

Subsidiary Body for Implementation

Fifty-eighth session

Bonn, 5–15 June 2023

Programme budget for the biennium 2024–2025

Proposal by the Executive Secretary

Addendum

Work programme of the secretariat for the biennium 2024–2025

Summary

The work programme of the secretariat for the biennium 2024–2025 outlines the core budget, supplementary and other resources required by the secretariat to implement its mandates and achieve the stated objectives and expected results. A fully integrated budget across all funding sources is presented by division and objective, and all outputs and accomplishments expected to be delivered are documented.

It is the first biennium in which the Paris Agreement will be fully operational and actions taken in this biennium will determine whether the world has a chance to reach the goals and objectives of the Paris Agreement. To make sufficient progress by 2030 in accordance with science, the UNFCCC process must deliver significant outcomes in the biennium 2024–2025. In 2024, the secretariat must be resourced to support Parties in responding to the outcomes of the first global stocktake. In the same year, an agreement on a new collective quantified goal on finance to support enhanced climate action is due. In parallel, the secretariat will be required to engage in course correction of the collective action by enhancing the accountability of Parties and non-Party stakeholders. In 2025, the secretariat will proactively support Parties in meeting their commitment to ratchet up ambition in the next round of nationally determined contributions.

The work programme should be considered in conjunction with document FCCC/SBI/2023/2, which presents the proposed programme budget for the biennium 2024–2025, and document FCCC/SBI/2023/2/Add.2, which presents the proposed budget for the international transaction log.

JISC	Joint Implementation Supervisory Committee
KCI	Katowice Committee of Experts on the Impacts of the Implementation of Response Measures
LCIPP	Local Communities and Indigenous Peoples Platform
LEG	Least Developed Countries Expert Group
LT-LEDS	long-term low-emission development strategy(ies)
LULUCF	land use, land-use change and forestry
MRV	measurement, reporting and verification
NA	not applicable
NAMA	nationally appropriate mitigation action
NAP	national adaptation plan
NC	national communication
NDC	nationally determined contribution
NIR	national inventory report
NWP	Nairobi work programme on impacts, vulnerability and adaptation to climate change
PAICC	Paris Agreement Implementation and Compliance Committee

PCCB	Paris Committee on Capacity-building
QELRCs	quantified emission limitation and reduction commitments
REDD+	reducing emissions from deforestation; reducing emissions from forest degradation; conservation of forest carbon stocks; sustainable management of forests; and enhancement of forest carbon stocks (decision 1/CP.16, para. 70)
RM forum	forum on the impact of the implementation of response measures
RSA Forum	Registry System Administrators Forum
SBI	Subsidiary Body for Implementation
SBSTA	Subsidiary Body for Scientific and Technological Advice
SCF	Standing Committee on Finance
TEC	Technology Executive Committee
TNA	technology needs assessment
TT:CLEAR	technology information clearing house
WIM	Warsaw International Mechanism for Loss and Damage associated with Climate Change Impacts
ZNG	zero nominal growth

I. Introduction

1. This integrated work programme for the biennium 2024–2025 is instrumental to maximizing the secretariat’s contribution to the progress needed by 2030 in accordance with science and enabling it to serve as a catalyst for transformation on climate change and effectively leverage its role as the custodian of the political process to address climate change. During the biennium, the secretariat will strive to ensure that significant progress is made in preventing and responding to the impacts of climate change, noting the significant detrimental repercussions of climate change for the achievement of the Sustainable Development Goals.
2. In the biennium 2024–2025, the UNFCCC process must deliver significant outcomes. In 2024, the secretariat must be fully resourced to support Parties in responding to the outcomes of the first global stocktake, which will conclude at COP 28. In the same year, a transformation of the finance agenda and an agreement on a new collective quantified goal on finance to support enhanced climate action are due. In parallel, the secretariat will be required to engage in course correction of the collective action by enhancing the accountability of Parties and non-Party stakeholders. In 2025, the secretariat will proactively support Parties in meeting their commitment to ratchet up ambition in the next round of NDCs and build on progress made in the areas of adaptation, loss and damage, and means of implementation.
3. This document outlines the core budget, supplementary and other resources required to deliver the activities and outputs needed to achieve the results expected by Parties. In line with best practice in the United Nations system, a results-based approach was adopted in planning the work of the secretariat.
4. The expected results referred to in this document stem directly from the work mandated for the biennium. The performance indicators are a measure of the achievement of the expected results of the activities undertaken by the secretariat. The identified indicators, as well as any related baseline and target data, are intended to enhance transparency.
5. The mandates referred to in this document, derived from provisions of the Convention, the Kyoto Protocol and the Paris Agreement and decisions of the COP, the CMP and the CMA, in addition to conclusions of the subsidiary bodies and workplans of constituted bodies, constitute the legal basis for the activities to be carried out by each division.
6. Chapter II below provides an overview of the secretariat’s functions, mandates and key workstreams by division for 2024–2025. It presents information, including major outputs, in the same way for each division, thereby clarifying what each division will deliver using different sources of funding. Many outputs need to be delivered annually or biennially in response to requests by the governing and subsidiary bodies and in support of multi-year work programmes.
7. Chapter III below presents objectives, results, outputs and performance indicators for each division, as well as the resource requirements under the proposed core budget and ZNG scenarios. The figure below shows the total resources required for implementing the 2024–2025 work programme (inner circle), broken down to resource requirements by objective (middle circle) and further by funding source (outer circle). The funding requirements for the core and supplementary budgets represent the proposed core budget.
8. The secretariat can only commit to the full and timely delivery of the results and outputs outlined in its work programme on the basis of the timely receipt of adequate funding. This in turn can be achieved through a combination of an adequate approved core budget, the timely receipt of indicative contributions and sufficient multi-year donor agreements for the Trust Fund for Supplementary Activities.

