

NDC PARTNERSHIP AND ITS EXPERIENCE CREATING ENABLING ENVIRONMENTS FOR NDC IMPLEMENTATION

Dr. Romeo Bertolini
Deputy Director NDC Partnership Support Unit

March 2022

WHO WE ARE

NDC PARTNERSHIP

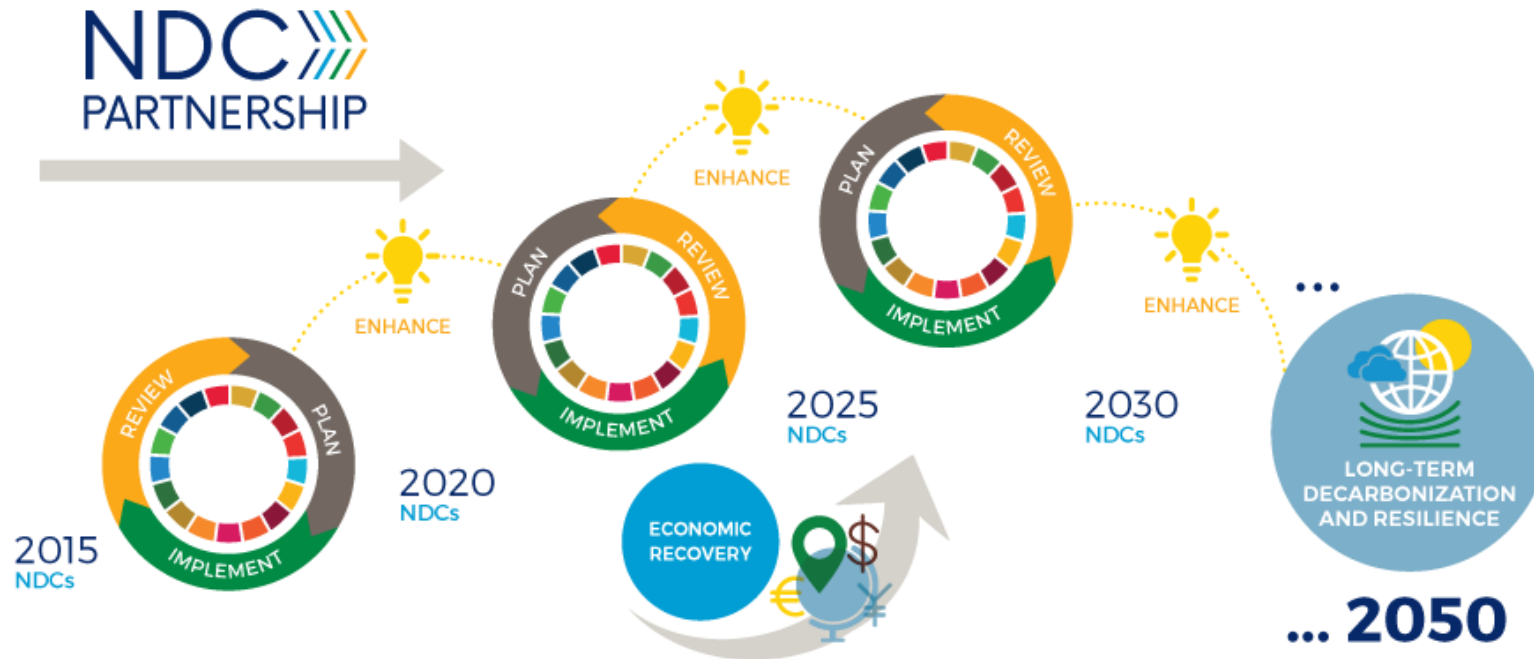

119 MEMBER COUNTRIES

48 INSTITUTIONAL MEMBERS

36 ASSOCIATE MEMBERS

WHO WE ARE

ACTING TOGETHER TO MEET THE PARIS AGREEMENT, ONE NDC CYCLE AT A TIME

Through the Partnership, members mobilize and access resources to gradually transition to well-established, **sustainable NDC processes** that **drive long-term**, low carbon and resilient planning and investments.

