

# Technology Mechanism

## Enhancing climate technology development and transfer

The UNFCCC's Technology Mechanism supports developing countries to develop and transfer climate technologies so that they can effectively reduce greenhouse gas emissions and adapt to the adverse effects of the changing climate. The Technology Mechanism's two bodies, the Technology Executive Committee (TEC) and the Climate Technology Centre and Network (CTCN), work together to address both policy and implementation aspects of climate technology development and transfer.

**This side event will present the achievements of the TEC and CTCN in 2015 in supporting countries to undertake climate technology action and contribute to their sustainable development efforts.**

### Programme

- 13.15 – 13.20 *Opening remarks*
- 13.20 – 13.35 *Technology Executive Committee: Achievements and emerging policy options in 2015*  
Mr. Kunihiko Shimada, TEC Chair
- 13.35 – 14.00 *Climate Technology Centre and Network:  
Strategically guiding the CTCN to meet developing country needs*  
Mr. Matthew Kennedy (PhD), CTCN Advisory Board Chair  
*Matching developing country needs with technology solutions*  
Mr. Jukka Uosukainen, CTCN Director
- 14.00 – 14.10 *Potential role of the Technology Mechanism in implementing the Paris Agreement*  
Mr. Kunihiko Shimada, TEC Chair  
Mr. Matthew Kennedy (PhD), CTCN Advisory Board Chair
- 14.10 – 14.40 *Question and answers*
- 14.40 – 14.45 *Thanks and closure*