Integrated secretariat budget for 2024–2025 by objective and source of funding
(Millions of euros)

Abbreviations: Core = proposed core budget; Suppl.= Trust Fund for Supplementary Activities; Partic. = Trust Fund for Participation in the UNFCCC Process; Bonn = Bonn Fund; Art. 6.4 = Budget for work on matters under Article 6, paragraph 4, of the Paris Agreement; KP fees = Budgets for the mechanisms established under the Kyoto Protocol.

II. Functions, mandates and key workstreams by division

A. Programmes department

9. The combined outputs of the four divisions of the Programmes department (Adaptation, Mitigation, Means of Implementation, and Transparency) will provide Parties with a broad suite of technical and substantive inputs and support so as to enable comprehensive and coherent international cooperation and implementation of action aimed at the collective achievement of the objectives and goals of the Convention, the Kyoto Protocol and the Paris Agreement. The work of the divisions is aligned with the overall priorities of the secretariat in the biennium 2024–2025, in particular with regard to supporting the outcomes of the first global stocktake, work on the new collective quantified goal on climate finance, supporting Parties in increasing the mitigation ambition of their NDCs and their adaptation efforts and enhancing the transparency of and accountability for climate action by Parties and non-Party stakeholders.

1. Programmes Coordination

10. Programmes Coordination will provide strategic direction and oversight in relation to the work of the four Programmes divisions (Adaptation, Mitigation, Means of Implementation, and Transparency). It will ensure strategic, substantive and administrative coherence and synergy in the delivery of their work programmes, including in relation to the established intergovernmental processes and constituted bodies. As a result, Parties will receive coherent, consolidated support for implementing mitigation and adaptation action

enabled by the provision and mobilization of means of implementation while ensuring transparency of both action and support.

11. Programmes Coordination will serve as an interface between the Executive division and the Programmes department to ensure the alignment of the overarching executive outreach of the secretariat with the substantive work of the Programmes divisions, as well as with the climate-related work of other parts of the United Nations system. It will work in close cooperation with the Intergovernmental Support and Collective Progress division to ensure strategic, substantive and procedural coherence in supporting the meetings of the governing, subsidiary and constituted bodies and the review of collective progress of action and support, particularly in the context of the global stocktake. Programmes Coordination will also collaborate with the Communications and Engagement division to ensure outreach and engagement activities are consistent with the substantive work of the Programmes Department. Finally, it will work closely with the Executive and Operations Coordination divisions with a view to ensuring the efficient and effective planning, management and monitoring of resources across the secretariat and facilitating resource mobilization and partnerships.

12. In the biennium 2024–2025, Programmes Coordination will:

(a) Facilitate intergovernmental engagement in responding to the threat of climate change by providing effective, coherent and synergistic support for the operation of processes related to adaptation, loss and damage, mitigation, means of implementation and transparency in the framework of the Convention, the Kyoto Protocol and the Paris Agreement;

(b) Facilitate the provision of comprehensive and targeted high-level UNFCCC inputs to the climate-related activities of other organizations in the United Nations system, in particular with regard to linkages between climate action and sustainable development and synergies facilitating the achievement of sustainability goals;

(c) Enable constituted bodies working in the areas of adaptation, loss and damage, mitigation, means of implementation and transparency to fulfil their mandates in an effective, coherent and synergistic way;

(d) Manage and administer the Programmes divisions in accordance with United Nations rules and regulations.

13. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for Programmes Coordination for the biennium 2024–2025 are presented in chapter III below.

2. Adaptation division

14. The Adaptation division will support Parties in enhancing adaptive capacity, strengthening resilience and reducing vulnerability to climate change. It will facilitate the provision of holistic technical guidance and advice to Parties on all aspects of adaptation and resilience, especially on assessing climate change risks and sharing knowledge; planning responses to impacts and vulnerability; and enhancing implementation and reviewing progress.

15. The division will support a number of processes, including the NAP process, and four constituted bodies (the Adaptation Committee, the FWG of the LCIPP, the LEG and the WIM Executive Committee). It will support Parties by:

(a) Catalysing knowledge-sharing, action and support in close cooperation with the Means of Implementation and the Communications and Engagement divisions;

(b) Enhancing learning on and understanding of needs and action in response to climate change impacts, in addition to increasing the visibility and profile of adaptation and resilience and improving the balance between mitigation and adaptation support, in close cooperation with the Transparency division;

(c) Providing technical analyses, syntheses and input in the context of recognizing the adaptation efforts of developing country Parties and reviewing overall progress towards the global goal on adaptation.

16. The division's core mandates are derived from Article 2 (objective), Article 3 (principles) and Article 4 (commitments) of the Convention and Article 2 (objective), Article 7 (adaptation) and Article 8 (loss and damage) of the Paris Agreement. Additional mandates are set out in decisions and conclusions of the governing and subsidiary bodies of the Convention and the Paris Agreement and in the work programmes of the constituted bodies.

