Local Communities and Indigenous Peoples Platform

Draft conclusions proposed by the Chair

Recommendation of the Subsidiary Body for Scientific and Technological Advice

The Subsidiary Body for Scientific and Technological Advice, at its sixtieth session, recommended the following draft decision for consideration and adoption by the Conference of the Parties at its twenty-ninth session (November 2024):

Draft decision -/CP.29

Local Communities and Indigenous Peoples Platform

The Conference of the Parties,

Recalling decisions 1/CP.21, 2/CP.23, 2/CP.24 and 16/CP.26,

Also recalling the Paris Agreement and the United Nations Declaration on the Rights of Indigenous Peoples,

Acknowledging the role and contributions of Indigenous Peoples and of local communities in nature stewardship and climate leadership, as well as the disproportionate effects of climate change on Indigenous Peoples and on local communities,

Also acknowledging that climate change is a common concern of humankind and that Parties should, when taking action to address climate change, respect, promote and consider their respective obligations on human rights, the right to a clean, healthy and sustainable environment, the right to health, the rights of Indigenous Peoples, local communities, migrants, children, persons with disabilities and people in vulnerable situations, and the right to development, as well as gender equality, empowerment of women and intergenerational equity,

Noting the importance of ensuring the integrity of all ecosystems, including oceans, and the protection of biodiversity, recognized by some cultures as Mother Earth, and *also noting* the importance for some of the concept of ‘climate justice’, when taking action to address climate change,

Recognizing that the knowledge systems of Indigenous Peoples are diverse and an integral part of their identities, values, spiritualities and worldviews, and that local knowledge and value systems are also diverse and dependent on the contexts of local communities,

Recalling decision 1/CMA.5, whereby, inter alia, it was reaffirmed that sustainable and just solutions to the climate crisis must be founded on meaningful and effective social dialogue and participation of all stakeholders, including Indigenous Peoples, and local communities, and noted that the global transition to low emissions and climate-resilient development provides opportunities and challenges for sustainable development and poverty eradication, and the implementation of integrated, multi-sectoral solutions, building on the best available science as well as Indigenous Peoples' knowledge and local knowledge systems was encouraged, and the role of the Local Communities and Indigenous Peoples Platform in strengthening the capacity of Indigenous Peoples and of local communities to effectively engage in the intergovernmental process under the Paris Agreement was recognized,
