

**Addendum to the POLAND'S  
NATIONAL INVENTORY REPORT 2022**  
**GREENHOUSE GAS INVENTORY FOR 1988-2020**  
**Submission under the United Nations Framework Convention**  
**on Climate Change and the Kyoto Protocol**

**Amended information on the Poland's commitment period reserve (CPR)**

The Poland's commitment period reserve for 2013–2020 is to be calculated as follows:

CPR based on the 90% of assigned amount	CPR based on the 100% of 8 times the latest national total of the GHG inventory (2022 annual submission)
$90\% * 1,583,938,824 \text{ tCO}_2\text{eq} = 1,425,544,942 \text{ tCO}_2\text{eq}.$	$8 * 376,038,461 \text{ tCO}_2\text{eq} = 3,008,307,688 \text{ tCO}_2\text{eq}.$

Based on the above calculations and in accordance with paragraph 6 of annex to decision 11/CMP.1, in conjunction with decision 1/CMP.8, Poland's commitment period reserve amounts to 1,425,544,942 tCO<sub>2</sub>eq.