17. In the biennium 2024–2025, the Adaptation division will:

(a) Facilitate intergovernmental engagement in adaptation, including by supporting the NAP process, the NWP, the WIM (including as regards the Santiago network for averting, minimizing and addressing loss and damage associated with the adverse effects of climate change, as appropriate) and the LCIPP and facilitating adaptation-related reporting and the fulfilment of transparency requirements under the Paris Agreement;

(b) Support the adaptation-related constituted bodies in fulfilling their mandates;

(c) Manage a trusted repository of adaptation data and information;

(d) Facilitate engagement on adaptation to promote action towards the achievement of the objectives and goals of the Convention and the Paris Agreement.

18. The objectives, expected results, outputs and resource requirements, as well as resource requirements and information on staffing, for the Adaptation division for the biennium 2024–2025 are presented in chapter III below.

3. Mitigation division

19. The Mitigation division will support Parties in facilitating, catalysing and cooperating on the implementation of ambitious climate action in line with global efforts to limit the temperature increase to well below 2 °C and pursue efforts to limit this increase to 1.5 °C above pre-industrial levels. Parties will be supported in developing, communicating and effectively implementing ambitious NDCs and LT-LEDS in a manner that facilitates a just transition, including through the use of collaborative approaches, mechanisms and economic instruments that broaden mitigation action and drive sustainable development.

20. The division will provide technical and operational support to Parties for their mitigation and cooperative implementation efforts, in close cooperation with the cross-cutting Intergovernmental Support and Collective Progress division and the other Programmes divisions, in relation to (1) NDCs and LT-LEDS; (2) implementation of the Sharm el-Sheikh mitigation ambition and implementation work programme; (3) the impact of the implementation of response measures; (4) the transition of the mechanisms under Article 6 (JI), Article 12 (CDM) and Article 17 (emissions trading) of the Kyoto Protocol to Article 6 of the Paris Agreement; (5) the review of reporting on the implementation of cooperative approaches under Article 6, paragraph 2, of the Paris Agreement; (6) implementation of the mechanism established by Article 6, paragraph 4, of the Paris Agreement (cooperative implementation); and (7) implementation of the work programme for non-market approaches under Article 6, paragraph 8, of the Paris Agreement, as appropriate. The division will work closely with the Communications and Engagement division to catalyse action and support and enhance knowledge and understanding of mitigation needs and action.

21. The core mandates of the Mitigation division are derived from Article 3 (principles), Article 4 (commitments) and Article 8 (secretariat functions) of the Convention; Article 2 (policies and measures, and minimization of adverse effects of response measures), Article 3 (QELRCs, accounting of assigned amounts and minimizing adverse effects of climate change and response measures), Article 6 (JI), Article 12 (CDM) and Article 17 (international emissions trading) of the Kyoto Protocol; and Articles 3–4 (NDCs, LT-LEDS and impacts of response measures), Article 6 and Article 15 (facilitating implementation and promoting compliance) of the Paris Agreement.

22. In the biennium 2024–2025, the Mitigation division will support:

- (a) The delivery of mandated mitigation activities under the Convention and the Paris Agreement and relevant decisions taken by the COP, the CMP and the CMA;
- (b) Implementation of the Sharm el-Sheikh mitigation ambition and implementation work programme;
- (c) Work related to Article 6 of the Paris Agreement relating to cooperative approaches, the mechanism and the framework for non-market approaches;
- (d) Efforts relating to the transition of the CDM and the related reporting, review and compliance regime to Article 6, paragraph 4, of the Paris Agreement;
- (e) Efforts to address the impact of the implementation of response measures, including by supporting the KCI;
- (f) The preparation and implementation of NDCs and LT-LEDS;
- (g) Sectoral mitigation efforts, including under international aviation and maritime transport.

23. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Mitigation division for the biennium 2024–2025 are presented in chapter III below.

4. Means of Implementation division

24. The Means of Implementation division will provide critical assistance to Parties for enhancing access to and mobilizing and scaling up support for the implementation of the Convention, the Kyoto Protocol and the Paris Agreement by supporting the climate finance architecture, international cooperation on climate technology development and transfer, and the implementation of capacity-building arrangements and processes.

25. The division's core mandates are derived from Article 4 (commitments), Article 11 (Financial Mechanism) and Article 12 (communication of information on implementation) of the Convention; other mandates derived from Article 10 (technology transfer and capacity-building), Article 11 (finance and technology transfer) and Article 12, paragraph 8 (levy for adaptation financing), of the Kyoto Protocol also apply. Additional mandates are set out in decisions and conclusions of the governing and subsidiary bodies of the Convention and its Kyoto Protocol. In the context of the Paris Agreement, the division's mandates are derived from Article 2, paragraph 1(c) (broader finance flows), and Article 9 (climate finance), Article 10 (technology development and transfer), Article 11 (capacity-building) and relevant provisions of Article 13 (transparency) and Article 14 (global stocktake), and from accompanying provisions of decision 1/CP.21 and the Katowice and Glasgow outcomes on matters related to climate finance, technology development and transfer, and capacity-building.

