

Collaboration with other relevant organizations outside of the Convention

5 September 2013

At its 7th meeting, the Technology Executive Committee (TEC) of the UNFCCC further considered areas of work or topics and modalities to collaborate with other relevant organizations outside of the Convention of the UNFCCC. To assist the TEC in its work on this matter, the TEC hereby invited observers, either in-person at TEC 7 or via social media:

- To propose possible areas of work or topics and modalities to collaborate with other relevant organizations outside the Convention, and
- To participate in discussions on this matter at TEC 7.

At TEC 7, a session on this matter took place on Thursday 5 September 14:00-15:45 in Bonn. Observers not physically present in the room were invited to participate virtually with the help of the live webcast and Twitter. Viewers could participate via Twitter by following the hashtag #climatetech to keep track of the discussion. To ask the committee a question or leave a comment, viewers were able to use the same hashtag in their Twitter posts and also send their questions or comments to [@UN_climatetalks](#). The entire event was [webcast](#).

More information about the 7th meeting of the TEC, including the provisional annotated agenda, is available [here](#).
