistema de códigos de identificación de ubicaciones geográficas, que se pueden comunicar por medios electrónicos.

3. Información específica sobre las actividades

3.1. Métodos para las estimaciones del cambio de las reservas de carbono y de las emisiones y absorciones de GEI

- 3.1.1. Descripción de las metodologías y los supuestos en que se basan.
- 3.1.2. Justificación cuando se omite cualquier contingente de carbono o emisiones y absorciones de GEI de las actividades previstas en el párrafo 3 del artículo 3 y las actividades elegidas con arreglo al párrafo 4 del artículo 3 (el cuadro IIN 1 debería ir acompañado de esta información en todos los casos en que se lleve un RN).
- 3.1.3. Información sobre si se han excluido o no las emisiones y absorciones de GEI indirectas y naturales.
- 3.1.4. Cambios en los datos y métodos desde la presentación anterior (nuevos cálculos) (véase, entre otras, la sección 4.2.4.1 de la orientación del IPCC sobre las buenas prácticas en el sector UTS).
- 3.1.5. Estimaciones de la incertidumbre (véase, entre otras la sección 5.2 de la orientación del IPCC sobre las buenas prácticas en el sector UTS).
- 3.1.6. Información sobre otras cuestiones metodológicas (por ejemplo, intervalo y medición y variabilidad interanual) (véase, entre otras, la sección 4.2.3 de la orientación del IPCC sobre las buenas prácticas en el sector UTS).
- 3.1.7. A efectos de la contabilización exigida en el párrafo 18 del anexo al proyecto de decisión -/CMP.1 (*uso de la tierra, cambio de uso de la tierra y silvicultura*) que acompaña a la decisión 11/CP.7, se debe indicar el año del inicio de la actividad, si éste tiene lugar después de 2008.

3.2. Artículo 3.3

- 3.2.1. Información que demuestre que las actividades que figuran en el artículo 3.3 comenzaron el 1º de enero de 1990, o después de esa fecha, y antes del 31 de diciembre de 2012 y que éstas eran actividades humanas directas.

- 3.2.2. Información sobre la manera en que la recolección o la perturbación forestal a la que sigue el restablecimiento de un bosque se diferencia de la deforestación.
- 3.2.3. Información sobre el tamaño y la ubicación geográfica de las zonas forestales que han perdido masa forestal pero que no se han clasificado todavía deforestadas.

3.3. Artículo 3.4

- 3.3.1. Información que demuestre que las actividades que figuran en el artículo 3.4 tuvieron lugar a partir del 1º de enero de 1990 y que éstas eran actividades humanas.
- 3.3.2. Información relacionada con la gestión de tierras agrícolas, la gestión de pastizales y el restablecimiento de la vegetación, si se eligieron, para el año de base.
- 3.3.3. [Información relacionada con la ordenación forestal:
 - a) que la definición de bosque para esta categoría es conforme a la definición que figura en el punto 1.1 más arriba;
 - b) que la ordenación forestal es un sistema de prácticas para la administración y uso de la superficie forestal que tiene por objeto cumplir las funciones ecológicas (en particular la diversidad biológica), económicas y sociales pertinentes del bosque de una manera sostenible (inciso f) del párrafo del anexo del proyecto de decisión -/CMP.1 (*uso de la tierra, cambio de uso de la tierra y silvicultura*), que acompaña a la decisión 11/CP.7).]

4. Otra información

- 4.1. Análisis de las principales categorías para las actividades del artículo 3.3 y otras actividades escogidas que figuran en el artículo 3.4 (como, entre otras, en el cuadro IIN 3, sección 5.4 de la orientación del IPCC sobre las buenas prácticas en el sector UTS).

5. Información relativa al artículo 6

Primera alternativa: [El código de identificación en los cuadros 5(KP-I)A.1.1, 5(KP-I)A.1.2, 5(KP-I)B.1, 5(KP-I)B.3 y 5(KP-I)B.4 deben incluir una indicación específica sobre si la tierra es objeto de un proyecto con arreglo al artículo 6 del Protocolo de Kyoto.]

Segunda alternativa: [El código de identificación debe incluir una indicación específica de si el límite de la ubicación geográfica comprende la tierra objeto de un proyecto con arreglo al artículo 6 del Protocolo de Kyoto.]

