UNIVERS-SEL

- Producers from the salt marshes of Guérande
- ... meeting other producers

« Exchanges of know-how
between producers »

Two technologies for two age-old local productions

- **Salt** production : solar evaporation
- **Rice** production : water management improvement & facilitation

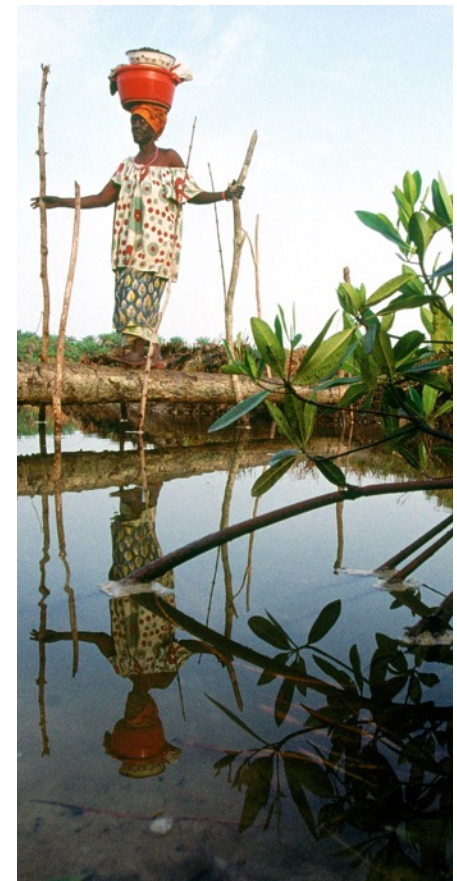

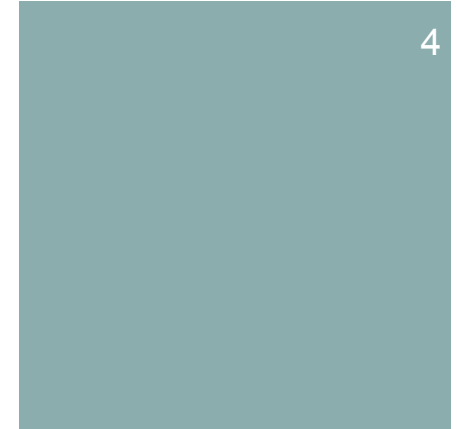

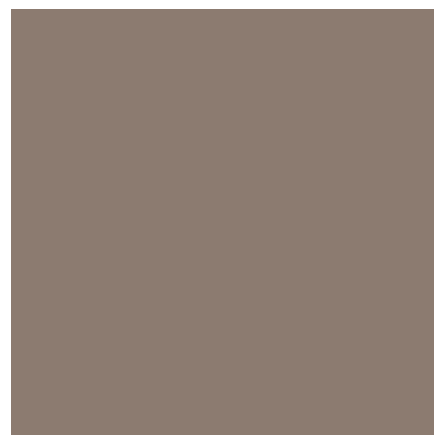

Climate change adaptation & mitigation

Mitigation

- Greenhouse gases reduction
- Carbon sinks maintenance

Adaptation

- Mangrove, biodiversity preservation
- Water management improvement

Spreading & Upscaling

- Communities empowerment and involvement
- Technologies dissemination and upscaling
- Community-based technologies matching needs, local practices and social-ecological systems

Thank you !
