

A photograph of a sunset over the ocean. The sky is filled with large, dark clouds, and the sun is low on the horizon, creating a warm, golden glow. The water is calm, reflecting the light from the sky. In the foreground, several people are silhouetted against the water, appearing to be swimming or wading. In the distance, a large ship is visible on the horizon. The overall mood is serene and peaceful.

# Innovations in learning to accelerate uptake and diffusion of climate adaptation technologies

---

Christina Chan, Director, Climate Resilience Practice, WRI  
October 27, 2020

# IMPORTANCE OF LEARNING

---

- Adaptation is a process, learning is fundamental to understanding what works, what doesn't and why
- Learning is integral to M&E, not an add-on
- Learning requires time and resources
- Learning goals need to shift and become less top-down

# APPROACHES & PRACTICES

---

- Establishing distinct processes and budgets for accountability and learning, since there is often a tension between these objectives
- Prioritizing self-directed learning to promote sustained local ownership  
Learning through games to facilitate understanding of complex systems and enhance learning and dialogue
- Promoting peer-to-peer learning
- Using knowledge exchange platforms as vehicles for long-term, cross-scale vertical & horizontal learning