TABLE NIR 1. SUMMARY TABLE

Activity coverage and other information relating to activities under Article 3.3 and elected activities under Article 3.4

Activity		Change in carbon pool reported ⁽¹⁾					Greenhouse gas sources reported ⁽²⁾						
		Above-ground biomass	Below-ground biomass	Litter	Dead wood	Soil	Fertilization ⁽³⁾	N ₂ O	N ₂ O	N ₂ O	CO ₂	CO ₂	CH ₄
Article 3.3 activities	Afforestation and Reforestation												
	Deforestation												
Article 3.4 activities	Forest Management												
	Cropland Management												
	Grazing Land Management												
	Revegetation												

⁽¹⁾ Indicate R (reported), NR (not reported), IE (included elsewhere) or NO (not occurring), for each relevant activity under Article 3.3 or elected activity under Article 3.4. If changes in a carbon pool are not reported, it must be demonstrated in the NIR that this pool is not a net source of greenhouse gases. Indicate NA (not applicable) for each activity that is not elected under Article 3.4. Explanation about the use of notation keys should be provided in the text.

⁽²⁾ Indicate R (reported), NE (not estimated), IE (included elsewhere) or NO (not occurring) for greenhouse gas sources reported, for each relevant activity under Article 3.3 or elected activity under Article 3.4. Indicate NA (not applicable) for each activity that is not elected under Article 3.4. Explanation about the use of notation keys should be provided in the text.

⁽³⁾ N₂O emissions from fertilization for Cropland Management, Grazing Land Management and Revegetation should be reported in the Agriculture sector. If a Party is not able to separate fertilizer applied to Forest Land from Agriculture, it may report all N₂O emissions from fertilization in the Agriculture sector.

⁽⁴⁾ If CO₂ emissions from biomass burning are not already included under changes in carbon stocks, they should be reported under biomass burning; this also includes the carbon component of CH₄. Parties that include CO₂ emissions from biomass burning in their carbon stock change estimates should report IE (included elsewhere).

Table NIR 1.1 Additional information

Selection of parameters for defining "Forest"under the Kyoto Protocol

Parameter	Range
Minimum land area	0.05 - 1 ha
Minimum crown cover	10 - 30 %
Minimum height	2 - 5 m

Table NIR 2. LAND TRANSITION MATRIXArea change between the previous and the current inventory year^{(1), (2), (3)}

		TO	Article 3.3 activities		Article 3.4 activities			Other	Total
			Afforestation and reforestation	Deforestation	Forest Management (if elected)	Cropland Management (if elected)	Grazing Land Management (if elected)		
FROM			(kha)						
Article 3.3 activities	Afforestation and Reforestation								
	Deforestation								
Article 3.4 activities	Forest Management (if elected)								
	Cropland Management ⁽⁴⁾ (if elected)								
	Grazing Land Management ⁽⁴⁾ (if elected)								
	Revegetation ⁽⁴⁾ (if elected)								
Other									
Total area									

⁽¹⁾ This table should be used to report land area and changes in land area subject to the various activities in the inventory year. For each activity it should be used to report area change between the previous year and the current inventory year. For example, the total area of land subject to Forest Management in the year preceding the inventory year, and which was deforested in the inventory year, should be reported in the cell in column B and in the row of Forest Management.

⁽²⁾ Some of the transitions in the matrix are not possible and the cells concerned have been shaded.

⁽³⁾ In accordance with section 4.2.3.2 of the IPCC good practice guidance for LULUCF, the value of the reported area subject to the various activities under Article 3.3 and 3.4 for the inventory year should be that on 31 December of that year.

⁽⁴⁾ Lands subject to Cropland Management, Grazing Land Management or Revegetation which, after 2008, are subject to activities other than those under Article 3.3 and 3.4, should still be tracked and reported under Cropland Management, Grazing Land Management or Revegetation, respectively.

