

Paris Committee on Capacity-building (PCCB)

Call for submissions from Parties and non-Party stakeholders: Experience, good practices and lessons learned related to enhancing the ownership of developing countries of building and maintaining capacity

Background

The PCCB aims to address gaps and needs, both current and emerging, in implementing capacity-building in developing country Parties and further enhance capacity-building efforts.

Current priority areas are:

- a) Enhancing coherence and coordination of capacity-building under the Convention;
- b) Identifying capacity gaps and needs, both current and emerging, and recommending ways to address them;
- c) Promoting awareness-raising, knowledge- and information-sharing and stakeholder engagement.

To learn more about the work of the PCCB, you can access its annual reports and other documents [here](#).

Topic for submissions

As part of its continuing efforts to respond to these priorities, the PCCB determined in its 2021-2024 workplan, to make a call for submissions from Parties and non-Party stakeholders on:

Experience, good practices and lessons learned related to enhancing the ownership of developing countries of building and maintaining capacity.

Submissions form

We thank you in advance for filling out this template with concise, evidence-based information and for referencing all relevant sources. There are 2 sections in this template:

- *Details about your organization*
- *Guiding questions about implementing NDCs and national development plans in developing countries*

How will the inputs be used?

The inputs will feed into upcoming deliverables under Activity B.3 of the 2021-2024 PCCB workplan, including a technical paper in 2022, a technical session at the 5th Capacity-building Hub in 2023, and recommendations to the COP and CMA.

Further information:

You are welcome to provide any other information that your organization thinks would highlight suggestions made in response to this call for submissions.

Address for submission: pccb@unfccc.int

Deadline for submissions: 30 November 2021

Please only fill out sections that are relevant to the work of your organization. Please note that no section is mandatory.

Organization or entity name:

Independent Consultant

Type of organization:

Please choose as appropriate:

Organization Location

City: Durban

Country: South Africa

Scale of operation:

- | | |
|----------------------------------------------|----------------------------------------------|
| <input checked="" type="checkbox"/> Global | <input checked="" type="checkbox"/> Regional |
| <input checked="" type="checkbox"/> Local | <input type="checkbox"/> Subregional |
| <input checked="" type="checkbox"/> National | <input type="checkbox"/> Transboundary |

City(ies)/Country(ies) of operation (if appropriate):

Durban, Johannesburg, Capte Town/SA

Experience, good practices and lessons learned related to enhancing the ownership of developing countries of building and maintaining capacity.

Enhancing country ownership of capacity-building, is a topic that the PCCB has explored from the start as part of its mandate. Article 11.2 of the Paris Agreement notes that capacity-building “should be country-driven, based on and responsive to national needs, and foster country ownership of Parties, in particular, for developing country Parties, including at the national, subnational and local levels.” Parties and other stakeholders in the UNFCCC process have variously noted that a lack of country ownership and local leadership is a key cause behind existing capacity gaps and constraints in developing countries.

Under its new workplan for 2021–2024, the PCCB will collate, review and share information on experience, good practices and lessons learned related to enhancing the ownership of developing countries of building and maintaining capacity, and providing recommendations in this regard.

What are good examples of lessons learned and best practices in enhancing country ownership of capacity-building efforts?
<ul style="list-style-type: none">• Bespoke climate change courses specifically aimed at industry employees and tailored for the different levels (workers, engineers, managers) in an organization• While there are many efforts and initiatives on CCCB for communities and schools, very little attention is paid to CCCB for employees in industry/business, who could be key to mobilising industry/businesses to respond better to the climate change crisis and make decisions that will be climate friendly in all their developments and designs.
In your experience, how can country ownership of capacity-building efforts best be ensured and enhanced?
<ul style="list-style-type: none">• Making CC capacity building mandatory for certain sectors and categories of jobs; integrating CC learning in key academic programmes such as engineering, project management, inter alia.
What are key challenges (incl. e.g. knowledge and institutional barriers and capacity gaps) with regard to effectively enhancing country ownership of capacity-building efforts?
<ul style="list-style-type: none">• Lack of knowledge in industry; other more pressing priorities in industry; high consumption patterns of industry/business employees
Useful sources:
<i>Please give examples of useful sources relevant to this topic (e.g. webpages and portals, publications, fora, organizations working on this issue)</i> <ul style="list-style-type: none">• Environmental Learning Research Centre (ELRC), Rhodes University