26. In the biennium 2024–2025, the Means of Implementation division will support:

- (a) The intergovernmental activities relating to Article 9, paragraph 5 (projected levels of finance), of the Paris Agreement, including processing the biennial communications of developing country and other Parties and maintaining a dedicated online portal; organizing a biennial in-session workshop and the biennial ministerial dialogue on climate finance on Article 9, paragraph 5; engaging with developing countries and stakeholders; the negotiations and technical work on setting the new collective quantified goal on climate finance and the high-level ministerial dialogues related thereto; long-term climate finance and the biennial high-level ministerial dialogue on climate finance; the fifth review of the Adaptation Fund; the periodic review of the Financial Mechanism; and guidance to the operating entities and work relating to transparency of support;
- (b) The implementation of the workplan of the SCF, such as the preparation of the sixth Biennial Assessment and Overview of Climate Finance Flows, including work relating to progress in achieving the goal of mobilizing jointly USD 100 billion per year by 2020 and Article 2, paragraph 1(c), of the Paris Agreement; preparatory work on the second report on the determination of developing countries' needs related to implementing the Convention and the Paris Agreement; work relating to the ad hoc work programme on the new quantified

collective goal on climate finance; the organization of the SCF Forums; and the preparation of draft guidance for the operating entities of the Financial Mechanism;

(c) Activities to support the Technology Mechanism in the implementation of mandated activities relating to technology development and transfer under the Convention, the technology framework under Article 10 of the Paris Agreement, and the implementation of the Technology Mechanism joint work programme for 2023–2027, in particular as relates to new activities of the TEC and joint activities of the TEC and the CTCN undertaken in response to decisions 9/CP.26 and 15/CMA.3; enhancement of partnerships and collaboration with other organizations on support for developing countries for identifying and prioritizing technology needs and implementing technology actions; and intergovernmental work and negotiations on matters related to technology development and transfer under the Convention and the Paris Agreement, including the periodic assessment of the effectiveness and adequacy of the support provided to the Technology Mechanism for supporting the implementation of the Paris Agreement and the third independent review of the CTCN;

(d) Activities to support the implementation of the workplan of the PCCB in accordance with provisions of relevant COP 25 and 26 decisions,¹ including those pertaining to the priority areas and activities of the PCCB included in the workplan; the organization of two annual Capacity-building Hubs to be held at sessions of the COP; and the intergovernmental work and negotiations on matters related to capacity-building under the Convention, the Kyoto Protocol and the Paris Agreement, including in relation to the institutional arrangements for capacity-building under the Convention and the initial institutional arrangements for capacity-building to implement Article 11 of the Paris Agreement.

27. The Means of Implementation division will also support the global stocktake process and contribute to addressing the outcomes thereof by assisting the SCF, the TEC and the PCCB in compiling, analysing and presenting, as required, relevant information and data on climate finance, technology development and transfer, and capacity-building.

28. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Means of Implementation division for the biennium 2024–2025 are presented in chapter III below.

5. Transparency division

29. Transparency continues to be one of the most important levers in terms of building mutual trust and confidence among Parties, promoting effective implementation of action and support, obtaining financial, technological and capacity-building support needed and enabling Parties to raise their ambition with regard to climate action. The Transparency division will support Parties in reporting on their climate actions and support provided, needed and received under the ETF and ensure that Parties are ready to participate in the ETF by providing enhanced support to developing countries for implementing the ETF at the domestic level and the necessary tools and knowledge to fulfil the related requirements.

30. The Transparency division will support the intergovernmental process in relation to the ETF under Paris Agreement and MRV under the Convention, its Kyoto Protocol and its Doha Amendment by organizing technical reviews and analysis, MA, FSV and FMCP and by providing technical assistance to developing country Parties and training to experts engaged in the reporting, review and analysis processes. The division will continue to support work on relevant methodological issues, including in relation to GHG inventories, REDD+, agriculture, LULUCF, IPCC guidelines and common metrics. It will also support and facilitate the transparency-related work under the CGE, maintain a transparency data hub that includes data and information management and analysis and coordinate the preparation of annual NDC synthesis reports.

31. The division's core mandates are derived from Article 3 (principles), Article 4 (commitments), Article 8 (secretariat functions) and Article 12 (communication of information) of the Convention; from Article 2 (policies and measures), Article 3 (QELRCs

¹ Decisions 8/CP.25, 9/CP.25 and 12/CP.26.

and accounting of assigned amounts), Article 5 (emissions and GHG inventories), Article 7 (reporting) and Article 8 (review) of the Kyoto Protocol; and from the Paris Agreement, whereby Article 13 (transparency) guides the work of the division, complemented by Article 4 (NDCs), Article 5 (forests and REDD+), Article 7 (adaptation information), Articles 9–11 (climate finance, technology development and transfer, and capacity-building), Article 14 (global stocktake) and Article 15 (mechanism to facilitate implementation of and promote compliance). Additional mandates are set out in decisions and conclusions of the governing and subsidiary bodies of the Convention, the Kyoto Protocol and the Paris Agreement.

32. In the biennium 2024–2025, the Transparency division will continue to:

(a) Coordinate the full operationalization of the ETF and enable the transition thereto by all Parties, including by providing technical and implementation support to developing country Parties and preparing the enabling environments and processes for implementing the ETF, including establishing review practices, training new experts, deploying new systems and tools, reviewing the BTRs and organizing the FMCP;

(b) Support Parties in implementing the MRV under the Convention and its Kyoto Protocol with its Doha Amendment; facilitate the submission, review, analysis and international assessment of information provided by Parties in their NCs, GHG inventories, BRs, BURs and true-up period reports under the Doha Amendment; organize and support the meetings of lead reviewers to guide the review process; and coordinate the implementation of IAR, including MA, and of ICA, including FSV;

(c) Coordinate the technical assessment of FRL and FREL submissions and the technical analysis of REDD+ results to facilitate the provision of support to developing countries for sustainable forest management;