TABLE NIR 3. SUMMARY OVERVIEW FOR KEY CATEGORIES FOR LULUCF ACTIVITIES UNDER THE KYOTO PROTOCOL

Country
Year
Submission

KEY CATEGORIES OF EMISSIONS AND REMOVALS	GAS	CRITERIA USED FOR KEY CATEGORY IDENTIFICATION			COMMENTS ⁽³⁾
		Associated category in UNFCCC inventory ⁽¹⁾ is key (indicate which category)	Category contribution is greater than the smallest category considered key in the UNFCCC inventory ⁽¹⁾ (including LULUCF)	Other ⁽²⁾	
Specify key categories according to the national level of disaggregation used⁽¹⁾					
<i>For example: Cropland Management</i>	<i>CO₂</i>	<i>X (Cropland remaining Cropland)</i>			

⁽¹⁾ See section 5.4 of the IPCC good practice guidance for LULUCF.

⁽²⁾ This should include qualitative consideration as per section 5.4.3 of the IPCC good practice guidance for LULUCF or any other criteria.

⁽³⁾ Describe the criteria identifying the category as key.

Documentation box:

Parties should provide in the NIR the full information on methodologies used for identifying key categories (according to section 5.4 of the IPCC good practice guidance for LULUCF).

**TABLE 5(KP) REPORT OF SUPPLEMENTARY INFORMATION FOR LAND USE, LAND-USE CHANGE AND FORESTRY ACTIVITIES
UNDER THE KYOTO PROTOCOL^{(1),(2)}**

Country
Year
Submission

GREENHOUSE GAS SOURCE AND SINK ACTIVITIES	Net CO ₂ emissions/ removals ^{(3), (4)}		CH ₄ ⁽⁵⁾	N ₂ O ⁽⁶⁾
	(Gg)		B	C

A.1. Afforestation and Reforestation ⁽⁷⁾				
A.1.1. Units of land not harvested since the beginning of the commitment period				
A.1.2. Units of land harvested since the beginning of the commitment period				
A.2. Deforestation				
B. Article 3.4 activities				
B.1. Forest Management (if elected)				
B.2. Cropland Management (if elected)				
B.3. Grazing Land Management (if elected)				
B.4. Revegetation (if elected)				

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ All estimates in this table include emissions and removals from projects under Article 6 hosted by the reporting Party.

⁽²⁾ If Cropland Management, Grazing Land Management and/or Revegetation are elected, this table and all relevant tables should also be reported for the base year for these activities.

⁽³⁾ According to the Revised 1996 IPCC Guidelines, for the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+). Net changes in carbon stocks are converted to CO₂ by multiplying C by 44/12 and by changing the sign for net CO₂ removals to be negative (-) and net CO₂ emissions to be positive (+).

⁽⁴⁾ CO₂ emissions from liming, biomass burning and drained organic soils, where applicable, are included in this column.

⁽⁵⁾ CH₄ emissions reported here for Cropland Management, Grazing Land Management and Revegetation, if elected, include only emissions from biomass burning (with the exception of savannah burning and agricultural residue burning which are reported in the Agriculture sector). Any other CH₄ emissions from Agriculture should be reported in the Agriculture sector.

⁽⁶⁾ N₂O emissions reported here for Cropland Management, if elected, include only emissions from biomass burning (with the exception of savannah burning and agricultural residue burning which are reported in the Agriculture sector) and N₂O from conversion to Cropland of lands other than Forest Land (Table 5(KP-II)3). Any other N₂O emissions from Agriculture should be reported in the Agriculture sector.

⁽⁷⁾ As both Afforestation and Reforestation under Article 3.3 are subject to the same provisions specified in the annex to draft decision -/CMP.1 (*Land use, land-use change and forestry*), attached to decision 11/CP.7, they can be reported together.

* On all CRF tables, please use, as applicable, the notation keys as specified in the annex to decision 18/CP.8.

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ Report here information on anthropogenic change in carbon stock for the inventory year for all geographical locations that encompass units of land subject to Afforestation and Reforestation under Article 3.3 not harvested since the beginning of the commitment period.

⁽²⁾ As both Afforestation and Reforestation under Article 3.3 are subject to the same provisions specified in the annex to draft decision -/CMP.1 (*Land use, land-use change and forestry*), attached to decision 11/CP.7, they can be reported together.

⁽³⁾ Geographical location refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.

⁽⁴⁾ Activity data may be further subdivided according to climate zone, management system, soil type, vegetation type, tree species, ecological zone, national land classification or other criteria. Complete one row for each subdivision.