HOW WE WORK

- In-country Engagement
- Knowledge and Information Sharing
- Facilitating Access to Finance

CREATING ENABLING ENVIRONMENTS FOR CLIMATE PROJECT IMPLEMENTATION

The Partnerships Initiatives

Central Bank Initiative: focused on on-the-ground embedded support for building and sustaining a green financial system. Was officially launched by the Partnership at COP 26.

- Ensure central banks have the necessary capacity, institutional structure, systems, and processes to adopt a precautionary approach to climate risks.
- Establish operational relationships between central banks and ministries of environment and finance/planning
- Provide Technical Assistance to Central Banks e.g., Design of net zero financial sector transition plan in alignment with NDCs and LTSs in partnership with the CoFM.
- **Progress:** Eastern Caribbean Central bank requested TA to green the finance sector in the Eastern Caribbean Currency Union. EIB with financial contribution from BMU announced a USD20 million trust fund to support requests of the EIB and its commitment to the green agenda.

CREATING ENABLING ENVIRONMENTS FOR CLIMATE PROJECT IMPLEMENTATION

Examples from the Partnerships Requests in Anglophone Africa

Rwanda: NDC Partnership through its members WB, UNDP, GIZ & UN Habitat are jointly supporting Rwanda to create an enabling environment for greater green investments aligned with the national climate plan targeting Private Sector engagement. This includes -

- Developing new financial instruments to fast track and implement blended finance and prepare investment ready flagship projects.
- Green Investment Facility, Green Guarantee Facility, Community Adaptation Fund (CAF), and Agriculture Insurance are some of the innovative instruments being explored with support from WB.

Liberia: Through the Partnership's Economic Advisory Initiative Liberia has -

- Identified over 50 targeted climate actions and investments to integrate into the Economic Recovery Plan (ERP) across a wide range of economic sectors.
- Established an environmental unit within the Ministry of Finance and Development Planning to mainstream climate action & development.

CREATING ENABLING ENVIRONMENTS FOR CLIMATE PROJECT IMPLEMENTATION

Example from the Partnerships Requests in the LAC region

Jamaica: NDC Partnership through its members UNEP and CTCN supported a request for ***“Identification of a Climate Change Research Agenda to Include Collaboration with Academia”***.

