

Paris Committee on Capacity-building (PCCB)

Call for submissions from Parties and non-Party stakeholders:

Existing tools and methodologies for implementing capacity-building activities that enable countries to achieve the long-term goals of the Paris Agreement

Background

The PCCB aims to address gaps and needs, both current and emerging, in implementing capacity-building in developing country Parties and further enhance capacity-building efforts.

- a) Enhancing coherence and coordination of capacity-building under the Convention;
- b) Identifying capacity gaps and needs, both current and emerging, and recommending ways to address them;
- c) Promoting awareness-raising, knowledge- and information-sharing and stakeholder engagement.

Current priority areas are:

To learn more about the work of the PCCB, you can access its annual reports and other documents [here](#).

Topic for submissions

As part of its continuing efforts to respond to these priorities, the PCCB determined in its 2021-2024 workplan, to make calls for submissions from Parties and non-Party stakeholders on:

Existing tools and methodologies for implementing capacity-building activities that enable countries to achieve the long-term goals of the Paris Agreement.

Submissions form

We thank you in advance for filling out this template with concise, evidence-based information and for referencing all relevant sources. There are 2 sections in this template:

- *Details about your organization*
- *Guiding questions about implementing NDCs and national development plans in developing countries*

How will the inputs be used?

The inputs for implementing capacity-building activities will feed into upcoming deliverables under Activity B.2 of the 2021-2024 PCCB workplan, including a technical session at the 4th Capacity-building Hub in 2022.

Further information:

You are welcome to provide any other information that your organization thinks would highlight suggestions made in response to this call for submissions.

Address for submission: pccb@unfccc.int

Deadline for submissions: 15 October 2021

Please only fill out sections that are relevant to the work of your organization. Please note that no section is mandatory.

Organization or entity name:

PRC GLOBAL PTE LTD

Type of organization:

Existing tools and methodologies for implementing capacity-building activities that enable countries to achieve the long-term goals of the Paris Agreement.

Having the right and necessary tools and methodologies available to efficiently design, implement, and monitor and evaluate meaningful capacity-building interventions is key to making sure that countries successfully implement the Paris Agreement and reach its goals.

The PCCB seeks information on tools and methodologies used in climate-related efforts that aim to strengthen capacities at the individual, institutional or systemic level to meet objectives or perform better, and/or that enhance the sustainability, replicability or scalability of capacity-building projects/efforts. Relevant tools and methodologies also include those supporting the design and monitoring and evaluation of capacity-building efforts.

What are good examples of tools and methodologies used by different actors for implementing capacity-building activities that enable countries to achieve the long-term goals of the Paris Agreement?

- It is unlikely that we are able to achieve the set target of SDG goals & 1.5 deg.C. , if nothing is done to stop dumping waste and leaching chemical fertilizers into all our water ways. Policy makers need to be serious, to follow Sri Lanka Presidential order to ban all chemical fertilizers & pesticides importation by statutory legislations. All Cop26, need to follow the Sri Lanka footsteps.

Which types of tools and methodologies for capacity building have proven to be the most effective and why?

- The public sectors policy and directives to respective agriculture ministry or departments need to be coherent for actions, based on the latest IPCC reports. The problem is most policy makers & signatories are ignoring the latest IPCC reports that humanity need to take actions to mitigate impacts of climate change.

Which (types of) tools and methodologies to support the efficient design, implementation, and monitoring/evaluation of meaningful capacity-building interventions are currently lacking?

- There is no lacking of any tools to push and execute the policy as needed for a 1.5deg C as laid out in the IPCC latest report for actions. All we need is for the respective signatories of Cop26 to legislate law to stop dumping wastes into our waterways, and also need to follow Sri Lanka legislations to ban all chemical inputs and pesticides into the respective countries.

In which thematic area(s) of the Paris Agreement are new tools and methodologies for capacity-building most required in order to achieve the long-term goals of the Paris Agreement?

- To achieve the long term goals, there is an urgent need to support the motion that ecocide be legislated as a crime against humanity under the Rome Statutes ICC legislation. France have legislated the ecocide law to protect and clean up the ecosystems. Our global biodiversity, and ecology are destroyed beyond natural restoration capacity. Unless signatories of Cop26 take serious actions to legislate legal actions for all polluters, based on polluters pay basis. The ICC Rome Statutes, 5th crime against humanity deserves a robust debate at the Cop26 conference too. But, it can be done under ICC jurisdiction too. Unless, we act our hope to achieve the set targets of 1.5deg.C & 17 SDG goals will remain a dream for humanity. Policy makers need to be serious at COP26 Glasgow conference for real executions of executive orders to act.

Open comment:

Signatories to Glasgow UNFCCC Cop26, need to act and not like what was evolved at the 1992 Rio Summit where most of the agendas agreed upon was never acted upon.