⁽⁵⁾ The signs for estimates of gains in carbon stocks are positive (+) and of losses in carbon stocks are negative (-).

⁽⁶⁾ In all cases where the good practice guidance methods used give separate estimates of gains and losses, these estimates should be reported.

⁽⁷⁾ Note that net change corresponds to increase/decrease of carbon stock (see table 4.2.6a of the IPCC good practice guidance for LULUCF).

⁽⁸⁾ According to the Revised 1996 IPCC Guidelines, for the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+). Net changes in carbon stocks are converted to CO₂ by multiplying C by 44/12 and changing the sign for net CO₂ removals to be negative (-) and for net CO₂ emissions to be positive (+).

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ Units of lands subject to Deforestation under Article 3.3 otherwise subject to elected activities under Article 3.4 are implicitly included under A.2. They are reported here for transparency and to fulfil the requirement of paragraph 6 (b) (ii) of the annex to draft decision -/CMP.1 (*Article 7*), attached to decision 22/CP.7.

⁽²⁾ Geographical location refers to the boundaries of the areas that encompass units of land subject to Deforestation which would otherwise be included in land subject to elected activities under Article 3.4.

⁽³⁾ Activity data may be further subdivided according to climate zone, management system, soil type, vegetation type, tree species, ecological zone, national land classification or other criteria. Complete one row for each subdivision.

TABLE 5(KP-I)B.1. SUPPLEMENTARY BACKGROUND DATA ON CARBON STOCK CHANGES AND NET CO₂ EMISSIONS AND REMOVALS FOR LAND USE, LAND-USE CHANGE AND FORESTRY ACTIVITIES UNDER THE KYOTO PROTOCOL

Elected Article 3.4 activities: Forest Management⁽¹⁾

GEOGRAPHICAL LOCATION ⁽²⁾	ACTIVITY DATA		IMPLIED CARBON STOCK CHANGE FACTORS ⁽⁶⁾						Implied emission/removal factor per area ⁽⁷⁾	CHANGE IN CARBON STOCK ⁽⁶⁾						Net CO ₂ emissions/removals ⁽⁷⁾

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ If Forest Management has been elected, report here information on anthropogenic carbon stock change for the inventory year for all geographical locations that encompass land subject to Forest Management under Article 3.4.

⁽²⁾ Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management (if elected).

⁽³⁾ Activity data may be further subdivided according to climate zone, management system, soil type, vegetation type, tree species, ecological zone, national land classification or other criteria. Complete one row for each subdivision.

⁽⁴⁾ The signs for estimates of gains in carbon stocks are positive (+) and of losses in carbon stocks are negative (-).

⁽⁵⁾ In all cases where the good practice guidance methods used give separate estimates of gains and losses, these estimates should be reported.

⁽⁶⁾ Note that net change corresponds to increase / decrease of carbon stock (see table 4.2.6a of the IPCC good practice guidance for LULUCF).

⁽⁷⁾ According to the Revised 1996 IPCC Guidelines, for the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+). Net changes in carbon stocks are converted to CO₂ by multiplying C by 44/12 and changing the sign for net CO₂ removals to be negative (-) and for net CO₂ emissions to be positive (+).

TABLE 5(KP-I)B.2 SUPPLEMENTARY BACKGROUND DATA ON CARBON STOCK CHANGES AND NET CO₂ EMISSIONS AND REMOVALS FOR LAND USE, LAND-USE CHANGE AND FORESTRY ACTIVITIES UNDER THE KYOTO PROTOCOL

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ N₂O emissions from fertilization for Cropland Management, Grazing Land Management and Revegetation should be reported in the Agriculture sector. If a Party is not able to separate fertilizer applied to Forest Land from

Agriculture, it may report all N₂O emissions from fertilization in the Agriculture sector. This should be explicitly indicated in the documentation box.

⁽²⁾ Direct N₂O emissions from fertilization are estimated following section 3.2.1.4.1 of the IPCC good practice guidance for LULUCF based on the amount of fertilizer applied to land under Forest Management.