(d) Support the negotiations on methodological work under the ETF and MRV processes, including in relation to GHG inventories, the GHG data interface, LULUCF, REDD+, the joint work on implementation of climate action on agriculture and food security, IPCC guidelines and common metrics, the provision of financial and technical support to developing countries and the work of the CGE;

(e) Support and facilitate the work of the CGE in helping developing country Parties to meet their reporting commitments under the Convention and the Paris Agreement, provide input to the work of the Compliance Committee under the Kyoto Protocol and facilitate understanding and reporting of NDCs and BTRs under the Paris Agreement;

(f) Develop, maintain and manage a transparency data hub, promoting the secretariat as the unique official depository of climate change data; facilitate implementation of the new ETF reporting and review tools, including through training for developing country Parties; initiate the phasing out of some existing MRV-related systems and tools used for reporting, submission, review, analysis and assessment processes; support and enhance the tools that will continue to be used, such as the NDC and NAMA registries, UNFCCC roster of experts and REDD+ web platform; and prepare compilation and synthesis reports, ensuring that the latest authoritative information is readily accessible;

(g) Facilitate the monitoring and tracking of national progress with a view to use this information for informing the global stocktake and the mechanism for facilitating implementation and promoting compliance.

33. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Transparency division for the biennium 2024–2025 are presented in chapter III below.

B. Operations department

34. The three divisions of the Operations department (Legal Affairs; Conference Affairs; and AS/HR/ICT), as well as the Records Management and Resource Mobilization and Partnerships subdivisions, ensure that the secretariat operates effectively and efficiently, and are critical to ensuring that Parties are provided with a broad suite of conference-related, legal, logistical, ICT, administrative, travel, and resource mobilization and partnership support, as

well as records and archives, to enable comprehensive international cooperation and support for the implementation of action towards the collective achievement of the objectives and goals of the Convention, the Kyoto Protocol and the Paris Agreement. The work of the divisions is aligned with the overall priorities of the secretariat in the biennium 2024–2025 and will support the programmatic outcomes of the first global stocktake, work on the new collective quantified goal on climate finance, provision of support to Parties in increasing the mitigation ambition of their NDCs and their adaptation efforts and enhancement of the transparency of and accountability for climate action by Parties and non-Party stakeholders.

1. Operations Coordination

35. Operations Coordination will ensure the strategic direction, effective coordination and oversight of the Operations department. It will collaborate with all areas of the secretariat on (1) ensuring strategic, substantive and administrative coherence and synergy in the delivery of the department’s work programmes; (2) taking and reviewing decisions on the strategic direction and priorities of the secretariat and the corresponding allocation of resources; (3) ensuring that all divisions contribute to the secretariat’s aspiration to remain a strategically agile and effective organization; (4) fostering the organization-wide culture and values of innovation, agility and flexibility for the achievement of its goals and mandates; (5) taking a coherent secretariat-wide approach to resource mobilization and partnerships through coordination, policy support, processes, capacity-building and development of the required intelligence, tools, resources and services; (6) keeping the secretariat accountable to the governing bodies; and (7) maintaining and managing official business records and information, preserving archives of the intergovernmental climate negotiation process and the secretariat, and facilitating public access and research to ensure transparency.

36. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for Operations Coordination for the biennium 2024–2025 are presented in chapter III below.

2. Legal Affairs division

37. The Legal Affairs division will support the climate change process by providing independent, high-quality, authoritative and sound legal, procedural and, where relevant, programmatic advice and services with a view to maintaining trust in the fairness, inclusivity and transparency of the climate change regime and facilitating the operations and administration of the secretariat.

38. The division’s core mandates are derived from the Convention (Articles 7, 8, 15, 16 and 17), the Kyoto Protocol (Articles 13, 14, 18, 20 and 21) and the Paris Agreement (Articles 11, 12, 15, 16, 17, 22 and 23), as well as from the rules of procedures of all the bodies and mechanisms thereunder.

39. In the biennium 2024–2025, the Legal Affairs division will:

(a) Provide legal and procedural services to support the sound delivery of all mandated activities under the Convention, the Kyoto Protocol and the Paris Agreement, including the Glasgow and Sharm el-Sheikh outcomes, and to ensure that the governing and subsidiary bodies function and operate in accordance with legal, procedural and institutional requirements, and that presiding officers, Bureau members, regional and negotiating groups, Parties, chairs, facilitators and secretariat teams receive timely and effective legal, procedural and, where relevant, programmatic support and services in respect of all agenda items under negotiation;

(b) Provide legal and procedural support to ensure that all constituted bodies and institutional arrangements under the Convention, the Kyoto Protocol and the Paris Agreement operate in accordance with legal, procedural and institutional requirements, including substantive, technical and logistical services to support the operations of the Compliance Committee under the Kyoto Protocol and the PAICC. The Legal Affairs division acts as the secretary of both constituted bodies, facilitating the performance of their functions;

(c) Provide innovative tools for promoting treaty implementation and legal capacity-building to further UNFCCC engagement with Parties and non-Party stakeholders

and across the wider United Nations system to enhance UNFCCC action towards achieving its objectives;

(d) Facilitate and support the effective management and administration of the secretariat by protecting its legal interests, minimizing its legal liabilities and maximizing its operational efficiency by providing comprehensive advice on, inter alia, institutional and policy matters; personnel and staff-related issues; privileges and immunities; and legal aspects of public–private partnership and fundraising activities, in accordance with decisions of the COP, the CMP and the CMA and applicable regulations, rules and policies of the secretariat and the United Nations;

(e) Strengthen the institutional and policy legal framework of the secretariat through the development and promulgation of policies that meet the operational and business needs of the secretariat, and support their implementation;

(f) Enhance knowledge management and information-sharing on legal matters across the secretariat to maximize efficiency and coordination with a view to ensuring that the governing and subsidiary bodies function and operate in accordance with legal, procedural and institutional requirements.

40. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Legal Affairs division for the biennium 2024–2025 are presented in chapter III below.

3. Conference Affairs division

41. The provision of optimal conference services for the sessions of the governing and subsidiary bodies and for a wide range and growing number of increasingly complex workshops and other events is a cornerstone of the support given by the secretariat to Parties and other stakeholders. The Conference Affairs division will create an optimal environment for UNFCCC events and facilitate the preparation of Parties and other stakeholders for such events. The division will plan and coordinate conferences and provide high-quality conference services, including managing the Participation Fund, documents, meetings and the registration and accreditation of participants, as well as implementing innovations in conferencing. In addition, it will continue to support the work of other divisions, such as with regard to editorial and documentation services.

42. The division's core mandates are derived from Article 8, paragraph 2, of the Convention; Article 14, paragraph 2, of the Kyoto Protocol; and Article 17 of the Paris Agreement (secretariat functions), as well as Article 7 of the Convention (the COP); Article 13 of the Kyoto Protocol (the CMP); and Article 16 of the Paris Agreement (the CMA). Additional mandates are set out in decisions and conclusions of the governing and subsidiary bodies of the Convention, the Kyoto Protocol and the Paris Agreement.

43. In the biennium 2024–2025 the division will continue to provide its core services of arranging meetings, facilitating participation in meetings and managing the documentation process. This includes:

(a) Making organizational arrangements for in-person intersessional and in-session meetings and mandated events with a robust virtual component;

(b) Facilitating the participation of a growing number of participants representing a broad stakeholder base at sessions of the governing bodies, including in relation to registration, meeting services, accommodation, visas, financial support for eligible participants and virtual participation;

(c) Facilitating the participation of world leaders in the sessions of the governing bodies;

(d) Supporting work on host country agreements and other instruments related to the hosting of conferences;

(e) Editing and processing an increasing volume of documents, including pre-session, in-session and MRV/transparency documents, and continuing to pursue options to improve access to in-session documents;

(f) Continuing, in close collaboration with host countries, to implement measures to reduce the carbon footprint and enhance the accessibility of UNFCCC sessions, including through sustainable event management and carbon neutrality certification according to internationally recognized standards.

44. Moreover, the division will continue to take innovative steps to provide an optimal environment and services for on-site and remote participants at UNFCCC conferences and events, in particular by:

(a) Continuing to guide the development of digital tools and systems for climate change events under the supervision of the Senior Director of the Operations department and in collaboration with other divisions and external partners with a view to further improving participants' experience;

(b) Leveraging data to digitalize existing and introduce new services.

45. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Conference Affairs division for the biennium 2024–2025 are presented in chapter III below.

4. Administrative Services, Human Resources, and Information and Communication Technology division

46. The AS/HR/ICT division will deliver a wide range of operational services that will support the intergovernmental process, related institutions, bodies and mechanisms, including conferences and meetings, the regulatory systems under the Kyoto Protocol, and the daily operations of the secretariat. The division collaborates with the administrative teams in Programmes Coordination, Operations Coordination and the Executive division to support all divisions with their administrative and human resources needs.

47. The division's core mandates related to administrative and human resources services are derived from Article 8, paragraph 2, of the Convention; Article 14, paragraph 2, of the Kyoto Protocol; Article 17 of the Paris Agreement; decision 15/CP.1 (UNFCCC financial procedures and related Financial Regulations and Rules of the United Nations); decision 16/CP.1 (Bonn as the seat of the secretariat, including pertinent offer of the Government of Germany); and decision 12/CP.15 (reducing and offsetting GHG emissions). The division's core mandates related to ICT services are contained in Article 12 of the Convention (communication of information on implementation); Articles 5, 7 and 8 of the Kyoto Protocol (reporting and review requirements); and Articles 6, 12 and 17 of the Kyoto Protocol (project-based mechanisms and emissions trading). Additional mandates for operational services are set out in decisions and conclusions of the governing and subsidiary bodies of the Convention, the Kyoto Protocol and the Paris Agreement.

48. In the biennium 2024–2025, the AS/HR/ICT division will deliver:

(a) Administrative services, which include coordinating the preparation of the secretariat budget for the biennium 2026–2027, effectively managing and administering UNFCCC financial resources and coordinating procurement activities, ensuring compliance with applicable regulations, rules, decisions, policies and contracts and meeting reporting requirements; providing efficient travel and travel-related services to UNFCCC meeting participants and staff; and ensuring the provision of an appropriate, safe, disability-inclusive and environmentally sustainable physical working environment;

(b) Human resources services, including optimized talent resourcing and management; workforce planning that utilizes data analytics for decision-making; enhanced people management and spearheading leadership culture change; staff learning and development, coaching and mentorship; a robust performance appraisal system; and appropriate processing of staff entitlements and benefits, in addition to embracing organization-wide initiatives by the United Nations on the future of work (hybrid working modalities) and well-being (mental health and prevention of sexual harassment);

(c) ICT services, which include providing a secure, reliable, sustainable and coherent ICT infrastructure; operating and maintaining existing institutional platforms and mandated systems that support the intergovernmental process, with a focus on increasing and

improving user-facing services; leveraging cloud-based infrastructure to increase the security, efficiency and effectiveness of ICT services that are integral to secretariat operations; and introducing innovative ICT solutions that could improve the productivity of secretariat staff and external users.

49. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the AS/HR/ICT division for the biennium 2024–2025 are presented in chapter III below.

C. Cross-cutting divisions

1. Intergovernmental Support and Collective Progress division

50. The Intergovernmental Support and Collective Progress division will enable the governing and subsidiary bodies of the Convention, the Kyoto Protocol and the Paris Agreement to function and thus facilitate progress in the climate change process. The division will ensure the coherence, consistency and timeliness of the work of the bodies and enable and support overarching processes, such as the periodic review of the adequacy of the long-term global goal under the Convention, the global stocktake under the Paris Agreement and research and systematic observation.

51. The division's core mandates are derived from the Convention (Articles 7–10), the Kyoto Protocol (Articles 13–15) and the Paris Agreement (Articles 14, 16, 17, 18 and 19), as well as from the rules of procedures of the governing and subsidiary bodies.

52. In the biennium 2024–2025, the Intergovernmental Support and Collective Progress division will:

(a) Provide strategic, substantive and procedural support for two sessions of each of the governing bodies and four sessions of each of the subsidiary bodies, including to the presiding officers, namely the Presidencies of COP 28 and 29, the incoming Presidency of COP 30 and the Chairs of the subsidiary bodies of the relevant sessions;

(b) Provide procedural support for the work of the COP 28 and COP 29 Bureaux;

(c) Facilitate interaction between the presiding officers of the governing and subsidiary bodies and the 13 constituted bodies serviced by the secretariat² in order to ensure the coherence and complementarity of their respective functions and activities in support of the implementation of the Convention, the Kyoto Protocol and the Paris Agreement;

(d) Provide strategic guidance and advice on the protocol to be followed in the design and delivery of high-level events in conjunction with COP 29 and COP 30 and other relevant events;

(e) Provide enhanced support to Parties to facilitate their effective participation in the UNFCCC process by organizing a series of capacity-building, knowledge-sharing and awareness-raising events;

(f) Maintain channels of communication and relationships with Parties, observer States, diplomatic missions and United Nations organizations to facilitate their participation in meetings related to the intergovernmental process;

(g) Support any follow-up to the first global stocktake, including in relation to refining the procedural and logistical elements of the overall global stocktake process on the basis of experience gained from the first global stocktake, as appropriate;

(h) Plan and support negotiations and mandated events on research and systematic observation as well as the ocean and climate change dialogue;

(i) Cooperate with the IPCC, including through the joint SBSTA–IPCC working group;

² Adaptation Committee, CDM Executive Board, CGE, Compliance Committee under the Kyoto Protocol, FWG, KCI, LEG, PAICC, PCCB, SCF, Supervisory Body for the mechanism established by Article 6, paragraph 4, of the Paris Agreement, TEC and WIM Executive Committee.

(j) Plan and support negotiations on the consideration of the continuation of periodic reviews at COP 29 pursuant to decision 21/CP.27, paragraph 22.

53. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Intergovernmental Support and Collective Progress division for the biennium 2024–2025 are presented in chapter III below.

2. Communications and Engagement division

54. The Communications and Engagement division ensures that the global response to climate change is informed by cohesive messaging based on the outcomes of the intergovernmental process. The division works to improve coherence among the climate actions of a wide variety of actors and the alignment of those actions with the goals and objectives of the Convention, the Kyoto Protocol and the Paris Agreement.

55. The Communications and Engagement division has multiple cross-cutting objectives and communicates authoritative, relevant and timely information to Parties, non-Party stakeholders and the public regarding the UNFCCC process and action on climate change, with an emphasis on proactively building support among all stakeholders with a view to facilitating engagement in and recognition of climate action and increasing ambition. The division has three areas of focus:

(a) **Communications**, focusing on external and internal communications with the aim of ensuring that all Parties and non-Party stakeholders and the public are well informed and can easily access wide-ranging, relevant and timely information that enables them to support and engage with the UNFCCC process;

(b) **Engagement and Accountability**, focusing on enabling and supporting Parties and non-Party stakeholders to collaborate on driving more ambitious climate action; enhancing the transparency and credibility of action and the process by tracking climate action pledges and progress; and facilitating observer participation in intergovernmental negotiations and non-Party engagement in established processes, bodies and work programmes;

(c) **Empowerment**, focusing on facilitating the enhanced participation of all stakeholders in climate action and in the UNFCCC process, in particular through the ACE and gender work programmes and action plans.

56. The division delivers all communications and engagement support services for established processes and bodies supported by the Programmes divisions and supports the Executive division and presiding officers in collaboration with the Intergovernmental Support and Collective Progress division. Effective collaboration with the Operations department ensures that support and services are aligned for information, data and IT systems, and for full integration with the session management and delegate support services delivered by the Conference Affairs division.

57. The division's core mandates are derived from Article 8, paragraph 2, of the Convention and Article 14, paragraph 2, of the Kyoto Protocol (secretariat functions); Article 6 and Article 7, paragraph 6, of the Convention (education, training and public awareness); Article 12 of the Convention (communication of information on implementation); Article 10 of the Kyoto Protocol, Article 12 of the Paris Agreement and decision 17/CMA.1 (education, training and public awareness); decisions 1/CP.21 and 1/CP.25 (engagement); decisions 1/CP.27 and 1/CMA.4 (accountability); and decision 23/CP.18 (gender). Additional mandates are set out in decisions and conclusions of the governing and subsidiary bodies of the Convention, the Kyoto Protocol and the Paris Agreement.

