

## *Agenda item 4 (c) i. Water-energy-food systems*

### *Progress of the work*

Technology Executive Committee, 29<sup>th</sup> meeting and TEC-CTCN AB Joint session  
17-19 and 20 September 2024, Bonn, Germany

### Background

- At the last TEC meeting, the TEC considered the updated annotated outline of the knowledge product presented by FAO. The TEC requested the activity group to revise it, to develop the final knowledge product including key messages and recommendations, and to prepare a concept note for the COP 29 event.
- The activity group met three times to consider the guidance provided at TEC 28 and to develop the revised draft knowledge product in collaboration with FAO.
- Two iterations of the knowledge product were shared, and various comments and inputs were provided by the activity group members.
- The activity group, in collaboration with FAO, prepared the concept note for the event at COP 29.

### Expected outcomes and next steps on this matter

- TEC considers the draft knowledge product with a view to finalizing it and gives guidance to publish it leading up to COP 29.
- Drawing upon the knowledge product, TEC considers key messages and recommendations on this topic which will be discussed tomorrow.
- TEC considers the concept note for the event at COP 29 and gives guidance to take it forward.

*Thank you!*