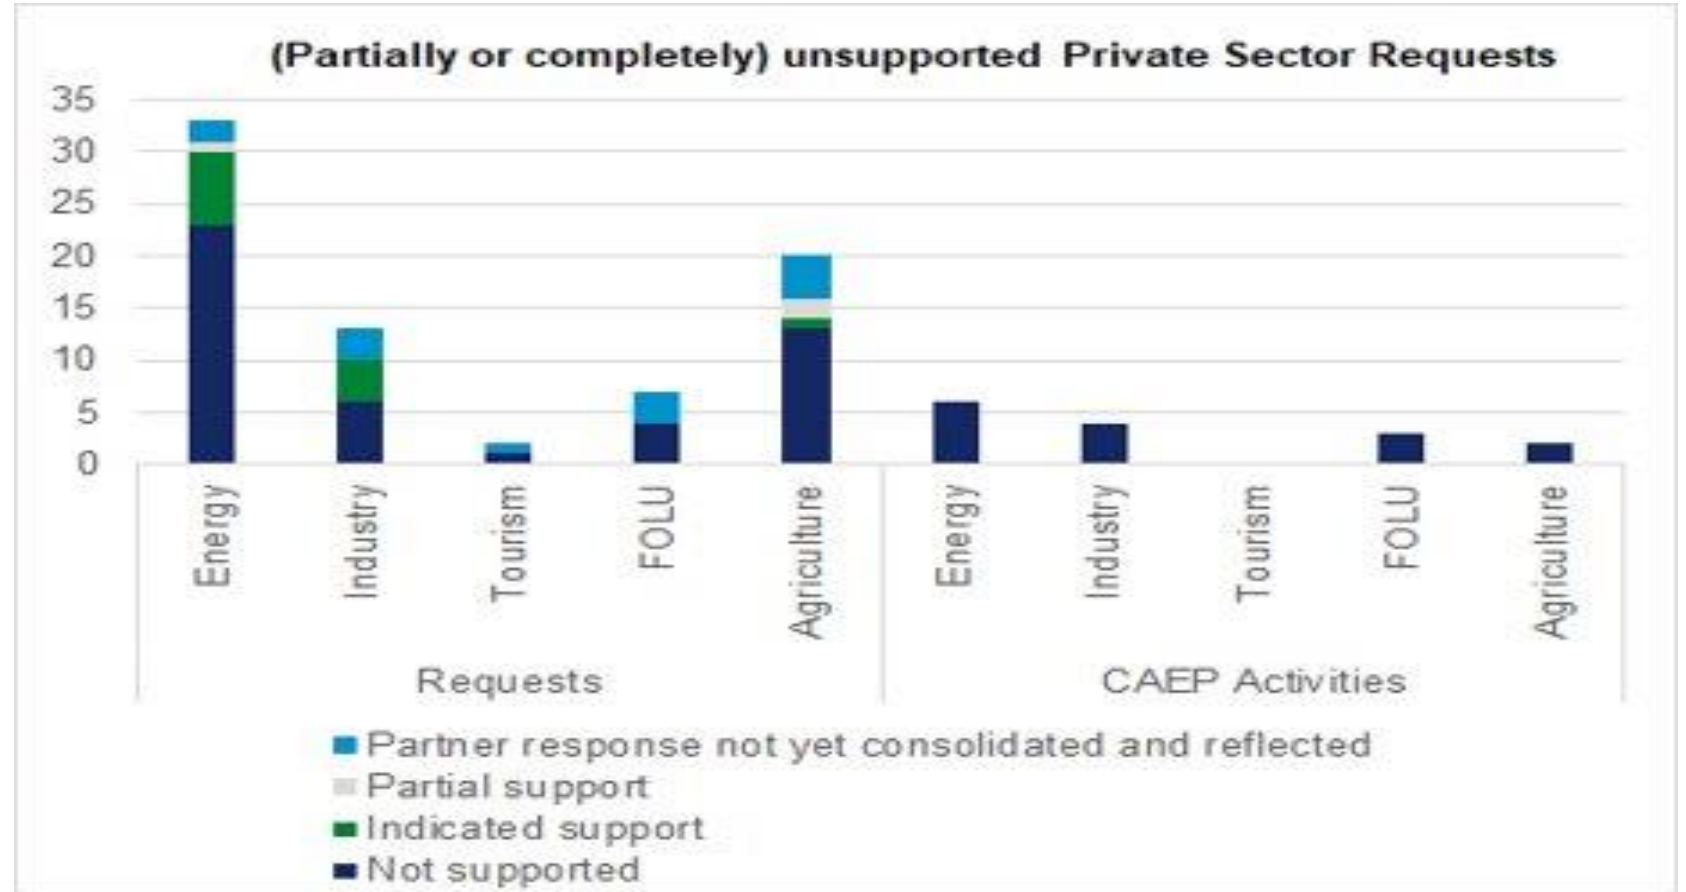

- This included two pilot projects - one with academia and the second with the private sector which included high climate change benefit potential
- Resulted in Research and Technological Development activities which have been prioritized into 5 sectors in Jamaica i.e., Agriculture, Energy, Human Infrastructure & Settlements, Waste, and Water.

CREATING ENABLING ENVIRONMENTS FOR CLIMATE PROJECT IMPLEMENTATION

Overview of Partnerships Requests to enable Private Sector Engagement

Most private sector requests come from Energy, Industry, Agriculture and FOLU sectors;

Stakeholder engagement, and capacity building are the most requested activities.

CREATING ENABLING ENVIRONMENTS FOR CLIMATE PROJECT IMPLEMENTATION

Examples of Partnerships Requests to enable Private Sector Engagement

Countries are interested in **improving the regulatory environment** that enable the private sector engagement in climate activities, e.g.:

- **Zimbabwe** is interested in involving Private Sector in NDC implementation for social and economic benefits by sharing knowledge, improving capacity of officials, and developing GHG inventory tools.
- **São Tomé and Príncipe** is interested in including Private Sector in project development in the Forestry and Landscape Restoration (RFP) work by providing funding and establishing platforms for guiding the RFP work.
- **Namibia** is developing best practice guides, business models, and emission reporting system for the Private Sector. It is also inviting investment by the Private Sector and encouraging work on climate change in agriculture by establishing linkage between smallholder farmer groups and Private Sector.
