

Smart finance. People first.

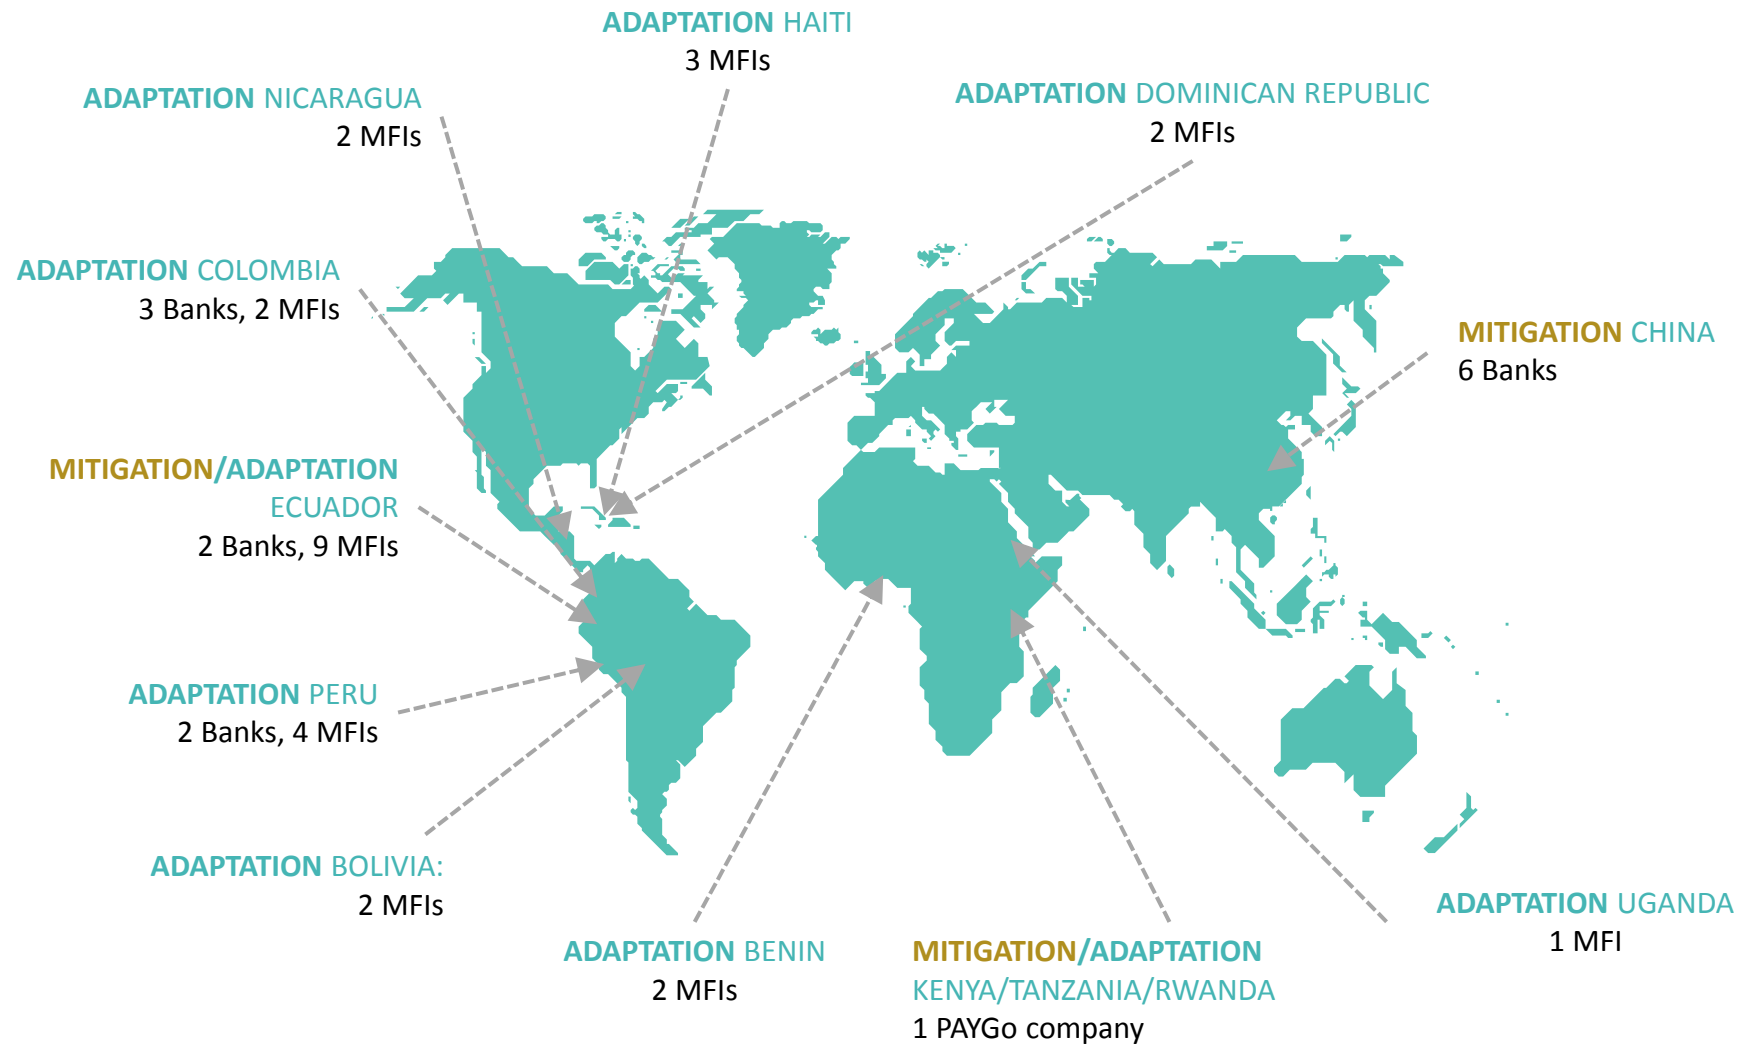

Incubators & Accelerators
**ADAPTATION
FINANCE**

03.2018 | UNFCCC TEC

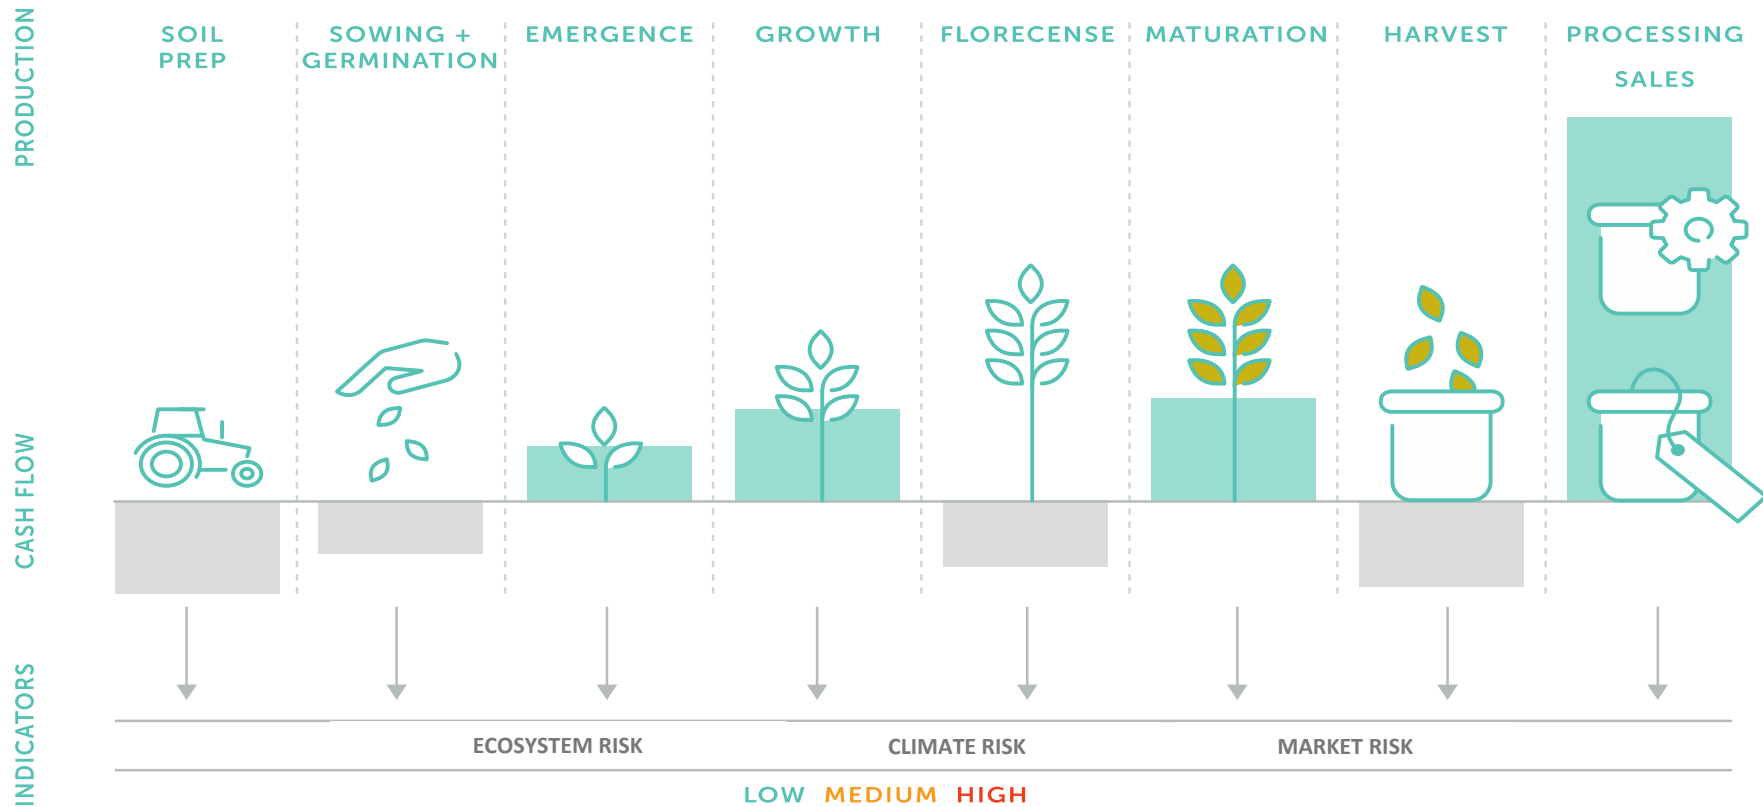

CLIMATE FINANCE EXAMPLES

Key focus here on MSMEs and smallholder farmers, as most vulnerable yet important economic actors in most developing countries; increasing interest from private financial sector

COMPLEX REALITY

For adaptation, interrelations are complex, especially in agriculture (example); concrete and tangible solutions to pressing topics of most vulnerable populations are key

SOLUTIONS

ENERGY INCLUSION SUSTAINABLE PRACTICES ADAPTATION PRACTICES INPUTS

Technology, capacity and financing targeting socio-economic and climate resilience, example: solar-powered drip irrigation system applied with integrated nutrient and pest management & resilient seeds

INCUBATOR & ACCELERATOR POTENTIAL

CHALLENGES & OPPORTUNITIES

To build up effective climate incubators/accelerators, identifying perspectives of different stakeholders is crucial, communication to be adjusted accordingly