58. In the biennium 2024–2025, the Communications and Engagement division will:

(a) Manage and communicate authoritative, relevant and timely information and data to Parties, non-Party stakeholders and the public regarding the UNFCCC processes, mechanisms and bodies and action on climate change, including through the UNFCCC website, mobile app and social media channels, as well as providing visibility to high-impact climate action identified through enhanced tracking and recognition efforts;

(b) Enhance external and internal communication of the goals and achievements of the intergovernmental process, including through the preparation of targeted speeches, speaking notes, press releases, written and video statements, interviews, talking points, awareness-raising events, and media engagement and campaigns that result in behavioural change, in addition to producing material and harvesting information that can be showcased via the UNFCCC digital channels, including social media, and in the media;

(c) Catalyse and track climate action by Parties and non-Party stakeholders in support of the implementation of the Convention, the Kyoto Protocol and the Paris Agreement, including through established work programmes on gender and ACE, and facilitate the participation of accredited observers to the UNFCCC.

59. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Communications and Engagement division for the biennium 2024–2025 are presented in chapter III below.

D. Executive division

60. The Executive division will provide strategic guidance for the work of the secretariat, ensuring the overall coherence and responsiveness of the organization's work in relation to the objectives of the Convention, the Kyoto Protocol and the Paris Agreement and its related mandates. The Executive Secretary will provide strategic leadership on efforts to ensure cohesive action on and accountability for global climate action. The Deputy Executive Secretary will support the Executive Secretary and ensure the effectiveness of secretariat operations and the organizational development of the secretariat.

61. In the biennium 2024–2025, the Executive division will provide strategic leadership and guidance to ensure that the secretariat continues to effectively function as the custodian of the political process to address climate change while becoming a catalyst for transformation for climate action, with a key emphasis on driving ambition and upholding accountability. The Executive Secretary will convene and engage a broad range of stakeholders, including Parties, stakeholders within the United Nations system, non-Party observers and members of civil society, to strengthen international cooperation on climate change. The Executive division will anchor the strength of the United Nations system with a view to furthering the system-wide strategic approaches taken to address climate change issues and achieve the Sustainable Development Goals.

62. The Executive division will lead organizational development and oversight activities, with a focus on enhancing the constructive work undertaken by the secretariat and strengthening organizational culture, in order to promote a results-driven working environment in accordance with United Nations rules and regulations. It will also ensure the proper functioning of governance mechanisms for the efficient use of secretariat resources and overall operational responsiveness to the needs of Parties. The Executive division will also provide administrative support for the management of its own human and financial resources and those of the two cross-cutting divisions.

63. The Executive division will provide strategic guidance and recommendations to COP Presidents and presiding officers with a view to advancing work under the UNFCCC process and facilitating the implementation of changes necessary for ensuring the sustainability and effectiveness of the process in the future. The Executive division will lead the secretariat's efforts to engage with governments and other stakeholders to strengthen their capacities to competently participate in the global climate dialogue.

64. The objectives, expected results, outputs and performance indicators, as well as resource requirements and information on staffing, for the Executive division for the biennium 2024–2025 are presented in chapter III below.

III. Expected results, outputs and resource requirements by division

65. Table 1 presents the expected results, outputs, performance indicators and post requirements by objective for all appropriations in the proposed budget, except in relation to the IPCC, for which the only activity is to transfer a grant to the IPCC. Expected results and performance indicators are presented for all work, irrespective of funding source. Outputs and related post requirements are specified clearly by funding source of the underlying activity.

Table 1
2024–2025 objectives, results, outputs, performance indicators and post requirements

Division, overarching objective, specific objective	Expected result, performance indicator, baseline, target	Specific budget		Outputs, posts
		Proposed budget	ZNG scenario	
Executive				
Overarching objective: intergovernmental engagement. Specific objective: facilitate intergovernmental engagement on responding to the threat of climate change by ensuring effective organizational, process, technical and substantive support to ongoing intergovernmental oversight of established processes and negotiation of new, revised or enhanced processes, as appropriate	Expected result: the operation of the intergovernmental process is facilitated. Performance indicator: percentage of intergovernmental process planning meetings and mandated activities delivered by the secretariat in accordance with the established intergovernmental meeting timelines and processes. Baseline: NA. Target: as necessary	Core	Core	Outputs: a total of 4 sessional periods are coherently and efficiently organized. Posts: 1.8
		Core	Core	Outputs: secretariat planning and preparation of sessional periods overseen. Posts: 0.4
		Core	Supplementary	Outputs: support provided for 50 external events and meetings in preparation of sessions through high-level participation. Posts: 2.1
		Programme support costs	Programme support costs	Outputs: support provided for 30 external events and meetings in preparation of sessions through high-level participation. Posts: 3.4
	Expected result: the secretariat is guided to effectively support presiding officers to perform their mandated functions. Performance indicator: proportion of coordination	Core	Core	Outputs: support provided for 80 external events and meetings in preparation of sessions through high-level participation. Posts: 1
		Core	Core	Outputs: necessary coordination meetings with Presidency and presiding officers. Posts: 1.6
