2018 Latin American & Caribbean Climate Week Workshop on South-South and Technological Cooperation for Climate Action and Sustainable Development  
Montevideo, 20 August

TEC

## Key research gaps

---

1. Decarbonization processes: Commuters estimation, transportation emission estimation (vehicules kilometers travel -VKT), carbon absorption by urban forest
2. Climate-related health issues: mortality and morbidity by heat waves, cardio-respiratory disease, dengue
3. Urban forest and urban heat island
4. Soil permeability in relation to the reduction of runoff in heavy rain events and floods
5. Rising water table

## Governance

1. Forum to fight climate change (Law 5613)
  - Citizen participation
  - Executive and legislative power
2. Interministerial Climate Change Cabinet (Law 3871)
3. Board on Climate Change (Law 3871)
  - NGOs
  - Academy
4. National level
  - Environmental Federal Council (COFEMA)
  - GEIs Inventory and reduction emission projects
  - Climate Change Commission
5. City global interface
  - C40
  - ICLEI
6. CDP's disclosure platform (cities, banks, investors and private sector)

## Buenos Aires City commit to became emisión neutral by 2050

Several cities have pledged to develop and begin implementing more ambitious climate action plans before the end of 2020 to deliver emissions neutral and climate resilient cities by 2050

Thank you!
