Report of Breakout Group 3

What could be the recommendations by the TEC to policy makers to enhance replication and upscale potential of SSC and TrC?

- Information sharing and knowledge management on adaptation technologies to be taken up by governments at wide scope in collaboration with relevant stakeholders

- Entry point for private sector are usually umbrella bodies or associations; each private sector organization should work closely with custodian of policy in their core business to utilize opportunities that come with technologies for adaptation

- Governments should play their roles in providing right EEs to attract private sector investment & catalyze innovation (make business case)

- National institutions should be linked to the private sector to enable it to supplement their work in addressing SDGs & NAP implementation

- Encourage governments to make use of universities, regional centres, CTCN and NDEs, and other international organizations to identify, implement and upscale SSC & TrC
