Programme performance data for 1 January to 31 December 2024

This document contains performance data for all objectives presented in the updated work programme of the secretariat for the biennium 2024–2025. It also provides details of the outputs delivered by the secretariat, budget implementation and posts. Post numbers are counted in full-time equivalent as some posts are not fully budgeted or filled. The total number of staff members is higher than the total number of posts as some posts are budgeted at 50 per cent only or filled with staff working part-time. Table 1 contains objectives, planned and delivered outputs, and performance indicators and data by secretariat division or unit. Table 2 contains data on resource requirements and expenditure for all divisions.

^a Lack of resources affected the timely delivery of several reports and products, specifically the technical paper on transformational adaptation, and a summary of a workshop which included a database of adaptation indicators.

^b Lack of resources affected the full and effective implementation of some mandates under the NWP in a systematic and coherent manner, resulting in, for example, a delay in work on thematic areas, the Lima Adaptation Knowledge Initiative and the UN Climate Change and Universities Partnership Programme.

^c Work on recommendations on how to improve reporting on adaptation (see decision [2/CMA.5](#), para. 45) had to be postponed to 2025 owing to an additional mandate from SB 60 to identify information on indicators reported by Parties in their national reports and communications. This had to be prepared within a short deadline to feed into the first expert meeting under the United Arab Emirates work programme on indicators and existing resources had to be redeployed.

^d Only a limited number of news articles and social media posts were produced owing insufficient resources.

^j There are plans in place to improve this.

^k Owing to lack of funds, support for national gender and climate change focal points to meaningfully participate in relevant UNFCCC meetings was significantly constrained.