The indirect N₂O emissions from Afforestation and Reforestation and land under Forest Management are estimated as part of the total indirect emissions in the Agriculture sector based on the total amount of fertilizer used in the country. Parties should show that double counting of N₂O emissions from fertilization with Agriculture sector estimates has been avoided.

⁽³⁾ In the calculation of the implied emission factor, N₂O emissions are converted to N₂O-N by multiplying by 28/44.

⁽⁴⁾ Geographical location refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.

⁽⁵⁾ Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management (if elected).

Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ Methodologies for estimating N₂O emissions from drainage of soils are not addressed in the Revised 1996 IPCC Guidelines, but Appendix 3a.2 of the IPCC good practice guidance for LULUCF provides methodologies for consideration.

⁽²⁾ N₂O emissions from drainage of soils include those resulting from Forest Management. N₂O emissions from drained Cropland and Grassland soils are covered in the Agriculture sector under Cultivation of Histosols.

⁽³⁾ Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management (if elected).

⁽⁴⁾ In the calculation of the implied emission factor, N₂O emissions are converted to N₂O-N by multiplying by 28/44.

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ Methodologies for N_2O emissions from disturbance associated with land-use conversion to Croplands are found in section 3.3.2.3.1.1 of the IPCC good practice guidance for LULUCF. N_2O emissions from fertilization in the preceding land use and new land use should not be reported here. Parties should avoid double counting with N_2O emissions from drainage and from cultivation of organic soils reported in Agriculture under Cultivation of Histosols.

⁽²⁾ According to the IPCC good practice guidance for LULUCF N_2O emissions from disturbance of soils are only relevant for land conversions to Cropland. N_2O emissions from Cropland Management when Cropland is remaining Cropland are included in the Agriculture sector.

⁽³⁾ Geographical location refers to the boundaries of the areas that encompass units of land subject to Deforestation.

⁽⁴⁾ Geographical location refers to the boundaries of the areas that encompass land subject to Cropland Management, if elected.

⁽⁵⁾ In the calculation of the implied emission factor, N_2O emissions are converted to N_2O -N by multiplying by 28/44.

⁽⁶⁾ N_2O emissions associated with Deforestation followed by the establishment of Cropland should be reported under Deforestation even if Cropland Management is not elected under Article 3.4.

⁽⁷⁾ Parties may separate data for organic and mineral soils, if they have data available.

⁽⁸⁾ This includes N_2O emissions in land subject to Cropland Management from disturbance of soils due to the conversion to Cropland of lands other than Forest Lands.

⁽⁹⁾ Units of land subject to Deforestation under Article 3.3 otherwise subject to elected activities under Article 3.4 are implicitly included under A.2. They are reported here for transparency and to fulfil the requirement of paragraph 6 (b) (ii) of the annex to draft decision -/CMP.1 (*Article 7*), attached to decision 22/CP.7.

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

⁽¹⁾ Carbon emissions from agricultural lime application are addressed in sections 3.3.1.2.1.1 and 3.3.2.1.1.1 of the IPCC good practice guidance for LULUCF.

⁽²⁾ Geographical locations refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.

⁽³⁾ Geographical locations refers to the boundaries of the areas that encompass units of land subject to Deforestation.

⁽⁴⁾ Geographical locations refers to the boundaries of the areas that encompass land subject to Forest Management, if elected.

⁽⁵⁾ Geographical locations refers to the boundaries of the areas that encompass land subject to Cropland Management, if elected.

⁽⁶⁾ Geographical locations refers to the boundaries of the areas that encompass land subject to Grazing Land Management, if elected.

⁽⁷⁾ Geographical locations refers to the boundaries of the areas that encompass land subject to Revegetation, if elected.

⁽⁸⁾ If Parties are not able to separate lime application for different geographical locations, they should include liming for all geographical locations in the total.

⁽⁹⁾ A Party may report aggregate estimates for total lime applications when data are not available for limestone and dolomite.

Documentation box

Parties should provide detailed explanation on the land use, land-use change and forestry sector in the relevant annex of the NIR: Supplementary information on LULUCF activities under the Kyoto Protocol. Use this documentation box to provide references to relevant sections of the NIR if any additional details are needed to understand the content of this table.

- (1) Geographical locations refers to the boundaries of the areas that encompass units of land subject to Afforestation and Reforestation.
- (2) Geographical location refers to the boundaries of the areas that encompass units of land subject to Deforestation
- (3) Geographical location refers to the boundaries of the areas that encompass land subject to Forest Management, if elected
- (4) Geographical location refers to the boundaries of the areas that encompass land subject to Cropland Management, if elected
- (5) Geographical location refers to the boundaries of the areas that encompass land subject to Grazing Land Management, if elected
- (6) Geographical location refers to the boundaries of the areas that encompass land subject to Revegetation, if elected
- (7) For each activity, activity data should be selected between area burned (AB) or biomass burned (BB). Units will be ha for area burned, and kg dm for biomass burned. The implied emission factor will refer to the selected activity data with an automatic change in the units.
- (8) If CO₂ emissions from biomass burning are not already included in Tables 5(KP-I)A.1.1 to 5(KP-I)B.4, they should be reported here. This also includes the carbon component of CH₄.
This should be clearly documented in the documentation box and in the NIR. Parties that include all carbon stock changes in the carbon stock tables (5(KP-I)A.1.1 to 5(KP-I)B.4) should report IE (included elsewhere) in the CO₂ column.
- (9) Parties should report controlled/prescribed burning and wildfires emissions separately, where appropriate.
- (10) Burning of agricultural residues is included in the Agriculture sector.
- (11) Greenhouse gas emissions from prescribed savannah burning are reported in the Agriculture sector.

Proyecto de decisión -/CMP.1

[Orientación sobre las buenas prácticas en el uso de la tierra, el cambio de uso de la tierra y la silvicultura con arreglo a los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto]

La Conferencia de las Partes en cuanto reunión de las Partes en el Protocolo de Kyoto,

Recordando, en particular, los párrafos 3 y 4 del artículo 3, el párrafo 2 del artículo 5 y el párrafo 1 del artículo 7 del Protocolo de Kyoto,

Recordando asimismo las decisiones 11/CP.7, 19/CP.7, 21/CP.7, 22/CP.7 y 13/CP.9,

Reafirmando que las emisiones antropógenas por las fuentes y la absorción antropógena por los sumideros de los gases de efecto invernadero no controlados por el Protocolo de Montreal deben notificarse de manera transparente, coherente, comparable, exhaustiva y precisa,

Habiendo examinado las recomendaciones pertinentes del Órgano Subsidiario de Asesoramiento Científico y Tecnológico,

[1. *Decide* que las Partes incluidas en el anexo I de la Convención que han ratificado el Protocolo de Kyoto sigan la orientación relativa a las buenas prácticas en el uso de la tierra, el cambio de uso de la tierra y la silvicultura, elaborada por el Grupo Intergubernamental de Expertos sobre el Cambio Climático, al preparar los inventarios de gases de efecto invernadero correspondientes al uso de la tierra, cambio de uso de la tierra y silvicultura con arreglo a los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto, de conformidad con la decisión 11/CP.7;]

2. *Decide* utilizar, a efectos de la información suplementaria a los inventarios anuales de gases de efecto invernadero en el primer período de compromiso, además de los elementos especificados en los párrafos 5 a 9 del anexo del proyecto de decisión -/CMP.1 (art. 7), adjunto a la decisión 22/CP.7, la información suplementaria que se incluya en un anexo al informe del inventario nacional contenido en el anexo I de la presente decisión, así como los cuadros del

formulario común para los informes¹ sobre las actividades realizadas con arreglo a los párrafos 3 y 4 del artículo 3 del Protocolo de Kyoto, contenidos en el anexo II de la presente decisión;

3. *Pide a la secretaría que准备 un programa informático para la presentación de los cuadros mencionados en el párrafo 2.*

ANEXOS

[Se prepararán de conformidad con el párrafo 5 de la decisión -/CP.10.]

¹ El formulario común para los informes es un formulario normalizado que deben utilizar las Partes en sus informes electrónicos sobre las estimaciones de las emisiones y absorciones de gases de efecto invernadero y otros datos conexos. Por razones técnicas (en razón, por ejemplo, del tamaño de los cuadros y la letra) en este documento no es posible normalizar la versión impresa de los cuadros del formulario común para los informes sobre uso de la tierra, cambio de uso de la tierra y silvicultura.
